المجلس التنفيذي - الدورة الخامسة والعشرون بعد المائة
روما، 12-14 ديسمبر/كانون الأول 2018

للاستعراض

المحتويات

iii	خريطة العمليات التي يمولها الصندوق في البلد
iv	موجز تنفيذي
1	أولاً - تشخيص الحالة القطرية
1	ألف - السياق الاجتماعي والاقتصادي
2	باء - القطاع الزراعي والاقتصاد الريفي
3	جيم - الإطار السياسي والمؤسسي
5	DAL - المخاطر القطرية والقطاعية والبرامجية وإجراءات التخفيف منها
5	ثانياً - الدروس والنتائج السابقة
5	الخبرات والنتائج السابقة
7	ثالثاً - الأهداف الاستراتيجية: مواصفة أولويات الصندوق وجورجيا لإرساء شراكة شاملة متسقة
9	رابعاً - النتائج المستدامة
9	ألف - الاستهداف والشباب والتباين بين الجنسين
10	باء - توسيع النطاق
10	جيم - الانخراط في السياسات
11	DAL - التطرق لتحديات الموارد الطبيعية وتغيير المناخ
11	هاء - الزراعة المرعية لقضايا التغذية والتنمية الريفية
12	خامساً - الإيصال الناجح
12	ألف - إطار التمويل
12	باء - الرصد والتقييم
12	جيم - إدارة المعرفة
13	DAL - الشراكات
13	هاء - الابتكار
14	واو - التعاون بين بلدان الجنوب والتعاون الثلاثي

الذيل

- الذيل الأول - إطار إدارة نتائج برنامج الفرص الاستراتيجية القطرية
- الذيل الثاني - الانفصال عن نقطة الإنجاز لنقاش البرنامج القطري السابق
- الذيل الثالث - عملية إعداد برنامج الفرص الاستراتيجية القطرية بما في ذلك الدراسات التحضيرية، والمشاورات مع أصحاب المصلحة والأحداث
- الذيل الرابع - إدارة الموارد الطبيعية والتأقلم مع تغير المناخ: الخلفية، السياسات الوطنية واستراتيجيات الصندوق في التدخل

الذيل الخامس - القطر في لمحات موجزة

الملفات الرئيسية:

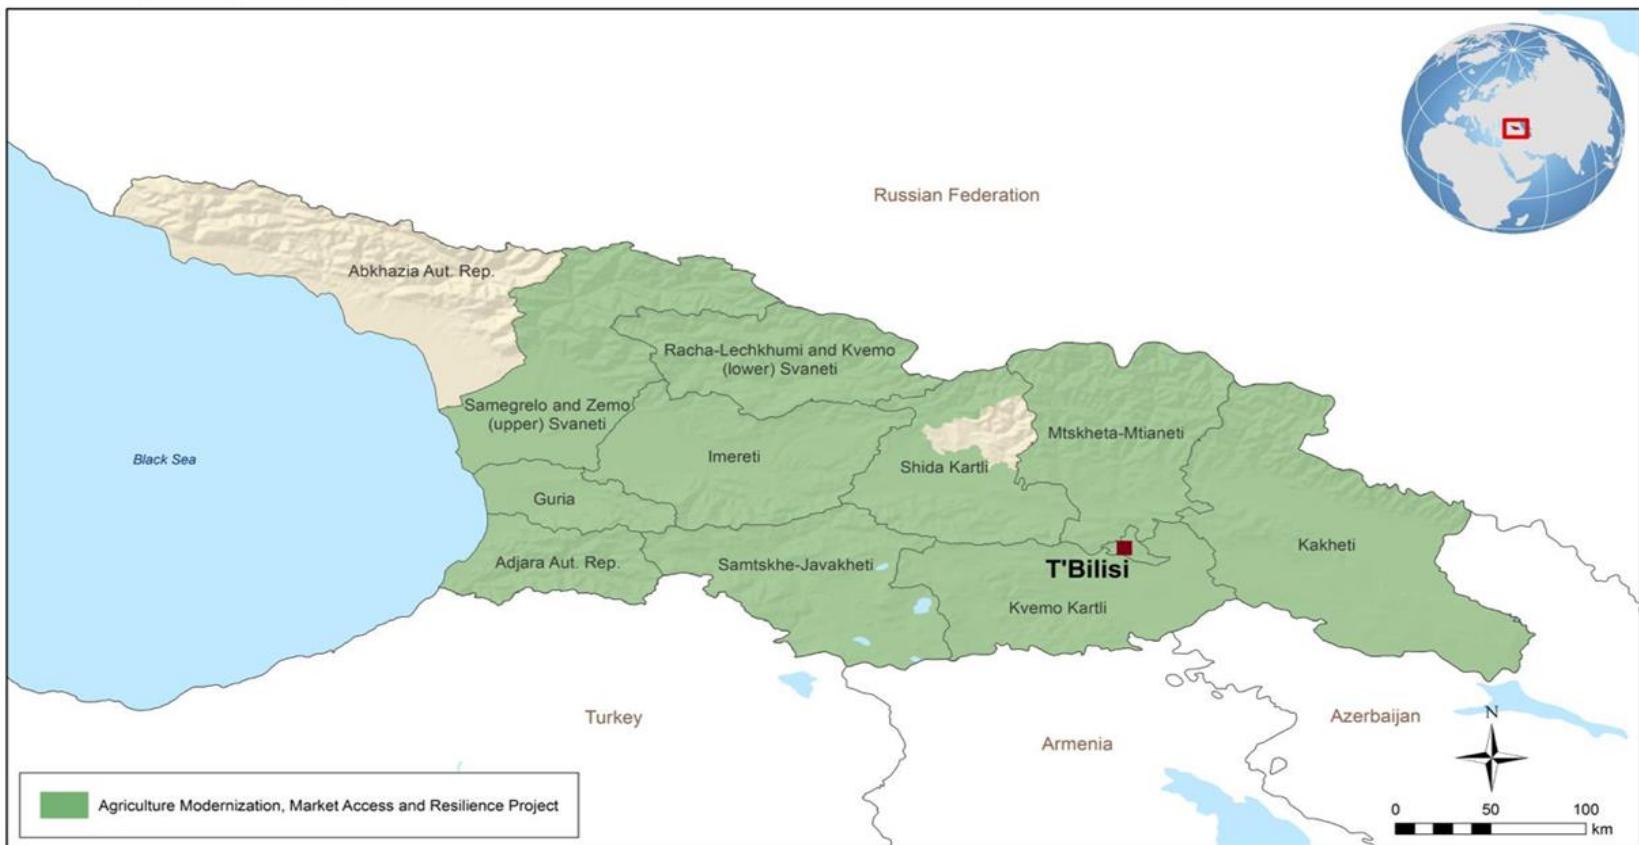

الملف الرئيسي 1: الفقر الريفي وقضايا القطاع الزراعي/الريفي

الملف الرئيسي 2: مصفوفة المنظمات (تحليل جوانب القوة والضعف والفرص والمخاطر)

الملف الرئيسي 3: المبادرات التكميلية للجهات المانحة

الملف الرئيسي 4: تحديد المجموعة المستهدفة، وقضايا الأولويات، والاستجابة المحتملة

خريطة العمليات التي يمولها الصندوق في البلد

إن التسميات المستخدمة وطريقة عرض المواد في هذه الخريطة لا تعني التعبير عن أي رأي كان من جانب الصندوق فيما يتعلق بترسيم الحدود أو التخوم أو السلطات المختصة

بها.

موجز تنفيذي

-1 تواجه جورجيا تحديات كبيرة في الحد من الفقر الريفي. من بينها التراجع المستمر في عدد السكان في المناطق الريفية، مما يؤدي إلى خسارة الдинامية وريادة الأعمال، ويترك المناطق الريفية قلة من المتقاعدين الذين يعيشون على تحويلات المغتربين في الغالب، والتحولات الاجتماعية، وزراعة الكافاف في بحث منازلهم. علاوة على ذلك فإن طموحات جورجيا في الانضمام إلى الاتحاد الأوروبي تفرض عليها معايير أكثر صرامة وأفضل إنفاذًا بشأن سلامة الأغذية كذلك المطبقة في الاتحاد الأوروبي. ومع أن هذا الأمر يفيد من حيث المبدأ مستهلكي الأغذية الجورجيين، وبوفر للمنتجين الزراعيين احتمالات الوصول إلى أكبر أسواق العالم، إلا أن عدداً قليلاً من فقراء الريف المنتجين قادرون في الوقت الحالي على الامتثال لهذه المتطلبات. وأخيراً، ومع التغير المناخي، سيواجه المزارعون في جورجيا تحديات جديدة، ولا يمتلك أصحاب الحيازات الصغيرة إلا القليل من المعرفة بإجراءات التكيف مع تغير المناخ كما أنهم غير قادرين من تحمل تكاليفها.

-2 وهناك خطر حقيقي يتمثل في اقصاء فقراء الريف في حال عدم وجود أي دعم مستهدف. وبالتالي يتمثل دور الصندوق في الترويج لمصالح القراء الريفيين ودعمهم، مما يدعم مشاركتهم في التحول الإيجابي للمناطق الريفية.

-3 ويتمثل الهدف الشامل لاستراتيجية الصندوق في دعم جهود الحكومة الرامية إلى الترويج للتحول الاقتصادي الريفي المستدام والشمولي، مع تحسين الصمود بين صفوف المجتمعات الريفية. وسيتم السعي لتحقيق ذلك من خلال هدفين استراتيجيين اثنين.

الهدف الاستراتيجي الأول: خلق الفرص الاستراتيجية للفقراء المنتجين

-4 أولاً، سوف يخلق الصندوق فرص الاقتصادية للفقراء المنتجين التي تتضمن تنمية سلاسل القيمة ودعم نماذج الأعمال الابتكارية، وبخاصة في المناطق الريفية الأفقر من جورجيا. وسيروج الصندوق لإنتاجية وإنتاج زراعي أعلى، علاوة على توسيع مصادر الدخل.

الهدف الاستراتيجي الثاني: إيجاد بيئة تمكينية لاقتصاد ريفي شمولي ومستدام وقابل للمواعمة

-5 ثانياً، سيدعم الصندوق ويشجع الجهود الرامية إلى إيجاد بيئة تمكينية لاقتصاد ريفي شمولي ومستدام وقابل للمواعمة. وستعمل الجهود المبذولة في هذا الاتجاه على صون وتعظيم القدرات الإنتاجية لجهة المياه والتربة والمراعي (وهي الموارد التي يعتمد عليها فقراء الريف المنتجون)، وإضافة إلى تعزيز قدراتهم على تحسين الأمن الغذائي وسلامة الأغذية.

-6 وسوف يتبلور الأثر الاستراتيجي من خلال توفير سبل موثوقة مستندة إلى الدلائل لفقراء الريف للانتقال خارج دائرة الفقر، من خلال حزم مطورة بعناية من المشورة التقنية والتمويل والربط التالي بسلسل القيمة المنتجة من مستوى أعلى. وبالتالي فإن الصندوق سوف يضع نفسه في موقع المنظمة التي تشكل رأس الحرية لمصالح فقراء الريف المنتجين، بحيث يعرض حالات الأعمال الخاصة بالتحول، ويشجع على توسيع نطاق المبادرات الناجحة. ومن خلال استهداف المناطق الثانية، سوف يضمن الصندوق أيضاً شمولاً

أفضل، كما سيبرهن على إمكانية إيقاف الحلقة المفرغة من التقدم في العمر وهجرة الشباب والتدور الاقتصادي في المناطق النائية.

وأما الأداة الأساسية لتحقيق الأثر الاستراتيجي الذي سيخلفه هذان الهدفان فهي المشروعات الاستثمارية:
-7
(1) المشروع الجاري للتحديث الزراعي والوصول إلى الأسواق والصود؛ (2) مشروع تحديث صناعة الألبان والوصول إلى الأسواق الذي يتم تصميمه حالياً، وربما الدعم المتوفر من استثمارات الصندوق المستقبلية في حال توفر التمويل لما بعد مشروع تحديث صناعة الألبان والوصول إلى الأسواق. وفي الوقت الحالي لا توجد أية موارد بموجب نظام تخصيص الموارد على أساس الأداء لجورجيا بعد هذا المشروع. ولكن من شأن المشروعين المذكورين سابقاً أن يتمكنا من تحقيق هذين الهدفين.

جورجيا

برنامج الفرص الاستراتيجية القطرية المستند إلى النتائج

أولاً - تشخيص الحالة القطرية

ألف - السياق الاجتماعي والاقتصادي

- 1 الاستعراض: شهدت جورجيا تغييرات درامية منذ برنامج الفرص الاستراتيجية القطرية الأخير الذي وضع لها عام 2004. إذ شهدت البلاد نزاعات مسلحة نجم عنها المزيد من انقطاعات الوصول إلى السوق الرئيسية، حيث يتمتع أصحاب العقارات الصغيرة الجورجيون تقليدياً بالقدرة على توريد منتجاتهم لها. كذلك كانت هناك دفعة كبيرة نحو زيادة الصادرات للاتحاد الأوروبي - وخاصة بعد توقيع اتفاقية الشراكة عام 2014 - أما بالنسبة لأصحاب العقارات الصغيرة، فإن الأسواق الروسية وأسواق رابطة الدول المستقلة حديثاً فقد استمرت في الاحتفاظ بأهميتها.
- 2 اقتصادياً، شهدت جورجيا نمواً متيناً في العقد الماضي، إذ نما الناتج المحلي الإجمالي للفرد الواحد بحدود 5.4 بالمائة سنوياً بين عامي 2004 و2016. وبحلول عام 2017 تجاوز 4 دولار أمريكي، مع وصول الدخل الوطني الإجمالي للفرد الواحد إلى 3.830 دولار أمريكي (عام 2016).¹ وقد حققت جورجيا نتائج قوية فيما يتعلق بالاستقرار المالي والاقتصادي الإجمالي، فسهولة ممارسة الأعمال² والأمن والحكومة - كلها أمور تجذب المستثمرين الأجانب وتيسّر من نمو قطاع السياحة.
- 3 يصل نصيب الزراعة إلى 9 بالمائة من الناتج المحلي الإجمالي، ولكنها تشغل 45 بالمائة من القوة العاملة في البلاد. ويسهم قطاع الخدمات بحدود 50 بالمائة من الناتج المحلي الإجمالي، في حين يسهم قطاع التصنيع والإنشاء بحدود 28 بالمائة. ويستفيد 10 بالمائة من السكان من تحويلات العاملين في الخارج التي تشكل حوالي 9 بالمائة من الناتج المحلي الإجمالي.
- 4 أدى النمو القوي إلى الحد من معدل الفقر (43 بالمائة عام 2006 إلى 32 بالمائة عام 2014)، ولكن مع تنامي انعدام المساواة بين المناطق الريفية والحضارية. وبالتالي فإن 43 بالمائة من قاطني الأرياف هم الآن دون خط الفقر البالغ 2.5 دولار أمريكي يومياً، في حين يتراوح الفقر الحضري بحدود 20 بالمائة فقط. ومنذ عام 2006، تقلص الفقر الريفي بحوالي 4 بالمائة. وأما المحرك الأساسي للحد من الفقر الريفي خلال العقد الماضي فلم يكن النمو المتين الذي تحركه المناطق الحضرية (والذي كان بإمكانه أن يزيد الطلب على المنتجات الريفية)، ولكن التحويلات الاجتماعية الأعلى، التي تتسم باستهداف أفضل.³
- 5 تحلل جورجيا المرتبة 32 من أصل 119 بلداً على مؤشر الحوكمة العالمي لعام 2017. وبقدر المعهد الدولي لبحوث سياسات الأغذية بأن تقرن الأطفال إلى 11 بالمائة، وأن الهزال يصل إلى 2 بالمائة (عام 2009) -

¹ البنك الدولي (2018)

² تحلل جورجيا الآن المرتبة التاسعة من أصل 190 بلداً في مطبوعة البنك الدولي لممارسة الأعمال في العالم.

³ البنك الدولي (2016)

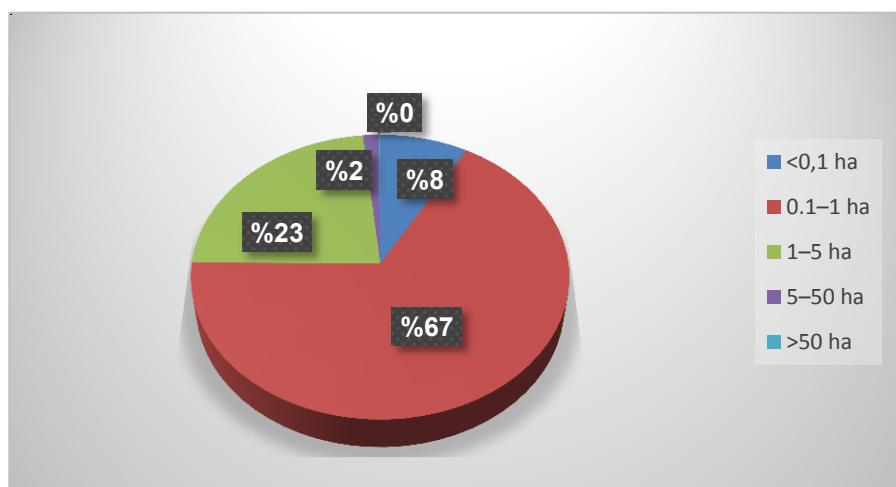

ووفقاً لدراسة أجرتها منظمة أوكسفام - تصل معدلات سوء التغذية في البلاد إلى 7.4 بالمائة، وعلى وجه العموم، فإن استهلاك الأغذية كافٍ لجهة الوحدات الحرارية والبروتين، ولكنه يتسم بتتنوع تغذوي منخفض إلى متوسط.

-6 ترجم الحكومة بصورة نشطة للنساء في المناطق الريفية، بما في ذلك في الأعمال الزراعية والتعاونيات والهيئات المحلية لصنع القرار. إلا أن مشاركة النساء في صنع القرار والوصول إلى المعلومات والأصول والائتمان والخدمات أقل من الرجال، مما يسهم في تصنيف جورجيا في المرتبة التسعين من بين 144 بلداً على مؤشر الأمم المتحدة العالمي للفجوة بين الجنسين. ويتراوح وسطي أجر النساء في القطاع الزراعي بحدود 25 بالمائة أقل من الأجر الذي يتلقاه الرجال. ولا تمتلك النساء إلا 31 بالمائة من المزارع، وحوالي 4.7 بالمائة فقط من التعاونيات تترأسها نساء. ويصل وسطي حجم مزارع النساء إلى حوالي ربع حجم المزارع التي يمتلكها الرجال.

باء - القطاع الزراعي والاقتصاد الريفي

-7 طرأت ثورة على هيكلية ملكية القطاع خلال تسعينيات القرن الماضي، مع خصخصة جميع الأراضي الزراعية تقريباً. وتحتل المزارع الأسرية حالياً 90 بالمائة من إجمالي الأراضي الزراعية، مما أدى إلى تفتت مفرط في الأراضي (انظر الشكل أدناه). وبالتالي، يمتلك ثلثي المزارعين أقل من هكتار واحد من الأراضي. والعديد منهم ينتج على أساس شبه كفاف، ولا يتاجر إلا مع جيرانه. وبصورة متزايدة، فإن هؤلاء المزارعون يتقدموا في السن، ويعتمدون في الغالب على التحويلات الاجتماعية ولا يمتلكون إلا نذراً يسيراً من المعرفة والاهتمام بالزراعة التجارية.

الشكل 1: نسبة المزارعين حسب حجم المزرعة

المصدر : GeoStat ، المسح الزراعي

-8 وبالنسبة للقراء الريفيين المنتجين، يتمثل التحدي الأساسي في التفتت المفرط في الأراضي، الذي جعل من الصعب عليهم تحقيق حجومات وجودة متسقة للإنتاج بحيث يمكن لهم أن يجتنبوا كل من المشترين/المجهزين، الأمر الذي يؤدي في نهاية المطاف إلى إدماج هذا الإنتاج في سلاسل القيمة التجارية.

ذلك فإنهم يواجهون تحديات تتعلق بالوصول إلى الخدمات المالية، والبني التحتية، والمعرفة والتكنولوجيات الجديدة وطلبات السوق التي يمكن استقطابها لتحقيق دخول أعلى.

9- ما زالت أسواق الأراضي غير متطورة، وما زالت حقوق الملكية تتسم ببراءة التعريف. وينطبق هذا الأمر بصورة خاصة على أراضي الرعي الماشع، حيث قضايا الحكومة بالنسبة لتنظيم الوصول إلى المراعي وحمايتها وصيانتها حادة على وجه الخصوص. و25 بالمائة فقط من إجمالي الأراضي الزراعية هي أراضٍ مسجلة رسميا⁴. كذلك يعتبر تغير المناخ تحديا آخر ناشئا بالنسبة لجورجيا. ويعود الإنتاج الزراعي أكثر خطورة مع التواتر الأعلى للأحداث المتطرفة، ومع تكرار أكبر للحوادث المناخية المتطرفة وارتفاع درجات حرارة وتراجع المطоловات المطرية ، علامة على التعرض لمخاطر الأمراض والآفات الجديدة التي تؤثر على المحاصيل وعلى الغابات والإنتاج الحيواني. ولا يمتلك فقراء الريف إلا النذر البسيط الذي يمكنه من الاستثمار في الإجراءات التكيفية، كما أنهم يمتلكون قدرًا ضئيلاً من المعرفة بكيفية التأقلم واقتراض أي من الفرص المتاحة.

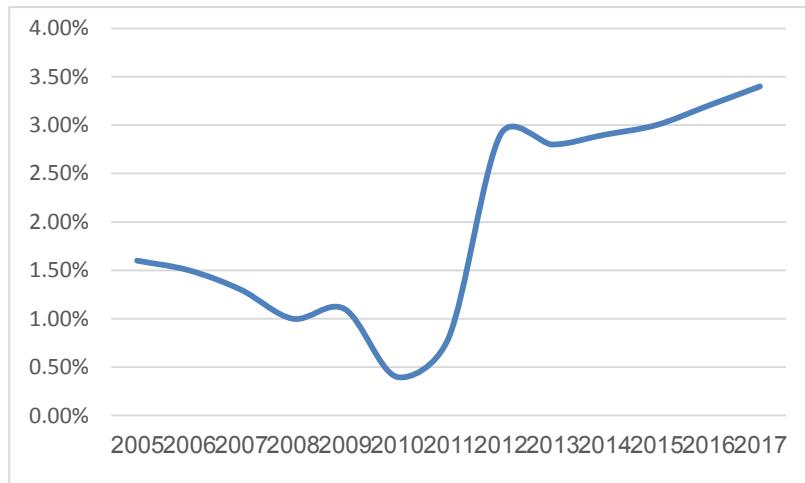

10- يميل القطاع الخاص الرسمي لأن يتكون أساساً من كبار المزارعين والأعمال الزراعية التي تنتج بعض السلع المختارة، وعلى وجه الخصوص المصدرین، كما أن هناك خدمات إرشاد زراعية خاصة قوية متوفرة في البلاد، على سبيل المثال بالنسبة لصناعة البندق. إلا أن خدمات الإرشاد العامة تتمرّكز حول عدد محدود من المراكز مع موارد ضئيلة، كذلك فهي تتسم بمحدودية الوصول إلى سلاسل القيمة التجارية، ويعود ذلك جزئياً لكونها صغيرة في الحجم وغير متنسقة، وبصورة متزايدة بسبب المعايير الأكثر تشديداً، على سبيل المثال الخاصة بسلامة الأغذية التي تقودها متطلبات الاتحاد الأوروبي. إلا أن هناك وبصورة واضحة إمكانية لربط أصحاب الحيازات الصغيرة القادرين والمستعدين ضمن سلاسل قيمة واحدة كما تشير إليه الأمثلة الناشئة.

جيم - الإطار السياسي والمؤسسي

11- تغيير الإطار المؤسسي والسياسي بصورة كبيرة على الأقل في السنوات الخمس الماضية، وبخاصة فيما يتعلق بالأولوية الأكبر التي توليها الحكومة للزراعة (انظر الشكل 2 أدناه).

⁴ تطرق الحكومة بدعم من البنك الدولي لهذه القضية في مشروع "تنمية أسواق الأراضي"

الشكل 2: حصة الزراعة من ميزانية الحكومة الجورجية

المصدر: وزارة الزراعة: استراتيجية تعميم القطاع الزراعي للفترة 2015-2020 والميزانية الحكومية لعام 2017

-12- ويترجم ذلك إلى زيادة في الاستثمارات وفي مخططات الدعم، وإعانت وائتمان رخيص جداً متوفراً للمزارعين والأعمال الزراعية. وهنالك مبدئياً استجابة قوية لهذه الإجراءات، مع نمو زراعي كبير وصل إلى 12 بالمائة عام 2013، وذلك يعود أساساً إلى زيادة الأرضي المزروعة وإلى ارتفاع المردودات. إلا أنه، ومنذ ذلك الوقت وصل النمو إلى عتبة لم يعد يتجاوزها، وهنالك شواغل بشأن عدة مظاهر تتعلق بالمخططات، بما في ذلك الاستهداف والاستدامة والتشوهات في الأسواق.⁵

-13- تتشكل السياسات في القطاع الزراعي في جورجيا إلى حد كبير قبل كل شيء بطموحات البلد للانضمام إلى الاتحاد الأوروبي، حيث تمثل الإجراءات الصحية النباتية وإجراءات التصحاح بعداً أساسياً. وقد بدأت جورجيا بالفعل بمواصلة تشريعاتها مع تلك السائد في الاتحاد الأوروبي.

-14- ومع أن استراتيجية التنمية الاجتماعية الاقتصادية طويلة الأمد 2020 التي صيغت (عام 2014) تبقى عماد السياسة الحكومية، إلا أن الاستراتيجية متوسطة الأمد لعام 2016 (الحرية، والتنمية المتسارعة والازدهار) تفصل كيف تروج الحكومة للنمو الاقتصادي الريفي الشامل والمستدام، على سبيل المثال من خلال الوصول إلى التمويل وتحسين تنافسية القطاع الخاص. وفي هذا السياق، هنالك تركيز متزايد على وصول أفضل للائتمان والخدمات لصالح أصحاب العيارات الصغيرة واهتمام متعدد في السلع العامة الريفية. وفي قطاع الزراعة، تعرف استراتيجية الحكومة للتنمية الزراعية للفترة 2015-2020 بأهمية العمل بتصميم بعد عقد من انخفاض الاستثمارات العامة، وتسلط الضوء على الحاجة لنهج تحولي في هذا القطاع. كذلك فإن هذه الاستراتيجية تأخذ بعين الاعتبار التحديات والفرص الخارجية التي ستحفظها اتفاقية التجارة الحرة مع الاتحاد الأوروبي، والتي تمنع المزيد من الدعم من الاتحاد الأوروبي لهذا القطاع ولكنها تفرض عليه معايير أكثر صرامة.

⁵ انظر: البنك الدولي، استعراض الإنفاق العام في جورجيا (2015)

دال - المخاطر القطرية والقطاعية والبرامجية وإجراءات التخفيف منها

- هنالك العديد من المخاطر التي لابد من النظر فيها عند تصميم الاستراتيجية القطرية. وترتدى هذه المخاطر مع إجراءات التخفيف منها موجزة أدناه.

الخطر	مستوى الخطر	استراتيجية التخفيف
مؤسسي: قدرات الحكومة في البلاد غير كافية لمعالجة عبء العمل المتزايد الناجم عن مخصصات مالية أكبر، وجدول أعمال إصلاح التشريعات الناظمة.	متوسط	بناء قدرات وحدة التنفيذ الأساسية ضمن الحكومة الجورجية، والتي تعامل أيضاً مع المشروعات الإنمائية الأخرى غير تلك التي يمولها الصندوق. وستتم إتاحة موارد إضافية لدعم فعالية التنفيذ.
محظوظة الثقة بالحلول الجماعية للتحديات المشتركة مما يفرض من التعاون الجامع	متوسط	الترويج لمنظمات/تعاونيات التنمية المجتمعية من خلال نهج متدرج مع نمو القرارات والثقة.
الاستهداف: من خلال استهداف الفقراء في المناطق النائية، لن تكون المشروعات قادرة على اجتذاب استثمارات القطاع الخاص أو تحفيز التحول الشمولي.	متوسط	سوف تستهدف المشروعات فقراء الريف، ولكنها ستضم بعض "قادة التحول المختارين" الذين بإمكانهم تشجيع الآخرين على إضفاء الطابع التجاري ودعم أصحاب المبادرات الفردية الطامحين أو الموجودين.
المتاخ: تزيد أحداث الطقس المتطرفة/غير المناخ الذي يزيد من المخاطر على الزراعة أصحاب الحيازات الصغيرة.	متوسط	اختبار والترويج للتقنيات الذكية ببيئا لإدارة الموارد الزراعية والبيئية والبني الأساسية المكيفة.

ثانياً - الدروس والنتائج السابقة

الدروس والنتائج السابقة

- هنالك العديد من النتائج الرئيسية التي استثار بها برنامج الفرص الاستراتيجية القطرية هذا، والمبنية عن استعراض استكمال برنامج الفرص الاستراتيجية القطرية وتقييم البرنامج القطري والاستراتيجية القطرية لعام 2017. وأما النتيجة الإيجابية الرئيسية فهي توسيع نطاق التدخلات، مثل إيجاد وتعزيز مكاتب لتسجيل الأرضي مما ساعد الحكومة في جهودها الرامية إلى فتح المزيد من الفروع عبر البلاد، وبالتالي قيادة تجميع الأرضي.

- وكذلك بذل الصندوق جهوداً قوية لزيادة دخول أصحاب الحيازات الصغيرة. وقد أظهر مسح الخط النهائي لمشروع الدعم الزراعي بأن دخول المستفيدين من الزراعة قد ازداد بحدود 14 بالمائة، في حين أن تقرير إنجاز برنامج التنمية الريفية أظهر أن دخول المزارعين والمشروعات ارتفع بحدود 28 بالمائة.

- كذلك ساعد الصندوق أيضاً في زيادة حجم المخرجات المسؤولة وتوسيع في القيمة المضافة للمنتج المحلي. وأظهرت النتائج في ظل مشروع الدعم الزراعي بأن المشروعات المدعومة قد تمكنت من إيجاد الروابط مع

المزارعين وغيرها من المشروعات الأخرى. وأظهر تقرير إنجاز المشروع وتقدير لأثر الصندوق أجري عام 2017 بأن المزارعين الذي يعيشون بالقرب للأعمال الزراعية المدعومة كانوا راضين عن النتائج، وذلك بفضل انخفاض تكاليف النقل، وارتفاع الأسعار وسرعة التسديد عند بيع منتجاتهم لتلك المشروعات. كذلك فقد خلق المشروع أكثر من 125 فرصة عمل جديدة وأوجد الروابط مع 700 مزارع ومشروع.

إلا أنه، كانت هنالك تحديات كبيرة في الحافظة، وبخاصة في إيجاد الاتحادات الائتمانية والتعاونيات وما يسمى بمنظمات المجتمعية، التي غالباً ما تتصرف بتاريخ يتسم بمحدودية الاستدامة وانخفاض الأثر. ومن بين 160 اتحاد ائتماني تم إنشاؤها بموجب مشروع التنمية الزراعية، ويحلول عام 2017، لم يتمكن إلا اتحادان فقط من البقاء والاستمرار. وبصورة مشابهة، أُسند برنامج التنمية الريفية للمناطق الجبلية والهضابية نهجه التشاركي إلى المنظمات المجتمعية المنشأة حديثاً وإلى رابطات المزارعين، ولكن لم يتمكن أي منها من البقاء والاستمرار بعد انتهاء فترة عمر المشروع.

الدروس التي ستدلي الاستراتيجية المستقبلية

أما الدرس الجوهرى من الخبرات السابقة فهو ينص ضمن اتساق الوثيق مع السياق السياساتى، وتفصيل الأهداف بحيث تتواءم مع أولويات مظروف موارد الحكومة، وبخاصة وزارة حماية البيئة والزراعة. ومن جهة حظي الصندوق بالنجاح، على سبيل المثال في إيجاد ست وكالات لسلامة الأغذية وجميعها مازالت قيد التشغيل الكامل والإدارة الجيدة، وهي تلعب دوراً هاماً في عملية الانضمام إلى الاتحاد الأوروبي، كما تم الاعتراف به في تقييم البرنامج القطري والاستراتيجية القطرية لجورجيا (عام 2018). ومن جهة أخرى، وقبيل عام 2013 فقد كان للانحراف العام منخفض المستوى في الزراعة تبعات جدية على استدامة التدخلات التي اعتمدت على استمرارية الدعم.

ويشير فشل الدعم المقدم إلى التعاونيات والاتحادات الائتمانية إلى محدوديات فرض نهج "أفضل الممارسات" من أماكن أخرى على السياق الجورجي، حيث هنالك إرث من الملكية الجماعية القسرية التي خلقت نوعاً من انعدام الثقة بالحلول التعاونية. وقد استفاد تصميم برنامج الفرص الاستراتيجية القطرية هذا من الدرس. ومن الواضح أن هنالك العديد من الفوائد لتجميع أصحاب الحيازات الصغيرة لقوائم (مثلاً اقتصادات الحجم الكبير، واجتناب التجار وتحسین الموقف التفاوضي) - إلا أن هذا الأمر لابد وأن يكون على شكل عملية يقودها الطلب.

وبالنسبة للاستثمارات المستقبلية، يتوجب على الصندوق إيجاد تركيز استراتيجي على التمويل الريفي وبناء المؤسسات الريفية، بما يتماشى مع أولويات الحكومة. إذ أن التمويل الريفي مجال بني فيه الصندوق جملة من الخبرات، وذلك بسبب اختبار نماذج متعددة للوصول إلى التمويل (تقييم البرنامج القطري والاستراتيجية القطرية 2018).

ومن بين الدروس الأخرى المستفادة أن الصندوق لا يمكنه أن يستهدف أشد الناس فقراً في المناطق الريفية مع الإبقاء بمهنته بالاستثمار بصورة مستدامة في الأصول الإنتاجية لفقراء الريف في جورجيا. فالسكان الريفيون الأشد فقراً هم في العادة الأشخاص الأكبر سنًا الذين غالباً ما يعيشون على التحويلات الاجتماعية ومعاشات التقاعد وتحويلات العاملين في الخارج، وزراعة باحات منازلهم (التي تصل مساحتها نمطياً إلى 0.1 هكتار) وهم يزرعونها عادة لأغراض الكفاف، كما أنهم لا ينخرطون إلا بصورة هامشية في تجارة

المقايسة مع أفراد أسرهم وحيوانهم، إلا أنه، وفي موقع عديدة، هنالك فرصة في الأراضي المهجورة مما يسمح بتجميعها والاستفادة من اقتصاد الحجم الكبير. كذلك فإن الفرص خارج المزرعة تتبع في قطاع الخدمات الريفية، والسياحة والصناعات الزراعية. وبالتالي سوف يركز الصندوق التزاماته المستقبلية في المناطق النائية المستبعدة والأكثر فقرًا، وسوف يستهدف الفقراء وأولئك الذين يواجهون خطير الفقر والقصاء الاجتماعي. ومع ذلك، فإن لهذه الالتزامات جانب اقتصادي، إذ سيتم استهداف قادة التحول ممن هم أقل فقراً القادرين على عرض النهج الصامدة المريحة، وتوليد فرص العمل.

-24- وحيث أنه يتوقع أن تبقى جورجيا على معدل نموها الحالي البالغ 5 بالمائة سنويًا في المتوسط حتى عام 2023 (الأفق الاقتصادي لصندوق النقد الدولي 2018)، يتوقع لهذا البلد أن يتخرج بصورة متدرجة من وضعه الحالي كبلد متوسط الدخل من الشريحة الدنيا في غضون عامين إلى ثلاثة أعوام. ويعني ذلك أنه يتوجب على الصندوق النظر في المجالات الأخرى للتعاون مع الحكومة، مثل إدخال المساعدة التقنية مستردة التكاليف ونقل المعارف والخبرات التي يمتلكها الصندوق على المستوى العالمي.

ثالثاً - الأهداف الاستراتيجية: معايير أولويات الصندوق وجورجيا لإرساء شراكة شمولية متسقة

-25- الميزة النسبية. يعتبر الصندوق شريكاً يحظى باحترام كبير في جورجيا، ويُعرف بكفاءاته في الحد من الفقر من خلال الاستثمارات المستدامة في قدرات الإنتاجية للمزارعين، والأعمال الزراعية وموفري الخدمات المالية. ويمتلك الصندوق فرضية واضحة في جميع المبادرات التي يتخذها وهي توفير السبل الابتكارية لخروج فقراء الريف من قبضة الفقر، في سياق تناقص عدد السكان، وزيادة متطلبات القواعد الناظمة والمزيد من الضغوطات التنافسية. ومن الناحية التشغيلية، فإن مجال التركيز الأساسي هو أصحاب الحيازات الصغيرة والاستثمارات الإنتاجية التي تسرع من النمو الشمولي في الزراعة وفي الفضاء الريفي الأوسع. وأخيراً، يركز الصندوق بصورة متزايدة على التوسيط في الشراكات المعرفية وتحفيز الابتكارات بشأن التحديات الناشئة، وبخاصة تغير المناخ⁶. وفي جورجيا، سوف يستقطب الصندوق هذه الكفاءات للترويج لسلب عيش تنسن بصمود أكبر في المناطق الريفية الهامشية، بما في ذلك دعم الزراعة الذكية بيئياً والتوعي الاقتصادي والإبقاء على المواهب، والوصول إلى التمويل الريفي.

-26- الغاية والأهداف الاستراتيجية. الغاية الإجمالية من برنامج الفرص الاستراتيجية القطرية المستند إلى النتائج للفترة 2019-2024 هي دعم جهود الحكومة الرامية إلى الترويج للتحول الاقتصادي الريفي المستدام والشمولي وتحسين صمود المجتمعات الريفية. وسيهدف الصندوق إلى زيادة قدرات الفقراء المنتجين - الذين يتمتعون بالإمكانيات وبالطموح للبقاء في المناطق الريفية ولعب دور النماذج - التي يحتدى بها لاقتراض الفرص التي يوفرها التحول الجاري للمناطق الريفية، مع الاستجابة لجملة من التحديات التي تواجههم. ويفترض أن يعتمد تحقيق هذه الغاية على تحقيق الاهداف الاستراتيجيين اللذين يركزان على:

(1) **الهدف الاستراتيجي الأول: خلق الفرص الاقتصادية للفقراء المنتجين.** سوف يستمر الصندوق في مساعدة المزارعين أصحاب الحيازات الصغيرة في المناطق الجبلية والفقيرة لزيادة إنتاجيتهم الزراعية

⁶ الإطار الاستراتيجي للصندوق للفترة 2016-2025 (2015)

وريحitem ووصولهم إلى الأسواق، وتحسين البنية الأساسية المنتجة. وسوف يركز هذا الهدف أيضا على الترويج للوظائف خارج المزرعة ولتوسيع الدخول، بما في ذلك في قطاع السياحة. وسوف يتم التأكيد على تحسين وصول السكان الريفيين الفقراء إلى الخدمات المالية في الجهد المبذولة في كل من القطاعين الزراعي وغير الزراعي. وكذلك سيساعد هذا الهدف أيضا على الإيفاء بالأهداف الحكومية المتعلقة بالتغذية الريفية.

(2) **الهدف الاستراتيجي الثاني: إيجاد بيئة تمكينية لاقتصاد ريفي مكيف مستدام وشمولي.** ومع تغير المناخ تأتي الحاجة للحد من ضعف القطاع الزراعي وإدارة أفضل للموارد الطبيعية. وسوف ينطوي هذا الهدف على العمل لحفظ على تعظيم القدرات الإنتاجية للمياه والتربة والمراعي – وجميعها موارد يعتمد عليها سكان الريف بصورة غير متناسبة، لا أقل من ذلك في المناطق الريفية، حيث تشكل المراعي العنصر الرئيسي لاستراتيجيات سبل العيش. وسوف يعمل الصندوق أيضا على الحد من ضعف أصحاب الحيازات الصغيرة في وجه الأحداث المناخية المتطرفة، مع كون البنية الأساسية المكافحة العنصر الرئيسي. علاوة على ذلك، سوف يسعى الصندوق لخلق منصة للأدلة حول إدارة الموارد الطبيعية التي يمكن أن يستثمر بها كل من صناعة السياسات، علاوة على الممارسات الملمسة في مجالات مثل إدارة المراعي والري. وسيكون تعزيز قدرات فقراء الريف أنفسهم على إدارة هذه الموارد وتحسين سلامة الأغذية والأمن الغذائي أمورا حاسمة لتحقيق هذا الهدف.

-27 وقد صمم الهدفان لتحقيق أثر استراتيجي لا أقله في المناطق الأشد فقرا ونأيا، حيث التهديد هو الأشد حدة وحيث تشتت الحاجة للإجراءات التصحيحية. وسيتأتي الأثر من الإشارة إلى السبل التي تستند إلى الأدلة لفقراء الريف للخروج من قبضة الفقر، من خلال حزمة معدة بعناية من المشورة التقنية والتمويل والربط الاستباقي مع سلسلة القيمة الأعلى إنتاجية. وسوف يضمن الصندوق إشراكاً أفضل وسيثبت أيضاً أن الحلقة المفرغة للتقدم في السن، وهجرة الشباب والتدحرج الاقتصادي في المناطق الريفية يمكن إيقافها – لا بالضرورة من خلال عكس الهجرة من المناطق الريفية إلى المناطق الحضرية ، ولكن من خلال إثبات أن سبل العيش الريفية تشكل خياراً وظيفياً جذاباً لأصحاب المبادرات من الشباب.

-28 وسيسهم هذان الهدفان الاستراتيجيان في الهدف الأول من أهداف التنمية المستدامة ("القضاء على الفقر بجميع أشكاله وأينما كان")، ("والقضاء على الجوع وتحقيق الأمن الغذائي وتحسين التغذية والترويج للزراعة المستدامة")، وهدف التنمية المستدامة الخامس ("تحقيق المساواة بين الجنسين وتمكين جميع النساء والفتيات")، وهدف التنمية المستدامة السادس ("ضمان توفر الإدارة المستدامة للمياه والتصحاح للجميع") وهدف التنمية المستدامة الثالث عشر ("اتخاذ إجراءات ملحة لمكافحة تغير المناخ وأثاره"). وكذلك فإن هذان الهدفان الاستراتيجيان يؤكدان ويدعمان تحقيق الأهداف الاستراتيجية السبعة لوزارة الزراعة⁷. وأخيراً، فإن برنامج الفرص الاستراتيجية القطرية هذا يتوازع أيضاً مع الأهداف الثلاثة للإطار الاستراتيجي للصندوق

⁷ (1) تعزيز تنافسية أصحاب المبادرات الريفية؛ (2) التنمية المؤسسية؛ (3) تحسين خصوبة التربة؛ (4) التنمية القطاعية والإقليمية/تنمية سلسلة القيمة؛ (5) ضمان الأمن الغذائي؛ (6) سلامة الأغذية، والصحة الحيوانية وحماية النباتات؛ (7) تغيير المناخ والبيئة و التوعي البيولوجي.

للفترة 2016-2025. ويتسق انخراط الصندوق بصورة كاملة ويتواهم أيضاً مع شراكة الأمم المتحدة للتنمية المستدامة.

-29- ستشكل المشروعات الاستثمارية الأداة الجوهرية لتحقيق الأهداف. إذ سيسمح مشروع التحديث الزراعي والوصول إلى الأسواق والصمود، الذي يركز على الري وعلى الممارسات الزراعية الذكية بيئياً، في كل من الهدفين وفي جميع المخرجات. وسيغذي التعلم من الحكومة ومن البنية الأساسية للري الحديث بشأن إدارة الموارد الطبيعية، وسوف يساعد الصندوق على تلبية أهدافه في توسيع النطاق. أما المشروع القادم وهو مشروع تحديث صناعة الألبان والوصول إلى الأسواق فسيسمح أيضاً في تحقيق الهدفين، مع التركيز على مزارعي الألبان على نطاق صغير في المناطق الجبلية. وسيدعم أيضاً حوكمة المرعاعي وإدارتها والمساهمة في الإدارة المستدامة الأكثر صموداً للموارد الطبيعية.

-30- وأما بالنسبة لسيناريو التمويل الحالي، حيث لا يوجد تمويل مستقبلي من الصندوق في الدورة التالية من دورات نظام تخصيص الموارد على أساس الأداء (والمعروفة أيضاً بالتجديد الحادي عشر للموارد، التي تمتد من 2019-2021)، فإن كلاً المنشروعين سببلاً جهوداً ملموسة لتحقيق الهدفين الاستراتيجيين. إلا أنه، ونظراً لهيكلاًية إدارة المنشروعين المتينة وللتزام الحكومي القوي بكل من القطاع واستثمارات الصندوق، فإن الآفاق إيجابية أساساً حتى وإن كان جدول الأعمال طموحاً. ومن الواضح أن أي استثمار مستقبلي متسلٍ من الصندوق سوف يوفر دعماً حاسماً وبعضاً من الآثار المحتملة، ولكن وفي الوقت الحالي فإن أكثر السيناريوهات واقعية هو المنشروعين فقط اللذين سينفذان ويشكلان جوهر تحقيق الأهداف الاستراتيجية.

رابعاً - النتائج المستدامة

ألف - الاستهداف والشباب والتمايز بين الجنسين

-31- بما يتماشى مع سياسة الصندوق في الاستهداف والتبدلات مع الحكومة، واستعراض استكمال برنامج الفرص الاستراتيجية القطرية وتوصيات مكتب التقييم المستقل، سوف تتركز استراتيجية الاستهداف لهذا البرنامج على الوصول إلى قراء الريف الذي يمتلكون إمكانيات النهوض بقدراتهم الإنتاجية. وهم المزارعون أصحاب الحيازات الصغيرة والمشروعات صغيرة النطاق. وعلى الرغم من كونهم عرضة لخطر الفقر والإقصاء الاجتماعي، إلا أنهم قادرون بصورة نشطة ومهتمون بتوسيع إنتاجهم وزيادة توسيع مصادر دخلهم. وسوف تستهدف الإجراءات المجتمعات المحلية والقادة الرسميين وغير الرسميين لنشر المعلومات بصورة واسعة حول الفرص المتوفرة وضمان الشفافية في اختيار المستفيدين.

-32- سوف يستخدم الاستهداف الجغرافي للوصول إلى المجتمعات الفقيرة والضعيفة، باستخدام معايير وبيانات ملموسة وواضحة. وسوف يستهدف المشروع المقترن لتحديث صناعة الألبان والأسواق منتجي الألبان في المناطق الجبلية والنائية حيث معدلات الفقر عالية. وسيتم تحقيق الاتساق بين إجراءات الاستهداف الذاتي مع القدرات والأولويات المخصوصة للمجموعات الفقيرة والضعيفة. وسوف يركز المشروع على القطاعات الفرعية التي تولد فرص العمالة وعلى الانخراط الأكبر مع أصحاب الحيازات الصغيرة، وبخاصة النساء والشباب منهم.

33- ونظراً للوضع غير المواتي للنساء في الزراعة في جورجيا، سينفذ المشروعان الاستثماريين كلما كان ذلك ممكناً آليات استهداف مباشرة، وبخالق الترتيبات لتعزيز قضايا التمييز بين الجنسين بغية زيادة مشاركة النساء ووصولهن إلى المعلومات والمعرفة، والأسواق، والتمويل.

34- تم استهداف الشباب في مشروع تحديث الزراعة والوصول إلى الأسواق والصمود، علاوة على استهدافهم في تصميم مشروع تحديث صناعة الألبان والوصول إلى الأسواق. وهنالك تركيز جوهري على تطوير الفرص الاقتصادية التي تثبت أن الزراعة جذابة بصورة كافية للشراائح الأصغر سنًا من السكان الريفيين كي يبقوا ويزدهروا في المواقع التي يعيشون فيها.⁸

باء - توسيع النطاق

35- سوف تسعى الاستراتيجية إلى الترويج لتوسيع نطاق منتظم للابتكارات. وعلى مستوى الحافظة، سوف يتم تبني نهج برامجي – وهو أداة مؤسسية لتيسير تحديد وتغيير ونشر أو تكرار الابتكارات التي يمكن توسيع نطاقها والتي تولدتها الأنشطة على أرض الواقع.

36- وسيتمحور التعلم الأساسي الذي من شأنه أن يستخدم لكي تستثير به سبل رفع النطاق حول كيفية خلق سلسل القيمة الشمولية للألبان الخاصة بأصحاب الحيازات الصغيرة التي تؤدي إلى زيادة الطابع التجاري، مع الترويج لمصالح ورفاهية فقراء الريف. وأما موضوع التعلم الثاني، فيمكن أن يتمحور حول تحديد العناصر الجوهرية لحزمة جذابة يمكن أن تستخدم لتحفيز المواهب الريفية الشابة للاستثمار في المواقع التي يعيش فيها. وأخيراً، هنالك عنصر شامل للتعلم يتعلق باستراتيجيات التأقلم المجدية لأصحاب الحيازات الصغيرة، المتعلقة بقدرتهم على البقاء حتى ضمن أكثر المعايير صرامة فيما يخص الأغذية والمعايير الناظمة المتعلقة بعملية الانضمام إلى الاتحاد الأوروبي. وسوف يستخدم هذا التعلم أيضاً لكي تستثير به الانحرافات السياسية، كما سيتم وصفه أدناه.

جيم - الانحراف في السياسات

37- سوف يساعد الصندوق الحكومي على تطوير فهم مشترك لتأثيرات وآثار التشريعات الجديدة ذات الصلة باتفاقية الانضمام إلى الاتحاد الأوروبي على المجموعات السكانية الريفية المختلفة، كما أنه سيوفر مقترنات عن كيفية استهداف الدعم لأولئك الذين يواجهون خطر المزيد من التهميش. وسوف يناقش الصندوق أيضاً سبل تحديد أصحاب المبادرات الفردية من الشباب القادرين على الإيفاء بمتطلبات التشريعات التي تزداد صرامتها، وصياغة بيئية مواتية توفر الحوافز لهم للبقاء في المناطق الريفية. وبالفعل، فإن مشروع التحديث الريادي والوصول إلى الأسواق والصمود يوفر لمحات ثاقبة هامة يمكن أن تشهد في هذا الحوار.⁹ وبموجب المشروع الجديد لتحديث صناعة الألبان والوصول إلى الأسواق، سوف تبذل الجهود أيضاً لتعلم كيفية جعل أصحاب الحيازات الصغيرة من مصنعي الألبان قادرين على التغلب على تحديات وضع

⁸ الذين تتراوح أعمارهم بين 14 و 29 سنة.

⁹ يعمل المشروع أيضاً على الوساطة المالية الشاملة، على سبيل المثال من خلال المنح النضيرية، كما تم تسليط الضوء عليه في تقييم الاستراتيجية القطرية والبرنامج القطري.

المعايير والتشريعات الناظمة، وإعداد لمحات ثاقبة في ممارسات إدارة أفضل للموارد الطبيعية وحوكمة الموارد المشاع، بما في ذلك ما يتعلق بحيازة أراضي المراعي.

دال - التطرق لتحديات الموارد الطبيعية وتغير المناخ

-38- سيستمر الصندوق في مساعدة الحكومة على التكيف مع تغير المناخ باعتباره عنصراً رئيسياً في كل من هذين الهدفين الاستراتيجيين. ويتطور مشروع التحديث الزراعي والوصول إلى الأسواق والصمود حالياً ٌلهجاً ابتكارية لمساعدة المنتجين أصحاب الحيازات الصغيرة على بناء صمودهم في وجه تغير المناخ، علاوة على الاستفادة من الحواجز المتاحة والتمويل المتوفر للتحول نحو نظم الإنتاج التي تتسم بالصمود في وجه تغير المناخ. وسوف يوسع مشروع تحديث صناعة الألبان والوصول إلى الأسواق أيضاً الدعم المقدم للتأقلم مع تغير المناخ من خلال الترويج للإدارة المستدامة للموارد الطبيعية وممارساتها وتقنياتها، بما في ذلك الإجراءات المتعلقة بسلسلة قيمة الإنتاج الحياني مثل نقاط سقاية القطuan المقاومة لتغير المناخ، وجسور الوصول وتحسين بعض مقاطع الطرق، وإعادة إحياء المراعي المتدهورة وضبط الفيضانات/الحث المائي. علاوة على ذلك، وبما يتضمن التوصية الصادرة عن تقييم الاستراتيجية القطرية والبرنامج القطري، سوف يسعى الصندوق لتوفير تمويل بمنحة لتسريع إجراءات التأقلم مع تغير المناخ (على سبيل المثال من الصندوق الأخضر للمناخ ومرفق البيئة العالمية).

هاء - الزراعة المعاصرة لقضايا التغذية والتنمية الريفية

-39- مع أن سوء التغذية ليس بقضية رئيسية في البلاد، إلا أن هنالك قلق متزايد بشأن زيادة السمنة والبدانة التي تتراوح معدلاتها بحدود 53 بالمائة بالنسبة للنساء و 16 بالمائة بالنسبة للرجال (2014)¹⁰. وتتسم جورجيا بتتنوع منخفض إلى متوسط في حمياتها الغذائية، مما يعني أنه وبال المتوسط بإمكان السكان في جورجيا تحمل نفقات خمس من أصل عشرة مجموعات من الأغذية الموصى بها. وبسبب سوء القدرة الشرائية للمستهلكين، تتسم الحمييات الغذائية نمطياً باستهلاك عالي للخبز والمعجنات، وبالتالي فإن 62 بالمائة من قيم الطاقة الغذائية تأتي من الأطعمة المستندة إلى النشويات. ووفقاً لمنظمة أوكسفام، تتفق الأسر الفقيرة أكثر من 65 بالمائة من دخلها على الغذاء. وللتتصدي لهذه القضايا على مستوى مؤسسي، تتخذ الحكومة خطوات هامة لزيادة صورة الأمن الغذائي وخرجت بـ 20 توصية أساسية حول الأمن الغذائي والتغذية، مع مسودة قانون حول الأمن الغذائي، مما يعزز بصورة إضافية من التزاماتها. وبهدف برنامج الفرص الاستراتيجية القطرية هذا إلى دعم تنويع الحمييات الغذائية في البلاد، من خلال تعزيز سلسلة قيم الألبان التي من شأنها أن تعزز تغذية أصحاب الحيازات الصغيرة عبر تحسين فرص الوصول لمنتجات الألبان واللحليب المصنعة محلياً والقدرة على احتمال تكاليفها. كذلك ستدعى تدخلات الصندوق أيضاً تعزيز الجودة والسلامة، وبخاصة لمنتجات الألبان من خلال تطوير قدرة المصنعين والمنتجين، ومن خلال الدعم المالي لرفع سوية المرافق بحيث تفي بالمعايير الدولية لسلامة الأغذية.

¹⁰ <https://www.globalnutritionreport.org/files/2017/12/gnr17-Georgia.pdf>

خامساً - الإيصال الناجح

ألف - إطار التمويل

- 40 سوف يسعى الصندوق لاستقطاب التمويل من الشركاء الإنمائيين ومن جميع المستفيدين الذي يشاركونه هدف زيادة صمود قراء الريف، من خلال الاستثمار المنتج.
- 41 وسيبدأ مشروع تحديث صناعة الألبان والوصول إلى الأسواق عام 2019. وفي سيناريو الانتقال، قد يحدث تسلسل للاستثمارات اعتماداً على الظروف، وبخاصة الظروف التي لا تقع ضمن نطاق سيطرة جورجيا. إلا أنه لا يوجد أي تمويل من الصندوق مخصص للبلاد بعد هذا المشروع، وذلك بسبب انتقائية استثمارات الصندوق عالمياً. وفي هذه الأثناء، ولأي مشروع مستقبلي - وفي حال تم تخصيص موارد لجورجيا - فإن نسبة التمويل المشتركة يجب أن تتواءم مع النسبة المؤسسية التي وضعها الصندوق، بمستوى 1 إلى 1.4.

باء - الرصد والتقييم

- 42 يتواكب نظام رصد وتقييم المشروعات الحالي بصورة كاملة مع نظم الإبلاغ في الصندوق. وسوف يتم تتبع التقدم المحرز تجاه تحقيق الأهداف الاستراتيجية باستخدام إطار نتائج برنامج الفرص الاستراتيجية القطرية المستند إلى النتائج، الذي يعتمد بدوره على نجاح النظام الحالي للرصد والتقييم الخاص بمشروع التحديث الزراعي والوصول إلى الأسواق والصمود. وسيتم الترويج للنهج الجديد للمرجعية الجغرافية للتدخلات المختلفة من خلال تطوير نظام للرصد والتقييم يعتمد على بيانات مستندة إلى الأدلة. وهناك موظف للرصد والتقييم موجود حالياً ويتلقى الدعم من خلال برامج تنمية القدرات في الصندوق. وسوف تتضمن آليات بناء القدرات الأخرى دعماً يقدمه الصندوق خلال بعثات الإشراف لتعزيز أداء نظام الرصد والتقييم.

جيم - إدارة المعرفة

- 43 أشار تقييم الاستراتيجية القطرية والبرنامج القطري إلى أن إدارة المعرفة لم تلتقي الكثير من الاهتمام ضمن البرنامج القطري. وسوف يتم إيلاء اهتمام وتحفيزه مخصوص لهذا الموضوع في ظل برنامج الفرص الاستراتيجية القطرية الجديدة.
- 44 تعتبر إدارة المعرفة حاسمة للتأكد من استخدام التعلم ذي الصلة من المشروعات السابقة لتعزيز توسيع النطاق، والحوار السياسي والحوار بين دول الجنوب، والتغذية الراجعة التي سيستفيد منها تصميم وتنفيذ المشروعات. وستعتبر البيانات المتولدة عن نظام الرصد والتقييم حجر أساس إدارة المعرفة . كما سيتم إعداد استراتيجية للاتصالات وإدارة المعرفة من قبل موظف إدارة المعرفة الذي تم تعيينه في إطار مشروع التحديث الزراعي والوصول إلى الأسواق والصمود، لتوفير سبل واضحة للأنشطة المختلفة لإدارة المعرفة.
- 45 سيتم إعداد عدد من المنتجات المعرفية، بما في ذلك مواجهة سياسات القواعد الناظمة ذات الصلة بالإنتاج الحيواني، وتقدير التسويق والاستراتيجيات التشغيلية المطورة لسلسل القيمة. إضافة إلى ذلك، وبنهاية مشروع التحديث الزراعي والوصول إلى الأسواق والصمود، سيكون قد تم إعداد منتج معرفي حول إدماج

الشباب بموجب المكون الخاص ب أصحاب المبادرات الفردية من الشباب الذي تشارك في تمويله الوكالة الدانماركية للتنمية الدولية.

دال - الشراكات

46- كما نص عليه تقييم الاستراتيجية القطرية والبرنامج القطري، فقد بنى الصندوق شراكات قوية، بما في ذلك شراكات التمويل المشترك مع جهات مانحة ثنائية ومتحدة الأطراف¹¹. وسيتم بناء الشراكات الاستراتيجية أو تعزيزها على المستويات الوطنية والإقليمية والدولية استناداً إلى الميزة النسبية لكل مؤسسة من المؤسسات، وذلك بهدف الحصول على استقطاب مالي أكبر من خلال التمويل المشترك على مستوى المشروعات، ودعم أفضل خلال التنفيذ من القطاع الخاص والمجتمع المدني وزيادة التأثير على القضايا السياسية الوطنية. وستسعى هذه الشراكات أيضاً للاستفادة من أثر الصندوق من خلال الانخراط في الصراعات السياسية مع الشركاء الأساسيين صانعي القرار على جميع المستويات.

47- وسوف يتم إرساء هذه الشراكات أساساً مع: (أ) الوزارات المختصة والسلطات البلدية حول إدارة النتائج، وإدارة المعرفة وحوار السياسات؛ (ب) شركاء التنمية الخارجيين الآخرين، وبخاصة الاتحاد الأوروبي، والبنك الأوروبي للإنشاء والتعمير، والوكالة السويسرية للتعاون الإنمائي، والبنك الدولي حول المشروعات المشتركة المحتملة و/أو التكامل؛ (ج) مع منظمة الأغذية والزراعة ووكالة التنمية الألمانية، ووكالة التنمية النمساوية، وبخاصة بشأن إدارة الأراضي في المناطق النائية والهامشية. علاوة على ذلك، سوف يستمر الصندوق في الانخراط مع شركائه الثنائيين، بما في ذلك الوكالة الدانماركية للتنمية الدولية لاستقطاب كل من الموارد المالية والتقنية التي يمكن لها أن توسيع نطاق الانخراط الشمولي، وبخاصة بالنسبة للشباب.

هاء - الابتكار

48- يتمتع الصندوق بسجل مثبت في الابتكارات: مكنته من ذلك مشروع التنمية الريفية، وقد أوجدت مؤسسات التمويل الصغرى ممارسات ابتكارية لإيصال الائتمان الصغرى الريفي، وحسنت من خدماتها للزيائين الريفيين وبنت قواعد زيان جديدة. وكان استخدام القروض من غير الضمانات أمراً ابتكارياً، فتح المجال للمعدمين للوصول إلى التمويل الريفي، كما ورد في تقييم الاستراتيجية القطرية والبرنامج القطري لجورجيا، حيث تم تسليط الضوء على وجه الخصوص على الدعم المقدم لمؤسسات التمويل الصغير¹². وبموجب مشروع دعم الزراعة، استثمر القطاع الخاص في قطاع التأجير الزراعي الذي تم إهماله سابقاً.

49- وبالمضي قدماً، سوف تتركز الابتكارات على ثلاثة تحديات جوهيرية متداخلة: أولها، الابتكار الخاص بالنمو الاقتصادي في المناطق الهامشية والنائية، واختبار نهج مختلفة - مثل الدعم الاستثماري المباشر والبني التحتية وروابط الأعمال - لتحديد الإجراءات الفعالة للبقاء على المواهب الريفية في هذه المناطق؛ وثانياً، سوف تتولد الابتكارات حول كيفية تعزيز الصمود الريفي في وجه تغير المناخ من خلال ممارسات زراعية مختلفة وحلول للبني الأساسية؛ وثالثاً، سوف يتم استقطاب الابتكارات ضمن آليات الحكومة ذات الصلة بإدارة الموارد المشاع، لا أقلها موارد المياه/الري والمرعى.

¹¹ انظر تقييم البرنامج القطري والاستراتيجية القطرية لجورجيا مكتب التقييم المستقل في الصندوق (روما، الصندوق، 2018)

¹² انظر تقييم البرنامج القطري والاستراتيجية القطرية لجورجيا مكتب التقييم المستقل في الصندوق (روما، الصندوق، 2018) الصفحة 27.

واو - التعاون بين بلدان الجنوب والتعاون الثلاثي

50- في جورجيا، سوف يركز الصندوق على توسيع دوره ك وسيط ومرجح لحلول التنمية الريفية وغيرها من الموارد لا التي نشأت في الإقليم فحسب، وإنما عالمياً أيضاً، والتي يمكن جلبها مجتمعة لتحسين من سبل عيش سكان الريف عبر البلدان التي تمر في مرحلة انتقال.

51- وبصورة ملموسة أكثر، سوف يشجع الصندوق الشراكات الإقليمية مع البلدان التي تواجه تحديات مشابهة، بما في ذلك حول تغيير المناخ والإجراءات المشتركة وانخفاض تعداد السكان في المناطق الريفية - وبخاصة في المناطق الجبلية. ومن البلدان الشريكة بصورة واضحة أرمينيا ومولدوفا وتركيا والجبل الأسود. وبصورة ملموسة، يمكن عرض الابتكارات من جورجيا من خلال الأحداث ذات الصلة بالتعاون بين بلدان الجنوب والتعاون الثلاثي (مثل المعرض العالمي للتنمية القائمة على التعاون بين بلدان الجنوب الذي تقيمه اليونيسكو، ويوم الأمم المتحدة للتعاون بين بلدان الجنوب)، والمطبوعات وبوابة الحلول الريفية في الصندوق.

Agreement at completion point of last country programme evaluation

Agreement at Completion Point

Introduction

1. This is the first country strategy and programme evaluation (CSPE) conducted by the Independent Office of Evaluation (IOE) in Georgia, as approved by the 116th Session of the IFAD Executive Board. The main purpose of this evaluation is to assess the results and performance of the country strategy and programme and to generate findings and recommendations for the upcoming COSOP to be prepared in 2018. The CSPE identifies the factors that contributed to the achievement of strategic objectives and results, including the management of project activities by IFAD and the Government.
2. The CSPE assesses the results and performance of the activities conducted since December 2004, when the first COSOP was presented to the Executive Board. The CSPE covers the full range of IFAD support to Georgia, including lending and non-lending activities (knowledge management, partnership-building, and country-level policy engagement), including grants, as well as country programme and COSOP management processes.
3. The CSPE benefitted from other IOE evaluations that have covered Georgia. This includes the evaluations of four closed projects, including the impact evaluation of a recently closed project, as well as country studies prepared as part of the 2016 corporate level evaluation on decentralization and the thematic evaluation of rural finance (2005).
4. The CSPE main mission took place from 12 June to 12 July 2017. It included meetings with a wide range of stakeholders in Tbilisi and in project areas. Field visits to completed and ongoing IFAD-supported projects covered infrastructure, demonstration plots, microfinance institutions (MFIs), credit unions (CUs), and supply chain beneficiaries in the Autonomous Republic of Adjara, and the regions of Guria, and Samegrelo-Zemo Svaneti. The mission teams visited land registration and food safety offices, infrastructure sites, and matching grant beneficiaries in Kvemo Kartili region, and infrastructure in Mtskheta-Mtianeti region. The main mission concluded with a wrap-up meeting in Tbilisi on 11 July 2017.
5. The Agreement at Completion Point (ACP) reflects commitment of the Government of Georgia and IFAD Management of the main CSPE to adopt and implement the CSPE recommendations within specific timeframes. The implementation of the agreed actions will be tracked through the Presidents Report of the Implementation Status of Evaluation Recommendations and Management Actions (PRISMA), which is presented to the IFAD Executive Board on an annual basis by the Fund's Management.
6. The ACP will be signed by the Government of Georgia (represented by H.E. the minister of Finance) and IFAD Management (represented by the Associate Vice President of the Programme Management Department). The signed ACP will be submitted to the Executive Board of IFAD as an annex to the new COSOP for Georgia.

7. **Recommendation 1. Establish some form of country presence *or limit IFAD's engagement to co-financing operations led by other development partners*.** Without a country presence IFAD cannot maintain the required flexibility, and at the same time consistency, in its engagement with a country such as Georgia, that is changing at such a fast pace and that is becoming increasingly demanding in terms of the kind of assistance it requires. For IFAD to play to its comparative advantage and add value, it has to leverage influence through partnerships. A consistent strategy for policy engagement and KM - yet to be developed - will require dedicated resources and solid expertise on the ground. If IFAD cannot establish a country presence, it should confine its engagement to co-financing operations led by other development partners. Past experience with co-financed projects has shown that IFAD can achieve good results through strong partnerships. This would enable IFAD to focus its resources on critical areas where it can add value through lending and non-lending activities.
8. **Agreed follow-up to recommendation 1:** The CSPE has highlighted that despite the challenges, the portfolio was relevant and, with some notable exceptions, well-aligned with Government priorities. While Management fully agrees that consistent with corporate priorities, there is a need to leverage partnerships, strengthen policy engagement and knowledge management, it does not concur with the premises of the recommendation as put forward *i.e. to establish some form of country presence or limit IFAD's engagement to co-financing operations led by other development partners*. Corporate level co-financing targets have been established and IFAD is also committed to country selectivity and prioritising investment opportunities for results and impact at scale. The Government and IFAD jointly prepared the Country Strategic Opportunities Programme which scopes the intensity of action and engagement. IFAD will continue to strengthen partnerships in Georgia and maximise opportunities for co-financing and scaling up investments for sustainable rural transformation and rural poverty reduction. While country presence is generally desirable, the current decentralisation plans foresee a Sub-regional hub in Turkey that will cover the Georgia country programme. This will increase proximity to the country and contribute to a closer engagement with the Government and other partners.
9. Responsible partners: Not applicable
10. Timeline: Not applicable
11. **Recommendation 2. Establish a strategic focus on rural finance and rural institution building, in line with Government priorities.** Rural finance is an area where IFAD has built up a body of experience due to experimentation with different access-to-finance models. No other development partner in Georgia has similar experience and IFAD should continue to pursue this niche. Furthermore, now that Government is showing an increasing interest in grassroots institutions and the EU (through ENPARD) and World Bank are supporting them, grassroots bodies can be the conduits for the financial products supported by IFAD. In this regard, IFAD should graft upon the work of others; there is no need to create parallel institutions unless absolutely necessary. It can also build on its successful relationship with MFIs. In the upcoming livestock project, MFIs should be used to target farmers and livestock cooperatives in the lower mountain regions.
12. **Agreed follow-up to recommendation 2:** IFAD Management agrees. IFAD has been engaged in Georgia since 1997. In the early years of engagement, there was a need to develop the mechanisms and institutional framework to allow for access to credit. This has been successfully achieved as also recognised in the CSPE.¹

13. Government has recognised that the rural financial markets are robust and have enough liquidity. Government's request to IFAD is to support the organisation of smallholder farmers to enable them to tap into this available financial resource and its value added is to create the demand for the rural financial services; this approach is already in place. IFAD has not established parallel institutions and continues to build on and tap into the successful partnership with MFIs and the government agency, Agriculture Project Management Agency (APMA), as is the case with the ongoing IFAD-funded Agriculture Modernisation, Market Access and Resilience project.
14. Responsible partners: IFAD and Ministry of Environmental Protection and Agriculture
15. Timeline: through the COSOP 2018 and next designs
16. **Recommendation 3. Radically revise the approach to targeting, to adopt an explicit strategy for targeting those at risk of poverty and social exclusion within the rural population, in close cooperation with other development partners.** IFAD has an important role to play in Georgia if it focuses clearly on the poorer parts of the rural population and in particular women and youth. For this IFAD needs to do more to reach out to those parts of the rural population that are economically active, but at risk of poverty and social exclusion.¹ Only targeting entrepreneurial farmers and assuming that the rest will benefit indirectly will not be sufficient. IFAD has to adopt a differentiated targeting strategy that will support direct benefits for the relatively poorer parts of the population. Therefore, it is recommended that in preparation for the new country strategy, and in cooperation with like-minded partners, IFAD should conduct robust poverty and gender analysis to provide the basis for identifying and reaching out those groups that are at risk of poverty and social exclusion in rural development interventions, with a specific focus on women and youth. The outcome of the consultation would be to identify actionable strategies and, where possible, agree on coordinated interventions specifically targeted to rural youth and women, including single women and women-headed farming households. These strategies should inform IFAD's future project designs. Furthermore, any intervention supported by IFAD should ensure that women and youth from poorer households benefit equally. Interventions targeted at entrepreneurial farmers should ensure that entrepreneurial women are mobilized and benefit equally. Every project targeting value chains should include a commensurate set of activities that will give the private sector incentives to include smallholder farmers and monitoring to ensure the active poor benefit.
17. **Agreed follow-up to recommendation 3:** IFAD Management broadly agrees but recognises that the targeting approaches in MICs will not necessarily be directed at the extreme poor who mostly rely on social assistance programmes and are not economically active. Adopting a differentiated strategy is statutory for all our interventions (COSOP and design). The learning on IFAD operational policies are part and parcel of the engagement process by IFAD to ensure that pro-poor targeting mechanisms and approaches are employed. However, IFAD engages in policy dialogue and ensures alignment with Government

¹ Note: this does not include those parts of the population that depend on social assistance

strategies and priorities. As a MIC and with imminent EU approximation, Georgian smallholders will have to comply with EU standards if they will continue to exist and participate in the economy. Our investments are intended to help these smallholders organise and graduate from their current situation and comply with EC standards. The fact that we also support enterprises is driven by this imminent development ensuring backward and forward linkages with the poorer segments. In all IFAD projects especially in MICs and particularly investments in VCs, various segments in the value chains provide opportunities for indirect outcomes such as job opportunities and input supplies and services from the youth and women in particular. Resources permitting, we will continue to conduct more feasibility and preparatory studies to develop packages for different segments of the target groups that fit with the overall macro-economic evolution and transformation of the agricultural sector

17. Responsible partners: IFAD and Government of Georgia

RB-COSOP preparation process including preparatory studies, stakeholder consultation and events

1. This RB-COSOP has been designed with IFAD's partners in Georgia, most notably the Ministry of Environmental Protection and Agriculture, but also other stakeholders from the private sector, civil society and external development partners. A RB-COSOP design team visited Georgia from 1 to 14 October 2017, during which intensive consultations were held, culminating in a joint learning event on 12 October 2017, when the preliminary findings were presented, discussed and the overall strategic direction agreed.¹³
2. Simultaneously, a RB-COSOP completion review was undertaken, upon which this RB-COSOP also rely for insights into past performance and learnings from the previous RB-COSOP (covering 2004-2013) and the country partnership and strategy note (CPSN, covering 2014-2017). Moreover, the RB-COSOP has also been informed by the preliminary findings, conclusions and recommendations of country strategy and programme evaluation conducted by IFAD's independent office of evaluation (2018). Other documentation include project evaluations, project completion reports, reviews and M&E reports.
3. The consultations in Georgia including the following stakeholders:
 - Ministry of Environmental Protection and Agriculture, including all relevant departments and units
 - AMMAR project staff
 - Ministry of Finance
 - Ministry of Economy and Sustainable Development
 - Ministry of Regional Development and Infrastructure
 - Statistics Georgia (GeoStat)
 - Georgia Farmers' Association
 - Georgian Amelioration Company
 - Georgian Alliance on Agriculture and Rural Development (GAARD)
 - OXFAM / Bridge
 - Action Against Hunger (a NGO)
 - European Neighbourhood Programme for Agriculture and Rural Development (ENPARD, EU supported)
 - Agricultural Cooperatives Development Agency (ACDA)
 - Agriculture Projects Management Agency (APMA)
 - Agriculture Projects Management Agency (APMA)
 - Biological Farming Association (Elkana, a NGO)
 - Women`s Information Center (WIC, a NGO)
 - Scientific-Research Center of Agriculture (SRCA)

¹³ The COSOP design team was led by Dina Saleh, IFAD country programme manager, Nicolas Tremblay, IFAD lead technical specialist, environment and climate, Edward Heinemann, IFAD, lead advisor, Peter Frøslev Christensen, lead consultant, Renaud Colmant, IFAD climate change specialist, Mohamed El Ghazaly, M&E consultant, Asyl Undeland, gender and targeting consultant, Sophie Berishvili, climate change specialist and Shorena Tchokhonelidze, institutional specialist.

- World Bank (including project staff and office staff)
- Swiss Agency for Development and Cooperation
- German International Cooperation (GIZ)
- Austrian Development Cooperation
- FAO
- UNDP
- UN Women
- UN Women
- CARE, Georgia
- USAID (office as well as USAID supported projects)

A country programme management team meeting was held in IFAD HQ on 17 October 2017, during which a presentation of the process and outcomes was made and broad agreement on the strategic direction was also solicited and obtained.

Georgia RB-COSOP joint learning event: 12 October 2017

Partnership for rural prosperity

Proposed strategic focus of IFAD for the future

By Peter Frøslev Christensen
IFAD lead consultant

IFAD country strategy – engagement process

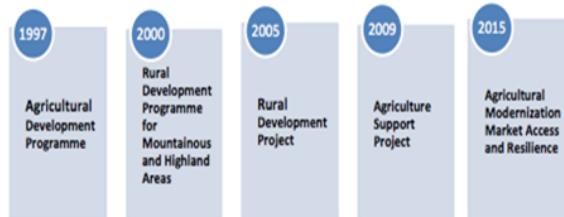

Approach to strategy review - Conversations with key partners:

- Government stakeholders, incl. MoA and its key departments and agencies
- Farmers, service providers and rural entrepreneurs
- External development partners, incl. SDC, WB, ADA, FAO, USAid and CSOs.

Learnings from these engagements have and are informing the strategy drafting process

IFAD historical engagement with Georgia

Key strategic context

IFAD own corporate strategies and mandate:

- IFAD is focused on raising the productivity and incomes of the rural poor; and improve their market integration
- Operationally, a key focus area is on the smallholders, and there are plenty in Georgia
- Priority on *productive* investment that accelerates inclusive growth not only in agriculture but in the wider rural space
- Increasingly also on brokering knowledge and innovation on emerging challenges especially on climate change.

Georgian strategic policy context

Policy level: Substantial changes since the last strategy:

- Georgia's long term SDS 2020 (2014) medium term Freedom, Rapid Development & Prosperity (2016) key in driving sustainable and inclusive economic growth, through effective public administration, human capital development, access to finance, and private sector competitiveness
- Increased focus on rural space through e.g. cheap credits, assistance to smallholders for e.g. inputs and ploughing and renewed interest in rural public goods

Georgian strategic policy context

Ministry of Agriculture's 2020 strategy:

- Key is to frame previous urgent but ad-hoc measures into a systemic transformative strategy
- Accentuated by the DCFTA/AA and the accompanying challenges and opportunities
- The seven strategic directions give guidance and IFAD is ready to assist on delivering on the promises
- Complements the Rural Development Strategy 2017 - 2020

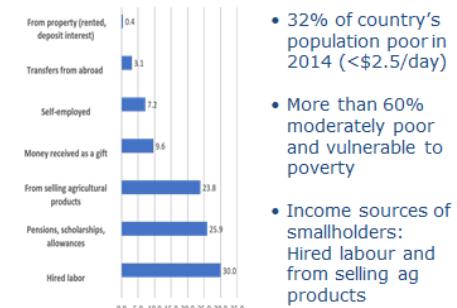

Georgian context - challenges

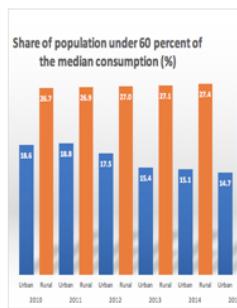

- Extreme land fragmentation and high rural poverty
- Animal and crop diseases still prevalent
- Climate change impact diseases, stress and risk
- Rural infrastructure in state of disrepair
- Poor governance of infrastructure and natural resources
- Quality standards underdeveloped, squeezing smallholders
- Insufficient 'quality infrastructure'
- Weak value chains esp. for smallholders
- All partly due to policy neglect and underinvestment

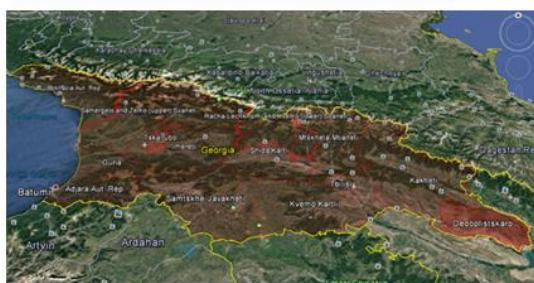

Poverty and its drivers in Georgia

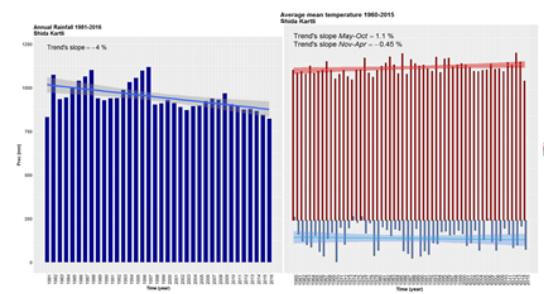

Poverty disparities

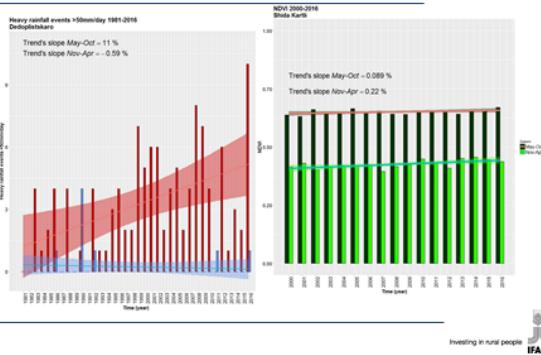

Georgian climate context

Climate context: Rain & Temperature

Climate: Extreme events & vegetation

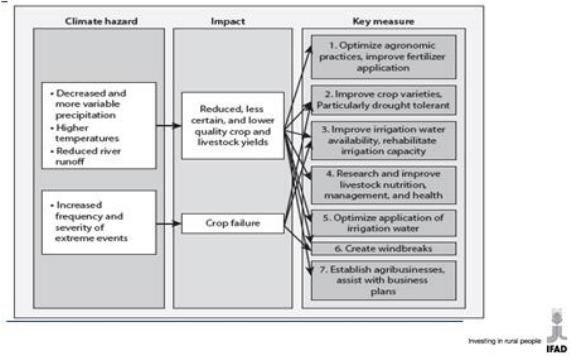

Climate impacts

- Climate change is happening in Georgia
- Impacts are not yet dramatic
- But it would be unwise to neglect the trends, including :
 - increasing water deficits, to be compensated by additional irrigation
 - increase in extreme events due to changes in the rainfall pattern;
 - risk of new plant/animal/human diseases;
 - exposure to land degradation (wind and water erosion, potential reduction in biodiversity, etc.).

Investing in rural people
IFAD

Climate adaptation framework

IFAD's climate lessons & challenges

Lessons learned from IFAD's AMMAR Project (Agricultural Modernization, Market Access and Resilience Project)

- Attempts of reforestation, pasture enrichment, windbreaks were unsuccessful due to uncertainty of property rights & responsibility of land.
- Significant policy and regulatory barriers, particularly affecting pastures:
 - Demarcation and registration
 - Land degradation and pasture condition insufficiently analyzed
 - Unclear management authority and lack of regulatory environment.

Investing in rural people
IFAD

IFAD's future climate engagements

- Upcoming project Livestock Improvement in the Mountain Areas (LIMA) to address barriers to climate-smart investments in pastoral areas.
- This requires significant collaboration between Ministries of Economy, Agriculture, Environment & Justice.
- Funding from the Green Climate Fund may be sought to complement IFAD financing, resulting in the potential for "win-win-win" interventions.

Investing in rural people
IFAD

IFAD's learnings

Informed by lessons learnt from past experiences:

- Government support, ownership is critical
- Don't be driven by numbers only. Institutional context matter
- Ad-hoc, time-bound measures not sufficient to achieve rural transformative impact
- As a corollary, need to have better integrated approaches, factoring in CC, governance and complete VCs
- Poverty targeting and monitoring hereof needed
- Partnerships (domestic and international) are necessary

Investing in rural people
IFAD

IFAD's learnings

Informed by lessons learnt from past experiences:

- 'Broken' value chains reduce profitability and market access esp. for small-scale producers
- However, top-down established producer, marketing and community groups have had severe sustainability challenges
- Need to base support more robustly on demand, market driven consolidation, increased competitiveness and economies of scale
- Need to engage different partners such as the financial sector, suppliers, buyers and processors.

IFAD's strategic partnership principles

Enhancing partnerships and leveraging impacts:

- Use existing sustainable structures for delivery
- Partner with like-minded rural development catalysts such as IFIs and CSOs
- Seek to leverage finance for e.g. CC and youth
- Align to government policies

IFAD's strategic partnership principles

Three pillars of mutual support areas – four point plan 2016-2020:

- 1. Private sector strengthening** – IFAD will target the single largest business cluster
- 2. Spatial planning** - IFAD will help deliver on the promise of development of rural highland and remote areas
- 3. Governance** - IFAD work on both public and private governance of collective goods

IFAD's strategic partnership principles

Seven pillars of mutual support areas – Agricultural strategy 2020:

- 1. Competitiveness of farmer and rural entrepreneurs** - IFAD response: support value chain strengthening
- 2. Institutional Development** - IFAD response: Assist in selected areas such as extension, APMA capacity and coordination
- 3. Irrigation and Soil Management** - IFAD response: Key area but increasingly complemented with governance focus and climate adaptive engagements

IFAD's strategic partnership principles

Agricultural strategy 2020 (Cont'd):

- 4. Regional/sector specific value chain development** - IFAD response: Engage in adaptive VCs and solutions
- 5. Ensuring food security** - IFAD response: Focus on commercialization & diversification of subsistence and smallholders
- 6. Food safety, vet & plant** - IFAD response: Complement EU with technologies, inputs and VC strengthening
- 7. Climate Change, environment and biodiversity** - IFAD Response: Robust focus on climate adaptive agriculture, sustainable water and land governance

IFAD's strategic partnership objectives and alignment with MoA strategy

IFAD's strategic objectives

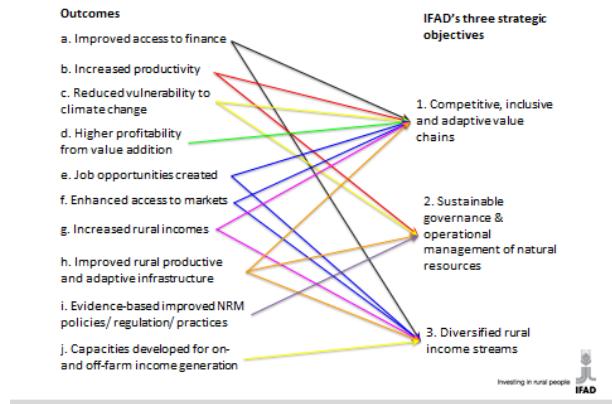

1. Competitive, inclusive and adaptive value chains
2. Sustainable governance & operational management of natural resources
3. Diversified rural income streams

MoA's seven strategic directions

1. Enhance the competitiveness of rural entrepreneurs, incl. farmers
2. Institutional development
3. Irrigation & soil management
4. Value chain development specific for region/sector
5. Food security
6. Food safety (vet and plant protection)
7. Climate change, environment and biodiversity

Outcomes needed to deliver on objectives

Tentative results framework

Key Results for RB-CO SOP (covers 2 funding cycles)		
Strategic objectives	Outcome indicators	Milestone indicators
SO 1: Promote competitive, inclusive and adaptive value chains	<ul style="list-style-type: none"> - At least 20% increase in income for targeted households - At least 30% of targeted households reporting an increase in production (Core indicator) - 30% of supported households reporting improved physical access to markets, processing and storage facilities 	<ul style="list-style-type: none"> - At least 15 productive infrastructures constructed/rehabilitated - At least 2500 people trained in production practices and/or technologies (30% women) (Core indicator) - 30% increase in volume of agriculture and dairy produce - At least 50% of trained beneficiaries reporting adoption of new/improved inputs, technologies or practices (Core indicator)
SO2: Improve sustainable governance & operational management of natural resources	<ul style="list-style-type: none"> - At least 2,000 ha under improved management practices (RICE indicator) - Two existing/new laws, regulations, policies or strategies proposed to policy makers for approval, ratification or amendment (Core indicator) 	<ul style="list-style-type: none"> 2000 hectares of land brought under climate-resilient management At least 10 policy-relevant knowledge products completed (Core indicator)
SO3: Advance diversification of rural income streams	<ul style="list-style-type: none"> - At least 2,500 FTE job created (Core indicator) - At least 1,000 persons reporting using 	<ul style="list-style-type: none"> At least 5,000 persons trained in income-generating activities or business management (30% women) (Core indicator)

How to do it: Reaching the rural poor

Geographic targeting: IFAD is working nationwide, with special focus on disadvantaged regions and municipalities

Direct Targeting: IFAD exercises direct targeting of the vulnerable, youth, smallholders; and quota for female-headed households

Self-targeting measures – focusing on the priorities and capacity of the productive smallholders

Enabling measures – to support a policy and operational environment favourable to poor

Engaging & empowering women

45% of all women-operated farms specialize in raising livestock like beef cattle, horses, sheep, goats and kids—both the goat and human varieties.

IFAD's strategic partnership – engaging with partners

- Continue the strong partnership with ministry of agriculture and its agencies
- Reach out to the key actors in inclusive value chains, from farmers, to coops, buyers, sellers and extension
- Engage and broker with financial institutions from MFIs to banks and IFIs
- Learn, cooperate, coordinate and complement with other ministries, development partners and civil society organizations
- Openness to new partnerships that share IFAD vision of transformative and adaptive change in the rural space

IFAD's strategic partnership – next steps

Next steps in the process

Based on previous consultations, learnings and inputs from this workshop:

- Revise and update the strategy and results framework
- Share draft with government partners - soliciting comments
- Finalise strategy paper
- Submit to IFAD Executive Board (2018)

Questions for discussion

- Do you agree with the three objectives?
- To what extend should IFAD focus outside core agriculture to e.g. diversify off-farm incomes
- How can smallholders become more integrated in and benefitting from value chains? Coops, consolidation or connectivity?
- What are the critical elements that can attract entrepreneurial youth to invest in their rural livelihoods?
- Why have past public investment in agriculture underperformed? And what to do?

Natural resources management and climate change adaptation: Background, national policies and IFAD intervention strategies

Social, Environmental and Climate Assessment Preparatory Study for the RB-COSOP of Georgia

1. Major landscape characteristics and issues

1.1 Socio-cultural context

1. Georgia spans on a territory of 69,700 km² and, as of January 2016, is home to 3.72 million people. Georgia's capital – Tbilisi - is the largest city of the country with the population of 1.1 million people¹⁴.
2. Georgia is a semi-presidential democratic state with multiparty system, has a president, as Head of the State and Prime Minister, as head of the Government (Government of Georgia). The President of the Republic and the Government wield executive power. The Parliament holds the legislative power in Georgia and court power is executed by constitutional court and other united courts.
3. Georgia is divided in nine regions: Guria, Imereti, Kakheti, Kvemo Kartli, Mtskheta-Mtianeti, Racha-Lechkhumi and Kvemo Svaneti, Samegrelo and Zemo Svaneti, Samtskhe-Javakheti, Shida Kartli. Georgia has two breakaway regions – Abkhazia and South Ossetia. A region is a non-self-governing administrative unit providing coordination and communication of several municipalities therein (with the exception of the municipalities of Adjara and that of Tbilisi) with the central Government. The 'State Commissioner' or the 'Governor' leads a region being formally appointed by the Prime Minister of Georgia.

4. Each region of Georgia is sub-divided in municipalities. According to the Local Self-

¹⁴ Geostat, 2016: <http://geostat.ge/>

Government Code of Georgia (2014), a municipality is a self-governing unit where a local self-governance is implemented. The municipality could be under the form of a settlement (self-governing city) which has administrative borders or of a unity of settlements (self-governing community or 'Temi'), which has administrative borders and administrative centre.

5. A municipality has elective representative and executive bodies, registered population and hold its own property, budget, and revenues. The executive body of the municipality is called Gamgeoba (or Municipality Board), and the highest official of the municipality is a Governor (Gamgebeli or Head of the Board), or a mayor for self-governing city. For the purposes of optimisation of governance, a municipality may be again sub-divided in administrative units.
6. The population of Georgia has significantly decreased since the collapse of the Soviet Union, as a direct result of emigration triggered by economic hardship. According to the World Bank, at least 15% of the country's population migrated permanently since 1990s¹⁵.

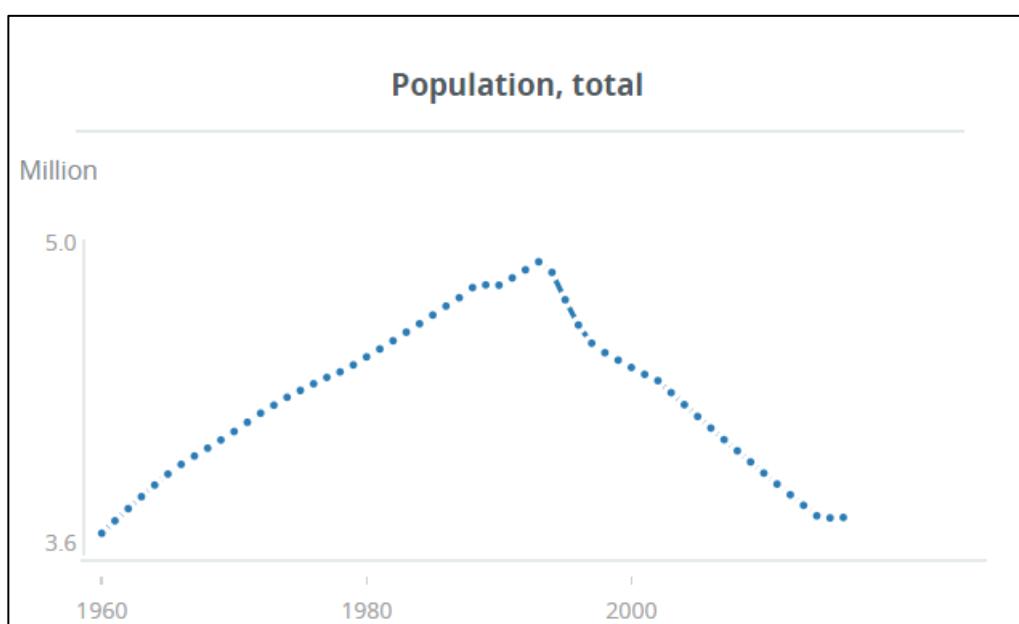

Figure 1: Total population in Georgia (World Bank, 2016)

A. Rural poverty

7. The average monthly income per capita and per household during the last ten years have been slowly increasing. The same trend is observed for the average monthly expenditure per capita and per household, with incomes only slightly higher than expenditures. The poverty level has nonetheless increased in the country from 6.4% in 2007 to 10.1% in 2015¹⁶. Georgia's Human development index (HDI) value for 2014 was measured at 0.754 by UNDP. This index indicator places the country in the high human development category and positions it at 76 out of 188 countries and territories. It is noteworthy that between 2000 and 2014, Georgia's HDI value increased from 0.672 to 0.754. Rural population has been decreasing. The majority of the poor are in rural areas, many of them occupied in subsistence or small-scale agriculture since the fall of the Soviet Union. Agriculture is no longer one of the main driver of the economic growth of Georgia. Still, agriculture maintains its importance in rural development and the rural labor force is predominantly employed in the

¹⁵ World Bank, 2016

¹⁶ Social Service Agency, 2016. <http://ssa.gov.ge>

agriculture sector.

B. Gender and youth

8. **Gender.** The constitution of Georgia guarantees equal rights to women and men. In 1995, Georgia adopted the Beijing Platform for Action and the Convention on the Elimination of All Forms of Discrimination against Women. The Millennium Development Goals also obliges the government to take measures for women's advancement and gender equality. After a pursuing a fragmented approach to women's advancement and gender equality in the late 1990s, Georgia has made important policy improvements since 2003. According to UNDP, slight gender inequalities persist in rural Georgia and justify measures to give equal opportunity to men and women in projects. However, these inequalities do not result in higher vulnerability for female-headed households
9. **Youth.** According to the State Youth Policy Document of Georgia a "youth" is considered to be a person aged from 14 to 29 years. The policy document covers identification and support of youth groups, among them students, children, vulnerable and marginalised groups, such as young people with disabilities, internally displaced young people, young people from ethnic minorities, underprivileged young people, young people living in mountains and rural areas, juvenile inmates, young people living in the areas bordering the occupation line etc. Georgian youth is considered by the state among the most valuable assets to ensure long-term democratic development and economic growth of the country.

C. Land and water tenure

10. According to the Strategy for Agricultural Development in Georgia for 2015-2020, agricultural land accounts for over 3 million ha and constitute 43.4% of the whole territory of Georgia. It is made up of arable lands, pastures and meadows. 25% of Georgia's total land area is classified as permanent pasture which represents about 1.7 million ha of Georgia total land area of 6.9 million ha. This confirms the importance of pastures, as they constitute over 50% of the total agricultural lands in Georgia.
11. While most arable land was privatized after Georgia's independence, pastures remained under state ownership and are used under a regime of free access¹⁷. To date, there no clear delineation between state-owned, municipal and privately-owned land for agricultural; only 20-30% of the agricultural lands are officially registered by the National Agency of Public Registry. In 2010, with the issuance of the Law of State Property, privatization of pasture was *de facto* stopped; however, some of pasture lands had already been acquired by private owners between the independence and the issuance of the Law. The current ownership of pastures is estimated as follows:
 - Private owners: 15% -25%
 - Municipalities: 2-5%
 - Agency for Protected Areas: 2%
 - Public Property: 70-80%
12. Currently, conflicting policies are driving the pastures registration process. On one hand, the Agency of State Property (ASP) is conducting a national inventory of all state land, including pastures, in view of strengthening the administration of state property. ASP is coordinating with municipalities and concerned ministries the registration process of state property. On the other hand, the Ministry of Regional Development and Infrastructure (MRDI) is supporting municipalities to register state property, including pastures in view of strengthening the decentralization process in Georgia. This process is aiming at improving revenues of municipalities and is linked to various on-going legal, institutional and financial support to local development.

¹⁷ Raaflaub and Dobry (2015). Pasture Management in Georgia

1.2 Natural resources and their management

13. Georgia is a mountainous country with rich biodiversity and varying climate and precipitation. Almost the entire infrastructure, as well as industrial and agricultural lands are located in the lowlands. About half of the area is farmland, mostly hay land and pastures due to the mountainous landmass. Arable land often requires land reclamation measures. The key environmental problems in Georgia include pollution to air and water, as well as land degradation; deforestation, forest degradation, localized overgrazing, erosion and loss of biodiversity are affecting the provision of ecosystem services negatively.

A. Water resources

14. The country can be divided into two main river basin groups: The Black Sea Basin, in the west of the country. The internal renewable surface water resources (IRSWR) generated in this basin are estimated at 42.5 km³/year.
15. Although water is abundant in Georgia, it is unevenly distributed geographically. Almost 80% of the fresh water is found in the western part of the country, while a majority of industrial facilities, irrigated land, and population is situated in the eastern part. Failing infrastructure for water supply, sewage, and wastewater treatment causes pollution of watercourses, particularly in the East, and may affect human health. Many of the rivers, especially Mtkvari and Rioni, are heavily polluted, affecting water quality nationally as well as in downstream countries.
16. Coliform bacteria levels in reservoirs and water supply systems have reached dangerous levels in many areas. The quality of drinking water often does not comply with human health and safety standards. The major sources of water pollution are domestic, industrial and agricultural activity, including inadequate waste management practices. In 1996, only 13% of domestic and industrial sewage was treated prior to discharge. Also the Black Sea is heavily polluted by uncontrolled sewage, agricultural runoff, oil spills and dumping of wastes. The entire ecosystem of the Black Sea has begun to collapse, and the wetlands (including Ramsar sites) are heavily affected.

B. Soil and land degradation issues

17. Georgia is among the countries having the most diverse soil types within a small area, stipulated by vertical zonality consisting from five climatic zones. Distribution of the major soil types are shown on the map (Figure 2).
18. The World Bank¹⁸ estimates that two-thirds of agricultural lands are eroded or degraded. Soil erosion, desertification and salinization (most common in east Georgia) are growing problems. Water and wind erosion, environmentally degrading agricultural practices and other anthropogenic pressures (e.g. uncontrolled logging)¹⁹ and natural processes has led to the degradation of farmland. Given the scarcity of arable land, soil erosion remains one of the greatest problems. There is no systematic monitoring of industrial pollution of soils. There is however, an increase in the use of chemical substances (fertilizers, pesticides, herbicides, etc.) which may affect the soil quality. Bad waste management practices, including sub-standard landfills (official and illegal dumping sites) cause constant pollution of soil, water and air.
19. Land degradation does not only lead to a loss of land productivity but also increases the frequency and magnitude of floods, landslides, and mudflows. From 1995 to 2012, floods and erosion—particularly through landslides and mudflow—led to US\$650 million in economic losses.²⁰

¹⁸ Georgia: Country Environmental Analysis – World Bank 2015

¹⁹ Geostat, 2016: <http://geostat.ge/>

²⁰ Georgia: Country Environmental Analysis – World Bank 2015

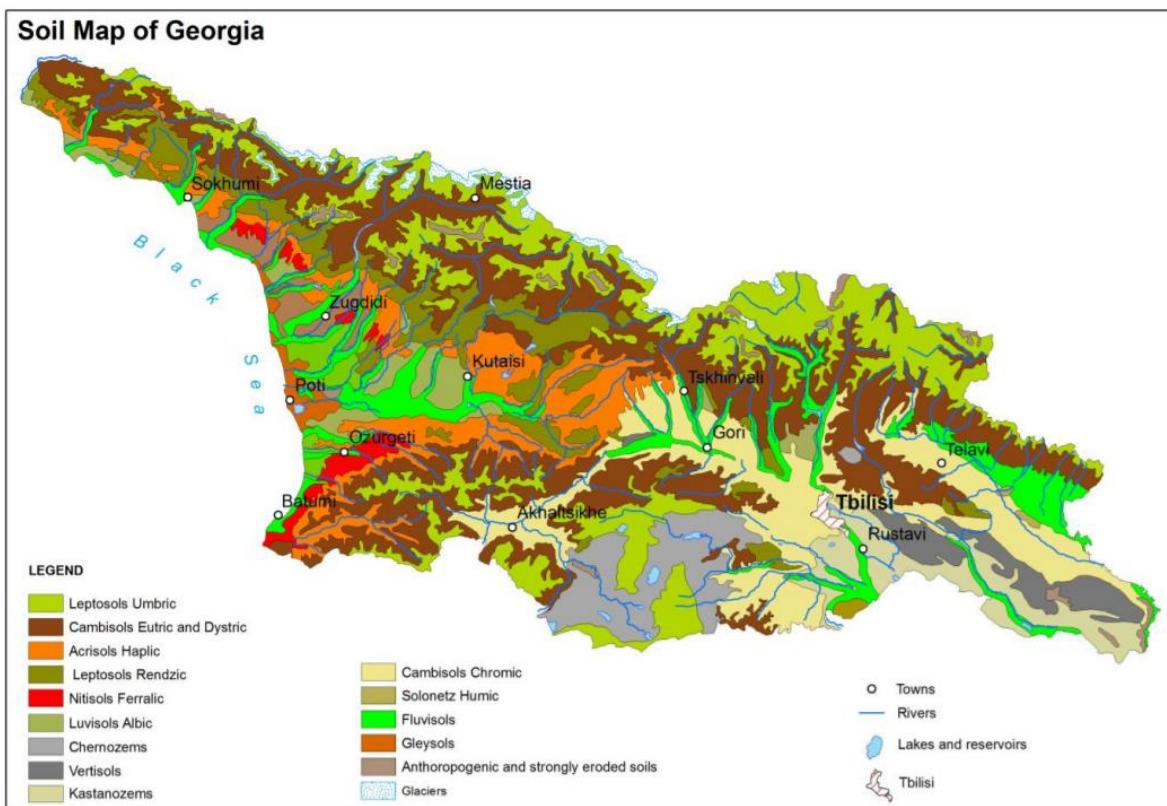

Figure 2: Soil map of Georgia²¹

C. Vegetation cover

20. Forests, which cover almost 40% of the land area, are mainly located in mountainous areas and large parts are severely degraded. Currently the average density of the forest has reached a critical threshold in 52% of the land area. The intensive deforestation since the late 1990s is unprecedented in the history of Georgia. Unsustainable forestry practices and the encroachment of livestock into forests are affecting the diversity, quality and productivity of the forests.²² Deforestation is mainly due to the drastic reduction in firewood imports from Russia. This has been compensated by illegal logging by the population. Degraded forests have drastically decreased protective functions (protection of soils, storage of waters, regulation of waters, sanitary-hygienic functions, etc.) and self-recovery ability. Landslides and avalanches are becoming more frequent. Deforestation exerts a negative influence on the entire ecological state in Georgia.

D. Biodiversity

21. Because of its high landscape diversity and low latitude, Georgia is home to about 5,601 species of animals, including 648 species of vertebrates (more than 1% of the species found worldwide) and many of these species are endemics. The Caucasus is one of the most biologically rich areas on earth and is ranked among the planet's 25 most diverse and endangered hotspots by Conservation International. The bulk of biodiversity is found in the forests, freshwater habitats, marine and coastal ecosystems and high mountain habitats; these are also where the threats are the greatest.

1.3 Climate change impacts and vulnerabilities

22. The climate of Georgia is extremely diverse, considering the nation's small size. There

²¹ Joint Research Center, European Commission, Soil Resources of Mediterranean and Caucasus Countries, 2013.

²² Akhalkatsi (2015). Forest habitat restoration in Georgia, Caucasus ecoregion

are two main climatic zones, roughly separating Eastern and Western parts of the country. The Greater Caucasus Mountain Range plays an important role in moderating Georgia's climate and protects the nation from the penetration of colder air masses from the north. The Lesser Caucasus Mountains partially protect the region from the influence of dry and hot air masses from the south as well.

23. Much of western Georgia lies within the northern periphery of the humid subtropical zone with annual precipitation ranging from 1,000–2,500 mm. The precipitation tends to be uniformly distributed throughout the year, although the rainfall can be particularly heavy during the autumn months. The climate of the region varies significantly with elevation and while much of the lowland areas of western Georgia are relatively warm throughout the year, the foothills and mountainous areas experience cool, wet summers and snowy winters, snow cover often exceeds 2 meters in many regions.
24. Eastern Georgia has a transitional climate from humid subtropical to continental. The region's weather patterns are influenced both by dry, Caspian air masses from the east and humid, Black Sea air masses from the west. Annual precipitation is considerably less than that of western Georgia and ranges from 400–1,600 mm.

A. Climate change impacts

25. According to the IPCC, at regional level in West Asia, upward temperature trends are notable and robust in recent decades. Also, a weak but non-significant downward trend in mean precipitation was observed in recent decades, although with an increase in intense weather events.
26. Recent study from the National Adaptation Plan for Agriculture (NAPA) in Georgia observed changes in climate and therefore in agro-climatic zones in Georgia²³. Temperature has increased in most parts of the country. According to the data of 1991-2015, precipitation through the period decreased slightly overall.
27. Climate change scenarios considered in the country's NAPA and its INDC predict:
 - (i) An increased risk to crops from rains that bring floods, landslides and mudslides
 - (ii) Reduced yields (except in eastern mountain regions where yields may increase)
 - (iii) Increase in variety and range of pests and diseases;
 - (iv) Shifts in production zones and
 - (v) Increased erosion and degradation of limited arable land.
 Climate change will impact natural resources (forest, pasture, water bodies, others) as well as rural infrastructures such as roads and water points and therefore livelihoods of smallholders and rural people.
28. Neglecting smallholders' adaptation will impact the rural poor negatively and will contribute to socio-economic issues such as rural depopulation (rural population in Georgia was reported at 46.17 % in 2016 and is decreasing) and unemployment (11.8% total population) with possible consequences on the country's stability. Economic losses without adaptation measures during 2021-2030 are estimated to be about 10-12 billion USD, while adaptation measures will cost within 1.5-2 billion USD.²⁴
29. The analysis of the last decades climatic patterns (1960-2016) done by IFAD in 2017²⁵ confirms that the climate in Georgia has already changed and that the main trends foreseen by the IPCC and the NAPA are becoming evident. Extremes in maximum and minimum temperatures have exacerbated since 1960, meaning warmer maximum temperature in summer and colder minimum temperature in winter, for most of the Regions in the country.

²³ Climate Change National Adaptation Plan for Georgia's Agriculture Sector, Ministry of Environment and Natural Resources Protection of Georgia, 2017

²⁴ [Georgia's intended nationally determined contribution submission to the UNFCCC](#)

²⁵ Georgia Georeferenced Climate Trends Assessment 1981-2016. IFAD 2017.

30. Significant decrease in annual rainfall since 1981 is observed for several of the municipalities in Georgia but not at regional level except for Shida Kartli region (see figure 4). Georgia has several micro climates and the trends for annual precipitation can vary from one municipality to another within the same region (i.e. significant increase in Martvili and significant decrease in Tskhakaia within the Samagrelo and Zemo Svaneti region). Significant decrease of annual rainfall is noted at local level in most of the municipalities in Imereti particularly during summer and in the North of Kakheti Region throughout the whole year. Those municipalities have experienced smallest amount of annual rainfall since 1981 three years in a row (2014-2015-2016).

31. A shift in intra annual monthly rainfall is observed with an increase in concentration of monthly rainfall in early autumn and late winter and a decrease in summer (with a negative trend of around 1mm/year² for August). Rainfall events are not equally distributed during the summer and assessments show trends of longer dry period combined with more intense rainfall events, storms that increase erosion and provoke mudflows and landslides. The study shows a significant increase in heavy rainfall events (>50mm/day) during summer season for the period 1981-2016 (see Figure 3 below).

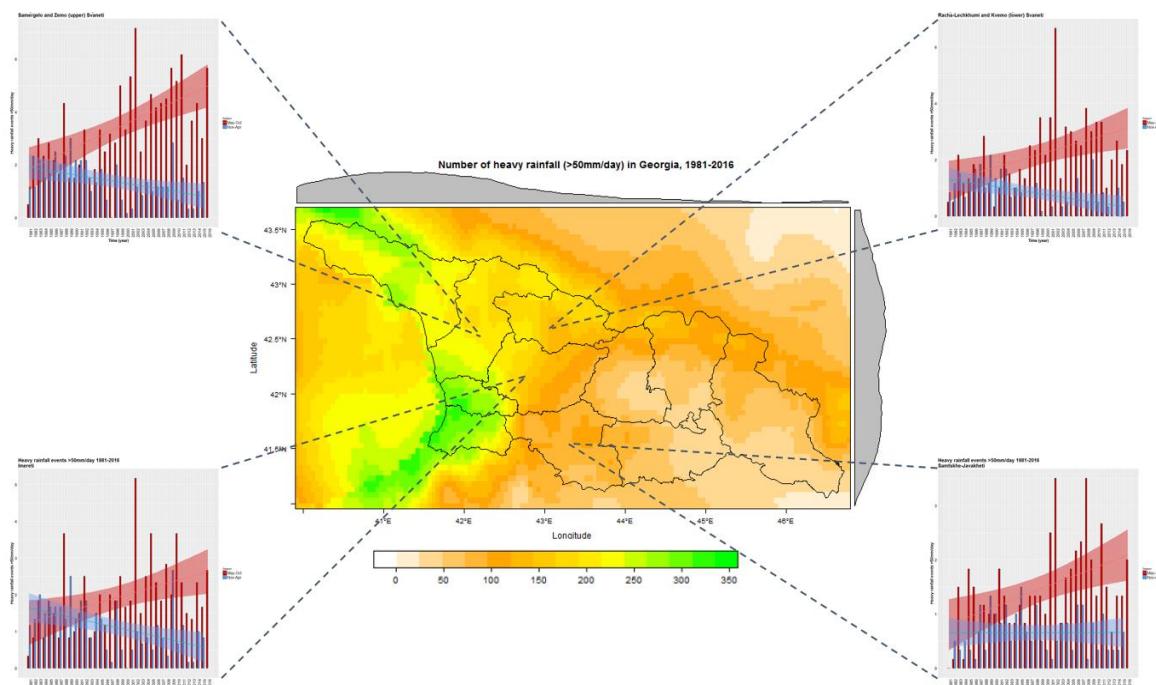

Figure 3: Number of heavy rainfall events (>50mm/day) in Georgia for the period 1981-2016

32. A study of trends in snow cover for the period 2000-2016 was also conducted by IFAD²⁶ based on satellite imagery from Landsat, NASA. Results show as expected that the percentage of the territory covered by snow is higher during the winter months. In the two regions situated in the north of the country (Racha-Lechkhumi and Kvemo (lower) Svaneti, Samergelo and Zemo (upper) Svaneti) the study shows a robust trend of decreasing snow cover since 1981.

²⁶ Georgia Georeferenced Climate Trends Assessment 1981-2016. IFAD 2017.

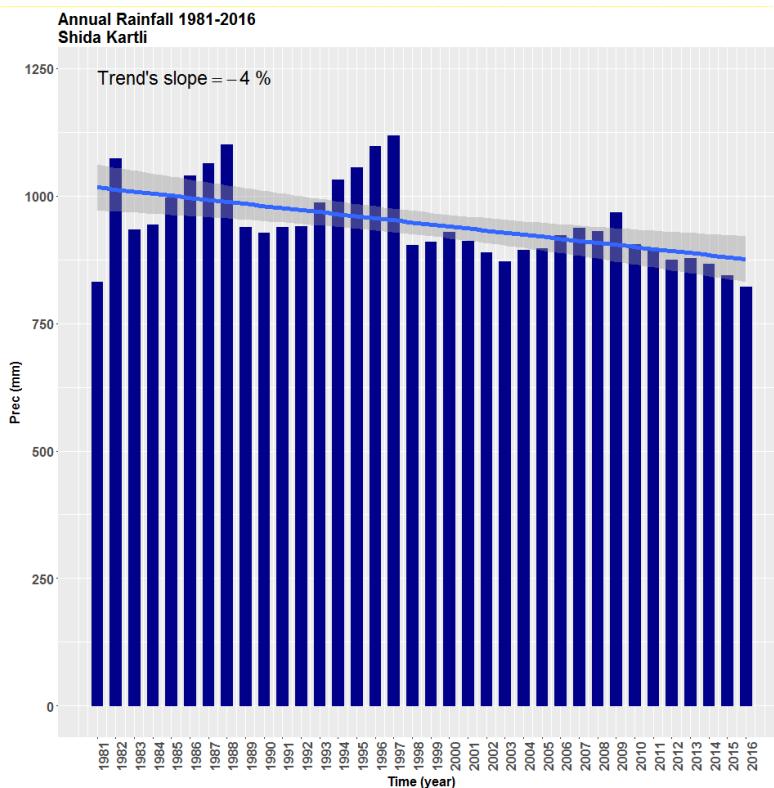

Figure 4. Declining rainfall in Shida Kartli (Eastern Georgia)

33. From the above data the following conclusions can be made: (i) Although there is uncertainty of increase or decrease in annual rainfall, in the eastern part of the country rains are more concentrated and heavier in summer, increasing the torrential regime and thus the risk of flooding, soil erosion, and reduced infiltration of water in the soils (lower availability of water in during the warm season); (ii) the precipitation decrease in summer months and increased evaporation caused by higher temperatures could have negative impact on water availability leading to longer drought events in the future.
34. Aggregated climatic models under the scenario RCP8.5 predict higher temperatures in the whole country and less rainfall especially during summer months, with higher probability of drought in those areas with higher maximum number of consecutive dry days. The third communication to the UNFCCC (2014) similarly predicts higher temperature by 2070-2100 for the whole territory. The study also predicts an increasing trend for annual rainfall in the mountainous area until 2050, followed by a decrease except for some areas (Batumi, Pskhu and Mta – Sabueti). Significant decrease of precipitation is expected by 2100 on whole territory of Georgia, mostly in Samegrelo, Kvemo Kartli and Kakheti (22%).
35. According to the Initial National Communication Report to the United Nations Framework Convention on Climate Change (UNFCCC) published in 2014 and the National Adaptation Plan for Agriculture (NAPA) published in 2017, the climate of Georgia is affected by global climate changes and variability, with impacts illustrated in Table 1.

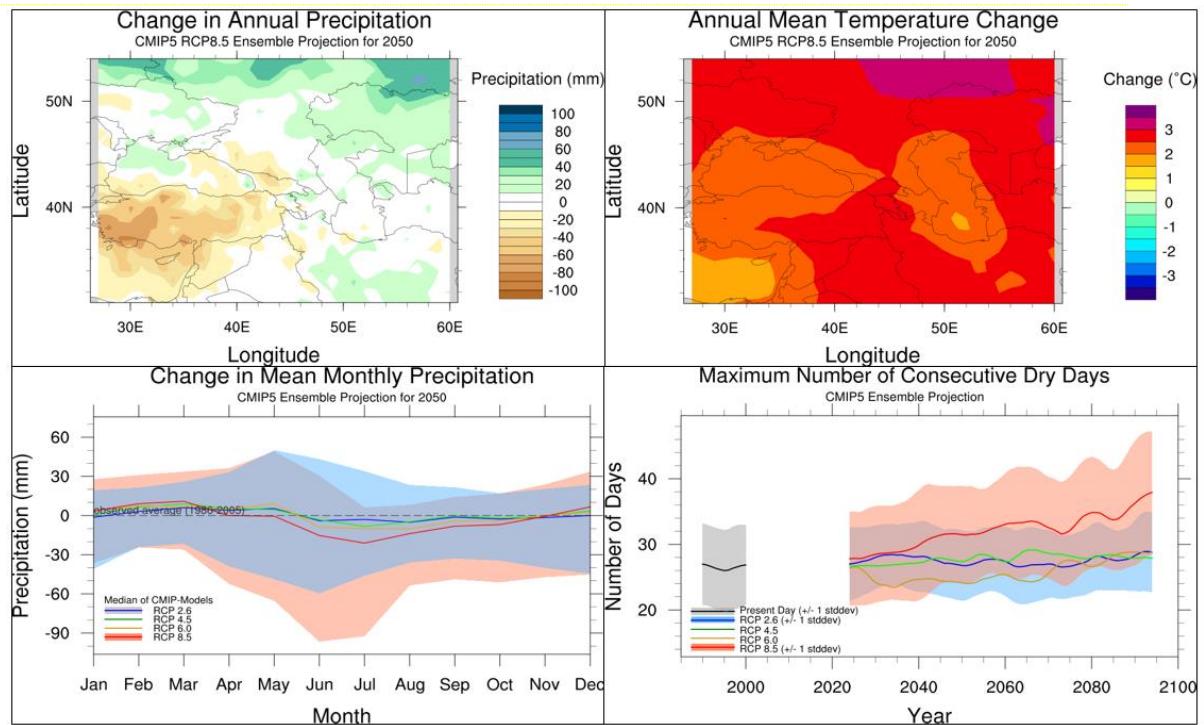

Figure 5: Change in annual precipitation (upper left), annual mean Temperature (upper right) and in Mean Monthly Precipitation (lower left) for 2050 compared to 1996-2005 baseline; Maximum Number of Consecutive Dry days (lower right) in Georgia (IPCC-CCKP^{27 28}).

B. Impact of climate change on urban infrastructures

36. Storm-water systems are under-designed in Georgia. Urban development increases the amount of water runoff and localized flooding and flash floods occur in urban areas where there are too few drains, or where their capacity is insufficient to deal with heavy precipitation. The population of Georgia, as well as its lands, roads, oil and gas pipelines, hydropower sites, energy transmission lines and mountain tourism sites periodically suffer with disasters, and the threat is increasing constantly. This is confirmed by disasters recorded by the geological office of Georgia. A large share of the populated and urbanized areas of Georgia are in ecologically dangerous zone, where West Georgia is distinguished with the greatest vulnerability.

²⁷ World Bank Climate Portal: <http://sdwebx.worldbank.org/climateportal/>

²⁸ IPCC 5th Assessment Report <https://www.ipcc.ch/report/ar5/>

Table 1: Climate change impacts in Georgia

Resource	Impact
Water resources	<p>With increasing temperatures (30–38C) the water supply of cattle watering points in Kakheti and Kvemo Kartli decreases every day from June to September. Water sources fed by rainwater (which is often the single source of watering) are gradually decreasing or are generally dried out. Water points are often subject to pollution due to animal high pressure.</p> <p>High-water levels of rivers should also be taken into consideration. Rivers often change riverbeds grasping thousands of hectares of soil every year, including even territories of populated areas. In such cases old burial grounds of anthrax might be stripped off. Several cases of anthrax in animals were recorded in the south of Georgia in 2013. It was stated that the focus of infection was the soil washed off by the heavy rains in that year.</p>
Agriculture and livestock	<p>Current climate change has already influenced cattle breeding. Frequent precipitation, strengthened as a result of warming, causes washing-off of the soil from the slopes, which, against the background of intense utilization of the grass cover, is accompanied by harsh reduction of productivity of mowing and grazing lands.</p> <p>Heat waves, which are projected to increase under climate change, could directly threaten livestock, reducing weight gain and sometimes causing fatal stress. Heat stress affects animals both directly and indirectly; it can increase an animal's vulnerability to disease, reduce fertility, and reduce milk production in dairy animals.</p> <p>The year 2000 was one of the worst harvest years for wheat due to “great” drought. According to the data of Dedoplistsxaro meteorological station, aggregate precipitation in the wheat vegetation period was the lowest value in 1961-2015 period. The drought was further aggravated by increased temperatures. Average temperature for June in 2000 was the highest temperature in 1961-2015 period.</p> <p>Drought in 2014 has significantly damaged grain crops in some municipalities of Kakheti (East Georgia) and has serious negative impact on agricultural production in general.</p>
Forest and biodiversity	Displacement of natural boundaries at sensitive areas of eastern Georgia (temperature forest ecosystems), loss of resilience of flora and fauna to invasive species, loss of natural ecosystems “corridors” for migration of rare and endemic species, increased cases of forest fires (Summer 2017) degradation of landscape diversity, loss of biodiversity impact on livelihood.

C. Knowledge gap

37. The National Adaptation Plan for Agriculture published in 2017 intends to reduce the knowledge gap on climate related impacts on agriculture. However, even though the document gives us a broad idea on main crops in Georgia, the document is not complete yet and the recommendations for adaptation measures should be strengthened.
 38. There is a knowledge gap, which makes it challenging to improve the adaptation analysis. As an example, erosion risk is well known in Georgia but no recent study on this issue was conducted so far to identify the location and the related adaptation activities. In addition, there is a need to enable systematic quality control of the data used in the analysis. Technical training to share experience and best practice with the deployment of these adaptation practices in similar regions.
-

2. Institutional analysis

39. Georgian legislation comprises various laws and international agreements. Along with the national regulations, Georgia is signatory to a number of international conventions related to environmental and social protection.
40. The Constitution of Georgia (1995, last amended in 2013) lays down the legal framework that guarantees environmental and social protection, and public access to information with regard to environmental conditions.
41. A number of ministries, departments and agencies are responsible either directly or indirectly for the implementation of environmental and social related legislation and policy.
42. The **Ministry of Environment and Natural Resources Protection** (MoENRP) was the authority for implementing and enforcing environmental legislation and policy, however due the recent restructuring in the government in November 2017, the MoENRP was moved to the Ministry of Agriculture. The natural resources management was moved to the Ministry of Economy and Sustainable Development. At this stage it is unclear how these two Ministries will work together.
43. The core function of the **Ministry of Agriculture** (MoA) is to develop and implement a unified government policy on the development of agricultural sector of Georgia. Along with other issues, the Ministry is in charge of agro-production, agro-processing, land conservation and productivity improvement, crops, livestock, fisheries, agro-engineering and veterinary, as well as promotion of upgrade and accessibility of agricultural technology.
44. **Ministry of Economy and Sustainable Development** has an important role in the supporting agricultural development as well as pastures through its role in overseeing land management policies in general and the process of privatization of state owned lands as well as their registration in specific.
45. **National Environmental Agency** is a legal entity under the Ministry of Environment Protection of Georgia. The agency represents an independent organization from public administration that implements its activities independently under state control. Official functions include preparing and spreading informational documents, forecasts, warnings regarding to existing and expected hydro-meteorological and geodynamic processes.
46. **National Forestry Agency** is a legal entity under the Ministry of Environment Protection of Georgia. Its official functions include forest protection, monitoring, reforestation and forest use state policy.
47. **Ministry of Energy** of Georgia implements State Energy Policy for Georgia, participates in the development of strategies and programs that address the priorities in the energy sector, monitors their implementation, and works out appropriate recommendations. The Ministry structure includes the Department for Energy Efficiency and Renewable Energy.
48. **The low emission development strategies (LEDS)** aims to reduce greenhouse gas emissions. In 2013 the low emission development strategy, funded under the US EC LEDS program, started in Georgia. The program aims at supporting efforts to pursue transformative development and accelerate sustainable, climate-resilient economic growth while slowing the growth of greenhouse gas emissions.
49. **Ministry of Regional Development and Infrastructure** (MRDI) is in charge of regional development policies in addition to overseeing the development of the infrastructure, including water, roads and others. MRDI is in the process of strengthening policies and laws which allow transferring the implementation of services from central level to municipalities. MRDI has developed Regional Action Plans (for a duration of 7 years) of all regions and has initiated the development of

municipal development plans (for a duration of 4 years) for 40 municipalities.

50. Georgia's **climate change adaptation strategy** is structured around the **National Adaptation Plan (NAPA) to Climate Change** produced by Ministry of Environment and Natural Resources Protection in collaboration with other agencies including IFAD. The Third National Communication to UNFCCC as well as the Georgia's Intended Nationally Determined Contribution (INDC) are equally important documents. New strategies to ensure environment management and climate change mitigation and adaptation have been developed. Nonetheless, the country is still facing a major deficit in terms of climate change adaptation.

3. Recommendations to enhance environmental and climate resilience in agriculture and rural development

3.1 Strategic orientation for the RB-COSOP

51. The RB-COSOP features two strategic objectives: 1. Inclusive and adaptive rural economic growth; and 2. Sustainable governance and operational management of natural resources of importance to the rural poor. These objectives will guide projects towards development of social and environmental strategies that include investments and capacity building practices, taking into account environmental constraints and climate change challenges.
52. IFAD aims to support climate change adaptation to increase the resilience to climate change at household level. This includes improving soil and water management to secure higher crop yields and land productivity, and mitigating the impact of the higher frequency and intensity of increased extreme weather events, such as drought, torrential rainfall/floods and storms.
53. Projects to be developed under the new RB-COSOP have to be in line with international environmental conventions and national strategies. These include Georgia's Intended Nationally-Determined Contribution (INDC), its National Adaptation Plan for Agriculture (NAPA) and its National Biodiversity Strategy and Action Plan 2014 – 2020 (NBSAP) under the Convention for Biological Diversity. RB-COSOP objectives have to be in line with the UN Sustainable Development Goals.
54. Georgia's INDC states that adaptation measures of the agricultural sector include the following measures of direct relevance to IFAD: (a) research and development of emergency response plans for agriculture dealing with droughts, floods, etc; (b) introduction of innovative irrigation management and water application techniques to safeguard agricultural yields; (c) implementation of various site specific anti-erosion measures to reverse land and forest degradation; (d) establishment of information centers for farmers that provides guidance on adaptive management of agriculture.
55. National and international stakeholders from different sectors and agencies should enhance coordination in their approach to the agricultural sector. IFAD should explore opportunities to partner with other agencies such as EBRD, GIZ, FAO, UNIDO or UNDP to increase the impact of its programmes. IFAD is currently not an implementing agency in the current United Nations Partnership for Sustainable Development (UNPSD) framework document for Georgia.²⁹ IFAD could contribute to the framework's objectives, especially in strengthening the government's capacities in environmental governance.
56. Funding from other co-financers (e.g. the Green Climate Fund or the Global Environment Facility) will be sought to complement IFAD financing. Possible projects should identify components that have development and environmental co-benefits making it possible to apply for climate and environmental funding.

3.2 Proposed strategic actions

57. **Promote collective management of natural resources.** Explore different governance models to sustainably manage water and pasture resources in order to address the regulatory gap that currently affects public lands in Georgia. Specifically check whether user associations/unions present commercially and environmentally sustainable governance options, in combination with municipalities in the overall context of decentralization.

²⁹ [United Nations Partnership for Sustainable Development \(Framework Document\) Georgia 2016-2020](#)

- 58. Promote sustainable use of pastures.** Pasture overuse is a regional and local problem in Georgia and is mostly concentrated on pastures and forests near settlements. Increasing the productivity and the efficiency of animal feeding will mitigate the livestock pressures causing pasture and forest degradation. Measures should aim at halting soil erosion, increasing soil productivity and restoring vegetation and soils on degraded grasslands and forests that are used for grazing. Sustainable grazing practices include pasture rotation, setting up hay meadows, and pasture improvement including mowing, environmentally friendly fertilisation, seed dissemination, improved access to water, etc. The prospects for improvement of communally used natural pastures are limited without appropriate legislation. Proper pasture management requires a regulatory framework that allows for better stewardship and sustainable use of resources. In this respect it is important to ensure that low income and transhumant pasture users are not excluded.
- 59. Improve farmer access to agronomic technology and information.** According to the National Adaptation Plan for Agriculture (MoENRP, 2017), relevant government institutions have limited systems, capacity and expertise to address challenges related to climate change efficiently. There is a need to effectively collect and analyze climatic and environmental data that not only support policy and decision making but also support farming households to identify resilient practices. This includes expanding and modernizing the hydrological and meteorological observing network (that largely fell into dereliction in the 1990s) and further applying geo-information technologies (GIS). Information systems should also provide farmers with market information for various products. Extension services should aim to reduce the climate change adaptation deficit in rural areas through promoting improved agronomic practices. This includes the capacity building of (i) technical offices of rural municipalities and villages, (ii) private sector companies, as well as of (iii) smallholders, associations and institutions in the field of natural resource management and sustainable livestock management. The INDC specifically mentions information centers for farmers that provides guidance on adaptive management of agriculture.
- 60. Accelerate the construction of irrigation and drainage systems.** The relatively arid climate of eastern Georgia which will become drier and hotter requires wide application of irrigation, while many regions of western Georgia need to remove excess water through drainage systems. Measures include the construction and rehabilitation of water reservoirs through irrigation designation as well as the rehabilitation of drainage systems. The most efficient use of irrigation water can be achieved through drip and artificial sprinkling irrigation systems that strongly reduce the risk of soil water erosion and salinization. This priority is also listed in Georgia's INDC as an adaptive measure for agriculture.
- 61. Strengthen youth involvement.** It is essential to have a common view of the needs, challenges and role of young people, based on which appropriate mechanisms and approaches will be established for full-fledged development of the young generation in Georgia. Young people are generally more open for migration. It is very hard to face all the challenges (employment, education, health and healthy lifestyle, drug/alcohol abuse, violence, participation in social life, etc.) of young people if there is no cross-sectoral approach to youth and youth policy. It is important to establish a permanent co-ordination body with participation of all ministries, local governments, youth organisations and groups, the private sector, international organisations and donors.
- 62. Mainstream gender.** IFAD projects should analyse how intended interventions benefit or disadvantage women. Projects should be mainstream gender into their activities and give equal opportunities to women and men to improve their livelihoods.

3.3 Proposals for additional financing

63. The international climate finance landscape offers many opportunities for IFAD to significantly increase the impact of its programmes through its blended financing approach. However, requirements of climate funds are becoming more demanding and require IFAD to adjust its programming approaches. IFAD is registered as an implementing entity of the Global Environment Facility, Adaptation Fund, and the Green Climate Fund.
64. **Green Climate Fund:** Currently two other multilateral agencies submitted proposals to the fund. The United Nations Development Programme (UNDP) submitted in November 2016 a funding proposal of USD 46 million for the project titled "Scaling-up Multi-Hazard Early Warning System and the Use of Climate Information in Georgia". The European Bank for Reconstruction and Development (EBRD) submitted a regional concept note in October 2016 that includes Georgia for the programme "FP025: GCF – EBRD Sustainable Energy Financing Facilities". US\$420.5 million are requested from the GCF. The programme aims to promote technologies that address water efficiency and climate resilience in agricultural sector. To avoid overlap IFAD should not invest in renewable energy and early-warning systems without ensuring close cooperation with these eventual projects. Investments opportunities should be explored in irrigation and drainage systems as adaptation measures against climate change.
65. **Global Environment Facility:** Various environmental projects are currently financed through this fund (see GEF website). IFAD projects aimed to improve pasture management may be highly eligible for GEF co-financing, because sustainable grazing practices prevents erosion, protects biodiversity and maintains ecosystem services. Georgia's GEF-6 allocation has been fully committed. Planning for GEF-7 should begin in the second half of 2018.
66. **Adaptation Fund:** The Adaptation Fund will be approached for co-funding of the upcoming DiMMA project (Dairy Modernization and Market Access). The proposed AF funding will complement the modernization of the dairy value chain with specific interventions in pastoral areas to prevent or reverse land and forest degradation, consistent with the above recommendation and in line with the INDC.

Key file 1: Rural poverty and agricultural/rural sector issues

Priority Areas	Affected Groups	Major Issues	Action Needed
Poverty and vulnerability to poverty The poverty and most importantly vulnerability to it has been slightly growing during last two years;	<ul style="list-style-type: none"> Lone retired people, People with disabilities and extreme poor, IDPs and minorities Rural HHs especially in remote and mountainous areas 	<ul style="list-style-type: none"> Climate change poses risks to all rural households, but effects more vulnerable HHs, and mountainous communities; Limited employment and labour opportunities in rural areas; Lack of property ownership among women and youth restricts access to finances; Migration from rural areas to urban settlements and abroad; Remittances used for consumption; The social targeted assistance in many cases stimulates ‘inactive’ behavior 	<ul style="list-style-type: none"> State policies and strategies on social issues are to be inclusive (not IFAD mandate); Support to sub sectors dominated by the <i>productive</i> poor and must include smallholders; Wide outreach and information dissemination on IFAD programme’s benefits for inclusion; Promote diversification of income streams; Target mountainous areas in policies and investments with higher poverty incidents and climate change vulnerability; Direct targeting of productive groups to improve nutrition and incomes (women headed HHs and youth)
Vulnerability to climate change and natural disasters	<ul style="list-style-type: none"> Rural HHs, HHs in mountainous areas 	<ul style="list-style-type: none"> Growing incidents of drought, hail, frost and other natural disasters; Degradation of natural resources because of lack of policies and legislation in pastures management and de facto ‘open access’ regime; Overgrazing of near village pastures; Limited knowledge on climate smart technologies; Limited knowledge on climate resilience and adaptation strategies; Lack of off farm opportunities; 	<ul style="list-style-type: none"> Support policies, legislation, strategies on sustainable management of natural pastures; Support adaptation of sustainable agricultural technologies and ecosystem-based practices by smallholder farmers in agriculture and livestock to enhance climate change resilience Build capacities for diversification and off farm incomes;
Low agricultural productivity	<ul style="list-style-type: none"> Subsistence oriented and small scale farmers; Farmers in mountainous areas; Smallholder farmers 	<ul style="list-style-type: none"> Very small land plots suitable for cropping; Animal and crop diseases; Rural infrastructure in state of disrepair; Poor governance of infrastructure and natural resources; Quality standards underdeveloped, squeezing smallholders Insufficient ‘quality infrastructure’ Weak value chains esp. for smallholders Limited access to irrigation water; Low yield, limited production, limited returns Lack of knowledge of adequate agricultural 	<ul style="list-style-type: none"> Investments focus on improvements in horticulture/livestock productivity Support access of smallholders to improved inputs and technologies Enhance capacity of smallholders Encourage and incentivize links between farmers to form groups Provide support to improve fodder and feed production and management

		<p>practices and limited access to extension</p> <ul style="list-style-type: none"> Limited use of inputs (seeds, breeds, fertilizers) 	
• Weak Value Chains	<ul style="list-style-type: none"> Smallholder farmers, inputs suppliers, small and medium size enterprises 	<ul style="list-style-type: none"> EU requirements for food safety to be introduced in 2020, would mostly affect smallholders and squeeze many from small scale production Small producers have difficulties to meet market requirements in quantity, quality and food safety Poor level of organization along the value chain Limited processing and short value chains Limited access to finances 	<ul style="list-style-type: none"> Provide support to viable smallholders with meeting food safety requirements; Support efficient linkages and partnerships amongst producers and processors; Support improved access to modern technology; Investments in supportive infrastructure and services; Improving access to finances

Key file 2: Organizations matrix (strengths, weaknesses, opportunities and threats analysis)

Organization	Strengths	Weaknesses	Opportunities	Threats
Ministry of Finance	<ul style="list-style-type: none"> - Well developed and generally efficient financial management system for use of IFAD funds to finance programme activities. - Key role in enforcing state policies on financial issues, budgeting and taxes. - Robust expertise in Loan Negotiations, concluded by Government of Georgia, controls their realization and loan's return. - Capacity to provide and manage state budget funds and control their transfer within Georgia. 	<ul style="list-style-type: none"> - Does not support implementation of LEADER-CLLD approach which include the development of local strategies, supporting stakeholder networking and the appraisal and approval of individual LEADER projects. 	<ul style="list-style-type: none"> - Can manage the Special Account, flow of funds and withdrawal applications. 	Limited cooperation from line ministry may undermine coordination
Ministry of Economy and Sustainable Development	<ul style="list-style-type: none"> - Key role in implementation of macroeconomic policy and private entrepreneurship development. - Priority is to support liberalization of entrepreneurial activities, creation of favorable, transparent and stable legal regulatory framework for private business owners. - Controls the privatization process. - Facilitates issuance of licenses and permits and reform of the system of technical regulation. - Directs development of tourism, transport and communication infrastructure. <p>Important Legal Entities under the Ministry: National Agency of State Property, Georgian National Tourism Administration, Enterprise Georgia</p>	<ul style="list-style-type: none"> - Has few resources and limited competence to manage agricultural land plots under its ownership: pastures, windbreaks etc. - Significant amount of land resources is neither in state nor in private ownership or may be disputable between the private sector and the state. 	<ul style="list-style-type: none"> - Can accelerate process of land registration of state land plots in the certain municipalities or districts. - Can transfer certain state land plots for usage to the local government. 	<ul style="list-style-type: none"> - Merging the Ministries: The Ministry of Energy and the natural resources management component of the Ministry of Environment and Natural Resources Protection will be incorporated into the Ministry of Economy and Sustainable Development.
Ministry of Regional Development and Infrastructure	<ul style="list-style-type: none"> - Key agency in development and implementation of regional development strategy of Georgia as well as regional development strategies for nine regions of Georgia with their regional action plans. - Responsible for the Rural Development Strategy, which emphasizes diversification. - Oversees regional and infrastructure development throughout the country which includes modification and modernization of state road networks of international and domestic importance. - Monitors architectural and construction works in 	<ul style="list-style-type: none"> - No hierarchy of strategic documents on central, regional, municipal, administrative unit level. 	<ul style="list-style-type: none"> - To create regional development agencies in all regions of Georgia for implementation of strategic documents and projects. - To delegate project implementing duties of municipal development fund to the municipal governments (announcing tenders, supervising construction process etc.) - To advocate transferring management of state agricultural land resources to the 	

	<p>Georgia.</p> <ul style="list-style-type: none"> - Issues proposals and drafts on modernization of Georgian infrastructure which is then reviewed by the Parliament of Georgia. - Creates legislation basis for decentralization process. <p>Subdivisions of the Ministry: Automobile Roads Department of Georgia, Transport Administration and Main Architectural-Constructions Inspection.</p>		municipal governments.	
Ministry of Agriculture	<ul style="list-style-type: none"> - Key agency in development and implementation of unified government policy on the development of agricultural sector of Georgia. - Has a wide range of technical and administrative capabilities. - Has direct contacts with farmers on the fields through regional and municipal branches. - Supports the development of agricultural cooperation. - Promotes processing of primary agricultural and food products. - Organizes scientific-consulting services, capacity building and hands-on training courses of agricultural entrepreneurs; <p>Important Legal Entities under the Ministry: National Food Agency, Georgian Amelioration, Agricultural Cooperatives Development Agency, Agricultural Projects' Management Agency, Meqanizatori</p>	<ul style="list-style-type: none"> - Limited interagency cooperation of rural development commission which was created within the Ministry and it is not the governmental commission involving all other Ministries of Georgia. 	<ul style="list-style-type: none"> - To enhance impact through an enabling role in supportive policy, regulatory, coordination and monitoring functions. - To develop a long-term vision for the development of agriculture extension services. - To strengthen the capacity of provincial governments to assume a leadership role in the agriculture sector. 	<p>Merging the Ministries: The environment component of the Ministry of Environment and Natural Resources Protection merged with the Ministry of Agriculture.</p>
Ministry of Environment and Natural Resources Protection	<ul style="list-style-type: none"> - Key role in implementation of national policy in environmental protection. - Organizes evaluation of the existing and expected meteorological and geodynamic processes, geo-ecological situation and preparation of information on the state of environment on the territory of Georgia, in rivers and water reservoirs, Black Sea territorial waters, continental shelf and special economic zone. - Coordinates and monitors development of national policy of founding, functioning and managing the system of protected areas. - Ensures the rational use and protection of land, 	<ul style="list-style-type: none"> - 	<ul style="list-style-type: none"> - Can play a key role in supervising environmental projects funded by international funds, providing implementation support to enhance impact. - To strengthen the capacity of provincial governments to manage natural resources. 	<p>Merging the Ministries: The environment component of the Ministry of Environment and Natural Recourses Protection will be merged with the Ministry of Agriculture and the natural resources management component of the</p>

	<p>measures against soil erosion, carrying out activities on restoration and preservation of fertility within its competence.</p> <ul style="list-style-type: none"> - Key role in climate change adaptation and mitigation of climate change. - Coordinates and monitors the implementation of the commitments assumed under international environmental agreements. <p>Important Legal Entities under the Ministry: Agency of Protected Areas, National Forestry Agency, National Environmental Agency</p>			<p>Ministry of Environment and Natural Resources Protection will be incorporated into the Ministry of Economy and Sustainable Development.</p>
36	<ul style="list-style-type: none"> - Produces the statistics and disseminates the statistical information according to the Georgian legislation. - Priority is to introduce the international practice and methodology and share relevant experience based on the agreements and treaties concluded with the international organizations engaged in this field. - Works out a unified policy for the field of statistics and secures coordinated cooperation with its territorial units and other bodies producing the statistics. - Conducts statistical surveys and census of the population, processes administrative data and produces annual reports. 	<ul style="list-style-type: none"> - Prolonged process of obtaining specific statistical information for governmental bodies. 	<ul style="list-style-type: none"> - Can conduct specific surveys on demand. - Particular statistics can be purchased on the basis of the agreement. 	<p>Integrity of especially rural data can be weak.</p>
The private sector	<ul style="list-style-type: none"> - Dynamic and growing rapidly for crops, livestock, fruit & vegetables. - Introduction to the EU regulations develops quality control mechanisms and leads to value chain improvements. - Emergence of agriculture and livestock service providers. 	<ul style="list-style-type: none"> - Poor infrastructure in the rural areas (irrigation, drainage systems, roads, transportation). - Lack of land titling in some areas makes it difficult to ensure the use rights of purchasers. - Fragmented and unrecorded supply chain. - The lack of cold storage, grain storage, grain drying facilities, and deep processing of fruits and vegetables. 	<ul style="list-style-type: none"> - To develop winter and off-season production of different agricultural commodities. - To provide rural insurance, financial, consulting, and rental services. - To export agricultural products to neighboring countries and EU. 	<ul style="list-style-type: none"> - Geopolitically dependent on what events can occur in the neighboring countries. - Uncertainty of government policy.
Financial institutions	<p>The banking system is the biggest part of the Georgian financial market. It is sound and stable and has continued to perform well. There are 17 commercial banks operating in the country with</p>	<ul style="list-style-type: none"> - Lack of agro credit opportunities for small holder farmers. - Low competence of credit officers in assessment of agricultural 	<ul style="list-style-type: none"> - Potential exists for developing financial products suitable for rural areas. - Willing to increase their activities in rural areas. 	<p>Dollarization presents specific challenges as it increases credit and liquidity risks.</p>

	<p>nonresident shareholding structure. The leading commercial banks are presented throughout the major rural centers (Liberty Bank, TBC, BoG). As for microfinance organizations in Georgia, there are 75 institutions operation in the country. Some of them are also presented in rural centers (Credo, Crystal, Rico). Before launching governmental program of cheap agro credits through commercial banks, according to the National Bank data, microfinance institutions had been leaders in providing agro credits. The National Bank, as an independent body, exercises supervision over the financial sector for the purposes of facilitating financial stability and transparency of the financial system, as well as for protecting the rights of the sector's consumers and investors.</p>	<p>business potential and risks.</p>	<ul style="list-style-type: none"> - Potential for enhancing Agro credit project initiated by the government. 	
Local NGOs, CSOs, service providers	<p>Many organizations active, with different expertise, degree of community outreach and knowledge. Some have well qualified and experienced personnel, strong grassroots base, advocacy skills and the cultural knowledge that is essential for successful grassroots development. Important role in developing gender equity.</p>	<p>Limited technical and management capacity in the regions. Service providers are not presented in all municipalities of Georgia. Fragmented funding is not enough to create the basis for sustainable development.</p>	<p>Can help programme implementation but local expertise is needed at community level. Community activities must continue long enough to be sustainable. Communities that have benefitted from good NGO assistance desire longer-term engagements with outsiders to help their development. Upgrading of skills is essential.</p>	

Key file 3: Complementary donor initiatives

Project Name	Amount	Grant/Credit	Donor(s)	Govern Authority	Start date	Duration (years)	Geographic Coverage	Main Thematic Areas (Value chains, Irrigation, Water Management, etc.)
Capacity Building Of Agricultural Cooperatives (CBAC)	770,000 EUR	Grant	ADA	Georgian Farmers Association	2015	3	Georgia (except Tusheti)	Policymaking, value chains
Sustainable Forest Governance In Georgia II	1,000,000 EUR	Grant	ADA	Caucasus Environmental NGO Network	2015	3	Adjara, Samegrelo-Upper Svaneti, Kakheti and Tbilisi	Forest Management, Policymaking
Gender Assessment Of Agriculture And Local Development Systems And Follow Up To Its Findings	30,000 EUR	Grant	ADA	United Nations Entity for Gender Equality and the Empowerment of Women	2015	1	Adjara, Qvemo Qartli, Samtskhe-Javakheti, Kakheti, Shida Qartli and Samegrelo regions	Improvement of the social and economic living conditions in rural areas
Capacity Development Of The Ministry Of Agriculture Of Georgia: Improved Policy Making And Effective Implementation Of The Strategy For Agricultural Development (Contribution To Enpard Georgia Programme)	1,900,000 EUR	Grant	ADA	Food and Agricultural Organization	2013	4	Georgia (except Tusheti)	Strengthening small farmers and small farmers' organizations as well as farmer cooperation, environmentally friendly agriculture, the sustainable models for rural development in mountainous areas
Sustainable Forest Governance In Georgia: Strengthening Local And National Capacity And Developing Structured Dialogue Phase I	582,835 EUR	Grant	ADA	Caucasus Environmental NGO Network	2012	3	Adjara, Samegrelo-Upper Svaneti, Kakheti and Tbilisi	Forest Management, Policymaking
Participative Rural Development In Georgia	187,400 EUR	Grant	ADA	CARE Austria, Association for	2015	3	Lagodekhi district and Eastern Georgia	LAGs, innovative agricultural initiatives, non-agricultural enterprises
