Recommendation for approval

The Executive Board is invited to approve the recommendation for the proposed financing to the Socialist Republic of Viet Nam for the Agriculture, Farmers and Rural Areas Support Project in Gia Lai, Ninh Thuan and Tuyen Quang Provinces, as contained in paragraph 36.

Proposed loan and grant to the Socialist Republic of Viet Nam for the Agriculture, Farmers and Rural Areas Support Project in Gia Lai, Ninh Thuan and Tuyen Quang Provinces

I. The project

A. Main development opportunity addressed by the project

1. The Agriculture, Farmers and Rural Areas Support Project in Gia Lai, Ninh Thuan and Tuyen Quang Provinces will assist in establishing the policy framework and institutional arrangements and in developing the capacities and approaches necessary for the implementation of the Government of Viet Nam’s new rural development policy, known as Tam Nong or Resolution 24 on Agriculture, Farmers and Rural Areas. The project will support the provinces covered in carrying out much-needed pro-poor institutional reforms, such as the more decentralized, grass-roots, bottom-up, participatory approaches to agricultural development, and wider engagement of the private sector.

B. Proposed financing

Terms and conditions

2. It is proposed that IFAD provide to the Socialist Republic of Viet Nam a loan in the amount of SDR 31.5 million (equivalent to approximately US$48.04 million), on highly concessional terms, and a grant in the amount of SDR 0.2 million (equivalent to approximately US$0.31 million) to help finance the Agriculture, Farmers and Rural Areas Support Project in Gia Lai, Ninh Thuan and Tuyen Quang Provinces. The loan will have a term of 40 years, including a grace period of 10 years, with a service charge of three fourths of one percent (0.75 per cent) per annum.

Relationship to the IFAD performance-based allocation system (PBAS)

3. The project fits within the allocation defined for Viet Nam under the PBAS of US$68.75 million over the 2010–2012 allocation cycle.

Relationship to national medium-term expenditure framework criteria

4. The project is aligned with the provincial medium-term expenditure framework, as laid out in the provincial socio-economic development plans (SEDP).

Country debt burden and absorptive capacity of the State

5. Gross domestic product (GDP) in 2009 was equivalent to US$92.6 billion. In 2009, real growth was 5.4 per cent. The country’s external debt represents an estimated 32.8 per cent of GDP in 2009.

---

1 Resolution No. 24-NQ/TW, dated 28 October 2008, of the 7th Congress by the Session X Central Executive Committee on Agriculture, Farmers and Rural Areas.
Flow of funds
6. The borrower/recipient shall open four designated accounts in United States dollars, one for each province and one for the grant, in bank(s) acceptable to IFAD, in order to receive grant and loan funds. Additionally, each province shall open a project account at the provincial treasury, to be maintained in local currency.

Supervision arrangements
7. IFAD will directly supervise the project.

Exceptions to IFAD General Conditions for Agricultural Development Financing and operational policies
8. No exceptions are foreseen.

Governance
9. Governance in the project provinces will be enhanced through the institutionalization of market-oriented, results-based, participatory planning and implementation processes at the village level, and through increasing capacity for transparency and accountability for the effective use of public resources at the commune, district and province levels.

C. Target group and participation

Target group
10. The targeted group in the three provinces is constituted by poor households and ethnic minority households (including both the poor and the near-poor).

Targeting approach
11. The project is in line with the IFAD Policy on Targeting. Through implementation of the proposed institutional reforms, the project will mainstream concepts of pro-poor development. The inclusion of the poor, ethnic minority groups, and particularly women, in targeted value chains will be a specific objective of the project. Common interest groups and collaborative groups will consist of a mix of poor and better-off members to enhance opportunities and access to learning for poorer households. Financial support provided through commune development funds (CDFs) will be based on the specific interests of the poor, ethnic minorities and women.

Participation
12. Participation in the project will be enhanced by the following: (i) informed participation: awareness-raising activities will be carried out in local languages, utilizing materials appropriate for both literate and non-literate ethnic minorities and poor households; (ii) participatory rural appraisal: within villages, processes of participatory rural appraisal will include self-assessment and poverty-ranking exercises to allow identified subgroups of the poor, ethnic minorities and women to be consulted in separate forums so that their needs and options can be prioritized before village development plans are drawn up; (iii) village development boards: development boards will be set up in villages to ensure that selected activities (productive investments, training and extension) are reflected in the commune SEDP; and (iv) participatory monitoring and social audit: the monitoring and evaluation system will specifically incorporate annual household surveys and social audits, whereby representatives of the poor, ethnic minorities and women will be consulted to provide insights into the performance of the project.

D. Development objectives

Key project objectives
13. The goal of the project is to improve the quality of life for rural people, with a particular focus on those living in the most disadvantaged areas (as described in the Policy on Agriculture, Farmers and Rural Areas). The objective is to increase the sustainable participation in economic activities of 73,800 ethnic minority and rural poor households living in Gia Lai, Ninh Thuan and Tuyen Quang Provinces.
Policy and institutional objectives
14. The project seeks to: (i) improve the policy and institutional framework for
decentralization; (ii) increase and strengthen private-sector engagement in rural
areas and agriculture; and (iii) expand inclusion of the rural poor, particularly ethnic
minorities, in local planning, decision-making and development processes.

IFAD policy and strategy alignment
15. In line with the country strategic opportunities programme 2008-2012, the project
will target the poor, particularly ethnic minorities in upland rural areas. The project is
aligned with IFAD’s corporate priorities with regard to the promotion of equitable
market linkages, improved agricultural technologies and effective production
services.

E. Harmonization and alignment
Alignment with national priorities
16. The project will support the Tuyen Quang, Gia Lai, and Ninh Thuan provinces in their
implementation of Tam Nong and, more specifically, the policy’s newly articulated
sector goals, which require a series of institutional reforms, new strategies and
policy frameworks.

Harmonization with development partners
17. The project steering committee is the best platform for coordinating the sharing of
lessons at the provincial level. The provincial SEDP processes will further provide an
important mechanism for harmonizing practices and sharing knowledge.

F. Components and expenditure categories
Main components
18. The project has three components: (i) institutional strengthening for the
implementation of pro-poor initiatives under Tam Nong; (ii) promotion of pro-poor
value chains; and (iii) commune market-oriented socio-economic development
planning and implementation.

Expenditure categories
19. There are seven expenditure categories: (i) vehicles, equipment and materials (9 per
cent); (ii) civil works (0.4 per cent); (iii) training, courses, workshops, technical
assistance and studies (19 per cent); (iv) commune development fund (61 per
cent); (v) pro-poor development fund (7 per cent); (vi) financial services (0.6 per
cent); and (vii) operations and maintenance (3 per cent).

G. Management, implementation responsibilities and partnerships
Key implementing partners
20. The implementing partner for the first component is the Department of Planning and
Investment in each province; for the second component, the Department of
Agriculture and Rural Development in each province; and for the third, the District
People’s Committees in each district.

Implementation responsibilities
21. The responsibilities of each implementing partner include: (i) preparing a component
annual workplan and budget (AWP/B); (ii) coordinating the co-implementing
agencies in carrying out the AWP/B; and (iii) preparing quarterly progress reports on
component implementation for submission to the project coordination unit.’

Role of technical assistance
22. Technical assistance will be required in the following areas: (i) training in market-
oriented business planning; (ii) value chain analysis, action plan development and
market information development, during the initial years of the project;
(iii) development of appropriate training packages and extension materials;
(iv) preparation and vetting of proposals submitted by the Pro-poor Agribusiness
Fund; and (v) training of trainers for credit officers at the Vietnam Bank for Social Policies and Agribank.

**Status of key implementation agreements**
23. At present, no implementation agreements are available.

**Key financing partners and amounts committed**
24. The total project cost is US$65.36 million over five years. The sources of financing are IFAD (74.0 per cent), Viet Nam (16.6 per cent); beneficiaries (9.4 per cent).

**H. Benefits and economic and financial justification**

**Main categories of benefits generated**
25. About 73,800 households will benefit directly from the project and 58,800 households will benefit indirectly in 117 selected communes of Tuyen Quang, Gia Lai and Ninh Thuan provinces. Of the total beneficiary households, 90 per cent are ethnic minorities and 46 per cent are poor households.

**Economic and financial viability**
26. The economic internal rate of return generated by the project is estimated at 20 per cent.

**I. Knowledge management, innovation and scaling up**

**Knowledge management arrangements**
27. Knowledge products include documentation of good practices, annual impact surveys and data analysis, and media products. The main actors include the Department of Cooperatives and Rural Development and International Cooperation Department of the Ministry of Agriculture and Rural Development, the Institute of Policy and Strategy for Agriculture and Rural Development, the project knowledge management officers, and monitoring and evaluation officers, the Ministry of Planning and Investment and the IFAD office in Hanoi.

**Development innovations that the project will promote**
28. Innovations promoted by the project include engagement of private-sector actors as stakeholders in the rural development process, adoption of a pro-poor value chain approach by Government, and differentiated strategies for “pre-market” and “market-ready” communes.

**Scaling-up approach**
29. At the time of the mid-term evaluation, an initial analysis will be carried out to determine the costs and benefits, comparative efficiencies, effectiveness, possibilities for achieving economies of scale, and institutional requirements for implementing the project model. Based on the results of this assessment, the project strategy may be adapted over the remainder of the project duration; if the project model is found to be effective and efficient, plans for scaling up will be discussed.

**J. Main risks**

**Main risks and mitigation measures**
30. The project faces three main risks: (i) lack of understanding of market-oriented approaches to public investment planning; (ii) limited capacity for developing and strengthening pro-poor value chains; and (iii) at the commune level, limited capacity to carry out procurement, financial management, quality control and supervision, operations and maintenance for the CDF schemes. The planned mitigation measures include: (i) investing in capacity-building in the first year to build a solid foundation for effective planning and resource management; (ii) engaging in a “learning-by-doing” process to support delivery of value chain development activities; and (iii) drafting a CDF manual/guidelines before any CDF disbursements and obtaining clear guidance for commune development boards at the initial stage of CDF implementation.
Environmental classification
31. Pursuant to IFAD’s environmental assessment procedures, the project has been classified as a Category B operation in that it is not likely to have any significant negative environmental impact.

K. Sustainability
32. The project is to be implemented by existing line agencies, with institutional strengthening, training and capacity-building to be provided, as needed. Broad-based private-sector development will be sought to ensure that activities designed to generate rural household income and assets for the poor are pursued.

II. Legal instruments and authority
33. A project financing agreement between the Socialist Republic of Viet Nam and IFAD will constitute the legal instrument for extending the proposed financing to the borrower/recipient. A copy of the negotiated financing agreement is attached as an annex.

34. The Socialist Republic of Viet Nam is empowered under its laws to receive financing from IFAD.

35. I am satisfied that the proposed financing will comply with the Agreement Establishing IFAD and the Lending Policies and Criteria.

III. Recommendation
36. I recommend that the Executive Board approve the proposed financing in terms of the following resolution:

RESOLVED: that the Fund shall make a loan on highly concessional terms to the Socialist Republic of Viet Nam in an amount equivalent to thirty-one million five hundred thousand special drawing rights (SDR 31,500,000), and upon such terms and conditions as shall be substantially in accordance with the terms and conditions presented herein.

### Component 1: Institutional Strengthening for the Implementation of Pro-Poor Initiatives under Tam Nong

| OUTCOMES: Policy and institutional environment strengthened to carry out effective and sustainable pro-poor market-oriented innovations with a focus on ethnic minorities, and to engage the private sector in the implementation of Tam Nong⁴ (GOVERNMENT PLANNING) | 25% increase in the number of agribusiness related private sector investment in project areas⁵ MOP-SEDP approach mainstreamed into DPI’s annual planning and budgeting process and integrating government resources at district and commune levels by EOP | PCI Website, provincial budgets, annual commune budgets, approved grants for CDF and APF, coordination meeting minutes | Improved governance, additional private sector investment, decentralization of rural investment budgets and improved multi-sectoral coordination will lead to specific opportunities for expanded economic engagement of targeted impact groups. |

### Component 2: Promotion of Pro-Poor Value Chains

| OUTCOMES: Demand driven, value chain focused services (public and private) available for connecting poor, ethnic minority households to market opportunities (VALUE CHAINS) | 20% increase in value of targeted value chain commodities marketed annually per district;⁶ 50% percent of targeted households have at least a 25% increase in income from targeted value chain sources. | DARD production monitoring statistics, annual household surveys, CDF grant documentation | Market prices remain reasonably stable for targeted commodities Costs of capital will not significantly reduce the profitability of investments made.
