Resumen de los Fondos Suplementarios Recibidos, Comprometidos y Utilizados en 2017

I. Introducción

1. Los fondos suplementarios son donaciones recibidas de Estados Miembros y otros donantes (como organizaciones internacionales, fondos y fundaciones) que se gestionan según las condiciones acordadas por el FIDA y los donantes. Los fondos se asignan independientemente del sistema de asignación de recursos basado en los resultados y del sistema de asignación de donaciones, y generalmente se utilizan en iniciativas concretas de cofinanciación de proyectos, estudios o iniciativas de asistencia técnica, y para apoyar el Programa de jóvenes profesionales del FIDA.
2. Estos fondos suplementarios constituyen un instrumento de eficacia comprobada en la movilización de cofinanciación para que el FIDA ejecute su programa de préstamos y los entregue a los receptores a través de un único canal, lo que simplifica la administración y reduce la carga que pesa sobre los receptores. Representan una importante vía para la ampliación de escala de las intervenciones en los países de ingresos bajos y los países de ingresos medianos bajos, para prestar apoyo a la actuación del Fondo en las situaciones de fragilidad y para la mejora de la colaboración con la sociedad civil, por ejemplo, con las organizaciones de agricultores. También se utilizan para financiar la innovación en esferas temáticas tales como la gestión del riesgo agrícola, y las remesas, y han desempeñado un importante papel en el apoyo a los temas relativos a la nutrición, las cuestiones de género y el clima.
3. El FIDA ha logrado una trayectoria positiva en la movilización de fondos suplementarios procedentes de fondos mundiales vinculados al medio ambiente y al clima, tales como el Fondo para el Medio Ambiente Mundial (FMAM), el Fondo para los Países Menos Adelantados (FPMA), el Fondo Especial para el Cambio Climático (FECC) y el Fondo de Adaptación. En 2016, el FIDA fue acreditado como organismo de ejecución ante el Fondo Verde para el Clima¹.
4. Los fondos suplementarios constituyen una fuente esencial de financiación para realizar actividades no crediticias a escala nacional, regional y mundial, como financiar estudios, talleres, y actividades de actuación normativa y de otro tipo para las que se dispone de pocos recursos administrativos.
5. En la presente nota informativa se proporciona información actualizada sobre los fondos suplementarios recibidos, comprometidos y utilizados en 2017².

¹ Tomando en cuenta el Programa de Adaptación para la Agricultura en Pequeña Escala (ASAP), el FMAM, el FPMA, el FECC y el Fondo de Adaptación, el FIDA ha movilizado una financiación orientada a las iniciativas relacionadas al clima y al medio ambiente en 62 países por un valor aproximado de USD 500 millones; esto lo convierte en el mayor canal de recursos para la adaptación de la agricultura en pequeña escala.

² También se facilita información sobre el Programa de jóvenes profesionales del FIDA, que, no obstante, no se incluye en el cálculo, ni en la evaluación de toda la cartera.

II. Resumen de la cartera de fondos suplementarios del FIDA en 2017

6. **Situación de la cartera de fondos suplementarios.** Al 31 de diciembre de 2017, la cartera de fondos suplementarios del FIDA³ estaba formada por 124 acuerdos con 21 Estados Miembros y sus instituciones, 11 organizaciones internacionales y una fundación, por un monto total de USD 751,2 millones⁴. Una parte considerable de los fondos está vinculada a acuerdos que están a punto de vencer; no obstante, al mismo tiempo, el FIDA está negociando una serie de contribuciones de aproximadamente USD 160 millones.
7. En el cuadro 1 del anexo 2 se puede encontrar la lista de donantes, los pormenores de estos acuerdos y una breve descripción de estos. En el gráfico siguiente se proporciona una visión general del tamaño y el número de acuerdos de la cartera para el período comprendido entre 2015 y 2017.

Gráfico 1
Tamaño y número de acuerdos de la cartera, entre 2015 y 2017

8. **Fuentes y asignación de fondos.** En 2017, las organizaciones y fondos internacionales (Unión Europea, Programa Mundial de Agricultura y Seguridad Alimentaria, etc.) representaron el 74 % de la cartera de fondos suplementarios (USD 556,6 millones), mientras que los Estados Miembros representaron el 26 % (USD 194,6 millones). Cabe señalar que los fondos suplementarios aportados por los Estados Miembros han aumentado un 7 % con respecto a 2016, y que una serie de países (por ejemplo, Hungría y la Federación de Rusia) aportaron fondos suplementarios al FIDA por primera vez en 2017.
9. Se han dedicado esfuerzos especiales a colaborar con fundaciones privadas y filantrópicas como una nueva fuente de fondos suplementarios. La cartera actual comprende fondos de la Fundación Bill y Melinda Gates dirigidos a diseñar asociaciones entre el sector público, el sector privado y los productores que se dediquen a desarrollar cadenas de valor de pequeños rumiantes en la India. Durante 2017, el FIDA movilizó fondos de las Fundaciones de la Sociedad Abierta del Fondo para Refugiados, Migrantes y Desplazados Forzados en pro de la Estabilidad Rural (FARMS), en Jordania.

³ Esto incluye los acuerdos que se firmaron, estuvieron en curso y concluyeron en 2017, o que concluyeron en ese año, pero que siguen teniendo actividades en curso.

⁴ Al calcular los valores equivalentes en dólares de los Estados Unidos, de la cartera al 31 de diciembre de 2017, se utilizó un tipo de cambio de 0,832 euros por dólar.

10. En total, el 63 % de los fondos suplementarios en curso se destinó a cofinanciar proyectos de inversión del FIDA y el 37 %, a esferas temáticas. Este último porcentaje también incluye un 11 % en apoyo de la investigación agrícola a través del Consorcio de Centros Internacionales de Investigación Agrícola (CGIAR).

Gráfico 2

Principales donantes de fondos suplementarios al 31 de diciembre de 2017

11. En el gráfico 2 se presentan los principales nueve donantes, que aportaron el 89 % de los fondos suplementarios (USD 667,7 millones) con arreglo a 83 acuerdos. Se puede observar que el resto fue proporcionado mediante un número elevado de acuerdos (40), con contribuciones de entre USD 30 000 y USD 3 millones.
12. La Unión Europea es, con diferencia, el mayor contribuyente de fondos suplementarios, ya que representa el 35 % de la cartera total (USD 265,1 millones), mediante 16 acuerdos en curso. Los fondos mundiales para el medio ambiente y el clima (el Fondo de Adaptación, el FMAM, el FPMA y el FECC) constituyen el segundo contribuyente, con el 23 % de toda la cartera de fondos suplementarios (USD 175,6 millones), seguidos del Programa Mundial de Agricultura y Seguridad Alimentaria (PMASA), con el 15 % (USD 112,1 millones).
13. Estos asociados aportan principalmente fondos para la cofinanciación de proyectos de inversión del FIDA (el 74 %), mientras que la Unión Europea también financia actividades relacionadas con la investigación agrícola (en asociación con el CGIAR), las remesas (desde 2006), las organizaciones de agricultores, la innovación en la gestión de riesgos agrícolas (por conducto de la Plataforma para la Gestión de Riesgos Agrícolas) y la colaboración con el sector privado mediante la financiación destinada al Fondo de Inversión en Capital Social Yield Uganda. El FIDA está ultimando las negociaciones con la Unión Europea para que destine nuevos fondos al Fondo de Inversión para Agroempresas (ABC) (un fondo de inversiones de impacto para financiar a pequeños productores y a pequeñas y medianas empresas).
14. Los Estados Miembros que más contribuyen a la cartera en curso son los Países Bajos (USD 28 millones), Italia (USD 23 millones), Alemania (USD 16 millones), el Canadá (USD 16 millones), Noruega (USD 15 millones) y Dinamarca (USD 13,7 millones). El 37 % de los fondos suplementarios aportados por los Estados Miembros se destina a la cofinanciación de proyectos y el resto (el 63 %), a prestar apoyo temático a la investigación agrícola, las organizaciones de agricultores, la mejora del acceso a servicios financieros, la gestión de los recursos naturales, la seguridad alimentaria y la nutrición, y al Fondo ABC.

15. **Ámbito temático.** En el gráfico 3 se ofrece una visión general de la asignación de los recursos por ámbito temático y una comparación del año en curso con 2016.

Gráfico 3

Ámbitos temáticos de la cartera de fondos suplementarios al 31 de diciembre de 2017

16. En 2016, el clima siguió siendo el principal ámbito temático (el 32 % o USD 240 millones) y comprendió el apoyo prestado por los fondos para el medio ambiente y el clima que están cofinanciando la cartera de inversiones del FIDA, por un lado, y por Suecia y Noruega para el fondo fiduciario de la segunda fase del ASAP, por otro. El ligero aumento observado en 2017 se debe a los nuevos fondos movilizados para la segunda fase del ASAP y nuevas asignaciones para el FMAM. Estos fondos tienen una función importante en la incorporación del cambio climático en la labor del FIDA.
17. El ámbito que ocupó la segunda posición es el de la seguridad alimentaria y nutricional (el 29 % o USD 215 millones). Los principales contribuyentes son el PMASA, la Unión Europea, Italia, el Japón y la Federación de Rusia para cofinanciar proyectos en países de ingresos bajos, países de ingresos medianos bajos y países en situaciones de máxima fragilidad. El Canadá, Irlanda y Alemania están aportando fondos para prestar apoyo temático a la reducción de las pérdidas de alimentos y para incorporar la nutrición en la cartera del FIDA.
18. Los servicios financieros inclusivos y el fomento de cadenas de valor (el 20 % o USD 153,4 millones) engloban fondos aportados por el Canadá, Dinamarca, la Unión Europea e Italia para cofinanciar proyectos de financiación rural, infraestructura relacionada con el mercado y fomento de cadenas de valor. También comprende apoyo de Francia, la Unión Europea, Luxemburgo y Suiza destinado a programas de múltiples donantes, como el Fondo de Financiación para Remesas, la Plataforma para la Gestión de Riesgos Agrícolas, el Fondo ABC y el Mecanismo de asistencia técnica del Fondo Africano para la Agricultura.
19. La investigación agrícola (el 11 % o USD 84,5 millones) comprende fondos provenientes de la Unión Europea para el CGIAR. La finalidad de la contribución es poner en práctica la investigación y elaborar y probar enfoques innovadores que afecten positivamente en los medios de vida, la nutrición y la resiliencia de las comunidades rurales. El FIDA y la Unión Europea mantienen una colaboración duradera en este ámbito de más de 10 años.

20. El apoyo a las organizaciones de agricultores (el 6 % o USD 42,3 millones) comprende fondos de la Unión Europea, Francia y Suiza destinados a fortalecer la capacidad institucional de dichas organizaciones y desarrollar servicios económicos que faciliten la integración de los pequeños agricultores en las cadenas de valor, respaldando el Programa de apoyo a las organizaciones campesinas en África y Asia y el Foro Campesino del FIDA.
21. La última categoría comprende el apoyo destinado a la incorporación de las cuestiones de género y otros temas como la evaluación, el apoyo institucional y la eficacia en términos de desarrollo (el 2 % o USD 15,3 millones), mediante los fondos aportados por Estonia, Hungría, Noruega, Suiza, Suecia y otros países.
22. **Distribución regional.** En el gráfico 4 a continuación se muestra la distribución de la cartera de fondos suplementarios por región. El 25 % de estos fondos son mundiales o se destinan a múltiples regiones o países. Casi la mitad de la cartera (el 48 %) se destina al África Subsahariana: el 24 %, al África Oriental y Meridional (ESA); el 14 %, al África Occidental y Central (WCA), y el 10 % que se centra en ambas regiones. La región del Cercano Oriente, África del Norte y Europa (NEN) recibe el 14 % de la cartera de fondos suplementarios, más que en años anteriores, principalmente a causa de la respuesta a los conflictos y la fragilidad a través del FARMS. Asia y el Pacífico (APR) recibieron el 11 %, mientras que el 2 % se destinó a América Latina y el Caribe (LAC).

Gráfico 4
Distribución regional de la cartera de fondos suplementarios

23. **Fondos movilizados en apoyo de los programas del FIDA.** Durante 2017 se realizaron esfuerzos especiales para movilizar fondos en apoyo de la cartera de inversiones del FIDA y sus programas mundiales y temáticos. El FIDA reunió un monto total de USD 81,4 millones de 18 donantes. Algunos de los principales nuevos fondos son: i) los del FMAM relacionados con el Programa de enfoque integrado del FMAM dirigido por el FIDA en el África Subsahariana; ii) los de Noruega y Suecia para el fondo fiduciario de la segunda fase del ASAP; iii) los de Suiza, Noruega y el Fondo de la Organización de Países Exportadores de Petróleo para el Desarrollo Internacional para financiar el FARMS para programas en Jordania, Líbano, Níger y Somalia, y iv) los de la iniciativa "Missing Middle" del PMASA para financiar un proyecto en Malí que respalda la inclusión de los jóvenes del ámbito rural en cadenas de valor.
24. Asimismo, Luxemburgo confirmó su financiación (por un monto de EUR 5 millones) para el Fondo ABC, como primer contribuyente a esta importante iniciativa. En lo que respecta a la cofinanciación, Alemania presta apoyo al sector de la pesca en pequeña escala en Eritrea, mientras que la

Federación de Rusia hizo su primera contribución de fondos suplementarios al FIDA con objeto de mejorar la nutrición de los escolares en Tayikistán. En el apéndice 2 se presenta información detallada sobre todos los acuerdos firmados y los pagos recibidos en 2017.

25. En total, se recibieron USD 120,6 millones en concepto de pagos con arreglo a acuerdos nuevos y existentes de provisión de fondos suplementarios.
26. **Programa de jóvenes profesionales.** El Programa de jóvenes profesionales del FIDA, por medio del cual los Estados Miembros patrocinan a jóvenes universitarios para que hallen empleo en el FIDA, también se financia con fondos suplementarios. El FIDA tiene en total 17 de estos programas, 15 de los cuales están ubicados en la Sede y dos sobre el terreno, en Ghana y el Sudán. Los países patrocinadores son los Países Bajos (con seis programas), Suiza (con cuatro), Alemania (con dos), Finlandia (uno), Italia (dos), el Japón (con uno) y Corea (con uno).
27. **Gestión y administración de fondos suplementarios.** Con miras a reforzar la movilización y gestión de fondos suplementarios, el FIDA ha invertido en los últimos años en mejorar los sistemas de gestión de estos fondos. Durante 2018, todos los datos relacionados con acuerdos de provisión de fondos suplementarios se integraron a los sistemas institucionales del FIDA. Ello ha llevado el aumento de la eficiencia, el refuerzo del cumplimiento y la mejora del acceso a la información, y la presentación de informes. Un grupo de trabajo interno también está examinando las directrices del FIDA relativas a la recuperación de los costos vinculados a los fondos suplementarios. El FIDA ha llevado a cabo una auditoría interna durante el período de notificación para evaluar los resultados de la gestión de los fondos suplementarios. El dictamen de auditoría fue favorable con respecto a la idoneidad del uso de los fondos según la finalidad establecida en los acuerdos de provisión de fondos suplementarios.
28. Como se hace habitualmente, se han proporcionado a los donantes sus estados financieros comprobados, en los que se muestra la situación financiera de las contribuciones al 31 de diciembre de 2017. Se han realizado esfuerzos adicionales para mejorar la calidad de la presentación de informes en general, destacando la información relativa a los logros y resultados junto con los datos financieros.
29. Durante el período de notificación, se cerraron financieramente 15 acuerdos concluidos y se concluyeron otros 22, que se encuentran en proceso de cierre financiero. La Oficina de Asociaciones y Movilización de Recursos, junto con la División de Contaduría y Contraloría, están trabajando proactivamente para garantizar el cierre financiero puntual de estos acuerdos.

III. Acuerdos de asociación del FIDA en curso

Gráfico 5
Acuerdos de asociación activos por tipo de asociado

30. Durante el 121.^º período de sesiones de la Junta Ejecutiva del FIDA, el Fondo se comprometió a remitir a los miembros de la Junta Ejecutiva la lista de los acuerdos de asociación activos firmados con varios asociados. Al 30 de junio de 2018, el FIDA tiene un total de 78 acuerdos de asociación en curso firmados con organizaciones asociadas. Entre ellos hay acuerdos con instituciones financieras internacionales y nacionales, organizaciones de las Naciones Unidas, organizaciones multilaterales, Estados Miembros, organizaciones regionales, y organizaciones y fundaciones del sector privado, etc. Además de estos acuerdos, el FIDA también tiene 15 acuerdos transaccionales. Se trata de acuerdos con Estados Miembros en apoyo del Programa de jóvenes profesionales del FIDA y dos acuerdos de asignación para la adscripción de personal. En el gráfico 5 se proporciona una visión general de la cartera en curso por tipo de asociado. En el apéndice 1 se ofrece una lista de los acuerdos de asociación en curso.

IV. Conclusiones

Como ya se ha mencionado en el informe, los fondos suplementarios son una forma bien establecida de atraer cofinanciación para los programas de préstamo del FIDA y de respaldar su labor temática. En vista de los compromisos contraídos para la FIDA11, el Fondo seguirá movilizando fondos suplementarios para destinarlo a prioridades específicas que añadan valor a los programas en los países o mejoren la colaboración mundial, como: i) la cofinanciación de los programas de inversiones del FIDA, en especial de la UE y donantes bilaterales; ii) los mecanismos de múltiples donantes como el FARMS o la segunda fase del ASAP; iii) las iniciativas de cooperación Sur-Sur y cooperación triangular, y iv) el desarrollo del sector privado y el espíritu empresarial de los jóvenes a través del Fondo ABC.

| TECHNICAL ASSISTANCE FACILITY TO THE AFRICAN AGRICULTURE FUND | | | | | |
| First multi-donor fund established at IFAD (including a joint multi-donor agreement between Italy-AGRA-UNIDO) | | | | | |
| <p>TAF's main objective is to support the economic development of Small and Medium Enterprises (SMEs) and small farmers operating in the agriculture sector in Africa. By doing so, TAF enables small businesses, small-scale farmers, farmers' organizations, and cooperatives to benefit, either directly or indirectly, from the African Agriculture Fund (AAF). In practice this means that TAF links small-scale farmers and micro-entrepreneurs and their associations with portfolio companies that receives investments from the AAF. TAF may also develop and strengthen the capacity of third-party providers of services, inputs, productive assets and equipment to serve the linkage scheme partners. Moreover, TAF support can also be directly provided at SMEs allowing them to optimize their operations and secure long-term growth.</p> <p>With the closure approaching as of May 2018, TAF is currently focusing on sustaining interventions and gathering lessons learned. TAF is working with 12 portfolio companies and 34 projects are in progress. The nature of these projects is quite broad. In Malawi, under the Farm Services Unit (FSU) of Meridian, soil testing initiatives continue to further develop knowledge about the nutrient requirements of soils. 13,408 farmers have now been registered around the stores and are benefiting from the 120 demonstration plots set up in the central and southern regions of Malawi. Moreover, TAF funds are also used to strengthen Small and Medium Enterprises. Through TAF SME's component in Cameroon, the Pig Production Technical Support and Capacity Building project led by CS Vet has made significant progress towards the overall improvement of piggery key performance indicators (KPIs). KPIs such as average litter size per sow per year, final grower selling weights and overall mortality have started to match global standards with the piggery beginning to report consistently strong financials over the last six months and the business averaging \$100k in monthly turnover.</p> <p>The contribution agreements signed with AGRA (US\$150,000) and UNIDO (US\$75,942) completed on 11 May 2016, and therefore are not included in the calculation below.</p> | | | | | |

| FINANCING FACILITY FOR REMITTANCES | | | | | |
| <p>For more than 10 years IFAD has managed the Financing Facility for Remittances (FFR), a multi-donor facility linking migration and development issues, financing innovative projects to enhance the development impact of remittances and migrants' investment, and supporting capacity-building, advocacy and research in this field. Since 2006, with initial funding from Spain (EUR 2 million) and the EU (EUR 4 million), the FFR has grown to an over US\$45 million multi-donor fund and supported more than 60 projects in over 45 countries across the developing world that use innovative technologies to lower the transaction cost of remittances, promote access to financial services in remote areas and foster migrant investment and entrepreneurship. IFAD's FFR is nowadays recognized as one of the lead global actors in the area of migration and development, actively contributing, among others, to the works of the G20, the Global Forum on Migration and Development (GFMD), the Financing for Development process, the Global Migration Group and the recently-launched Global Compact for Safe, Orderly and Regular Migration. The FFR was the first to publish global remittance estimates to developing countries – particularly through its Sending Money Home reports – and continues to contribute to policy dialogue through actionable research and its Global Forums on Remittances, Investment and Development (GFRID), bringing together all the major players in the remittance marketplace.</p> | | | | | |
| <p>In 2015 IFAD launched the International Day of Family Remittances (IDFR), celebrated yearly on June 16. The day was unanimously proclaimed by IFAD's 176 Member States with the purpose to raise global awareness of migrant workers' contribution to the wellbeing of their families and communities of origin through remittances, the key role they play in contributing to achieve the SDGs, and the importance of engaging the private sector in lowering transaction costs. On 12 June 2018, during the 95th plenary meeting of the 72nd session, the IDFR was unanimously adopted by the United Nations General Assembly (Resolution A/RES/72/281).</p> | | | | | |
| <p>The FFR is continuing to receive support and additional contributions from both the donor community and IFAD, to allow to scale up the impressive results reached thus far, and to mainstream remittances, migrant investments and migration within IFAD's programme of loans and grants. While the FFR has been managed as one facility, separate contribution agreements were signed between IFAD and Spain, Luxembourg, the EU, UNCDF and the Swiss Development Agency (SDA), and require separate financial reporting. Further contribution is currently under discussion with the EU and Spain.</p> | | | | | |

| SUPPORT TO FARMERS' ORGANIZATIONS | | | | | |
| <p>The support to Farmers' Organisations (FO) is delivered by IFAD through 4 complementary programmes: The Support to Farmers' Organizations (FO) in Africa Programme (SFOAP) and the Farmers' Fighting Poverty in Africa (FFP/AFRICA), which together form the Farmers' Africa programme; and the Medium-Term Cooperation Programme with Farmers' Organisations in Asia and the Pacific (MTCP 2) and FFP/ASEAN which together form the ASEAN Farmers' Organisations Support Programme (AFOSP). Since 2009 these programmes have mobilised over EUR 65 million in support of FO, mainly from the EU, Switzerland, France and IFAD.</p> <p>SFOAP was established in 2009 with EUR 5 million financing from the EU and US\$1.5 million financing from IFAD. It was the first programme to be initiated by the four regional networks of FOs in sub-Saharan Africa (EAFF, PROPAC, ROPPA and SACAU). In 2012 Italy, Finland and Switzerland agreed to jointly co-finance SFOAP's transition from pilot phase to a main phase. The main phase was launched in January 2013 through additional supplementary funds by the EU (EUR 15 million), France (EUR 1 million), Switzerland (EUR 2 million), and USD 2.5 million from IFAD. This phase builds on the successes and lessons learned from the pilot phase and scales up programme activities and outreach. The programme aims to further strengthen and consolidate the institutional capacity of FOs and give them a greater say in agricultural policies and programmes. It also supports the development of FOs' economic services to facilitate the integration of smallholder farmers in value chains. The addition of a fifth regional network, UMNAGRI, has expanded the geographical area to the North Africa region. The programme now supports 68 national farmers' organizations (NFOs) in 49 countries, their five regional networks. SFOAP has generated some interesting results for the participating FO, which include: an additional 500,000 members recorded; approximately USD 14 million mobilised from public sources and over USD 5.7 million from the private sector; increases in productivity between 30% and 150%; increases in revenues up to 350% for some participating farmers; increased solicitations to participate in policy task forces and stronger influence in national agricultural policies.</p> <p>The first phase of MTCP was implemented from 2009- 2012, with a budget of USD 1.9 million. In 2015 the EU agreed to support MTCP2 with additional EUR14.4 million. MTCP2 aims to strengthen the capacities of farmers organizations in Asia and the Pacific to deliver better, improved and inclusive services to their members and to engage in effective dialogues with governments, thereby making FOs more viable, responsive and accountable to their members, more respected by their partners and with greater participation in policy-making and program implementation processes of governments and IFAD country operations. The programme now supports 150 FOs representing 20 million small-scale farming families in 25 countries in Southeast and South Asia and the Pacific.</p> <p>FFP/AFRICA (2013-2016) and FFP/ASEAN (2015-2019) are initiatives of the global Farmers Fighting Poverty programme established by AgriCord, the network of agri-agencies for development cooperation with structural links to farmers and rural members' organizations in their home countries (10 agri-agencies and 4 associated farmers' organisations). FFP/AFRICA focuses solely on FOs in sub-Saharan Africa. The total cost of the programme is EUR 20.2 million, which includes a contribution from the EU of EUR 11.9 million. An additional EUR 8.3 million is to be provided by agri-agencies, their governments and other donors. FFP/ASEAN is implemented in 6 countries of south-east Asia, with an overall budget of EUR 7.2 million, of which EUR 6.7 million from the EU and EUR 500,000 as co-financing from the agri-agencies. Both programmes involve mainly FOs at local level and national value chain specialized FOs from the local to national level. One of the main pillars of Farmers Fighting Poverty is the funding of small organizations and local associations. FFP/Africa has also recorded some interesting results, including: approximately 20.000 farmers accessing improved inputs; 800 linkages created with market outlets and over 600 agreements signed with the private sector; increases in volume produced varying from 15% to 90% and reported productivity increases from 11% to 250%.</p> | | | | | |

| FARMERS' FORUM-Ongoing | | | | | |
| <p>The Farmers' Forum (FAFO) is a bottom-up process of consultation and dialogue between small farmers' and rural producers' organizations, IFAD and governments for rural development and poverty reduction. Established in 2006 as a permanent feature of the IFAD Governing Council and operationalized through IFAD-funded investment projects and grant programmes, the Farmers' Forum is fully aligned with IFAD's strategic objectives, and is rooted in concrete partnership and collaboration at country and regional levels. Over the past 8 years, the FAFO process has demonstrated its relevance and indeed changed the way IFAD and FOs are working together. Since its inception, FAFO has received supplementary funding from Italy, Switzerland, France, Finland and BMGF.</p> <p>During the 6th Global meeting of the Farmers' Forum held in Rome in February 2016, members agreed to decentralise the FAFO process and to begin holding regional level FAFOs in order to 'be closer' to the farmers and to foster greater involvement of IFAD regional divisions and country programmes. The FAFO members also decided to use the IFAD geographical structure for the regional FAFOs in order to facilitate interactions with the regional divisions. Furthermore it was decided to organise the regional FAFOs in concomitance with the IFAD regional divisions' implementation workshops. As such, from 20 to 23 May 2017, 40 Farmers' Leaders from 12 countries and 28 farmers organizations, organized the First Regional Farmers' Forum in Eastern and Southern Africa (ESA FAFO Meeting) in Kampala, Uganda. The Forum was held in conjunction with the IFAD Regional Implementation Workshop, centred around the theme of Financial Inclusion for Rural Transformation, and was also attended by approximately 260 representatives from IFAD funded projects in 17 countries and by IFAD staff from HQ. During the Regional FAFO, the FOs, ICOs and IFAD funded projects developed 15 Country-level action plans to outline the next steps and agreed actions for the initiation/strengthening of the country level partnerships. A regional FAFO has also been organised in WCA (9th and 10th April 2018) and one is planned for APR on the 20th October 2018.</p> | | | | | |

| PLATFORM FOR AGRICULTURE RISK MANAGEMENT: Multi-donor facility 2013-2018 | | | | | |
| <p>IFAD, with the support of the EU, France, and Italy, and in strategic partnership with the New Partnership for Africa's Development (NEPAD) and Germany, launched the Platform for Agricultural Risk Management (PARM) in December 2013. PARM is a partnership-based initiative aiming at fostering responsible investment in rural areas and agriculture. The aim of the platform is to assess and qualify agricultural risks in partner countries, develop appropriate strategies to challenge such risks and contribute to establishing the conditions necessary for food and nutrition security. Its main role will consist of: (a) improving the area of risk agricultural management, (b) assist national stakeholders in setting up a process to develop agricultural risk management strategies, (c) developing effective tools to measure efficiency and effectiveness of risk management systems, (d) building capacity among African nations on agricultural risk management topics, (e) act as a broker between the private and public sector and between those in need of risk management expertise and those who can provide it; and, (f) strength regional cooperation on agricultural risk management.</p> <p>In 2017 PARM has consolidated its pillars of action and became a global reference on Agricultural Risk Management. PARM is now the Platform that brings together: the methodological rigour of the holistic approach; the inclusive and participatory process such as through the CAADP policy framework; the focus on risk assessment and management capacities on the field; and the partnership with key local, regional and global experts and institutions. PARM policy engagement with the governments and key stakeholders in the country has allowed developing an attractive package of ARM tools and initiatives that directly respond to the priorities identified by the governments and stakeholders.</p> | | | | | |

| WEATHER RISK MANAGEMENT FACILITY | | | | | |
| <p>The Weather Risk Management Facility (WRMF) is a partnership between IFAD and WFP which started in 2008. It aims to increase the resilience of smallholder agriculture and rural livelihoods with inclusive insurance. The three main pillars of WRMF activities are (i) Design and implementation support of holistic agricultural insurance schemes linked to IFAD's portfolio; (ii) Knowledge Management and capacity enhancement and (iii) Public goods and global engagement. With funding support from Agence Française de Développement and an additional contribution from the Belgian Federal Science Policy Office, the IFAD-WFP WRMF has been implementing Phase II of the project "Improving weather risk management in Sub-Saharan Africa: remote sensing for index insurance". It aims to overcome scaling-up constraints of index insurance, by testing remote sensing solutions based satellite-based data. The project unites a wide range of different public and private expertise in remote sensing, insurance and reinsurance, aid and development, and agricultural research. In 2017, the project entered its last full year. During this time it finalized the ground-breaking research funded by AFD on satellite technology for scaling-up index insurance for smallholders; Results were captured in the publication: 'Remote sensing for index insurance: findings and lessons learned for smallholders', and widely disseminated in international fora and events. This included at a specialized workshop in Senegal, and also to global players at the Global Action Network on Index Insurance, a G8 initiative funded by USAID and the Annual Microinsurance Conference of the Microinsurance Network - the only global multi-stakeholder platform of microinsurance industry and experts with over 80 members from over 40 countries, coming from the insurance industry, as well as governmental and development organisations. Under the project, support to implementation of index insurance for farmers' organizations in PADAER was continued and support to WCA was given to develop a scaling up proposal for the Green Climate Fund (GCF).</p> <p>WRMF was awarded over 4 million USD in funding from Sida to implement a new 4-year programme - INSURED - Insurance for Rural Resilience and Economic Development. INSURED is focusing on scaling-up climate insurance to improve rural and agricultural risk management. Technical assistance will be provided to IFAD's portfolio and at corporate level to translate lessons into strategies and operational guidelines. It will also give a comprehensive package of services to at least three countries across at least two continents, which will benefit from country assessment and policy dialogue, as well as implementation linked to IFAD's in-country programmes and capacity building. INSURED will also include partnerships with ILO's Impact Insurance Facility, with WFP, as well as other operational partnerships.</p> | | | | | |

| NUTRITION SENSITIVE AGRICULTURE | | | | | |
| In 2017 funds from Canada supported the systematic mainstreaming of nutrition into IFADs operations. In the year, IFAD mainstreamed nutrition into 100% of COSOPs and 53% of new project designs. This was achieved through technical assistance from IFAD HQ staff and consultants in design and implementation support missions. In 2017, IFAD continued its partnerships with CGIAR's Research Program on Agriculture for Nutrition and Health (A4NH) to support implementation of the Nutrition Action Plan (2016-2018). The deliverables from this support included review of country portfolios on nutrition mainstreaming in Burundi and Nepal, developing a capacity development Plan to supporting mainstreaming nutrition at IFAD, identification of field-based insights and recommendations on how to integrate nutrition education and Behaviour Change Communication into projects, a review of neglected and underutilized species and how they can help IFAD respond to the challenges of climate change and nutrition while preserving indigenous knowledge and cultural identity and a proposed operational framework for IFAD that seeks to make these insights more practical and directly relevant to IFAD's nutrition-sensitive investments. | | | | | |
| Funds from Canada have also allowed IFAD to hire additional technical staff including a Lead Technical Specialist on Nutrition. IFAD also undertook trainings and awareness raising for IFAD staff (HQ and ICO) as well as country stakeholders. This was done through seminars and presentation during regional division's implementation meetings and implementation support missions. IFAD also participated in various global and regional level nutrition policy engagement and events by UN Network for SUN, UNSCN, CFS and the Initiative for Food and Nutrition Security in Africa (IFNA) by JICA and participated actively in the 21st International Conference On Nutrition; IFAD contributed to Global Policy documents e.g. State of Food Insecurity Report, Global Nutrition Report, SUN/REACH global and regional reports. | | | | | |
| With regards to supplementary funding from Germany, the nutrition-sensitive value chain (NSVC) project entered its final phase in 2017. Country workshops were held in both Nigeria and Indonesia with the objective of presenting findings from the fieldwork studies, learn from the experience and discuss and validate the NSVC approach at country level. A summary of the findings from the fieldwork in Nigeria and Indonesia has been published, and seed funds were transferred to IFAD country offices for small scale follow up activities in-country. During 2017, a global workshop was also held in Rome to share and cross-learn from the experiences in each country, and to validate the NSVC framework and approach to project design with international experts in this field (RBAs, CGIAR, IDS, GAIN, etc.). The final output of the NSVC project, the NSVC Guide for project design (Volumes I and II), has also been drafted, peer reviewed and is ready for publication. | | | | | |

| FOOD LOSS REDUCTION | | | | | |
| <p>In 2013 the Swiss Agency for Development Co-operation (SDC) through their Global Programme on Food Security (GPFS) funded a Rome-based agency (RBA) joint project under the title "Mainstreaming food loss reduction initiatives for smallholders in food deficit areas". Phase I (2014-2017) is completed and Phase II started in July 2017 and is expected to end in June 2020. The partnership between IFAD, FAO and WFP ensured that each agency leveraged its core competencies and strengths to maximise the outreach and impact of project activities to reduce food losses. Among the outcomes of Phase I is the establishment of the trilingual (English, French and Spanish) Community of Practice (CoP), on Food Loss Reduction (FLR) that is hosted in FAO and that has gained global interest. Other outcomes include several country-based food loss assessments along with selected grain value chains in Burkina Faso, Democratic Republic of the Congo (DRC), and Uganda following the FAO case study methodology. These resulted in the identification of critical loss points along the value chains, which led to the development of national food loss policy briefs in Burkina Faso and the DRC, which have formed a basis for Phase II of the project. Phase II will continue in the same countries expanding and implementing where possible a national policy dialogue on food loss reduction. On 7 September 2017, the 3 Rome based agencies (IFAD, FAO and WFP) jointly organized a high level event at IFAD HQ with the aim of highlighting the areas of FLR activities of the various agencies, presenting the results and lessons learnt from past and ongoing RBA collaboration in this area, and outlining the way forward for future collaboration to reduce food losses and waste. The event was attended by several Executive Board members, private sector representatives as well as Senior Management and technical staff of the RBAs.</p> | | | | | |
| <p>This project was closely collaborating with another FAO/IFAD UNJP project on "Food loss reduction through partnerships and evidence-based interventions" funded by the Irish government. The supplementary fund agreement between IFAD and Ireland was signed in 2013 to enable the use of US\$174,880 - which had remained unspent under a previous partnership agreement (see Agreement with Ireland under thematic single-donor facilities). This UNJP, which completed at the end of 2016 and provided with technical support on food losses to both FAO and IFAD field operations by supporting national loss assessments in of Timor-Leste, Ethiopia and Malawi along with different grain value chains within the IFAD investment projects, presenting and discussing results of the assessments in regional workshops on food losses, as well as developing awareness and knowledge materials.</p> | | | | | |

| MAINSTREAMING GENDER EQUALITY | | | | | |
| <p>Since 1995 IFAD has received US\$15million from Japan, Norway, Germany, Canada, Finland, The Netherlands and Italy under nine agreements to achieve more impact on reducing poverty and increasing household food security by: (i) building IFAD's capacity at HQs and country level reaching more rural women through gender-sensitive programme design and implementation; (ii) working in partnership with other institutions and organization; (iii) developing and testing innovative methodologies; (iv) empowering women and their organizations by creating their legal awareness. Remaining balances of these funds are being used to roll-out IFAD's household methodologies. On 26 November 2012 IFAD signed a 5-year joint programme with UN Women, FAO and WFP for accelerating progress towards the economic empowerment of rural women (RWEE-Joint Programme). The Joint Programme is articulated around four outcome areas: (i) Improved food security and nutrition; (ii) Increased income opportunities; (iii) Enhanced leadership and participation; and (iv) More gender responsive policy environment. The Joint Programme enhances as well the role of young women by specifically targeting them throughout its four outcome areas and its activities. The following seven countries are targeted for the implementation of the Joint Programme: Ethiopia, Guatemala, Kyrgyzstan, Liberia, Nepal, Niger and Rwanda. IFAD is implementing activities in Kyrgyzstan, Niger and Rwanda. The programme is administered by the UNDP-Multipartner Trust Fund (MPTF). Norway and Sweden - through the Swedish International Development Agency (SIDA) - have contributed NOK10million (US\$1.6 million equivalent) and SEK 112,000,000 (US\$13.9 million). In 2017, activities have been implemented in Niger, Kyrgyzstan and Rwanda, focusing on the promotion of household methodologies and support of vulnerable women through rural-pastoral kits.</p> | | | | | |

| MAINSTREAMING CLIMATE ADAPTATION | | | | | |
| IFAD's five-year Adaptation to Smallholder Agriculture Programme was launched in September 2012. ASAP is currently the largest adaptation programme for smallholder farmers globally and works with the goal to improve the climate resilience of 8 million farmers by 2020 through mainstreaming climate change into IFAD's existing work on rural development with poor smallholders. Five sub-goal outcomes focus on improved climate resilience in: land management, water use, human capacity to manage climate risk, infrastructure and learning and sharing knowledge. Some ASAP resources were accepted as supplementary contributions. | | | | | |
| The second phase of the Programme (ASAP2) will cover the period from September 2017 to 31 December 2025 and will contribute to achieving IFAD's climate mainstreaming objectives and outcomes over the Strategic Framework 2016–2025 implementation period. ASAP2 technical assistance activities will sustain climate-informed programming and leverage resources from the public and private sector to address the additional costs of climate change in IFAD's investment programmes. The ASAP2 outcomes include climate-informed investment planning, mobilisation of resources to address the additional costs of climate change and climate risk management investments. In 2017, fund have been received from Norway and Sweden. | | | | | |

| FACILITY FOR REFUGEES, MIGRANTS, FORCED DISPLACEMENT AND RURAL STABILITY (FARMS) | | | | | |
| In accordance with the information note presented to the 118th session of the Executive Board (document EB 2016/118/INF.6), IFAD established FARMS to address the causes and consequences of the current refugee and forced displacement crisis, which lies within IFAD's mandate, and to support efforts to bridge the humanitarian/development financing gap. | | | | | |
| The current global crises and forced displacement affect 65 million people worldwide and about 22.2 million in the Near East and North Africa Region, mainly in Iraq, the Syrian Arab Republic, Yemen, and their neighbouring countries. It has created severe humanitarian and development challenges and threatens further destabilization as host communities struggle to absorb displaced peoples. Jordan is currently host to about 1.4 million Syrians, who now comprise over 20 per cent of the total population. Of these, only 20 per cent live in the main refugee camps, and, though precise rural figures are not available, it is estimated that many refugees are located in rural areas. | | | | | |
| This influx of refugees, almost unprecedented in scale, puts refugees in positions of immense vulnerability and places enormous pressure on both host communities and refugees in terms of livelihoods, natural resource management and food systems. FARMS aim is to help host communities cope with the pressures of the crisis and provide refugees and internally displaced peoples with remunerative livelihoods – building skills and capacities that will serve them well on an eventual return to their homes. The Facility has three pillars: (a) Cofinancing of IFAD ongoing and pipeline investment projects, (b) Regional and country-specific grants, and (c) Policy engagement, knowledge management and communication outreach. When established, FARMS aimed to have an overall envelope of US\$100 million. At the current date, the Facility has mobilised approximatively US\$ 33.3 million. At the end of 2017, two agreements have been signed so far. | | | | | |

| INTERNATIONAL LAND COALITION | | | | | |
| <p>IFAD has received funding from European Union, Germany, Ireland and the Netherlands for the support of the International Land Coalition (ILC) Strategy 2016-2021. These funds are provided directly to ILC in line with the terms of the IFAD-ILC MoU. The ILC's goal is to "realize land governance for and with people at the country level, responding to the needs and protecting the rights of those who live on and from the land". To achieve this change, ILC members seek changes in policies, practices and agendas at country, regional and global level. The second year of implementing ILC's strategy has focused on consolidating a more regionalised, better coordinated, and increasingly focused coalition. The membership has expanded from 206 to 262 members, with the biggest growth in the Europe, Middle East and North Africa region. This has happened in a context of shrinking space for civil society but also major progress as SDG tenure security indicators were reclassified to Tier II – key to monitoring the achievement of the global goals and an unprecedented opportunity to unite all members engaged in land monitoring through the Dashboard initiative (to the design of which more than 150 members in all regions have contributed in 2017).</p> <p>2017 has also seen a shift towards allocation of ILC's resources based on members agreeing on priority actions and joint initiatives - building on complementarities between members' expertise and agendas. ILC has invested significantly in strengthening the capacities of National Engagement Strategy (NES) and Commitment-based initiative (CBI) focal points, while widening their opportunities and exposure to each other, to donors, to change-makers, and to intergovernmental processes and bodies.</p> <p>2017 demonstrated ILC's extraordinary capacity to connect actors through NESs and CBIs within and beyond its own membership. The Coalition's value is evident in the fact that in the course of the year 120 organisations expressed an interest in joining the network.</p> <p>In 2017, ILC organised the first Arab States meeting on people-centred land governance, serving as a launch pad to strengthen the land rights platform in the region by bringing together over 60 participants from civil society organisations (CSOs) representing 14 Arab countries. In 2017, multi-stakeholder platforms and processes have demonstrated more than ever their capacity to bring about significant transformation in land governance. Many examples from across the network were the subject of discussion and lesson sharing during the VGGT+5 Forum hosted by FAO in Rome, as well as between governments and other actors at the continental level at the High Level Forum on Multi-Stakeholder Platforms in Africa, co-hosted with IFAD and the Land Policy Initiative.</p> | | | | | |
