Country Strategic Opportunities Programme 2019-2024

Addendum
Djibouti
Country strategic opportunities programme
2019-2024

Addendum

The attention of the Executive Board is drawn to the following addendum and modifications to the country strategic opportunities programme for Djibouti (EB 2019/126/R.15).

For ease of reference, the changes to the text of the report are shown in boldface, while underscore indicates deleted text.

Page 2, paragraph 12
The last sentence should read:
"Underground water – which supplies 90 per cent of the rural population of Djibouti – is vulnerable to salinization and overexploitation and should not be used except in a sustainable way in response to priority needs, according to relevant hydrogeologic studies recommending the use of green technologies and renewable energy."

Page 6, paragraph 30
The second sentence should read:
"The funds for the 2019-2021 cycle, estimated at US$6.617 million, will be allocated to an intervention in the rural water sector that will be overseen by the Rural Water Directorate of National Water and Sanitation Office, the entity responsible for water resource management in the country, and will cover the PROGRES financing gap."

Page 10, paragraph 49
The paragraph should read:
"The projects will be under the MAEPE-RH, which oversees the entire rural sector and has regional offices. Given the lessons learned, project implementation of the next projects will be the responsibility of the PMUs, which are administratively and financially independent, overseen by the Rural Water Directorate. Project management will be entrusted to national and regional committees, and MAEPE-RH and IFAD will be jointly responsible for supervision."

Appendix IV. Page 29, paragraph 79
The last sentence should read:
"Les ressources en eaux souterraines, alimentant 99 pourcent de la population rurale de Djibouti, sont vulnérables à la salinisation et à la surexploitation et devraient n'être exploitées de manière durable que pour répondre à des besoins prioritaires suite à des études hydrogéologiques pertinentes."
