## Mapa de la zona del proyecto

Las designaciones empleadas y la forma en que aparecen presentados los datos en este mapa no suponen opinión alguna del FIDA respecto de la demarcación de las fronteras o los límites, ni de las autoridades competentes.

Mapa elaborado por el FIDA | 14-07-2022

## Resumen de la financiación

<b>Institución iniciadora:</b>	Fondo Internacional de Desarrollo Agrícola
<b>Prestatario/receptor:</b>	Reino de Lesotho, representado por el Ministerio de Finanzas y Planificación del Desarrollo
<b>Organismo de ejecución:</b>	Ministerio de Agricultura, Seguridad Alimentaria y Nutrición
<b>Costo total del proyecto:</b>	USD 72,644 millones
<b>Monto del préstamo 1 del FIDA (Sistema de Asignación de Recursos basado en los Resultados):</b>	USD 15,2 millones
<b>Condiciones del préstamo 1 del FIDA:</b>	Combinadas
<b>Monto del préstamo 2 del FIDA (Mecanismo de Acceso a Recursos Ajenos):</b>	USD 5 millones
<b>Condiciones del préstamo 2 del FIDA:</b>	Ordinarias: Plazo de vencimiento máximo de 35 años, incluido un período de gracia máximo de 10 años, sujeto a un plazo medio máximo de reembolso de 20 años
<b>Cofinanciadores:</b>	Fondo de la Organización de Países Exportadores de Petróleo (OPEP) para el Desarrollo Internacional Fondo para el Medio Ambiente Mundial (FMAM)
<b>Monto de la cofinanciación:</b>	Fondo de la OPEP para el Desarrollo Internacional: USD 20 millones FMAM: USD 5,2 millones
<b>Condiciones de la cofinanciación:</b>	Préstamo del Fondo de la OPEP para el Desarrollo Internacional Donación del FMAM
<b>Contribución del prestatario/receptor:</b>	USD 8,061 millones
<b>Contribución de los beneficiarios:</b>	USD 7,381 millones
<b>Déficit de financiación:</b>	USD 11,802 millones
<b>Monto de la financiación del FIDA para el clima:</b>	USD 4,130 millones
<b>Institución cooperante:</b>	Supervisado directamente por el FIDA

## I. Contexto

### A. Contexto nacional y justificación de la actuación del FIDA

#### Contexto nacional

1. El Reino de Lesotho, gobernado por un gobierno de coalición, ha vivido una década de relativa inestabilidad política, con una sucesión constante de partidos y coaliciones que, en ocasiones, ha provocado el colapso de los gobiernos. Esto ha repercutido en la dinámica de desarrollo del país. Los principales productos básicos que exporta Lesotho son el agua, los diamantes y los textiles. De estas exportaciones, sólo los textiles generan un empleo considerable.
2. El sector agrícola es una de las principales fuentes de medios de vida, ya que emplea a aproximadamente el 71 % de la población rural basotho<sup>1</sup>. La ganadería representa la mayor parte del producto interno bruto (PIB) agropecuario. La lana y el mohair son los dos productos agrícolas más importantes, y se estima que representan el 60 % de las exportaciones del sector. Desde la clasificación de Lesotho como país de ingreso mediano bajo, las condiciones de los préstamos para la financiación del desarrollo son más estrictas. Esto plantea un reto importante para el desarrollo del país y hace que el fomento del desarrollo orientado al sector privado y la mejora de la resiliencia de las cadenas de valor comerciales sean una prioridad fundamental.
3. La lana y el mohair son fibras naturales que se utilizan sobre todo en la industria de la confección y en el mercado de la moda de alta gama. La cría de ovejas de lana y cabras de mohair contribuye considerablemente a los medios de vida de unas 45 000 familias rurales basotho. La lana y el mohair son biodegradables, renovables y respetuosos con el medio ambiente, lo que los convierte en fibras “verdes” de nicho. Debido a que estos productos están influenciados por el consumo minorista, su viabilidad depende de las preferencias de los consumidores y de los requisitos del mercado final<sup>2</sup>.
4. El sector de la lana y el mohair de Lesotho se enfrenta a importantes limitaciones, como la desconfianza y la escasa coordinación entre las cadenas de valor; la falta de datos para la gestión, la elaboración de políticas y la planificación; el acceso limitado a la financiación, y la gestión deficiente de los activos públicos fundamentales (galpones de esquila, criaderos de ovejas y cabras de razas mejoradas). Además, la gran dependencia de Sudáfrica para la adquisición de insumos y el acceso a los servicios suponen un obstáculo para los productores, las asociaciones y los mayores agentes del sector privado. El predominio de la presentación de informes en papel limita la certificación de los productos.
5. Los resultados económicos del sector se ven obstaculizados aún más por la reciente escisión de la principal organización de productores<sup>3</sup>, por la modificación relativamente específica de las normas de comercialización y por el hecho de que, al margen de los proyectos de desarrollo, la mejora sistemática es limitada.

<sup>1</sup> Impacto de la crisis en Ucrania. Se prevé que el precio de los piensos aumente a corto y medio plazo. Es necesario capacitar a los productores en la utilización de los recursos locales para la alimentación animal (mediante una gestión adecuada de los pastos), lo que incluye la adición de valor a los cultivos y los subproductos industriales (paja de cereales y leguminosas, tallos de maíz, residuos desecados de cervecía, etc.). Los precios del combustible han aumentado en Lesotho, lo que ha incrementado los costos operacionales de los proyectos.

<sup>2</sup> Liako Mofo (2021): *Trade & Industrial Policy Strategies – Regional Wool Value Chain*.

<sup>3</sup> Las dos principales organizaciones de productores son la Asociación Nacional de Productores de Lana y Mohair de Lesotho y la Asociación de Productores de Lana y Mohair Skylight.

### **Aspectos específicos relativos a los temas transversales que el FIDA debe incorporar de forma prioritaria**

6. En consonancia con los compromisos transversales asumidos por el FIDA, el proyecto ha sido validado como proyecto que:
  - abarca la financiación para el clima;
  - tiene en cuenta a los jóvenes, y
  - tiene en cuenta la capacidad de adaptación.
7. **Cambio climático.** En Lesotho está aumentando la frecuencia de fenómenos meteorológicos extremos, como inundaciones y sequías, y se registra una importante erosión de la capa superficial del suelo y una reducción de su fertilidad. Estas tendencias afectan negativamente a la producción y productividad del ganado y a los medios de vida de los productores.
8. **Inclusión social.** Lesotho tiene un índice de desarrollo humano bajo (ocupa el puesto 165 de un total de 189 países)<sup>4</sup>. A pesar de los avances registrados por el país en la reducción de la pobreza en los últimos años, persisten elevados niveles de vulnerabilidad económica entre la población rural. Lesotho registra la segunda mayor tasa de prevalencia del VIH del mundo (23 %). Con una tasa de desempleo del 32 %, una parte importante de la población carece de acceso a ingresos estables y no puede movilizar capital de trabajo, activos productivos o financiación para invertir en medios de vida rurales.

### **Razones que justifican la intervención del FIDA**

9. Actualmente, el FIDA es el asociado para el desarrollo más importante y más antiguo del Gobierno y de la industria de la lana y el mohair en Lesotho. Es estratégico y recomendable basarse en el Proyecto de Fomento de la Lana y el Mohair y seguir trabajando con los aproximadamente 45 000 productores de lana y mohair para consolidar los resultados de ese proyecto y lograr un mayor impacto. El proyecto también se caracteriza por un enfoque favorable a la población pobre, ya que la producción de lana y mohair sigue concentrada en los distritos con altos niveles de pobreza.
10. El sector ofrece grandes oportunidades para mitigar los riesgos climáticos e incorporar aspectos climáticos y ambientales, como las buenas prácticas de gestión animal y del paisaje que promueven las normas de producción responsable, cada vez más solicitadas. El FIDA puede aprovechar los conocimientos y la experiencia mundiales con miras a incorporar la financiación para el clima y preparar el subsector para que pueda atraer más financiación de este tipo a fin de compensar las emisiones de carbono en el proceso de producción y realizar inversiones conexas.
11. De las consultas con el Gobierno se desprende que un medio eficaz para promover una cadena de valor de la lana y el mohair más inclusiva y autosuficiente en el país es crear un consorcio dirigido por las partes interesadas que facilite la gobernanza, la regulación y la prestación de servicios de la cadena de valor. Los conocimientos mundiales del FIDA serán útiles para ayudar a las partes interesadas en la cadena de valor de Lesotho a crear y poner en marcha sistemas de cadenas de valor a través del consorcio del fondo de la lana y el mohair y la empresa de la lana y el mohair.

---

<sup>4</sup> Esto corresponde a un valor del índice de desarrollo humano de 0,527, según el perfil de Lesotho para 2020.

## B. Enseñanzas extraídas

12. El diseño del Proyecto de Competitividad de la Cadena de Valor de la Lana y el Mohair se basa en una serie de enseñanzas extraídas de intervenciones anteriores, a saber:
- i) La sostenibilidad y la salida del proyecto se tienen en cuenta desde el principio, de ahí la creación del consorcio del fondo de la lana y el mohair y la empresa de la lana y el mohair.
  - ii) Se presta atención a la creación de un ecosistema digital viable, sostenible y orientado a las empresas.
  - iii) La gobernanza y la coordinación de la cadena de valor se consideran las principales limitaciones en el Proyecto de Fomento de la Lana y el Mohair y se abordan mediante un fortalecimiento institucional adecuado, junto con una labor reglamentaria y en el ámbito de las políticas.
  - iv) La continuación del programa de sacrificio e intercambio de ganado y la digitalización del plan de cría amplían la escala de los importantes logros alcanzados y fortalecen los sistemas de suministro de material genético fiable de Lesotho.
  - v) El enfoque basado en las alianzas productivas y el uso reducido de donaciones de contrapartida solo para tres ventanas se basan en la evaluación de la primera fase del Proyecto de Desarrollo Agrícola en Pequeña Escala y en la experiencia adquirida en la ejecución de la segunda fase de dicho proyecto.
  - vi) El enfoque por fases y los indicadores críticos relacionados con la gestión financiera y los resultados a nivel de los efectos directos se basan en proyectos respaldados por el FIDA, como el Proyecto de Regeneración de los Espacios Naturales y los Medios de Vida (Lesotho), el Proyecto de Promoción de Mecanismos de Incentivos para la Financiación Agrícola Basados en el Reparto de Riesgos (Togo) y el Proyecto de Gestión Integrada de las Cuencas Hidrográficas y el Riego en Kayonza (Rwanda).

## II. Descripción del proyecto

### A. Objetivos, zona geográfica de intervención y grupos objetivo

13. La meta general del proyecto es aumentar la resiliencia económica y climática de los medios de vida de los productores de lana y mohair. El objetivo de desarrollo es promover el crecimiento económico inclusivo y sostenible y la creación de empleo impulsada por el sector privado gracias a la producción de lana y mohair. El proyecto se dirigirá a unos 45 000 hogares (225 000 personas, aproximadamente) durante un período de siete años (2023-2030), de los cuales el 50 % serán mujeres y el 35 % jóvenes.
14. Aunque el proyecto abarcará todo el territorio nacional, hará especial hincapié en las zonas de las tierras altas, donde la incidencia de la pobreza es alta y el acceso a los mercados es limitado, pero donde el número de ovejas y cabras es elevado. Todas las actividades del componente 1, salvo la promoción de las industrias artesanales, serán de ámbito nacional desde el principio<sup>5</sup>. Con el fin de facilitar la puesta en marcha y garantizar un enfoque de reducción de la pobreza, varias actividades del componente 2 se centrarán inicialmente en zonas geográficas específicas.

<sup>5</sup> Este enfoque está influenciado por el trabajo básico realizado en el marco del Proyecto de Fomento de la Lana y el Mohair, que servirá de base para la mayor parte de las actividades del componente 1. El desarrollo de la industria artesanal se centrará en Berea y Leribe y se extenderá gradualmente a otros distritos.

15. El grupo objetivo estará compuesto sobre todo por pequeños productores de lana y mohair. Los galpones de esquila serán el punto de partida de las operaciones del proyecto y, por tanto, los miembros de las asociaciones de productores de lana y mohair de estos galpones constituirán el principal grupo objetivo.

## **B. Componentes, efectos directos y actividades**

16. El proyecto constará de los tres componentes siguientes: i) apoyo a la creación de sistemas de cadenas de valor; ii) funcionamiento y coordinación de cadenas de valor climáticamente inteligentes, y iii) gestión del proyecto.
17. **Componente 1: Apoyo a la creación de sistemas de cadenas de valor.** Mediante este componente se contribuirá al establecimiento y la mejora de los sistemas que permiten que las cadenas de valor prosperen. Consta de tres subcomponentes: 1.1) gobernanza de las cadenas de valor y estrategia sectorial; 1.2) producción responsable de lana y mohair, y 1.3) desarrollo empresarial e industria de la moda. En el marco de este primer componente, dirigido por la unidad de coordinación del proyecto (UCP), se ayudará al Gobierno y los agentes de las cadenas de valor a mejorar la gobernanza del sector, la regulación y el cumplimiento de los requisitos de certificación mediante el establecimiento de sistemas, directrices y reglamentos nacionales. En el marco de los subcomponentes 1.2 y 1.3, también se canalizarán fondos destinados a los productores rurales para la mejora de los rebaños (sacrificio e intercambio) y para el fortalecimiento de las cadenas de suministro nacionales esenciales por medio de alianzas productivas (alimentación animal, cría y servicios de sanidad animal).
18. **Componente 2: Funcionamiento y coordinación de cadenas de valor climáticamente inteligentes.** Con este componente se contribuirá al funcionamiento y la mejora de estos sistemas locales de cadenas de valor para que sean autosostenibles. Este componente tiene dos subcomponentes: 2.1) acceso a financiación y servicios productivos, y 2.2) producción responsable de las cadenas de valor. En la estrategia sectorial se pide que se refuerce este nuevo fondo de la lana y el mohair y la empresa de la lana y el mohair. Como entidad sin ánimo de lucro compuesta por todas las partes interesadas en las cadenas de valor y representada por un consejo de administración, esta organización dirigirá el desarrollo y la coordinación de las cadenas de valor, siguiendo el modelo aplicado en Sudáfrica. Tras la creación de capacidad, los activos se confiarán al consorcio para que los gestione y administre con contratos basados en los resultados. Además, con un fondo rotatorio, que se creará para financiar las necesidades de inversión de pequeña y mediana escala de los productores en la cadena de valor, se podrá realizar una selección limitada de préstamos en especie y se cubrirá un importante déficit de inversión en las explotaciones agropecuarias.
19. **Componente 3: Gestión del proyecto.** Con este componente se contribuirá a la ejecución eficaz y eficiente del proyecto. Este componente tiene dos subcomponentes: 3.1) comunicación para promover cambios de comportamiento y seguimiento destinado al aprendizaje, y 3.2) coordinación del proyecto. Las actividades se centrarán en las funciones de seguimiento y evaluación, comunicación y gestión de los conocimientos. La UCP se encargará de las actividades fiduciarias tradicionales y consultará a las partes interesadas durante la ejecución del proyecto.
20. **Estrategia de ejecución del proyecto y enfoque por fases.** El Proyecto de Competitividad de la Cadena de Valor de la Lana y el Mohair se ejecutará en tres fases. La fase 1, de 18 meses de duración, será el período de puesta en marcha y creación de los sistemas; la fase 2, de dos años de duración, corresponderá al período de implementación y ejecución de los sistemas, y la fase 3 abarcará el período de ampliación de escala, consolidación y retirada gradual una vez concluido

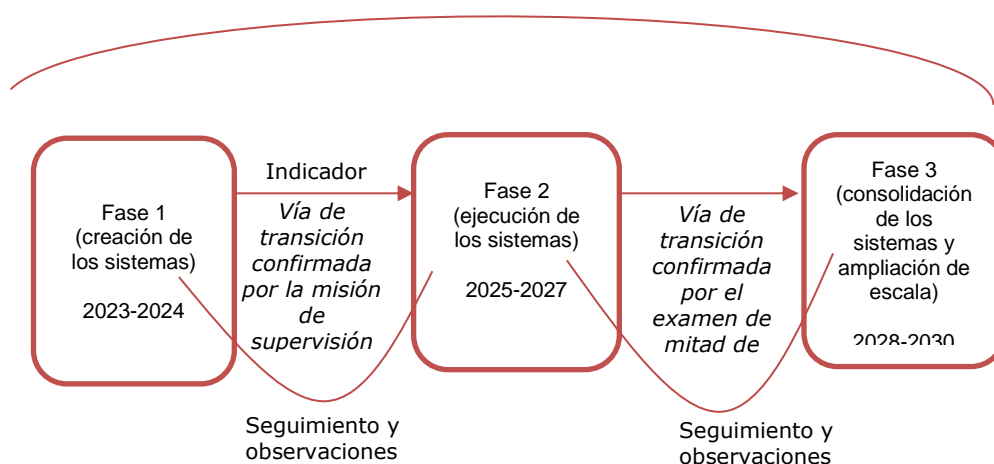

el proyecto. En las misiones de supervisión y apoyo a la ejecución se examinarán los progresos realizados entre las fases 1 y 2, y en la misión de examen de mitad de período se analizará la transición de la fase 2 a la 3.

21. Hay cinco indicadores críticos relacionados con los resultados para la transición de las fases 1 y 2: i) los actores de las cadenas de valor elaboran y validan el plan de negocios para el fondo de la lana y el mohair y la empresa de la lana y el mohair, y se establece la estructura de gobernanza; ii) se establecen y validan los sistemas fiduciarios, el programa informático para el seguimiento y la secretaría del fondo de la lana y el mohair y la empresa de la lana y el mohair; iii) el fondo de la lana y el mohair y empresa de la lana y el mohair elabora un plan de negocios para cada activo que le confía el Gobierno; iv) el fondo de la lana y el mohair y la empresa de la lana y el mohair finaliza el mecanismo de ejecución del fondo rotatorio, en particular el sistema informático, los manuales de financiación y los criterios de admisibilidad, y v) se contrata a un proveedor de servicios para seleccionar, establecer y apoyar a los grupos de ahorro.

#### Gráfico 1

Enfoque multiprogramático en tres fases

### C. Teoría del cambio

22. El proyecto tiene como objetivo crear sistemas sostenibles de cadenas de valor y fortalecer y desarrollar instituciones para que estos sistemas funcionen de forma sostenible, de modo que los productores puedan beneficiarse económicamente y contar con sistemas de producción y mercado más resilientes. En concreto, Lesotho necesita instituciones y organizaciones sólidas que apoyen y mejoren su producción de lana y mohair en función de la evolución de la demanda del mercado, y que garanticen que la mejora nacional de la producción de fibra se lleve a cabo de acuerdo con los requisitos del mercado de la moda ética. Ante la falta de instituciones nacionales sólidas y el hecho de no estar integrado en la cadena de valor de la lana y el mohair de Sudáfrica, y al tener algunos actores clave radicados en Sudáfrica, Lesotho aspira a crear un consorcio nacional del fondo de la lana y el mohair y la empresa de la lana y el mohair como principal anclaje institucional. Mediante este proyecto se ayudará al país a hacer realidad esa aspiración.
23. Además, se favorecerá la digitalización de las transacciones para crear un ecosistema de gobernanza, planificación e inversión transparente y basado en los datos en la cadena de valor de los basotho. Se fortalecerá el apoyo que se presta a las cadenas de suministro esenciales para los piensos, el material genético y los servicios de sanidad animal mediante el enfoque basado en las alianzas productivas, y se promoverá la mejora genética de un número importante de animales con el programa de sacrificio e intercambio.

## **D. Armonización, sentido de apropiación y asociaciones**

24. El proyecto está en consonancia con las prioridades nacionales de Lesotho en lo que respecta a la producción agropecuaria en pequeña escala, el desarrollo de la cadena de valor de la lana y el mohair, la mejora de la capacidad de los productores y el aumento de la productividad, tal como se presenta en el Segundo Plan de Desarrollo Estratégico Nacional y la política agraria del país en términos generales. El objetivo de desarrollo y las intervenciones del proyecto se ajustan a estos dos planes estratégicos y contribuirán a la consecución de sus objetivos.
25. En general, el proyecto está en consonancia con los siguientes Objetivos de Desarrollo Sostenible (ODS) y contribuirá a su consecución: ODS 1 (fin de la pobreza); ODS 2 (hambre cero); ODS 8 (trabajo decente y crecimiento económico); ODS 9 (industria, innovación e infraestructuras); ODS 10 (reducción de las desigualdades); ODS 13 (acción por el clima), y ODS 15 (vida de ecosistemas terrestres).
26. El proyecto se diseñó teniendo en cuenta los objetivos y principios expuestos en el programa sobre oportunidades estratégicas nacionales (2020-2025) relativo a Lesotho y está en consonancia con el Marco Estratégico del FIDA (2016-2025), que fomenta la transformación rural inclusiva y sostenible.

## **E. Costos, beneficios, y financiación**

27. El déficit de financiación de USD 11,802 millones podrá subsanarse gracias a ciclos posteriores del Sistema de Asignación de Recursos basado en los Resultados (PBAS) y/o a través del Mecanismo de Acceso a Recursos Ajenos (BRAM) (con arreglo a condiciones financieras que habrán de determinarse y con sujeción a los procedimientos internos y la posterior aprobación de la Junta Ejecutiva) o mediante cofinanciación obtenida durante la ejecución.
28. Los componentes 1 y 2 del proyecto se contabilizan en parte como componentes de financiación para el clima. De conformidad con las metodologías que emplean los bancos multilaterales de desarrollo en el seguimiento de la financiación para la adaptación del cambio climático y la mitigación de sus efectos, el monto total de la financiación para el clima concedida por el FIDA a este proyecto se prevé en USD 4,130 millones, lo que representa el 20,4 % de los costos totales del proyecto.

### **Costos del proyecto**

29. Los costos totales del proyecto, incluidos los imprevistos de orden físico y por alza de precios, se estiman en USD 72,644 millones durante un período de ejecución de siete años. Los costos por componente del proyecto incluyen: i) el apoyo a la creación de sistemas de cadenas de valor, USD 42,109 millones (58 %); ii) el funcionamiento y la coordinación de cadenas de valor climáticamente inteligentes, USD 24,862 millones (34,2 %), y iii) la gestión del proyecto, USD 5,672 millones (7,8 %).

### **Financiación y estrategia y plan de cofinanciación**

30. Las actividades básicas de puesta en marcha y las inversiones esenciales se financiarán con recursos del FIDA. Además, el Fondo de la OPEP para el Desarrollo Internacional se ha comprometido a realizar inversiones conjuntas de al menos USD 20 millones, que ya han sido programadas. El proyecto, que hace especial hincapié en la biodiversidad, la salud del suelo y las prácticas regenerativas, reúne las condiciones necesarias para recibir recursos en el marco de la octava reposición de los recursos del Fondo del FMAM de la Lana y el Mohair (FMAM-8), y el FIDA y el Gobierno han elaborado conjuntamente un formulario de identificación de proyectos en el marco de la FMAM-8 por valor de USD 5,2 millones. La cofinanciación del Gobierno ha sido aprobada por el Comité de Inversiones del Sector Público. La cofinanciación del sector privado se movilizará mediante contribuciones durante la ejecución.

### **Desembolso**

31. Los fondos del proyecto se distribuirán por medio de una cuenta designada en dólares de los Estados Unidos en el Banco Central de Lesotho, que se mantendrá separada del sistema de la cuenta única del tesoro para evitar posibles problemas de liquidez.

### **Resumen de los beneficios y análisis económico**

32. La tasa de rendimiento económico (TRE) del proyecto se estima en un 13,5 %, con un valor actual neto de USD 16,819 millones. Estas cifras indican que, basándose en un costo de oportunidad del capital del 10 %, el proyecto generará una TRE satisfactoria y está más que justificado desde el punto de vista económico. El análisis de sensibilidad, basado en aumentos del 10 %, el 20 % y el 50 % en los costos del proyecto, muestra tasas de rendimiento del 12,4 %, el 11,5 % y el 9,2 %, respectivamente.
33. En general, la TRE sigue siendo satisfactoria. Estas tasas y estabilidad se explicarían por el aumento de la productividad de las actividades específicas debido a la adopción de sistemas productivos eficientes y resilientes, entre ellos las técnicas culturales y el buen material biológico vegetal y animal. Gracias a estas medidas, se espera que los productores obtengan una prima por su lana y mohair.

### **Estrategia de salida y sostenibilidad**

34. La sostenibilidad y la estrategia de salida del proyecto están integradas en su diseño. Se espera que el fondo de la lana y el mohair y la empresa de la lana y el mohair siga utilizando los activos físicos y financieros que se le han confiado para mejorar progresivamente las funciones de coordinación de la cadena de valor y aumentar la prestación de servicios equitativos a los productores y otros actores de la cadena de valor. El consorcio del fondo de la lana y el mohair y la empresa de la lana y el mohair será responsable de la gobernanza y la ejecución de las actividades más importantes de la cadena de valor y actuará como organismo sectorial para toda la cadena de valor.

## **III. Riesgos**

### **A. Riesgos y medidas de mitigación**

35. El riesgo inherente general se ha calificado de considerable. Tras considerar las medidas de mitigación, el riesgo residual es moderado. Las subcategorías de riesgo con una mayor calificación son las siguientes: i) contexto nacional; ii) medio ambiente y clima, y iii) adquisiciones y contrataciones. El riesgo residual tras considerar las medidas de mitigación de las subcategorías de riesgo seleccionadas es, en general, moderado.

Cuadro 4  
Calificación general de los riesgos

<i>Esferas de riesgo</i>	<i>Calificación del riesgo inherente</i>	<i>Calificación del riesgo residual</i>
Contexto nacional	Considerable	Moderado
Estrategias y políticas sectoriales	Moderado	Bajo
Medio ambiente y clima	Considerable	Moderado
Alcance del proyecto	Moderado	Bajo
Capacidad institucional de ejecución y sostenibilidad	Moderado	Bajo
Gestión financiera	Considerable	Moderado
Adquisiciones y contrataciones en el marco del proyecto	Considerable	Moderado
Impacto ambiental, social y climático	Moderado	Bajo
Partes interesadas	Moderado	Bajo
<b>General</b>	Considerable	Moderado

## B. Categoría ambiental y social

36. **La categoría ambiental y social preliminar del proyecto es moderada.** El proyecto se centra en la productividad y el entorno propicio para la cadena de valor de la lana y el mohair, y algunas de sus actividades pueden tener repercusiones negativas en el medio ambiente y aumentar la presión sobre los recursos naturales. Sin embargo, los posibles efectos ambientales y sociales negativos son limitados, específicos del lugar, predecibles y en su mayoría reversibles y pueden gestionarse con medidas de mitigación adecuadas.

## C. Clasificación del riesgo climático

37. **La clasificación del riesgo climático es considerable.** Existe la posibilidad de que el cambio climático ocasione efectos generalizados. Los principales riesgos relacionados con el cambio climático a los que se enfrentan los pequeños productores de las zonas objetivo del proyecto son el aumento de las temperaturas y la variabilidad de las precipitaciones, con lluvias más intensas en algunas zonas, temporadas de lluvias más cortas y posibles sequías en algunos lugares. No obstante, es probable que las actividades de gestión de riesgos incrementen la resiliencia y la capacidad de adaptación de los hogares, la infraestructura, las comunidades y los ecosistemas.

## D. Sostenibilidad de la deuda

38. En lo que respecta a su deuda externa, el riesgo de Lesotho es moderado, con un margen limitado para absorber perturbaciones, al igual que hace dos años<sup>6</sup>. La deuda externa, que representa el 82 % del total de la deuda pública, se devenga principalmente a asociados multilaterales en condiciones favorables. Se parte del supuesto que la toma de préstamos externos en condiciones favorables seguirá siendo fundamental para financiar los grandes proyectos de inversión. Sin embargo, se prevé que la concesionalidad disminuya gradualmente a largo plazo a medida que Lesotho crezca y deje de reunir las condiciones necesarias para recibir financiación de la Asociación Internacional de Fomento. Tanto la relación entre la deuda externa y el PIB como la relación entre la deuda total y el PIB se acercan a los umbrales de alto riesgo, lo que deja poco margen para absorber nuevas perturbaciones.

<sup>6</sup> Fondo Monetario Internacional (2022): "Kingdom of Lesotho: 2022 Article IV Consultation-Press Release; Staff Report; and Statement by the Executive Director for Kingdom of Lesotho". Véase: <https://www.imf.org/en/Publications/CR/Issues/2022/06/08/Kingdom-of-Lesotho-2022-Article-IV-Consultation-Press-Release-Staff-Report-and-Statement-by-519018>.

## IV. Ejecución

### A. Marco organizativo

#### **Gestión y coordinación del proyecto**

39. Se establecerá un comité directivo para ofrecer orientación en materia de políticas y supervisar la ejecución del proyecto. El comité directivo y el propio proyecto contarán también con el apoyo de un comité técnico consultivo, que estará integrado por directores y coordinadores de los principales organismos interesados, entre ellos los departamentos gubernamentales.
40. La UCP, que dirigirá la coordinación y gestión ordinarias del proyecto, tendrá su sede en el Ministerio de Agricultura, Seguridad Alimentaria y Nutrición y contará con una plantilla adecuada de profesionales contratados mediante un proceso competitivo de contratación abierto al mercado. La UCP coordinará y apoyará el componente 1, y el consorcio del fondo de la lana y el mohair y la empresa de la lana y el mohair se encargará principalmente de ejecutar el componente 2. Este modelo pluralista de ejecución de las actividades del proyecto se ajusta a los principios consolidados que rigen la ejecución de los proyectos de desarrollo de cadenas de valor.

#### **Gestión financiera, adquisiciones y contrataciones, y gobernanza**

41. **Gestión financiera.** Tanto la UCP como el el fondo de la lana y el mohair y la empresa de la lana y el mohair dispondrán de estructuras adecuadas y de personal experimentado para gestionar las finanzas del proyecto. Prepararán los planes de trabajo anuales y los presupuestos correspondientes y retirarán los anticipos del FIDA, basándose en estos documentos y en el pronóstico de la liquidez para el siguiente período. La UCP será auditada por la Oficina del Auditor General, según lo dispuesto por la legislación de Lesotho, mientras que el consorcio del fondo de la lana y el mohair y la empresa de la lana y el mohair y la empresa social vinculada a la Iniciativa de Moda Ética serán auditados por una empresa de auditoría privada supervisada por la Oficina del Auditor General.
42. **Adquisiciones y contrataciones.** En conjunto, el riesgo relativo a las actividades institucionales de adquisición y contratación se considera medio. En la evaluación específica del proyecto, basada en las actividades previstas, se señala que es necesario mejorar las siguientes esferas: i) el marco normativo de las adquisiciones y contrataciones; ii) los documentos de licitación normalizados; iii) el seguimiento de las adquisiciones y contrataciones, y iv) el acceso a la información sobre adquisiciones y contrataciones. El FIDA ofrecerá asistencia técnica a distancia y en el país para crear capacidad en la materia.
43. **Gobernanza.** El riesgo inherente de Lesotho es alto. Según la evaluación de las políticas e instituciones nacionales de 2019 y la calificación de 2020 del Banco Mundial, Lesotho tiene un desempeño medio en materia de políticas (puntuación de 3,3) y ocupa el puesto 17 de los 40 países subsaharianos (la puntuación media es de 3,1). Sus principales puntos débiles son la política fiscal (puntuación de 2,5), la calidad de la gestión presupuestaria y financiera (puntuación de 2,5) y la calidad de la administración pública (puntuación de 2,5), donde la falta de controles adecuados ha provocado un aumento del gasto en sueldos en 2019 (alrededor del 41 % del gasto público).

#### **Participación y observaciones del grupo objetivo y resolución de reclamaciones**

44. Las asociaciones de productores y otros actores de la cadena de valor nombrarán a representantes y expertos para que los representen en el fondo de la lana y el mohair en calidad de miembros del consejo de administración. Esta es una característica fundamental de la participación del grupo objetivo. En el marco del proyecto se recabarán con regularidad los puntos de vista y las opiniones del grupo objetivo sobre los resultados del proyecto y se compartirán con el Gobierno. Se

recurrirá periódicamente a grupos de discusión, encuestas sobre los indicadores básicos de los efectos directos y encuestas anuales georreferenciadas vía WhatsApp para recabar opiniones y observaciones.

### **Resolución de reclamaciones**

45. Dado que las actividades agrícolas se llevarán a cabo a nivel comunitario, la negociación y el acuerdo por consenso serán el canal principal para resolver las reclamaciones de aquellos cuyas tierras y propiedades puedan verse afectadas. No obstante, también se establecerá un mecanismo de resolución de reclamaciones más oficial (acompañado de la debida sensibilización). Las personas afectadas podrán optar por uno de los dos sistemas paralelos siguientes: un sistema comunitario o un sistema oficial. La vía comunitaria consistirá en tribunales oficiosos administrados por los líderes tradicionales<sup>7</sup>. La vía oficial será el mecanismo de resolución de reclamaciones establecido por el proyecto.

## **B. Planificación, seguimiento y evaluación, aprendizaje, gestión de los conocimientos y comunicación**

46. La planificación y la presupuestación se integrarán en los procesos gubernamentales y se basarán en los planes de trabajo anuales y los presupuestos correspondientes, mediante la aplicación de un enfoque ascendente. El marco lógico del proyecto orientará la elaboración del plan de trabajo anual y el presupuesto conexo y el establecimiento del sistema de seguimiento y presentación de informes.
47. El sistema de seguimiento y evaluación generará información oportuna y fiable para contribuir a la adopción de decisiones y la gestión adaptativa. Los datos sobre los efectos directos y el impacto se recopilarán mediante encuestas iniciales, intermedias y finales, en consonancia con las Directrices de evaluación de los indicadores básicos de efectos directos del FIDA. Los datos sobre la resiliencia se recopilarán en la fase inicial y al final del proyecto a través de las tarjetas de puntuación de la resiliencia del FIDA.
48. En el proyecto también se llevarán a cabo estudios cualitativos y se elaborarán productos de gestión de los conocimientos sobre las esferas de impacto.

### **Innovación y ampliación de escala**

49. Las principales innovaciones del proyecto son el apoyo al consorcio del fondo de la lana y el mohair y la empresa de la lana y el mohair y su fortalecimiento institucional, pues se prevé que sea un mecanismo sostenible basado en la cadena de valor que ampliará y seguirá elaborando estrategias eficaces más allá del ciclo del proyecto de siete años; la promoción de la producción responsable y la certificación, las bajas emisiones y la mejora de la biodiversidad; la digitalización de la cadena de valor; la mejora del programa nacional de cría; el establecimiento de un sistema de respuesta y vigilancia de enfermedades, y la asociación con actores del sector privado.

## **C. Planes para la ejecución**

### **Preparación para la ejecución y planes para la puesta en marcha**

50. El proyecto se basará en las actividades del Proyecto de Fomento de la Lana y el Mohair, y el Gobierno y el FIDA han acordado seleccionar la nueva UCP mediante un proceso competitivo. El FIDA y el Gobierno de Lesotho se han comprometido a destinar recursos a la contratación y la puesta en marcha para que el proyecto pueda ejecutarse rápidamente. Por lo tanto, con este proyecto se promoverá el desarrollo de una nueva organización, pero que no parte de cero.

<sup>7</sup> Jefes de comunidades rurales, jefes, jefes principales, consejos de distrito.

**Supervisión, examen de mitad de período y planes de finalización**

51. Las misiones serán organizadas conjuntamente por el FIDA y el Gobierno. La supervisión incluirá misiones anuales de supervisión conjunta y exámenes documentales periódicos para garantizar que la ejecución avance a un ritmo adecuado. El examen de mitad de período se llevará a cabo a mitad del ciclo del proyecto y en él se evaluará de forma crítica si está en vías de alcanzar su meta y su objetivo de desarrollo. El Gobierno se encargará de supervisar la terminación del proyecto, centrándose en los progresos realizados, las enseñanzas extraídas y la sostenibilidad de las intervenciones.

**V. Instrumentos jurídicos y facultades**

52. Un convenio de financiación entre el Reino de Lesotho y el FIDA constituye el instrumento jurídico para ampliar la concesión de la financiación propuesta al prestatario/receptor. Se adjunta como apéndice I una copia del convenio de financiación negociado.
53. El Reino de Lesotho está facultado por su legislación para recibir financiación del FIDA.
54. Me consta que la financiación propuesta se ajusta a lo dispuesto en el Convenio Constitutivo del FIDA y en sus Políticas y Criterios en materia de Financiación.

**VI. Recomendación**

55. Recomiendo a la Junta Ejecutiva que apruebe la financiación propuesta con arreglo a lo dispuesto en la siguiente resolución:

RESUELVE: que el Fondo conceda un préstamo en condiciones combinadas al Reino de Lesotho, por un monto equivalente a quince millones doscientos mil dólares de los Estados Unidos (USD 15 200 000), conforme a unos términos y condiciones que se ajusten sustancialmente a los presentados en este informe.

RESUELVE ADEMÁS: que el Fondo conceda un préstamo en condiciones ordinarias al Reino de Lesotho, por un monto equivalente a cinco millones de dólares de los Estados Unidos (USD 5 000 000), conforme a unos términos y condiciones que se ajusten sustancialmente a los presentados en este informe.

Álvaro Lario  
Presidente

## Negotiated financing agreement: "Wool and Mohair Value Chain Competitiveness Project"

(Negotiations concluded on 7 June 2023)

Loan No: \_\_\_\_\_

Loan No: \_\_\_\_\_

Project name: Wool and Mohair Value Chain Competitiveness Project (the "WaMCoP"/ "the Project")

Kingdom of Lesotho (the "Borrower")

and

The International Fund for Agricultural Development (the "Fund" or "IFAD")

(each a "Party" and both of them collectively the "Parties")

**WHEREAS** the Borrower has requested a loan from the Fund for the purpose of financing the Project described in Schedule 1 to this Agreement;

**WHEREAS**, the Fund has agreed to provide financing for the Project;

**WHEREAS** the Borrower has undertaken to provide additional support, financially or in kind that may be needed to the Project;

**WHEREAS** the Project has an estimated financing gap of eleven million seven hundred and fifty two thousand United States dollars (USD 11 752 000). The Parties endeavour to secure funds to fill the financing gap within the first five years of the Project's implementation.

**WHEREAS** the Parties are jointly submitting a proposal to the Global Environment Facility (GEF) to support the technical components of the Project by advancing a "greening" of the value chain.

For avoidance of doubt, IFAD's intentions stated herein in regards to supporting the effort to secure funds to meet the financing gap or submitting the proposal to GEF to secure financing for the Project shall not be construed as a commitment or agreement to provide said financing to the Borrower.

**NOW THEREFORE**, the Parties hereby agree as follows:

### Section A

1. The following documents collectively form this Agreement: this document, the Project Description and Implementation Arrangements (Schedule 1), the Allocation Table (Schedule 2), and the Special Covenants (Schedule 3).

2. The Fund's General Conditions for Agricultural Development Financing dated 29 April 2009, amended as of December 2022, and as may be amended hereafter from time to time (the "General Conditions") are annexed to this Agreement, and all provisions thereof shall apply to this Agreement. For the purposes of this Agreement the terms defined in the General Conditions shall have the meanings set forth therein, unless the Parties shall otherwise agree in this Agreement.

3. The Fund shall provide a Loan (the "Financing") to the Borrower, which the Borrower shall use to implement the Project in accordance with the terms and conditions of this Agreement.

## **Section B**

1. A. The amount of the Loan eligible to blend terms (BT Loan) is fourteen million, two hundred thousand EUR (14 200 000 EUR).
- B. The amount of the Loan eligible to ordinary terms (OT Loan) is four million, six hundred and eighty thousand EUR (4 680 000 EUR).
2. The blended terms Loan shall be subject to interest on the principal amount outstanding and a service charge as determined by the Fund at the date of approval of the blended terms Loan by the Fund's Executive Board. The interest rate and service charge determined will be fixed for the life cycle of the loan and payable semi-annually in the Loan Service Payment Currency, and shall have a maturity period of twenty-five (25) years, including a grace period of five (5) years starting from the date of approval of the Loan by the Fund's Executive Board. The principal of the blended terms Loan will be repaid in equal instalments.
3. The Loan granted on ordinary terms shall be subject to interest on the principal amount outstanding of the Loan, at a rate equal to the IFAD Reference Interest Rate including a variable spread, payable semi-annually in the Loan Service Payment Currency, and have a maturity period of twenty eight (28) years, including a grace period of ten (10) years, starting from the date as of which the Fund has determined that all general conditions precedent to withdrawal have been fulfilled.
4. The Loan Service Payment Currency shall be in EUR.
5. The first day of the applicable Fiscal Year shall be 1 April.
6. Payments of principal, interest and service charge shall be payable on each 15<sup>th</sup> June and 15<sup>th</sup> December.
7. There shall be a Designated Account in EUR, for the exclusive use of the Project opened in the Central Bank of Lesotho. The Borrower shall inform the Fund of the officials authorized to operate the Designated Account.
8. There shall be Project Operational Accounts in local currency opened at a local commercial bank and details would be communicated to IFAD. Separate Project accounts will be maintained for the different Project co-financiers.
9. Once operational the Wool and Mohair fund shall open two separate Operational Bank Accounts at a local bank and details communicated to the Fund to facilitate the implementation of Component 2. One Operational Bank Account shall be used for IFAD funds and the other for Government of Lesotho contributions. The funds received from IFAD shall be used for the sole purpose of paying for eligible expenses of the Project.
10. The Borrower shall provide counterpart financing for the Project, in cash and in kind. The in-kind contribution will be in the form of assets transferred to the Wool and Mohair Enterprise, contribution towards civil works, administrative support and foregone taxes and duties on all Project inputs that involve funding from IFAD. The cash contribution will amount to an equivalent of three million United States dollars (USD 3 000 000) and in-kind contribution equivalent of five million United States dollars (USD 5 000 000).

## **Section C**

1. The Lead Project Agency shall be the Ministry of Agriculture and Food Security and Nutrition (MAFSN).
2. The following are designated as additional Project Parties:
  - (a) Lesotho National Development Corporation (LNDC)
  - (b) The National Farmer Associations (LNWMGA and Skylight)
  - (c) Ethical Fashion Initiative
  - (d) Textile Exchange
  - (e) GS1 South Africa
  - (f) Africa Clean Energy
  - (g) The Wool and Mohair fund and Wool and Mohair Enterprise (once established and operational)

Additional Project Parties are described in Schedule 1 section 9. The above list is not exhaustive and the Parties may agree on additional Project Parties from time to time.

3. A Mid-Term Review will be conducted as specified in Section 8.03 (b) and (c) of the General Conditions; however, the Parties may agree on a different date for the Mid-Term Review of the implementation of the Project.
4. The Project Completion Date shall be the seventh anniversary of the date of entry into force of this Agreement and the Financing Closing Date shall be 6 months later, or such other date as the Fund may designate by notice to the Borrower.
5. Procurement of goods, works and services financed by the Financing shall be carried out in accordance with procurement methods and any other measures identified by IFAD.

## **Section D – administration and supervision**

The Fund will administer the Financing and supervise the Project.

## **Section E – Withdrawal conditions and cancellation**

1. The following are designated as additional grounds for suspension of this Agreement:
  - (a) The Project Implementation Manual (PIM) and/or any provision thereof, has been waived, suspended, terminated, amended or modified without the prior agreement of the Fund and the Fund, after consultation with the Borrower, has determined that it has had, or is likely to have, a material adverse effect on the Project.
  - (b) In the event that the Borrower does not request a disbursement of the Financing for a period of at least 12 months without justification.
2. The following are designated as additional grounds for cancellation of this Agreement:
  - (a) In the event that the Borrower did not request a disbursement of the Financing for a period of at least 12 months without justification.

- 3. The following are designated as additional conditions precedent to withdrawal:
  - (a) The IFAD no objection to the Project Implementation Manual shall have been obtained.
  - (b) The Key Project personnel have been appointed as per section 10 Schedule 3 of this Agreement.
  - (c) IFAD approved accounting software has been procured and installed.
- 4. The following are the designated representatives and addresses to be used for any communication related to this Agreement:

For the Borrower:

Minister for Finance and Development Planning  
 Finance House, Government Complex  
 Maseru, Kingdom of Lesotho

For the Fund:

The President  
 International Fund for Agricultural Development  
 Via Paolo di Dono 44  
 00142 Rome, Italy

If applicable, the Parties accept the validity of any qualified electronic signature used for the signature of this Agreement and recognise the latter as equivalent to a hand-written signature.

This Agreement, has been prepared in the English language in two (2) original copies, one (1) for the Fund and one (1) for the Borrower.

## Schedule 1

### *Project Description and Implementation Arrangements*

#### I. Project Description

1. *Target Population.* The Project shall target smallholder wool and mohair farmers, particularly members of wool and mohair farmers associations. The project will target about 45,000 households (approximately 225,000 persons).
2. *Project area.* The Project will be national in scale and will place a special focus on the highland areas (*the "Project Area"*).
3. *Goal.* The goal of the Project is to increase the economic and climate resilience of wool and mohair farmers' livelihoods.
4. *Objectives.* The objective of the Project is to promote inclusive and sustainable economic growth and private sector led job creation from wool and mohair.
5. *Components.* The Project shall consist of the following Components:

##### 5.1 Component 1: *Support to building value chain systems*

This component will support the establishment and up-grading of the wool and mohair systems, enabling the value chains to thrive. It will support government and value chain players to improve sector governance, regulation, and compliance with certification by establishing national systems, guidelines, and regulations. It will be implemented by the Project Coordination Unit (PCU) and will have three sub-components as follows:

- 5.1.1 *Sub-Component 1.1:* Value chain governance and sector strategy, which consists of two interventions aiming at improving the sector's policy and regulatory framework and building the capacity of value chain stakeholders to operate under the new private sector led sector governance system.
- 5.1.2 *Sub-Component 1.2:* Responsible wool and mohair production, which will see the promotion of sustainable intensification of wool and mohair production through improvements in animal breeding, animal nutrition and animal health, and provides interlinked support for the rehabilitation of rangelands and carbon accounting. In partnership with African Clean Energy (ACE), energy efficient cooking stoves will be promoted to ensure a reduction of deforestation ultimately supporting soil carbon sequestration efforts.
- 5.1.3 *Sub-Component 1.3:* Business development and cottage industry, which will support the business development of critical supply chains of the wool and mohair value chains through the promotion of productive alliances. Moreover, national value will be promoted through transforming cottage industries into commercial fashion production. The Ethical Fashion Initiative has been selected as a strategic partner to implement the development of Lesotho fiber processing and market linkages.

Under sub-components 1.2 and 1.3, the Project will channel funds to rural producers for flock level upgrading (culling and exchange), and to strengthen critical national supply chains through productive alliances (animal feed, breeding, and animal health services).

##### 5.2 Component 2: *Climate smart Value Chain operation and coordination*

This component will support the operation and improvement of locally grounded value chain systems, towards self-sustainability.

This component will have two sub-components as follows:

- 5.2.1 *Sub-Component 2.1:* Access to productive finance and services, which aims to ensure farmers' access to financing services as well as inputs. It consists of three

interventions led by the Wool and Mohair fund and Wool and Mohair Enterprise (hereinafter Consortium): (i) Consortium provides services to farmers by managing entrusted physical and financial assets; (ii) roll-out a revolving fund to provide in-kind loans to farmers; and (iii) collaborate with a service provider to promote financial literacy and saving groups, targeting poorer households.

- 5.2.2 *Sub-Component 2.2: Responsible value chain production* - under this sub-component, the Consortium will lead the roll-out of the responsible production system (set-up under sub-component 1.2) and support the certification of shearing shed-linked farmer associations who have benefitted from other financial and non-financial support under the other project sub-components. The textile exchange has been selected as a strategic partner to assist in developing a model for certification in Lesotho. To support certification efforts and further promote value chain efficiencies, a digital platform will be established and will operate for the whole value chain. Moreover, the Consortium will coordinate the implementation of all activities required to meet the responsible production standards, as well as carbon sequestration and biodiversity enhancement.

The Wool and Mohair Enterprise (WME) will be a collaboration between key value chain players of the wool and mohair value chain and will act as a sectoral body. Its aim is to govern and coordinate value chain operations, manage critical value chain assets, and equitably deliver required services to all players. The Wool and Mohair fund (WMF) will be the financial entity that will channel finance to the wool and mohair sector. It will ensure farmers' access to financing services as well as inputs. The WMF will consist of an endowment fund and a revolving fund. The capital growth generated from investing the funds from the endowment fund will be used to finance the operations of the Consortium and support sector development. The revolving fund is aimed at providing in-kind input loans to farmers. The Wool and Mohair Enterprise will report to the Wool and Mohair fund. The WME and the WMF will be established during the Projects implementation.

The Consortium will comprise of cooperating partners/shareholders including but not limited to the Borrower, Lesotho National Development Corporation (LNDC) and key value chain players including relevant farmer associations, significant brokers and trader's associations. The partners/shareholders of the Consortium will be agreed upon by the Parties from time to time. It will be formed based on Memorandums of Understanding between the cooperating partners and will operate under a corporate management system that meets international standards and IFAD requirements, as well as follow a defined roadmap that will be determined jointly by the Parties. The Consortium's ability to implement will be determined following the fulfilment of performance related triggers to transition the Project from phase 1 to phase 2 as outlined in the PIM. The Consortium will primarily execute Component two.

Following capacity building, and through performance-based contracts, assets will be entrusted to the Consortium to manage and operate.

### 5.3 *Component 3: Project Management*

This component will support the effective and efficient implementation of the project. It has two sub-components as follows:

- 5.3.1 *Sub-Component 3.1: Communication for behaviour change and monitoring for learning; and*
- 5.3.2 *Sub-Component 3.2: Project coordination.* Activities will focus on monitoring and evaluation, communication, and knowledge management functions. Moreover, the PCU will handle traditional fiduciary activities and consult with stakeholders throughout project implementation.

## **II. Implementation Arrangements**

6. *Lead Project Agency.* The Lead Project Agency shall be the Ministry of Agriculture, Food Security and Nutrition (MAFSN). The responsible department for the Project will be the Department of Livestock Services (DLS), supported by the Department of Marketing (DOM).

7. *Project Steering Committee.* A Project Steering Committee (PSC) will be established to provide policy guidance and oversight of Project implementation. It will be convened and chaired by Principal Secretary MAFSN or an authorised representative, with membership open to the Ministry of Defence, National Security and Environment, Ministry of Trade, Industry, Business Development and Tourism, Ministry of Local Government, Chieftainship, Police and Home Affairs, Ministry of Finance and Development Planning, the LNDC, producer organisations and other relevant stakeholders as required. The PSC will meet quarterly or on a need's basis, provided three representatives call for a meeting. The PSC and broader Project will also be supported by a Project Consultative Technical Committee (PCTC), which will comprise of directors and focal points of key stakeholder agencies including Government departments. The PCTC will meet quarterly and will provide technical and operational guidance, including preparation of the PSC meetings. For the Consortium a light secretariat will be established that will oversee the day-to-day operations of the institution. The composition and descriptive role of the light secretariat will be established during the formation of the WME and WMF.

8. *Project Coordination Unit.* The Project Coordination Unit (PCU) will lead the day-to-day coordination and project management for the Project. It will be housed in MAFSN and adequately staffed with professionals recruited competitively from the market. The PCU will be responsible for Project implementation including fiduciary aspects (including audits); knowledge management/communication (including public awareness campaigns); grievance redress mechanism; citizen engagement; and monitoring the implementation of safeguard related measures. The PCU will consolidate the financial reports from the Consortium and other implementing agencies before submitting to IFAD. The PCU will share regular reports with the PSC and other relevant technical departments within the line Ministries. The PCU will be staffed as outlined in Schedule 3 section 10.

9. *Implementing partners.* The key implementing partners include:

- (a) Ministry of Agriculture and Food Security and Nutrition (MAFSN)
- (b) Lesotho National Development Corporation (LNDC)
- (c) The National Farmer Associations (LNWMGA and Skylight)
- (d) Ethical Fashion Initiative (EFI)
- (e) Textile Exchange
- (f) GS1 South Africa
- (g) Africa Clean Energy
- (h) The Wool and Mohair fund and Wool and Mohair Enterprise (once established and operational)

The above list is not exhaustive and the Parties may agree on additional Project Parties from time to time.

10. *Monitoring and Evaluation.* The Project will set up a solid Monitoring and Evaluation (M&E) system, which will generate timely and reliable information to support decision-making and adaptive management. To promote the use of M&E data for project management, the logframe will be a standing agenda point in PCU's quarterly reflection meetings. Data collection, verification and use will be a joint task by all project stakeholders. The primary responsibility for the M&E system will lie with the M&E Unit within the PCU. The M&E focal point for the Consortium will closely interact with the PMU's

M&E officer. All contracts and Memorandums of Understanding (MoUs) signed by the PCU will include details on implementing partners' data collection responsibilities.

11. *Knowledge Management.* The Project will carry out qualitative studies and produce Knowledge Management products on impact areas including changes in interactions among value chain actors, and changes in access to value chains and benefits from the Project promoted innovations for the most vulnerable. The Project's Knowledge Management officer will also liaise closely with the Consortium and capture key aspects of its functioning.

12. *Project Implementation Manual.* A comprehensive Project Implementation Manual (PIM) will be prepared, together with an AWPB, procurement plan and terms of reference for various service providers to be procured, and to ensure implementation readiness. Any revisions to the PIM and AWPB shall have to be previously approved by the Fund.

13. *Project Co-financing.* The Project shall be capable of receiving co-financing contributions from other institutions. The Borrower will enter into co-financing agreements with the co-financiers to provide financing for the Project.

## Schedule 2

### Allocation Table

1. *Allocation of Loan Proceeds.* (a) The Table below sets forth the Categories of Eligible Expenditures to be financed by the Loan and the allocation of the amounts to each category of the Financing and the percentages of expenditures for items to be financed in each Category:

Category	Blend Term Loan Allocated (Expressed in EUR)	Ordinary Term Loan Allocated (Expressed in EUR)	Percentage net of taxes
I. Civil Works	90 000		100%
II. Vehicles, Equipment and Materials	4 180 000	2 530 000	100%
III. Technical Assistance	3 280 000		100%
IV. Credit	3 350 000	1 680 000	100%
V. Recurrent Cost	1 900 000		100%
Unallocated	1 400 000	470 000	
<b>TOTALS</b>	<b>14 200 000</b>	<b>4 680 000</b>	

(b) The terms used in the Table above are defined as follows:

- (i) Technical Assistance category include eligible expenditures for costs associated with training and workshops.
- (ii) Recurrent Costs include eligible expenditures for cost associated with operating cost, salaries and allowances of Project staff.

### 2. *Disbursement arrangements*

- (a) *Start-up Advance.* Withdrawals in respect of expenditures for start-up costs incurred before the satisfaction of the general conditions precedent to withdrawal shall not exceed an aggregate amount of four hundred and seventy thousand Euros four hundred and seventy thousand (EUR 470 000). Activities to be financed by Start-up Costs will require the no objection from IFAD to be considered eligible.
- (b) *Start-up Costs.* Withdrawals in respect of expenditures for start-up costs (in Category(ies)) incurred before the satisfaction of the general conditions precedent to withdrawal shall not exceed an aggregate amount of EUR 470 000 equivalent. Activities to be financed by Start-up Costs will require the no objection from IFAD to be considered eligible and should be in line with the approved start-up budget.

### Schedule 3

#### *Special Covenants*

#### **I. General Provisions**

In accordance with Section 12.01(a)(xxiii) of the General Conditions, the Fund may suspend, in whole or in part, the right of the Borrower/Recipient to request withdrawals from the Loan/Grant Account if the Borrower/Recipient has defaulted in the performance of any covenant set forth below, and the Fund has determined that such default has had, or is likely to have, a material adverse effect on the Project:

1. Within nine (9) months of entry into force of the Financing Agreement, the Project will enter into Memorandum of Understandings (MoU) with implementing partners, as outlined in the project implementation manual, that will structure the collaboration, define roles, responsibilities and duties with regards to implementation, financial management, accounting and reporting. The MoUs shall be shared with IFAD for No Objection.

2. *Planning, Monitoring and Evaluation.* The Borrower shall ensure that (i) a Planning, Monitoring and Evaluation (PM&E) system shall be established within twelve (12) months from the date of entry into force of this Agreement. The project has to launch the procurement process for the baseline within the first six (6) months.

3. *Gender.* The Project shall ensure that it develops a gender and youth strategy and action plan to facilitate equitable participation of women and men to the economic opportunities and benefits generated by the Project.

4. *Indigenous People (IP) Concerns.* The Borrower shall ensure that the concerns of IPs are given due consideration in implementing the Project and, to this end, shall ensure that:

- (a) the Project is carried out in accordance with the applicable provisions of the relevant IP national legislation;
- (b) indigenous people are adequately and fairly represented in all local planning for Project activities;
- (c) IP rights are duly respected;
- (d) IP communities, participate in policy dialogue and local governance;
- (e) The terms of Declarations, Covenants and/or Conventions ratified by the Borrower on the subject are respected;
- (f) The Project will not involve encroachment on traditional territories used or occupied by indigenous communities.

5. *Land tenure security.* The Borrower shall ensure that the land acquisition process has already been completed and that compensation processes were consistent with international best practice and free prior and informed consent principles.

6. *Anticorruption Measures.* The Borrower shall comply with IFAD Policy on Preventing Fraud and Corruption in its Activities and Operations.

7. *Sexual Harassment, Sexual Exploitation and Abuse.* The Borrower and the Project Parties shall ensure that the Project is carried out in accordance with the provisions of the IFAD Policy on Preventing and Responding to Sexual Harassment, Sexual Exploitation and Abuse, as may be amended from time to time.

8. *Use of Project Vehicles and Other Equipment.* The Borrower shall transfer relevant vehicles and equipment from the IFAD supported WAMPP project to support Start Up activities. The specifications of the vehicles and equipment to be transferred will be clarified to IFAD by the Borrower prior to the Start Up period.

9. *IFAD Client Portal (ICP) and Contract Monitoring Tool (CMT)*. The Borrower shall ensure that a request is sent to IFAD to access the project procurement Contract Monitoring Tool in the IFAD Client Portal (ICP). The Borrower/Recipient shall ensure that all contracts, memoranda of understanding, purchase orders and related payments are registered in the Project Procurement Contract Monitoring Tool in the IFAD Client Portal (ICP) in relation to the procurement of goods, works, services, consultancy, non-consulting services, community contracts, grants and financing contracts. The Borrower/Recipient shall ensure that the contract data is updated on a quarterly basis during the implementation of the Project.

10 *The Key Project Personnel are*: Project Coordinator, Procurement Officer and Contract Manager, Financial Management Officer, Financial Accountant, M&E and KM/communication officer, and Senior Project Assistant. In order to assist in the implementation of the Project, the PCU, unless otherwise agreed with IFAD, shall employ or cause to be employed, as required, key staff whose qualifications, experience and terms of reference are satisfactory to IFAD.

The Parties agree that the preferred method of staffing the Key Project Personnel shall be competitive recruitment. The recruitments shall be under a consulting contract following the individual consultant selection method in the IFAD Procurement Handbook, or any equivalent selection method in the national procurement system that is acceptable to IFAD. At the request of the Borrower and subject to IFAD modalities, government officials may be seconded, provided they meet clear performance metrics.

The recruitment of Key Project Personnel is subject to IFAD's prior review as is the dismissal of Key Project Personnel. Key Project Personnel are subject to annual evaluation and the continuation of their contract is subject to satisfactory performance. Any contract signed for Key Project Personnel shall be compliant with the national labour regulations or the ILO International Labour Standards (whichever is more stringent) in order to satisfy the conditions of IFAD's updated SECAP. Repeated short-term contracts must be avoided, unless appropriately justified under the Project's circumstances.

## **II. SECAP Provisions**

1. The Borrower shall carry out the preparation, design, construction, implementation, and operation of the Project in accordance with the nine standards and other measures and requirements set forth in the Updated Social, Environmental Climate Assessment Procedures of IFAD ("SECAP 2021 Edition"), as well as with all applicable laws and regulations to the Borrower/Recipient and/or the sub-national entities relating to social, environmental and climate change issues in a manner and substance satisfactory to IFAD. The Borrower/Recipient shall not amend, vary or waive any provision of the SECAP 2021 Edition, unless agreed in writing by the Fund in the Financing Agreement and/or in the Management Plan(s), if any.

2. For projects presenting high or substantial social, environmental and climate risks, the Borrower/Recipient shall carry out the implementation of the Project in accordance with the measures and requirements set forth in the Environmental and Social Impact Assessments (ESIAs)/Environmental, Social and Climate Management Frameworks (ESCMFs) and/or Resettlement Action Plans/Frameworks (RAPs/Fs) and Environmental, Social and Climate Management Plans (ESCMs) for high risk projects and Abbreviated ESIAs and/or Abbreviated RAP/F and ESCMs for substantial risk projects and Free, Prior and Informed Consent (FPIC) Plans, FPIC Implementation Plans, Indigenous Peoples Plans (IPPs), Pesticide Management Plans, Cultural Resources Management Plans and Chance Finds Plans] (the "Management Plan(s)"), as applicable, taken in accordance with SECAP requirements and updated from time to time by the Fund.

The Borrower shall not amend, vary, or waive any provision of the ESCMPs and Management Plan(s), unless agreed in writing by the Fund and if the Borrower/Recipient has complied with the same requirements as applicable to the original adoption of the ESCMPs and Management Plan(s).

3. The Borrower shall not, and shall cause the Executing Agency, all its contractors, its sub-contractors and suppliers not to commence implementation of any works, unless all Project affected persons have been compensated and/or resettled in accordance with the specific RAP/Abbreviated RAP, FPIC and/ or the agreed works and compensation schedule.

4. The Borrower shall cause the Lead Project Agency to comply at all times while carrying out the Project with the standards, measures and requirements set forth in the SECAP 2021 Edition and the Management Plan(s), if any.

5. The Borrower shall disclose the draft and final ESIA reports and all other relevant Management Plan(s) with Project stakeholders and interested parties in an accessible place in the Project-affected area, in a form and language understandable to Project-affected persons and other stakeholders. The disclosure will take into account any specific information needs of the community (e.g., culture, disability, literacy, mobility or gender).

6. The Borrower shall ensure or cause the Executing Agency and Implementing Agency to ensure that all bidding documents and contracts for goods, works and services contain provisions that require contractors, sub-contractors and suppliers to comply at all times in carrying out the Project with the standards, measures and requirements set forth in the SECAP 2021 Edition, ESCMPs and the Management Plan(s), if any.

7. The Borrower will ensure that a Project-level grievance mechanism is established that is easily accessible, culturally appropriate, available in local languages, and scaled to the nature of the Project's activity and its potential impacts to promptly receive and resolve concerns and complaints (e.g. compensation, relocation or livelihood restoration) related to the environmental and social performance of the Project for people who may be unduly and adversely affected or potentially harmed if the Project fails to meet the SECAP standards and related policies. The Project-level grievance mechanism needs to take into account indigenous peoples, customary laws and dispute resolution processes. Traditional or informal dispute mechanisms of affected indigenous peoples should be used to the greatest extent possible.

8. This section applies to any event which occurs in relation to serious environmental, social, health & safety (ESHS) incidents (as this term is defined below); labor issues or to adjacent populations during Project implementation that, with respect to the relevant IFAD Project:

- (i) has direct or potential material adverse effect;
- (ii) has substantially attracted material adverse attention of outside parties or create material adverse national press/media reports; or
- (iii) gives rise to material potential liabilities.

In the occurrence of such event, the Borrower shall:

- Notify IFAD promptly;
- Provide information on such risks, impacts and accidents;
- Consult with Project-affected parties on how to mitigate the risks and impacts;

- Carry out, as appropriate, additional assessments and stakeholders' engagements in accordance with the SECAP requirements; and
- Adjust, as appropriate, the Project-level grievance mechanism according to the SECAP requirements; and
- Propose changes, including corrective measures to the Management Plan(s) (if any), in accordance with the findings of such assessment and consultations, for approval by IFAD.

**Serious ESHS incident** means serious incident, accident, complaint with respect to environmental, social (including labor and community), health and safety (ESHS) issues that occur in loan or within the Borrower/Recipient's activities. Serious ESHS incidents can comprise incidents of (i) environmental; (ii) occupational; or (iii) public health and safety; or (iv) social nature as well as material complaints and grievances addressed to the Borrower/Recipient (e.g. any explosion, spill or workplace accident which results in death, serious or multiple injuries or material environmental contamination, accidents of members of the public/local communities, resulting in death or serious or multiple injuries, sexual harassment and -violence involving Project/Programme workforce or in relation to severe threats to public health and safety, inadequate resettlement compensation, disturbances of natural ecosystems, discriminatory practices in stakeholder consultation and engagement (including the right of indigenous peoples to free, prior and informed consent), any allegation that require intervention by the police/other law enforcement authorities, such as loss of life, sexual violence or child abuse, which (i) have, or are likely to have a material adverse effect; or (ii) have attracted or are likely to arouse substantial adverse attention of outside parties or (iii) to create substantial adverse media/press reports; or (iv) give, or are likely to give rise to material potential liabilities).

9. The Borrower shall ensure or cause the Executing Agency, Implementing Agency, contractors, sub-contractors and suppliers to ensure that the relevant processes set out in the SECAP 2021 Edition as well as in the ESCMPs and Management Plan(s) (if any) are respected.

10. Without limitation on its other reporting obligations under this Agreement, the Borrower shall provide the Fund with:

- Reports on the status of compliance with the standards, measures and requirements set forth in the SECAP 2021 Edition, ESCMPs and the management plan (if any) on a semi-annual basis - or such other frequency as may be agreed with the Fund;
- Reports of any social, environmental, health and safety incidents and/accidents occurring during the design stage, the implementation of the Project and propose remedial measures. The Borrower/Recipient will disclose relevant information from such reports to affected persons promptly upon submission of the said reports; and
- Reports of any breach of compliance with the standards, measures and requirements set forth in the SECAP 2021 Edition and the Management Plan(s) (if any) promptly after becoming aware of such a breach.

11. The Borrower shall fully cooperate with the Fund concerning supervision missions, midterm reviews, field visits, audits, and follow-up visits to be undertaken in accordance with the requirements of SECAP 2021 Edition and the Management Plan(s) (if any) as the Fund considers appropriate depending on the scale, nature and risks of the Project/Programme.

12. In the event of a contradiction/conflict between the Management Plan(s), if any and the Financing Agreement, the Financing Agreement shall prevail.

**GENERAL CONDITIONS FOR AGRICULTURAL DEVELOPMENT FINANCING**

## Logical framework

Results Hierarchy	Indicators				Means of Verification			Assumptions	
	Indicator Name	Baseline	Mid-term*	End target	Source	Freq.	Resp.		
<b>Outreach</b>	<b>CI 1 Persons receiving services promoted or supported by the project<sup>8</sup></b>								
	# total people	0	22,500	45,000	MIS	Monthly	PMU	Project implementation takes place as planned

## Integrated project risk matrix

<b>Risk Categories and Subcategories</b>	<b>Inherent</b>	<b>Residual</b>
<b>Country Context</b>	<b>Substantial</b>	<b>Moderate</b>
<b>Political Commitment</b>	<b>Substantial</b>	<b>Substantial</b>
<p>Risk(s): Lesotho held elections in October 2022 and a new three-party coalition is leading the government. The new administration is still trying to plan, organise and set-up delivery mechanisms. Several ministries have been reconfigured and the human capacity too, this process has produced some uncertainty in the short term that needs to be managed.</p>		
<p>Mitigations: At the macro level, the new government is broadly continuing with the same priorities as the previous government. At the portfolio level, the Lesotho country team will also proactively engage with the new government once it is installed. Dedicated meetings and briefing sessions with new decision makers will be sought and stronger integration with the UN system on engaging government will be adopted. While the potential of WaMCoP to respond to such a risk remains limited, the project will advance the following approaches:</p> <ul style="list-style-type: none"> <li>• Develop strong director level buy-in, as these bureaucrats often act as the institutional anchors in times of change.</li> <li>• The WaMCoP has carved out substantial space for enhanced private sector participation and implementation, therefore, providing a bulwark against some of the expected uncertainties in the political climate.</li> <li>• Contribute to policy development and capacity building under component 1 of the project.</li> </ul>		
<b>Governance</b>	<b>High</b>	<b>Substantial</b>
<p>Risk(s): The fragility and uncertainty in Lesotho is manifesting in weakened governance and policy coherence. Transparency International's Country Corruption Perception places Lesotho at high risk in terms of corruption (38/100). The 2020 Afro Barometer SDG scorecard also highlights a decline in trust amongst Basotho, in their own public institutions. Lesotho is equally undertaking a national reforms process that is geared towards improved governance and strengthening of democratic institutions. Several bills have been passed to parliament for their review.</p>		
<p>Mitigations: One of the embedded safeguards in the project against governance risks is the promotion of private sector participation and implementation in the project. The project is also working alongside key service providers (EFI) that contribute to enhanced service delivery and equally, institutional stability. Therefore, insulating the project from the macro-level governance issues flagged. Moreover, IFAD procurement rules and financial best practice will feature strongly to ensure rigorous compliance throughout the project life cycle. The recruitment of key staff, notably, the project director and financial manager, will be competitive and transparent, which should contribute to a culture of effective governance.</p>		
<b>Macroeconomic</b>	<b>Substantial</b>	<b>Moderate</b>

Risk(s): Growth in Lesotho has been subdued for several years, even prior to the pandemic in 2020. The macroeconomic outlook for the country is contingent on the performance of South Africa and the United States. However, transfers from the Southern African Customs Union (SACU) which account for around half of the total tax take, will continue to reduce due to the economic contraction in the SACU region. This will require further economic adjustments in Lesotho and could very well see limited counterpart financing.		
Mitigations: Notwithstanding the importance of counterpart finance from the Government of Lesotho, the project is taking strides to mobilise counterpart finance from the private sector. This should insulate the project to some degree from the uncertainties embedded in the macroeconomic climate of the country. Experience has also shown that on-going projects have considerable leverage to advocate government to advance outstanding counterpart finance and this experience will feed into the legal agreement and equally into discussions with government.		
<b>Fragility and security</b>	<b>Substantial</b>	<b>Moderate</b>
Risk(s): The Kingdom of Lesotho has an unfortunately long history with political instability and security concerns. The spectre of fragility and security should be considered high, especially as the country will see the 2022 general elections taking place later this year. Moreover, the country is highly vulnerable to frequent and severe weather events, particularly flooding and drought.		
Mitigations: The strong promotion of a Wool and Mohair Enterprise that underpins the wool and mohair value chain, is an attempt to create a robust pocket of stability within Lesotho's civil society landscape.		
<b>Sector Strategies and Policies</b>	<b>Moderate</b>	<b>Low</b>
<b>Policy alignment</b>	<b>Moderate</b>	<b>Low</b>
Risk(s): The policy environment surrounding WaMCoP is favourable, as the comprehensive national agricultural policy, the national strategic development plan, and the livestock development policy all underscore key tenants of the project. However, the wool and mohair sector is still not underpinned by a clear and predictable sectoral strategy and this does pose some degree of risk, as ad-hoc policy decisions (i.e., marketing regulations of 2018) have often been undertaken in the vacuum of clear policy orientation.		
Mitigations: Under component 1 of the project, there will be concerted effort in supporting a sectoral strategy that will underpin key interventions in the sector. The sectoral strategy will be evidence-based and will look to create greater strategic and policy coherence in the wool and mohair sub-sector. Moreover, it is envisioned that the Wool and Mohair Enterprise will also be a player that drives policy development and can engage with the government on substantive issues.		
<b>Policy development &amp; implementation</b>	<b>Moderate</b>	<b>Low</b>
Risk(s): Lesotho suffers from a deficit in policy coordination and a lack of financial support that ensures key targets are met. Policy		

formulation is also not based on scientific research, which often makes it a subjective exercise.		
Mitigations: The project will specifically look to intensify the support it provides to key sector actors in driving formidable policies, with accompanying implementation plans. The project will specifically champion, multi-stakeholder policy formulation and implementation accountability under improved value chain governance.		
<b>Environment and Climate Context</b>	<b>Substantial</b>	<b>Moderate</b>
<b>Project vulnerability to environmental conditions</b>	<b>Moderate</b>	<b>Low</b>
Risk(s): The environmental vulnerabilities for WaMCoP activities include erosion, which may increase due to cultivation on slopes and sheep rearing. This will lead to land degradation and possible siltation of water channels. The current soil fertility conditions entail increased use of agro-chemicals for the desired levels of fodder production, which will lead to diffuse sources of pollution in some locations. Discharge of poor-quality effluent from slaughter slabs and other wool and Mohair value chain processing will result in point sources of pollution at these sites.		
Mitigations: The risks resulting from environmental conditions will be managed through the capacity building of the smallholders in environmental management and efficient resource use, including agro chemicals, erosion control measures such as vegetated contours, water conservation and focus on rehabilitation of existing rangelands.		
<b>Project vulnerability to climate change impacts</b>	<b>Substantial</b>	<b>Moderate</b>
Risk(s): The main climate change risks to reaching the WaMCoP objectives include rising temperatures and rainfall variability with more intense rainfall in some areas, shorter rainy seasons, and potential droughts in some locations. High temperatures may lead to decreased yields and quality of fodder and degradation of grazing rangelands, increased pests and diseases incidences, poor drainage in low-lying areas and soil erosion that results in reduced water holding capacity and soil fertility.		
Mitigations: Climate change adaptation measures under WaMCoP include capacity building for the producers on husbandry activities and resource use efficiency, water use efficient irrigation systems. The infrastructure developed under WaMCoP will be climate resilient to improve water use efficiency and harvest rainwater for productive use.		
<b>Project Scope</b>	<b>Moderate</b>	<b>Low</b>
<b>Project relevance</b>	<b>Moderate</b>	<b>Low</b>
Risk(s): The risk is flagged as moderate due to the dynamic nature of the wool and mohair sector; however, the project has received extensive inputs from government and civil society representatives. There has also been alignment sought with government policies and IFAD internal frameworks.		
Mitigations: As indicated above the project has received extensive inputs from several officials spanning government, private and civil society sectors. Moreover, the project will go through a robust review cycle through the Public Sector Investment Committee (PSIC). Moreover, a key pillar of the project will see the "compacting" of value chain actors under a Wool and Mohair		

Enterprise , this should further contribute to an evolving “relevance” of the project, especially as the Wool and Mohair Enterprise will lead implementation of key activities.		
<b>Technical soundness</b>	<b>Low</b>	<b>Low</b>
Risk(s): WaMCoP will naturally build on the key lessons accumulated through the existing Wool and Mohair Promotion Project. However, The Wool and Mohair Enterprise and its key role in driving the project is a risk to be acknowledged. And naturally, a Wool and Mohair Enterprise that has a weak operational thrust in implementing selected activities, could undermine the effectiveness of the project.		
Mitigations: The Wool and Mohair Enterprise ( will receive a robust evaluation of its ability to act as an implementing entity and where need be, will be supported to ensure it is able to carry out certain functions. Moreover, an 18-month implementation plan coupled with clear contingency plan will serve as guiding frameworks in the project design report and related annexes.		
<b>Institutional Capacity for Implementation &amp; Sustainability</b>	<b>Moderate</b>	<b>Low</b>
<b>Implementation arrangements</b>	<b>Moderate</b>	<b>Low</b>
Risk(s): The ministerial level risk here is quite minimal, as the line ministry is currently implementing two IFAD-supported projects. However, the ministry does have a deficit in terms of comprehensive institutional capacity and human resources that allow it to effectively deliver against its objectives. A risk related to the Wool and Mohair Fund-Wool and Mohair Enterprise set-up is the delay in its establishment. There is also a risk that there could be a delay in establishing the input supply-pre financing system through the revolving fund		
Mitigations: WaMCoP has been conceptualised in such a manner, that the envisioned risk is managed. These necessary steps embedded in the project’s concept include: <ul style="list-style-type: none"> <li>• An efficient PCU that will undertake all day-to-day operational functions related to the project</li> <li>• A steering committee that will strengthen oversight and provide guidance when called upon</li> <li>• The Line Ministry will be further capacitated, especially as the project intends to advance a sectoral strategy that will advance the wool and mohair value chain.</li> </ul> With respect to the Wool and Mohair Fund-Wool and Mohair Enterprise delays, the following measures will be introduced: <ul style="list-style-type: none"> <li>• The Lesotho National Development Corporation will be requested to take over key activities related to the financing of the value chain, in line with their capabilities and strengths.</li> <li>• The project coordination unit lead key component 2 related activities, namely the roll-out of the certification system and supporting the digital platform.</li> <li>• The Wool and Mohair Fund-Wool and Mohair Enterprise model will be evaluated in line with the phased approach and where necessary, a project level restructuring will take place to account for the delays. This might involve changing the implementation arrangements and empowering LNDC and the PCU to lead project implementation and making the Wool and Mohair Fund-</li> </ul>		

<p>Wool and Mohair Enterprise set-up a key outcome of the project.</p> <p>In the event there are delays in establishing the input supply-pre financing system through the revolving fund, the following measures will be applied:</p> <ul style="list-style-type: none"> <li>The PCU and LNDC will sign a performance agreement contract that will see LNDC manage the revolving fund, while reporting to the project coordination unit. This will aim to fast-track any delays experienced if the input supply mechanism does experience substantial delays.</li> </ul> <p>These mitigation measures strongly align with discussions with LNDC, in particular, its role as a fall-back option in the project.</p>		
<b>M&amp;E arrangements</b>	<b>Moderate</b>	<b>Low</b>
<p>Risk(s): This risk emanates from the executing agency's M&amp;E processes and systems are weak or inefficient, resulting in a limited ability to monitor, validate, analyse, and communicate results, capture lessons, and adjust implementation to seize opportunities and take corrective actions in a timely manner.</p>		
<p>Mitigations: WaMCoP will be staffed by an M&amp;E officer, M&amp;E assistant, and KM and communication officer. A robust M&amp;E system will be linked to the project's Management Information System (MIS) and data on outcomes and impact will be collected through a set of three surveys (baseline, mid-line, and completion). Moreover, the WhatsApp yearly surveys piloted by ROLL, will be integrated into WaMC-P and this will provide another layer of assessing the delivery of project services and related lessons learned.</p> <p>The digital platform will also provide another critical feedback loop that will inform the decision making of the project and fundamentally, assist in taking corrective measures if the occasion arises.</p>		
<b>Procurement</b>	<b>Substantial</b>	<b>Moderate</b>
<b>Legal and regulatory framework</b>	<b>High</b>	<b>Moderate</b>
<p>Risk(s): No procurement law exists, as the procurement framework consists of the 2007 Public Procurement Regulations and Procurement Manual. No national standard bidding documents currently exist. There is no reliable record/database for either monitoring procurement management or tracking procurement activities and methods used. Public access to procurement information is insufficient.</p>		
<p>Mitigations: In 2018, the government released "The Public Procurement Policy", the first step towards a new and more comprehensive and efficient public procurement framework. Specifically, the government set the development of public procurement policies, legislation, guidelines and processes as a primary objective. As of June 2022, no progress in the rolling out of the new public procurement framework was noticed. As a transitional measure until an updated and complete national public procurement framework is rolled out in the country, procurement under WaMCoP will follow IFAD's project procurement framework, resulting in the full adoption of IFAD's Project Procurement Guidelines, Project Procurement Handbook and Standard Procurement Documents. WaMCoP will be set up on the Contract Monitoring Tool (CMT) function of ICP, thus allowing</p>		

<p>for efficient tracking of contracts, including data on what has been procured, value of procurement and identity of suppliers, contractors, consultants and service providers. IFAD will periodically carry out a review of the quality of data inserted in the CMT to ensure it is accurate and up to date. IFAD can strongly encourage government through policy dialogue to accelerate the completion of the PPAD website, and it is recommended that it do so through the COSOP consultations with the government. Once completed, the PPAD website will grant full access to information concerning audit reports, compliance reports, procurement statistics, standard bidding documents, complaints &amp; appeals, blacklisted firms, annual procurement plans, bid notices and contract awards.</p>		
<p><b>Accountability and transparency</b></p>	<p><b>Substantial</b></p>	<p><b>Moderate</b></p>
<p>Risk(s): the country lacks publicly available information on the procurement complaints management, specifically concerning cases being heard and applicable procedures. While Lesotho presents a medium Country Corruption Perception Index Score (38/100), the local authority responsible for investigating corruption allegations is not independent from the government and no systematic debarment system is in place. Furthermore, there is an unclear relationship between the procurement units, the Procurement Policy, and Advice Division (PPAD) and the Directorate on Corruption &amp; Economic Offence (DCEO), which is Lesotho’s anti-corruption authority. The risk is that accountability, transparency, and oversight arrangements could be inadequate to safeguard the integrity of project procurement and contract execution, leading to potential cases of mis procurement and unintended use of funds.</p>		
<p>Mitigations: The Revised IFAD Policy on Preventing Fraud and Corruption in its Activities and Operations shall apply to all projects, vendors and third parties, in addition to the relevant national anticorruption and fraud laws. Pursuant to said Policy, IFAD has the right to sanction firms and individuals including by declaring them ineligible, either indefinitely or for a stated period of time, to participate to any IFAD-financed and/or IFAD-managed activity or operation. IFAD also has the right to unilaterally recognize debarments by any of the International Financial Institutions that are members to the Agreement for Mutual Enforcement of Debarment Decisions if such debarments meet the requirements for mutual recognition under the Agreement for Mutual Enforcement of Debarment Decisions. IFAD can strongly encourage government through policy dialogue to accelerate the adoption of the Public Procurement Bill, 2018, which provides the establishment of an autonomous Public Procurement Authority tasked with debarring suppliers, contractors, or consultants from participating in public procurement/ IFAD/ All years of project implementation. IFAD can also strongly encourage government through policy dialogue to publicly share information concerning cases being heard by the Procurement Tribunal, as well as a copy of the rules governing the proceedings of the Procurement Tribunal, and it is recommended that it do so through the COSOP consultations with the government.</p>		
<p><b>Capability in public procurement</b></p>	<p><b>Moderate</b></p>	<p><b>Low</b></p>

<p>Risk(s): The recruitment process of project staff may not guarantee the standards of competition, fairness and transparency required by IFAD. The selected staff may need capacity buildings in donor-funded procurement and the IFAD project procurement framework.</p>		
<p>Mitigations: IFAD will monitor the recruitment process of WaMCoP's procurement staff, to ensure competition, fairness and transparency. The Procurement Officer and Procurement Assistant to be invited to the BUILDPROC, the procurement certification programme launched by IFAD and the ITCILO. The BUILDPROC focuses on the integration of safeguards into procurement and on challenges faced by borrowers/recipients in their local markets. IFAD will provide in-person and remote trainings on its project procurement framework and international procurement practice from the start-up phase of WaMCoP. The Procurement Unit, Tender Panel and Technical Units of MAFS should attend said trainings together with the relevant members of the PMU.</p>		
<p><b>Public procurement processes</b></p>	<p><b>Low</b></p>	<p><b>Low</b></p>
<p>Risk(s): Currently, foreign companies are required to pay cash to collect bidding documents from the procurement office. There is a risk that procurement plans will be submitted for IFAD's no-objection late, that is when the corresponding financial year has already begun. Additionally, it has been observed that PMUs tend to react to IFAD's comments to the procurement plan with considerable delay, which further delays IFAD's No-Objection. Procurement staff may not be adequately or timely involved during the planning phase of the AWPB. One key risk that affected the earlier IFAD-funded project implemented by MAFS (WAMPP) was the expiration of the bid validity period before contract award, which resulted in a number of procurement processes having to be repeated. The contracts awarded following an ICB process are advertised on UNDB online. For other procurement methods, advertising is not always done. Another key risk for the project is contract administration and management. In fact, WAMPP's PCU exhibited instances of weak contract management, causing a number of contracts to expire before completion and without a timely extension. This was further exacerbated by WAMPP failing to keep contract data updated on the CMT. Therefore, this may also constitute a risk for WaMCoP. Substantial delays with works contracts have been noticed with WAMPP, with contractors abandoning the construction site in some cases. For WAMPP, record retention was found to be needing improvement with reference to procurement processes carried out by entities other than the PCU (e.g. (e.g., the LNWMGA). This may constitute a risk for WaMCoP as well, considering that the identified implementing partners will carry out procurement process directly.</p>		
<p>Mitigations: WaMCoP will ensure that access to bidding documents by foreign firms is also available online. To that end, WaMCoP will set up its own website, where a GPN and tender opportunities will be advertised. The provisions of the financing agreement stating that the Lead Project Agency shall submit a draft AWPB and procurement plan to IFAD no later than sixty days before the beginning of the relevant project year must be enforced. The calendar of IFAD's implementation support missions</p>		

<p>could be adjusted to precede the project’s planning period, thus providing timely support and not impeding the planning process. Additionally, the PMU will be encouraged to be more proactive in addressing IFAD's comments to the procurement plan and to implement simple upgrades as soon as possible, even pending more serious matters that will require an overhaul of the plan. This will allow the PMU to receive a timely IFAD's No-Objection to the procurement plan, while working on further improving the same during the financial year. The procurement unit must be adequately consulted during the planning phase before the beginning of each financial year. This will allow the procurement unit to provide feedback on whether procurement activities are achievable within the targets of the AWPB. The PIM will define the rules of engagement for procurement staff during the annual planning process. Given the delays often affecting evaluation of bids, the PMU of WaMCoP will be cautioned to closely monitor the bid validity period of all ongoing procurement processes. This will also be captured in the PIM. WaMCoP will publicly advertise all contract award on its website. The PIM of WaMCoP will clearly state responsibilities for contract management and the procurement unit must ensure that each contract signed clearly mentions the assigned contract manager. IFAD’s Contract Monitoring Tool (CMT) will be deployed from the start-up phase of the project and the ESA Procurement Team will follow up with the procurement team to ensure that contract data inserted therein is accurate and up to date. For civil works, the contract manager will be the project engineer, who will be competitively recruited. The PIM will also encourage the PMU to engage in formal correspondence with contractors whenever performance delays occur. Additionally, the PIM will require the PMU to apply all remedies available under the contract and to timely extend contracts about to expire when the related works are still outstanding. The PIM of WaMCoP will clearly state that copies of all contract administration records will have to be kept at the PMU offices, regardless of the implementing agencies. To that end, adequate filing space must be allocated at the PMU offices.</p>		
<b>Financial Management</b>	<b>Substantial</b>	<b>Moderate</b>
<b>Organization and staffing</b>	<b>High</b>	<b>Moderate</b>
<p>Risk(s): The Lead Project Agency, MAFS, has previously implemented some IFAD -funded projects. The LPA will establish a PMU to manage component 1 and component 3 activities while a Wool and Mohair Fund and Wool and Mohair Enterprise will be formed to lead Component 2 activities. Considering that there will be multiple implementing agencies with fiduciary responsibilities, there is a risk of complexity in reporting lines and logistical set up which may lead to inadequate FM organisational arrangements.</p>		
<p>Mitigations: One Finance Manager and one Accountant will be competitively hired at the PCU level. Additionally, one Accountant will be competitively recruited for the Wool and Mohair Fund/Company to support the Trust’s technical/operational staff, overseeing the financial transactions and will have a functional reporting line to PMU Finance Manager. FM capacity on IFAD’s practices will be built through regular training courses for project staff.</p>		
<b>Budgeting</b>	<b>Moderate</b>	<b>Low</b>

Risk(s): Low budget credibility arising during implementation due to unrealistic estimates and un-clarity in roles and responsibilities in the planning process. Risk in timely budget submission to IFAD due to lengthy consolidation processes		
Mitigations: Start drafting and the budget in the 3rd quarter of each year to allow for timely consolidation and sharp scrutiny for realistic estimates. Effective budget-module installed to monitor deviations. WaMCoP PCU to manage the process so that final revisions are agreed upon timely to facilitate PCU's submission of final consolidated AWPB within 60 days before the beginning of each year.		
<b>Funds flow/disbursement arrangements</b>	<b>High</b>	<b>Moderate</b>
Risk(s): Risk in timely flow of resources to the Wool and Mohair Fund/Enterprise due to the complex organizational structure. Also, irregular submission of WA may disrupt access to funds, leading to cross-financing practices and delay in implementation.		
Mitigations: WaMCoP PCU's quarterly submission of Interim Financial Reports (IFR) inclusive of cash forecast for the next two quarters will ensure prompt liquidity phasing. Implementing partners, through memorandum of understanding (MoUs) and strong reporting framework, will secure that fund financed by IFAD will flow to beneficiaries for the intended purposes of the project and that any residual funds will be returned to IFAD through WaMCoP PCU.		
<b>Internal controls</b>	<b>Substantial</b>	<b>Moderate</b>
Risk(s): Understaffed internal audit unit at the LPA unable to undertake regular internal audits. Also, the organizational set up with cross reporting lines may pose challenges to the internal control flow.		
Mitigations: Use of external assurance service providers to conduct WaMCoP 's internal audits twice a year supervised by Project Steering Committee (PSC). Performance audits for the Wool and Mohair Fund and Wool and Mohair Enterprise performed on six-monthly basis by reputable external assurance audit services provider supervised by the Office of Auditor General (OAG) to report on key operational milestones including evidence of strong management and proper functioning of the Wool and Mohair Fund and Wool and Mohair Enterprise . Finalizing the first draft of the PIM, including the finance manual section, before implementation start WaMCoP PIM/FMM with clarity on the financial coordination roles by the PCU which will include: (i) budget planning, preparation and monitoring in close coordination with Finance Manager and M&E Specialist, (ii) budget execution and treasury management, (iii) financial reporting to Government and IFAD, (iv) accounting software implementation and customization, (v) coordination of internal/external audit, (vi) compliance with IFAD's processes and procedures and (vii) securing FM operational continuity relating the opening and the closing of projects.		
<b>Accounting and financial reporting</b>	<b>High</b>	<b>Moderate</b>
Risk(s): Lesotho Government currently uses Integrated Information Management Systems (IFMIS) for financial accounting and reporting. IFMIS can provide adequate audit trail, regulate access control, and budget vs actuals reports. However,		

donor project accounting is done outside IFMIS because of operational issues such as incomplete records and unreconciled items. Need to accurately record and account for in-kind contributions		
Mitigations: Timely contracting for an off-the-shelf accounting software with the adoption of the chart of accounts of the Ministry of Finance so that once the operational issues of IFMIS are resolved, the project can transition to IFMIS. The software shall have an effective budget module and reporting capacity aligned to IFAD's minimum requirements at the PCU and for all implementing agencies with fiduciary responsibilities. WaMCoP PCU prepares consolidated financial reports for the purposes of monitoring and reporting to IFAD (IFRs and AFS).		
<b>External audit</b>	<b>Moderate</b>	<b>Low</b>
Risk(s): Delayed /inadequate external scrutiny of WaMCoP-P. Also, WaMCoP-P will work with private sector implementing agencies with fiduciary responsibilities (Wool and Mohair Fund/ Enterprise and Ethical Fashion) which will manage some key aspects of the project. According to the Office Auditor General, Wool and Mohair Fund and Companies with less than 50% Government shareholding are not subject to OAG audit.		
Mitigations: Early engagement of OAG for exploring availability/capacity to include WaMCoP into yearly OAG work plan. Wool and Mohair Fund Company and Ethical Fashion to be audited by a private audit firm but supervised by the OAG.		
<b>Environment, Social and Climate Impact</b>	<b>Moderate</b>	<b>Low</b>
<b>Biodiversity conservation</b>	<b>Moderate</b>	<b>low</b>
Risk(s): The expansion of agricultural activities, e.g. establishment of sheep studs, sheep sheds and improvements of grazing areas is likely to have adverse impacts on biodiversity conservation depending on the current use of the land to which the expansion will occur. Additional risks also result from the infrastructure development that will also potentially entail land use change and clearance of vegetation.		
Mitigations: The expansion of agriculture areas will target degraded areas that can be rehabilitated as much as possible. The expansion and infrastructure development will be in non-sensitive areas and rehabilitation will be promoted in areas where vegetation will be removed.		
<b>Resource efficiency and pollution prevention</b>	<b>Moderate</b>	<b>Low</b>
Risk(s): Activities targeting improved productivity will result in increased use of agro-chemicals and water resources for the different value chains. The increased use of agro chemicals will result in point pollution for the land and some water sources.		
Mitigations: The capacity building for the smallholders will include optimal use of agrochemicals with safe handling and disposal. Water resource use efficiency will be promoted through the soil and water conservation activities as well as the efficient irrigation systems.		
<b>Cultural heritage</b>	<b>Low</b>	<b>Low</b>

Risk(s): Natural features, antics and relics may be destroyed in the project area e.g., during excavations for foundations for agriculture infrastructure.		
Mitigations: (i) Conduct feasibility studies, fencing, introduce proper antiquity education programmes; (ii) Come up with a Physical cultural resources' management plan; (iii) Establish procedure for chance finds.		
<b>Indigenous Peoples</b>	<b>Low</b>	<b>Low</b>
Risk(s): Lesotho consists almost entirely of the Basotho people (99.7%) and the other subgroups are poorly defined and essentially part of the Basotho people.		
Mitigations: All people (Basotho) to be treated equally regardless of possible different ethnic origin.		
<b>Community health and safety</b>	<b>Low</b>	<b>Low</b>
Risk(s): Workers (i.e., shearing shed workers) contracting diseases at work. Risks are also likely to result from zoonotic diseases considering that WaMCoP is a livestock intervention.		
Mitigations: To mitigate the risks the following approaches will be adopted: <ul style="list-style-type: none"> <li>Promote safe work through Standard Operating Procedures, training and awareness raising</li> <li>Encourage and enforce the use of PPE</li> <li>Supporting first-aid box and to provide minimal level of training;</li> <li>Enlisting the names and numbers of village doctors in nearby community places/shops;</li> <li>Encourage regular workplace cleaning</li> </ul>		
<b>Labour and working conditions</b>	<b>Moderate</b>	<b>Low</b>
Risk(s): Poor working conditions at sheep sheds.		
Mitigations: <ul style="list-style-type: none"> <li>Ensure contractors adopt principles of decent work and the associated work programme in Lesotho.</li> <li>Monitor execution of cash-for-work programmes</li> <li>Ensure grievance mechanisms are known and accessible to workers</li> <li>Promotion of nutrition-sensitive meals during working hours</li> <li>Supporting first-aid box and to provide minimal level of training</li> </ul>		
<b>Physical and economic resettlement</b>	<b>Low</b>	<b>Low</b>
Risk(s): No physical resettlement is envisaged. However economic resettlement may occur if: <ul style="list-style-type: none"> <li>If the project embarks on establishing additional sheep and goats breeding studs, land consolidation and/or clearing of bona-fide occupants of government land could occur.</li> <li>If the project pilots larger fodder production and land-consolidation (either at sharecropping or through formal block-farm building, this could also trigger land-re-allocation in principle.</li> <li>Depending on the types of activities that will be employed, the improved grazing rangeland management may result</li> </ul>		

in deprivation of members of the community from accessing some resources.		
Mitigations: Enforce the implementation of the Resettlement Plan Framework. Avoid any subprojects that will entail any physical displacement of people. Minimise any potential economic displacements.		
<b>Greenhouse gas emissions</b>	<b>Low</b>	<b>Low</b>
Risk(s): Emissions may emanate from accumulations of Sheep and Goats dung ( <b>nitrous oxide</b> ) if not properly managed especially at sheep and goats studs.		
Mitigations: Use of sheep and goats' dung as farm manure since it gets assimilated into the soils and broken down by bacteria if it is spread out in the fields.		
<b>Vulnerability of target populations and ecosystems to climate variability and hazards</b>	<b>Substantial</b>	<b>Moderate</b>
Risk(s): Most of the WaMCoP target beneficiaries depend on rain-fed agriculture for their livelihoods. This dependency increases their vulnerability to variable climate. Some of the WaMCoP locations are also water stressed, which increases the vulnerability of the ecosystems. There is also the risk of accelerating land degradation and the total loss of topsoil on sloping rangelands.		
Mitigations: CSA investments will reduce the vulnerability to climate variability. The CSA investments that will reduce the risks include the following: <ul style="list-style-type: none"> <li>• Building capacity and developing Knowledge and decision support systems to manage the risks.</li> <li>• Efficient water management including use of alternative water sources to contribute to addressing water stress and incidents of drought.</li> <li>• Establishing off farm enterprises to supplement livelihoods for the farmers.</li> <li>• Shifting crop calendars to fit into changing climate.</li> <li>• Enhance community level irrigation to bolster fodder production</li> <li>• Development of new crop varieties and technologies to support farming.</li> <li>• Investing in disaster risk reduction and management (DRR/M) and improved monitoring and early warning systems.</li> </ul> To manage the risk of further land degradation, WaMCoP will partner with ROLL to: <ul style="list-style-type: none"> <li>• Invest in proper land use planning and management including greening, afforestation, and rangeland management.</li> <li>• Through the land management plans of the responsible standards use that as an operational entry point support institutional structure, such as grazing associations to better manage the rangelands.</li> <li>• Support the implementation of the rangeland management act and the enforcement of grazing rules and related fines</li> </ul>		
<b>Stakeholders</b>	<b>Moderate</b>	<b>Low</b>
<b>Stakeholder engagement/coordination</b>	<b>Low</b>	<b>Low</b>

<p>Risk(s): Envisioned risks relate to the following:</p> <ul style="list-style-type: none"> <li>• level of participation of all relevant stakeholders during project planning and designing</li> <li>• lack of ownership of the project by the locals.</li> </ul>		
<p>Mitigations:</p> <ul style="list-style-type: none"> <li>• All relevant stakeholders should be continuously involved and attend meetings from planning to implementation.</li> <li>• Integrate gender sensitive approaches into all activities including training.</li> <li>• Inform and encourage beneficiaries to use project's SEA-Grievance and Redress Mechanism (GRM) to report any misconduct.</li> <li>• Conduct all-encompassing and continuous Stakeholder Engagement to keep all stakeholder abreast with the project progress.</li> </ul>		
<b>Stakeholder grievances</b>	<b>Moderate</b>	<b>Low</b>
<p>Risk(s): Grievance redress mechanism not availed to project stakeholders. And channels for lodging complaints not clarified to stakeholders</p>		
<p>Mitigations: GRM should be well publicised to all potential PAP.</p> <ul style="list-style-type: none"> <li>• The access point for impacted/concerned people should be as closest to them as possible and at all WaMCoP offices.</li> </ul>
