For: Information

# Progress report on implementation of the performance-based allocation system

## Addendum

1. The Executive Board is invited to take note of the attached additional information relating to the progress report on implementation of the performance-based allocation system (PBAS).
2. Annex I contains the 2016 country scores by region and the country allocations for the Tenth Replenishment of IFAD's Resources (IFAD10) (2016-2018), indicating both the annual country allocations for 2016, 2017 and 2018 and the total country allocations for the 2016-2018 period. In order to improve the management of allocations in the three-year period, amounts for countries that are expected to use only part of their potential allocation have been capped at the expected level of financing. In line with the PBAS guidelines, minimum and maximum allocations have also been applied.
3. As per the current practice, if a new country is to be added to the allocation process during the second or third year of the cycle, it must be balanced by removing a country from the same region with a similar score. This ensures that the total number of recipient countries in each region remains the same throughout the replenishment period and reduces variability of allocations. In the East and Southern Africa region the Government of Mauritius confirmed that it does not intend to borrow from IFAD during the IFAD10 period. At the same time, Swaziland expressed its desire to borrow. As a result, management decided to replace Mauritius with Swaziland. The above mentioned change is reflected in table 2 of annex I.
4. Annex II presents details of the rural sector performance assessments for 2015, in line with the criteria for such assessments set out in document EB 2003/80/R.3. These assessments form the basis for the rural sector performance score (RSP) used in the calculation of the country performance rating. Such rating is then used to calculate the country performance score and country allocation.
5. Annex III contains the Debt Sustainability Framework classification for 2017.
