Investing in rural people

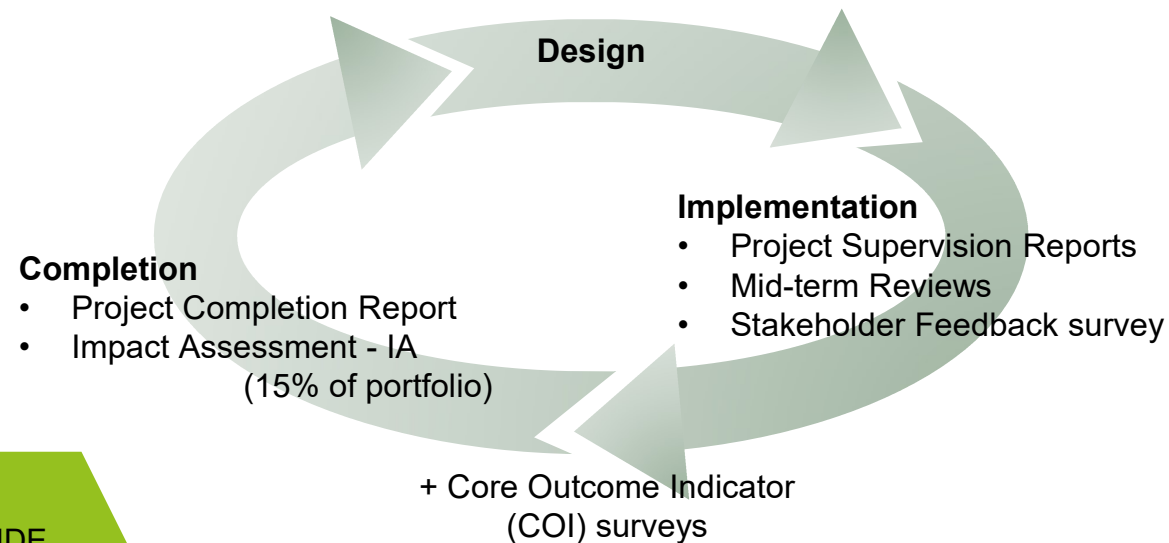

Self-Evaluation systems and products

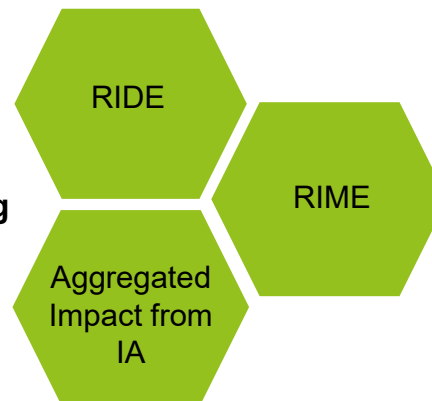

COSOP Cycle

Project cycle

Corporate Reporting

Measuring and reporting on results

Results reporting at COSOP level

- Reviews results logic of country strategies at design
- Reviews and consolidates data from COSOP MTRs and CCRs

Results reporting at project level

- Reviews results logic of projects at design
- Provides guidance on supervision reports
- Undertakes portfolio analysis and stocktakes
- Reviews Project Completion Reports
- Aggregates results data (scores, outreach, output and outcomes)

Corporate representation and reporting

- Coordinates Management's response on evaluations and serves as management counterpoint to IOE
- Develops the RMF for reporting to EB members and stakeholders
- Leads reporting of aggregated results through RIDE & MTR; PRISMA
- Manages results systems

Measuring and reporting on impact

IA – project level

- Conduct impact assessments on 15% of the portfolio in each cycle
- Estimate impacts on:
 - ✓ IFAD's goal and SOs
 - ✓ Gender, nutrition, CC (when applicable)
 - ✓ Other key indicators linked to project's logic
 - ✓ Mechanisms to impacts
- IA plans, reports, IA briefs, IA infographic
- Data collection increasingly harmonized with project endlines
- Capacity development during design & analysis for improved M&E

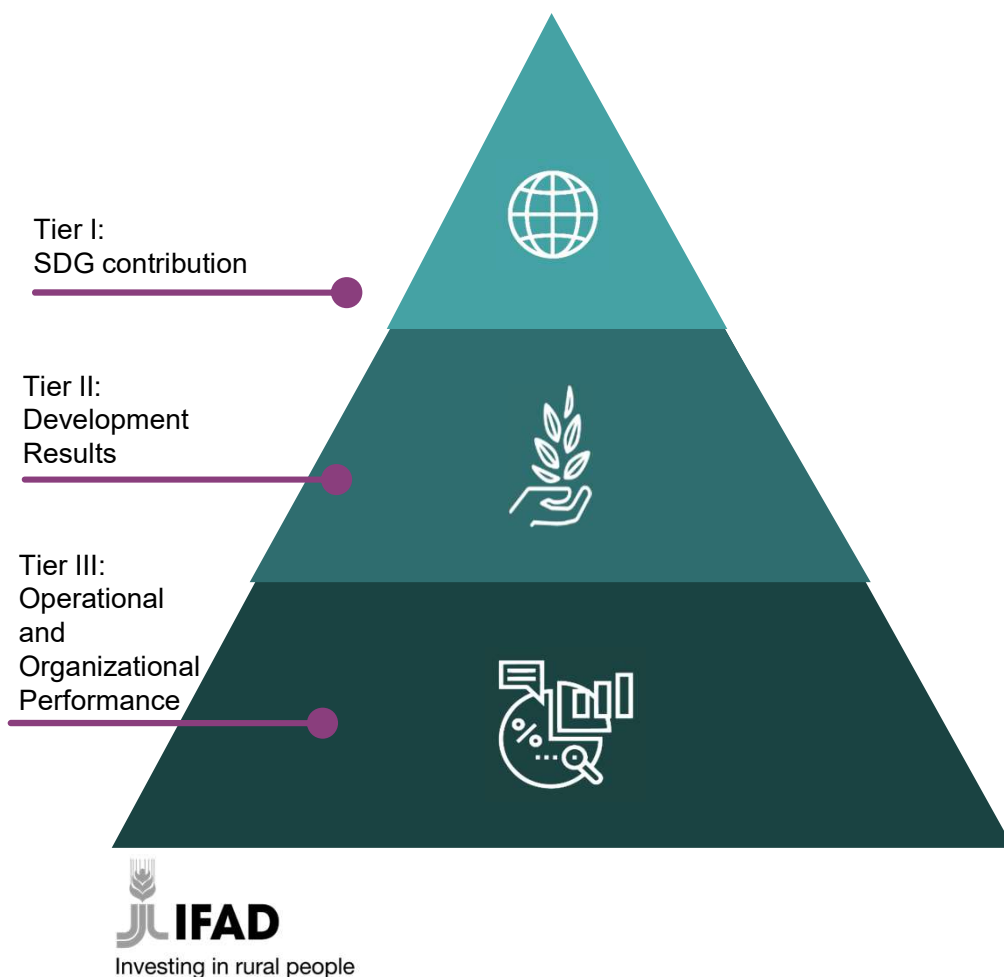

Aggregation & projection

- IFAD's goals and SOs estimates are aggregated across the sample using meta-analysis
- Results are projected to the total portfolio of IFAD
- Robustness checks & due diligence
- IFAD impact assessment overview

Evidence generation and use

- Achievements against Tier II development indicators reported to the board for each IFAD replenishment cycle
- Total impacts are used to set targets for new IFAD replenishment cycles
- Project specific impact estimates are fed into projects' PCRs
- Lessons learned from project specific IAs are used to feed into similar new project designed

Corporate Reporting

RIDE

Report on IFAD's
Development
Effectiveness

Draws on evidence to assess performance at both the organizational and the operational level. Strong focus on recent performance.

RIME

Report on IFAD's
Mainstreaming
Effectiveness

Presents performance in the areas of environment and climate, gender, nutrition, youth, Indigenous Peoples and persons with disabilities.

IFAD Impact Assessment Report

Project Level,
Aggregated &
projected Impacts at
portfolio level

Estimate impacts on at least 15% IFAD portfolio on IFAD goals and SOs, aggregate and project to the whole portfolio.

Lessons learned from IA on attributable impacts on SOs and key indicators are fed into project design and target setting

Highlights from RIDE 2024

9 INDUSTRY, INNOVATION
AND INFRASTRUCTURE

**8130 km roads
constructed**

4 QUALITY
EDUCATION

**3.7 million people
trained in income-
generating
activities**

1 NO
POVERTY

**95.6 million people
receiving project
services**

**50,860 people with
increased secure
land access**

8 DECENT WORK AND
ECONOMIC GROWTH

**723,900 rural
enterprises accessing
business development
services**

**194,710 jobs
created**

2 ZERO
HUNGER

**57% women with minimum
dietary diversity**

3.3 million households supported on nutrition

10.8 million people accessing financial services

**2.2 million ha. land brought under climate-
resilient management**

13,040 groups supported

**1.8 million rural producers were members
of rural producers' organizations**

**425,780 ha. of farmland under water-related
infrastructure**

**2.4 million people trained in production
practices**

13 CLIMATE
ACTION

**952,810 households adopting
environmentally sustainable and climate-
resilient technologies and practices**

**27.3 million tons of carbon dioxide equivalent
sequestered/GHG emissions reduced**
