Abbreviations and acronyms

ABC	Agribusiness Capital
ASAP	Adaptation for Smallholder Agriculture Programme
ASEAN	Association of Southeast Asian Nations
CGIAR	Consultative Group on International Agricultural Research
FAO	Food and Agriculture Organization of the United Nations
FARMS	Facility for Refugees, Migrants, Forced Displacement and Rural Stability
FFR	Financing Facility for Remittances
GAFFSP	Global Agriculture and Food Security Program
GCF	Green Climate Fund
GEF	Global Environment Facility
ILC	International Land Coalition
IFAD10	Tenth Replenishment of IFAD's Resources
JPO	Junior Professional Officer
LDCF	Least Developed Countries Fund
OFID	OPEC Fund for International Development
LMIC	lower-middle-income country
SCCF	Special Climate Change Fund
USAID	United States Agency for International Development

Overview of Supplementary Funds Received, Committed and Used in 2018

I. Introduction

1. Supplementary funds are grant resources received from Member States and other donors (e.g. international organizations and funds, and foundations) for project cofinancing, innovative initiatives, studies and technical assistance, and to support IFAD's Junior Professional Officer (JPO) programme. In addition, IFAD administers supplementary funds on behalf of the International Land Coalition (ILC).
2. Supplementary funds for cofinancing IFAD investment projects can provide opportunities to pilot innovative activities or expand their scale and impact, and reduce the administrative burden on recipients created by with parallel cofinancing.
3. Supplementary funds for thematic initiatives enable IFAD to innovate and add value to its operations. They are a major source of funding for IFAD's work with farmers' organizations, remittances and other topics of central importance to IFAD's mission.
4. This information note provides an overview of IFAD's supplementary fund portfolio¹ as of 31 December 2018. It presents an overview of the total supplementary funds managed by IFAD, new funds mobilized in 2018, providers of these funds and the initiatives to which they were allocated. The portfolio includes supplementary funds for ongoing and completed but not yet closed initiatives, and for new agreements not yet operational during 2018.

II. Overview of IFAD's supplementary fund portfolio in 2018

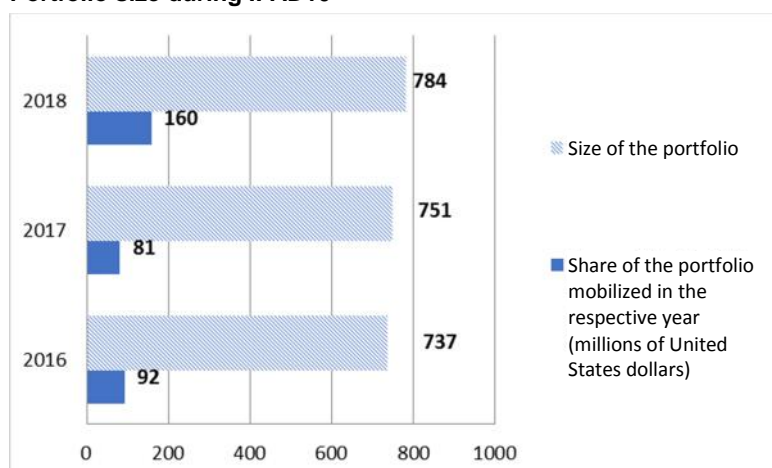

A. Financial status of the supplementary fund portfolio

5. On 31 December 2018, IFAD's supplementary fund portfolio consisted of funding provided based on agreements with 22 Member States and their institutions, 11 international organizations and six foundations totalling US\$784.5 million.² Detailed information on the providers of the funds and a list of all agreements can be found in tables 1 and 2 of the appendix.
6. Approximately 63 per cent (US\$489 million) of IFAD's supplementary fund portfolio is related to agreements signed between 2007 and 2017 to finance ongoing initiatives in different stages of implementation. About 20 per cent of the portfolio comprised new agreements signed in 2018 for a total of US\$160 million. The remaining 17 per cent (approximately US\$135 million) of the portfolio is related to agreements for which all funds were used and activities completed.
7. Figure 1 provides an overview of the ongoing portfolio's evolution during the Tenth Replenishment of IFAD's Resources (IFAD10) in terms of overall size and new funding mobilized during the year. The portfolio grew slightly between 2016 and 2018 – mainly due to new supplementary funds being mobilized. As can be seen, 2018 was a positive outlier in terms of supplementary fund mobilization, with an increase of approximately 100 per cent compared to previous years.

¹ Information is also provided on the JPO programme; however, it is not included in the overall calculation and assessment of the portfolio.

² In estimating United States dollar-equivalent values for the portfolio as of 31 December 2018, the exchange rate used was EUR 0.874:US\$1.

Figure 1
Portfolio size during IFAD10

8. During 2018, IFAD signed 27 new agreements and provided additional financing to 15 existing agreements for a total of US\$160 million. The details of the signed agreements, including information on donors, programmes financed and contribution amounts, is presented in table 3 of the appendix.
9. In 2018, the European Union provided US\$92 million in new funding for: the Agribusiness Capital (ABC) Fund; agricultural research by CGIAR; the Financing Facility for Remittances (FFR); and a joint Rome-based agency programme to promote gender-transformative approaches.
10. Also in 2018, there were continued efforts to mobilize funds for the Facility for Refugees, Migrants, Forced Displacement and Rural Stability (FARMS). This facility attracted US\$19 million in financing in response to donors' increased focus on migration. The funds were provided by the European Union, Norway and the Open Society Foundations to cofinance projects in Jordan, Niger and Sudan.
11. As part of a strategy to broaden its donor base, efforts have been made to engage with philanthropic foundations. As a result, IFAD mobilized funds from five new foundations: the Open Society Foundations, the Small Foundation, the New Venture Fund, the Rockefeller Foundation and the David and Lucile Packard Foundation.
12. In 2018, additional cofinancing was obtained from: (i) Denmark to support the Inclusive Finance and Agriculture Value Chain Project (INCLUSIF) (US\$20.6 million); (ii) the OPEC Fund for International Development (OFID) to support a project in the West Bank (US\$1 million); and the Abu Dhabi Fund for Development to provide supervision and implementation support for the Guinea Agriculture Development Support Project (US\$1.1 million).
13. In addition to the above-mentioned funds mobilized for new programmes, in 2018 IFAD received funding for ongoing and completed agreements totalling to US\$152.9 million (details are presented in the tables 4 and 5 of the appendix).

B. Who provides the supplementary funds and for what?

14. Figure 2 presents the top nine donors, which provided 91 per cent of IFAD's supplementary fund portfolio (US\$710 million). The remaining 9 per cent of supplementary funding was provided by 30 donors with contributions ranging from US\$30,000 to US\$10 million.
15. As indicated below, the European Union is currently the main provider of supplementary funds to IFAD. As of 31 December 2018, there were 18 ongoing agreements between IFAD and European Union, accounting for 36 per cent of the total value of the portfolio or US\$282.3 million; one quarter of the funding related to agreements in the completion phase. At the same time, IFAD is negotiating with the European Union a funding pipeline of approximately US\$100 million.

Figure 2
Major supplementary fund donors as of 31 December 2018

16. Collectively, environment and climate funds such as the Adaptation Fund, Global Environment Facility (GEF), Least Developed Countries Fund (LDCF) and Special Climate Change Fund (SCCF) are the second largest contributor, comprising 23 per cent of IFAD's overall supplementary fund portfolio (US\$177.9 million). GEF is the largest provider of this funding (US\$91.7 million). Among Member States, the main contributors to the ongoing portfolio are Denmark (US\$30 million), the Netherlands (US\$28million), Italy (US\$23 million) and Norway (US\$21 million). Apart from Denmark and Norway, donor countries provided funding for activities in the completion phase.
17. Over the past 10 years IFAD has established a positive track record in mobilizing supplementary funds for climate change (e.g. from Sweden and Norway for the Adaptation for Smallholder Agriculture Programme [ASAP] and from GEF). On 24 September 2018, IFAD and the Green Climate Fund (GCF) signed an Accreditation Master Agreement that enables the GCF to finance IFAD projects with a climate focus. The first proposal in the pipeline is to cofinance an IFAD programme in Belize.
18. Overall, 63 per cent of the supplementary funds were allocated to cofinancing IFAD investment projects, and close to 37 per cent were allocated to support global thematic programmes. The latter included support for agricultural research through the CGIAR and the ILC, which is hosted at IFAD.
19. Finally, the portfolio of supplementary funds also finances IFAD's JPO programme: as of 31 December 2018, IFAD employed 20 JPOs, of which 18 were located at headquarters, one was in Côte d'Ivoire and one was in Ghana. Sponsoring countries include: the Netherlands (with five JPOs, including three developing country nationals); Switzerland (four); Italy (three); Germany (two); Finland (two); France (one); Japan (one); the Republic of Korea (one); and Sweden (one).

C. Regional and global allocation

20. As indicated in figure 3, the distribution of the supplementary funding portfolio by region is aligned with IFAD's strategic priorities. More than half of the portfolio (51 per cent) is allocated to sub-Saharan Africa – 24 per cent for East and Southern Africa (ESA), and 18 per cent for West and Central Africa (WCA), which saw an increase from previous years as a result of Denmark's contribution to Mali and various contributions to FARMS. Joint programmes for ESA and WCA comprised 9 per cent.
21. The Near East, North Africa and Europe (NEN) region received 14 per cent of the supplementary fund portfolio. Asia and the Pacific (APR) received 10 per cent, while one per cent went to Latin America and the Caribbean (LAC). Global initiatives received 24 per cent of the funds.

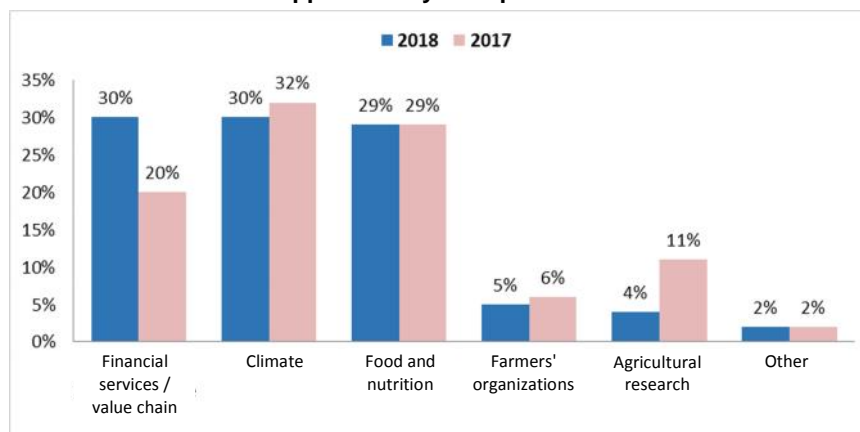

Figure 3
Regional distribution of the supplementary fund portfolio

D. Thematic focus

22. Figure 4 provides an overview of the allocation by thematic focus and a comparison between 2017 and 2018. Inclusive financial services and value chain development was the top thematic area in 2018 (receiving 30 per cent or US\$238.1 million). This included funds for cofinancing from the European Union, Denmark and Italy; it also included support for multi-donor programmes including the FFR, the Platform for Agricultural Risk Management, the ABC Fund and the Smallholder and Agri-SME Finance and Investment Network from the European Union, Luxembourg, Switzerland, Spain and the United States Agency for International Development (USAID). The increase from 20 per cent in 2017 to 30 per cent in 2018 was the result of new funding mobilized for the ABC Fund and cofinancing for a project in Mali.
23. The thematic area receiving the second greatest amount of supplementary funding was climate and natural resource management (with 30 per cent or US\$232.1 million). Support in this area was provided through the climate and environment funds, including the Adaptation Fund, GEF, LDCF and SCCF, to cofinance the IFAD investment portfolio. Sweden and Norway also provided funds for the second phase of the ASAP Trust Fund.

Figure 4

Thematic focus of the supplementary fund portfolio as of 31 December 2018

24. Food and nutrition security ranked third, receiving 29 per cent or US\$224.4 million. It included US\$114 million from the Global Agriculture and Food Security Program (GAFSP) for cofinancing projects in Burundi, the Lao People's Democratic Republic and Sierra Leone. It also included US\$102 million from the European Union, Italy, Switzerland, OFID and the Open Society Foundation for cofinancing projects through FARMS. Finally, it included funds for mainstreaming nutrition from Canada and the Food and Agriculture Organization of the United Nations (FAO).
25. A longstanding thematic and multi-donor programme delivers support to farmers' organizations (comprising 5 per cent of supplementary funding or US\$38.2 million). The aim of this work is to strengthen the institutional capacity of farmers' organizations and give them a greater influence in agricultural policymaking. It includes funding from the European Union, France and Switzerland to finance three complementary programmes currently in the completion phase: the Support to Farmers' Organizations in Africa Programme; Farmers Fighting Poverty in the Association of Southeast Asian Nations (ASEAN) Region; and the Cooperation Programme with Farmers' Organizations in Asia and the Pacific. Two new programmes are being negotiated with the European Union to continue support in these two regions, and to expand regional support to Latin America and the Caribbean.
26. Agricultural research (4 per cent or US\$34.7 million) included funds in support of the CGIAR from the European Union.
27. The final category includes support to gender mainstreaming and other themes such as evaluation, South-South and Triangular Cooperation and indigenous peoples (2 per cent or US\$15.8 million). Initiatives in this category received financing from the European Union, China, Norway, Switzerland, Sweden and others.
- E. Management and administration of supplementary funds**
28. The 122 supplementary funding agreements that were newly signed, under implementation or completed – with a total value of US\$784.5 million – illustrate that these funds are an important source of financing to scale up IFAD's impact, innovate and strengthen knowledge. Yet significant capacity is required to administer the funds entrusted by donors. Presently, IFAD charges an 8 per cent management fee for administering supplementary funds.
29. In recent years, IFAD has invested in improving its systems for managing these funds, resulting in enhanced efficiency, strengthened compliance and improved information access and reporting. During 2018, all data related to supplementary

funding agreements were integrated into IFAD's corporate systems, and a reporting feature is currently accessible to IFAD staff.

30. In line with standard practice, audited donor statements have been provided to donors showing the financial status of all contributions as of 31 December 2018. Efforts have been made to enhance the overall quality of reporting, highlight information on achievements and report on results together with financial data.
31. In 2018, 14 previously completed agreements were financially closed, and 15 agreements reached completion and are now in the process of being financially closed.

III. Conclusions

32. Supplementary funds are a proven instrument for mobilizing cofinancing to scale up interventions and support work in thematic areas. The European Union remains IFAD's largest supplementary fund donor with a funding pipeline for 2019 of approximately US\$100 million. However, there is a need to attract more supplementary funds for cofinancing the Fund's programme of loans during IFAD11, and to meet IFAD's commitment to international cofinancing for this cycle.
33. In light of the IFAD11 commitments, the Fund will continue to mobilize supplementary funds for priority areas that add value to country programmes or enhance global engagement. These include: (i) cofinancing for IFAD's investment programmes, especially from the European Union and bilateral donors; (ii) support to IFAD's mainstreaming agenda for climate, nutrition, youth and gender; (iii) multi-donor facilities such as the FFR, FARMS and ASAP2; (iv) South-South and Triangular Cooperation; and (v) private sector development.

Table 2. Ongoing supplementary fund agreements as at 31 December 2018 (US\$ equiv.)³

Donor	IFAD Multi-donor programmes	Start Date of Agreement	End Date of Agreement	Total value - Agreement	Received as at 31/12/2018
Agri - Business Capital Fund (ABC Fund)					
<p>The ABC Fund serves to invest in smallholder organizations and rural agricultural businesses to preserve existing jobs and generate new rural employment opportunities and growth. It complements IFAD work by supporting private sector enterprises directly through the provision of investments in selected entities operating within agriculture value chains that are broadly supported by IFAD projects via public types of interventions. The ABC Fund will provides loans and, in time, equity investments adapted to the needs of rural SMEs, farmers 'organizations, agri-preneurs and rural finance institutions. The Fund was launched as a private fund regulated under Luxembourg law on 12 February 2019.</p> <p>Luxembourg was the first supporter of this initiative, providing a contribution of EUR 5 million in December 2017. In December 2018, the European Union, made a commitment of EUR 45,750,000 in support of the Financing Instruments and the Autonomous Technical Assistance of the Instrument.</p> <p>The ABC Fund Manager, Bamboo Capital Partners, has begun engaging with potential investors to subscribe to the ABC Fund. It has engaged with several potential investors to gauge their interest in investing in the ABC Fund at the Mezzanine level. Roadshows are being organized by Bamboo Capital Partners to take place in Brussels, Frankfurt, Paris and London to attract additional investors.</p> <p>As for the Autonomous Technical Assistance, the Manager - Agriterra Foundation - has been selected through a competitive selection process. It is a Dutch non-for-profit entity that was established in 1997 by a group of Dutch Farmer Organizations.</p>					
European Union	Agri-business Capital Fund - Financial Instrument and Autonomous Technical Assistance	18/12/2018	18/12/2033	52 299 115	26 235 293
Luxembourg	Agri-business Capital Fund	19/12/2017	31/01/2030	5 715 750	2 857 875
	Subtotal – ABC Fund			58 014 865	29 093 168

³ Includes agreements at all stages from signature to implementation. Closed agreements are not included. An agreement is considered closed when all activities have been implemented, final report submitted to the donor, any final payments and reimbursements processed and final donor financial statement submitted.

Donor	IFAD Multi-donor programmes	Start Date of Agreement	End Date of Agreement	Total value - Agreement	Received as at 31/12/2018
FACILITY FOR REFUGEES, MIGRANTS, FORCED DISPLACEMENT AND RURAL STABILITY (FARMS)					
<p>In accordance with the information note presented to the 118th session of the Executive Board (document EB 2016/118/INF.6), IFAD established FARMS to address the causes and consequences of the current refugee and forced displacement crisis, which lies within IFAD's mandate, and to support efforts to bridge the humanitarian/development financing gap. The current global crises and forced displacement affect 65 million people worldwide and about 22.2 million in the Near East and North Africa Region, mainly in Iraq, the Syrian Arab Republic, Yemen, and their neighbouring countries. It has created severe humanitarian and development challenges and threatens further destabilization as host communities struggle to absorb displaced peoples. Jordan is currently host to about 1.4 million Syrians, who now comprise over 20 per cent of the total population. Of these, only 20 per cent live in the main refugee camps, and, though precise rural figures are not available, it is estimated that many refugees are located in rural areas.</p> <p>This influx of refugees, almost unprecedented in scale, puts refugees in positions of immense vulnerability and places enormous pressure on both host communities and refugees in terms of livelihoods, natural resource management and food systems. FARMS aim is to help host communities cope with the pressures of the crisis and provide refugees and internally displaced peoples with remunerative livelihoods – building skills and capacities that will serve them well on an eventual return to their homes. The Facility has three pillars: (a) Cofinancing of IFAD ongoing and pipeline investment projects, (b) Regional and country-specific grants, and (c) Policy engagement, knowledge management and communication outreach. When established, FARMS aimed to have an overall envelope of US\$100 million. At the current date, the Facility has mobilised approximately US\$ 33.3 million. At the end of 2018, five agreements have been signed so far.</p>					
European Union	Livestock Epidemio-Surveillance Project to Support Livelihoods of vulnerable rural smallholders and pastoralists	11/05/2018	11/05/2022	10 002 563	4 540 145

Donor	IFAD Multi-donor programmes	Start Date of Agreement	End Date of Agreement	Total value - Agreement	Received as at 31/12/2018
FINANCING FACILITY FOR REMITTANCES					
<p>For more than 12 years IFAD has managed the Financing Facility for Remittances (FFR), a multi-donor facility linking migration and development issues, financing innovative projects to enhance the development impact of migrant's remittances and diaspora investments in countries of origin, and supporting capacity-building, policy engagement and research in this field. From a US\$4 million facility to a US\$60 million multi-donor facility with a portfolio of more than 60 projects in over 45 countries across the developing world, the FFR is one of the few programmes that has had a systematic approach in testing and identifying scalable methodologies towards lowering the transaction cost of remittances, promoting access to financial services in remote areas through the linkage with financial services and foster migrant investment and entrepreneurship.</p> <p>IFAD's FFR is nowadays recognized as one of the lead global actors in the area of migration and development, actively contributing, among others, to the works of the G20, the Global Forum on Migration and Development (GFMD), the Financing for Development process, the UN Migration Network and the recently-launched Global Compact for Safe, Orderly and Regular Migration. The FFR periodically publishes global, regional, and national remittance market its Sending Money Home and RemitScope reports and platforms. It also continues to contribute to policy dialogue and definition through actionable research and its Global Forums on Remittances, Investment and Development (GFRID), which brings together all the major public and private sector stakeholders involved in the remittance field.</p> <p>The year 2018 represented a pivotal year for the FFR. The combination of the international recognition in the framework of the Global Compact for Migration (refer to objective 20 "Promote faster, safer and cheaper transfer of remittances, and promote financial inclusion of migrants"), the unanimous adoption of the International Day of Family Remittances (IDFR) by the United Nations General Assembly, together with the results obtained through its portfolio of projects and the increased internal number of requests for technical support by IFAD regional divisions, have concurred to the successful achievement of the planned annual outcomes, which in some cases went even beyond expectations.</p> <p>The Facility is currently managing eleven ongoing projects worldwide while seven additional projects are in the pipeline and expected to start in 2019. Out of them, five innovative projects are currently implemented in Central America, the Gulf states, Kenya, Malaysia and Uganda, while six ongoing scaled-up projects were directly financed for activities in Mali, Moldova, Morocco, Nepal, Philippines (2) and Senegal. In 2018, the FFR also continued the mainstreaming of remittances and migrant investment into six IFAD country programmes, where the topic was successfully included as components of the loans to Eswatini, Honduras, Indonesia, Mali, Philippines and Samoa. The 2018 edition of the GFRID in Kuala Lumpur brought together over 450 practitioners from the public and private sectors to discuss challenges and opportunities in the Asia-Pacific remittance market, and present innovative approaches and successful business models, framing the global discussions around the role of migrants' remittances and investment. In that occasion the "RemitScope.org" web portal was launched, with the aim to provide data, analyses and remittance market profiles on regions, sub-regions and individual countries in Asia-Pacific.</p> <p>On 12 June, the United Nations General Assembly (UNGA) unanimously adopted the Resolution (A/RES/72/281) during the 95th plenary meeting of the 72nd session proclaiming 16 June as the International Day of Family Remittances (IDFR), previously launched by IFAD GC in 2015. Its observance received enormous support from both public and private sectors, with over 20 international organizations, UN agencies and governments celebrating the Day, over 100 money transfer operators (MTOs), 800 mobile companies, 6,000 savings banks across 80 countries through WSBI, and more than 100 emerging payments entities endorsing it.</p> <p>The FFR is continuing to receive support and additional contributions from both the donor community and IFAD, to allow to scale up the impressive results reached thus far, and to mainstream remittances, migrant investments and migration within IFAD's programme of loans and grants. While the FFR has been managed as one facility, separate contribution agreements were signed between IFAD and Spain, Luxemburg, the EU, UNCDF and the Swiss Development Agency (SDA), and require separate financial reporting.</p>

FOOD LOSS REDUCTION					
<p>In 2013, the Swiss Agency for Development and Cooperation (SDC) through their Global Programme on Food Security (GPFS) funded a Rome-based agency (RBA) joint project "Mainstreaming food loss reduction initiatives for smallholders in food deficit areas". Phase I (2014-2017) is completed and Phase II is from July 2017 to June 2020. The partnership between IFAD, FAO and WFP ensured that each agency leveraged its core competencies and strengths to maximise the outreach and impact of project activities to reduce food losses. Among the outcomes of Phase I was the establishment of the trilingual (English, French and Spanish) Community of Practice (CoP), on Food Loss Reduction (FLR) that is hosted in FAO and that has gained global interest. Other outcomes include food loss assessments along selected grain value chains in Burkina Faso, Democratic Republic of the Congo (DRC), and Uganda following the FAO case study methodology. These resulted in the identification of critical loss points along the value chains, which formed the basis for the development of national food loss policy briefs in Burkina Faso and the DRC.</p> <p>Phase II has continued to work in the same countries expanding and focussing on national policy dialogue on food loss reduction. The development of policy frameworks on food loss reduction has been initiated in each country and are undergoing validation from national authorities. On 7 September 2017, the Rome-based agencies jointly organized a high level event at IFAD HQ that presented the results and lessons learnt from past and ongoing RBA collaboration, and outlined the way forward for future collaboration to reduce food loss and waste. The event was attended by several Executive Board members, private sector representatives, as well as Senior Management and technical staff of the RBAs.</p> <p>The SDC project collaborated with a FAO/IFAD UN joint project (UNJP) on "Food loss reduction through partnerships and evidence-based interventions" funded by the Irish government. The supplementary fund agreement between IFAD and Ireland was signed in 2013 for US\$174,880 - which had remained unspent under another partnership agreement (see Agreement with Ireland under thematic single-donor facilities). This UNJP provided technical support on food loss reduction to FAO and IFAD field operations by supporting national loss assessments in of Timor-Leste, Ethiopia and Malawi along different grain value chains. The results of the assessments were presented and discussed in regional workshops on food losses, and awareness and knowledge materials were developed and published. The UNJP completed at the end of 2016.</p> <p>At the end of 2018, a one-year grant of US\$ 262,500 was mobilized from the Rockefeller Foundation for the grant "Catalysing postharvest management for Food Systems Transformation". The grant's objective is to leverage IFAD's investment portfolio in Kenya, Rwanda, Nigeria and Tanzania, and to build upon the Rockefeller Yieldwise food loss initiative on postharvest loss reduction to develop a pipeline of value chain financing opportunities.</p>

INTERNATIONAL LAND COALITION					
<p>IFAD has received funding from European Union, Germany, Ireland and the Netherlands for the support of the International Land Coalition (ILC) Strategy 2016-2021. These funds are provided directly to ILC in line with the terms of the IFAD-ILC MoU. The ILC's goal is to "realize land governance for and with people at the country level, responding to the needs and protecting the rights of those who live on and from the land". To achieve this change, ILC members seek changes in policies, practices and agendas at country, regional and global level. In the third year of implementing its strategy, ILC moved towards becoming also a network of platforms for action, each with their own strategy, membership, governance, and facilitator. In 2018, the network welcomed 63 new members, increasing the proportion directly representing land users.</p> <p>The network's reach also expanded to 13 new countries, with Europe, Middle East and North Africa being the fastest-growing region and a new regional platform emerging. A Mid-Term Review affirmed the continuing validity of ILC's Strategy and provided strong evidence that the Coalition has contributed to changes in land governance. ILC supported platforms led by members (and including other partners) that jointly push for people-centred land governance in 26 countries (National Engagement Strategies (NES) as well as 34 platforms on specific themes linked to 10 commitments to achieve people-centred land governance (Commitment-Based Initiatives (CBIs). Responding to a request from members in Guatemala following a series of murders of indigenous and human rights defenders, the ILC and allies organized an international high-level mission. The mission made recommendations to the Government of Guatemala, development partners, international media and civil society.</p> <p>Also in 2018, the ILC held its triennial event – the Global Land Forum – with over 1,000 participants gathering in Bandung, Indonesia. In the lead-up, Indonesia's President Joko Widodo announced a moratorium on palm oil and signed legislation to resolve agrarian issues, as called for by local ILC member and event co-host, the Konsortium for Agrarian Reform.</p> <p>The ILC's Dashboard Initiative includes a monitoring framework of 30 indicators to measure people-centred land governance and to monitor progress towards the Sustainable Development Goals. In 2018, pilots in Colombia, Nepal and Senegal opened up dialogue and collaboration with national statistics offices. Read more in the ILC's latest triennial report (2016-2018): www.triennial.landcoalition.org.</p>

MAI NSTREAMING GENDER EQUALITY					
<p>Since 1995 IFAD has received US\$15million from Japan, Norway, Germany, Canada, Finland, The Netherlands and Italy under nine agreements to achieve more impact on reducing poverty and increasing household food security by: (i) building IFAD's capacity at HQs and country level reaching more rural women through gender-sensitive programme design and implementation; (ii) working in partnership with other institutions and organization; (iii) developing and testing innovative methodologies; (iv) empowering women and their organizations by creating their legal awareness. Remaining balances of Norway and Japan were used to roll-out IFAD's household methodologies. On 26 November 2012 IFAD signed a 5-year joint programme with UN Women, FAO and WFP for accelerating progress towards the economic empowerment of rural women (RWEE-Joint Programme). The Joint Programme is articulated around four outcome areas: (i) Improved food security and nutrition; (ii) Increased income opportunities; (iii) Enhanced leadership and participation; and (iv) More gender responsive policy environment. The Joint Programme enhances as well the role of young women by specifically targeting them throughout its four outcome areas and its activities. The following seven countries are targeted for the implementation of the Joint Programme: Ethiopia, Guatemala, Kyrgyzstan, Liberia, Nepal, Niger and Rwanda. IFAD is implementing activities in Guatemala, Kyrgyzstan, Nepal, Niger and Rwanda, focusing on the promotion of household methodologies and support of vulnerable women through rural-pastoral kits. The UNDP-Multi-partner Trust Fund (MPTF) is the programme's administrative agent. Norway and Sweden - through the Swedish International Development Agency (SIDA) - NOK10million (US\$1.6 million equivalent) and SEK 112,000,000 (US\$13.9 million).</p> <p>In 2018, a contribution of EUR 836, 740 was mobilised to from EU for a four-year long RBA collaboration to support the three agencies to embed gender transformative approaches in policy dialogue, programmes, institutional culture and their working modalities.</p>

MAINSTREAMING CLIMATE ADAPTATION					
<p>IFAD's Adaptation to Smallholder Agriculture Programme was launched in September 2012. ASAP is currently the largest adaptation programme for smallholder farmers globally with the goal to improve their climate resilience. It aims at reaching 8 million farmers by 2023 through mainstreaming climate change into IFAD's model by matching grants devoted to adaptation to climate change with regular loans in 41 countries. USD 316m have been invested and in some countries such as Mali, Bolivia and Mozambique new projects are currently designed, taking at scale ASAP supported innovations.</p> <p>ASAP has five outcomes focussing on various ways for improved climate resilience: land management, water use, human capacity to manage climate risk, infrastructure and policy dialogue on climate change.</p> <p>The second phase of the Programme (ASAP2) will cover the period from September 2017 to 31 December 2025 and will contribute to achieving IFAD's climate mainstreaming objectives and outcomes over the Strategic Framework 2016–2025 implementation period. ASAP2 technical assistance activities will sustain the design of new corporate tools for climate-informed programming, capitalization studies and leverage resources from global climate funds to address the additional costs of climate change in IFAD's agricultural programmes. The ASAP2 outcomes include climate mainstreaming in IFAD's Programme of Loans and Grants, private sector engagement, women engagement, support to the nexus between climate change and nutrition and policy engagement in the field of climate change.</p>

NUTRITION SENSITIVE AGRICULTURE					
<p>Funds from Canada supported the systematic mainstreaming of nutrition into IFAD's operations. IFAD has shown a steady increase in the share of COSOPs and projects that mainstream nutrition. The performance targets for operations (100 percent of COSOPs and 33 percent of new projects are nutrition-sensitive) were met for COSOPs and exceeded for projects with an average of 49%. IFAD achieved 100% target of mainstreaming nutrition in COSOPs from 2016. This followed the inclusion of nutrition in the corporate COSOP guidelines. Similarly, the share of projects that are nutrition sensitive has risen from 3 percent in 2010 to 48 percent in 2018. The highest percentage of nutrition sensitive projects at design was registered in 2017 (53 percent).</p> <p>IFAD's contribution to nutrition is high on its corporate agenda and it has strengthened its engagement in global policy towards the achievement of the Sustainable Development Goal Two (SDG II) on Zero Hunger by 2030. Indeed, "improving the nutritional level of the poorest populations in developing countries" is a principal objective of the agreement establishing IFAD. Since 2016, IFAD actively contributed to the Global Nutrition Report, having made concrete commitments on nutrition during the London nutrition for growth event. IFAD engages in existing global and country governance platforms for nutrition. At global level these platforms are the United Nations Standing Committee on Nutrition (UNSCN), United Nations System Network for Scaling up Nutrition (UN Network for SUN), Renewed Efforts against Child Hunger and Undernutrition (REACH), the Committee on World Food Security (CFS).</p> <p>IFAD has consistently improved the use of knowledge and evidence on nutrition-sensitive agriculture and food systems to improve projects, COSOPs, policy influence and engagement activities by IFAD and project staff. Currently, all nutrition sensitive designs benefit from a comprehensive nutrition analysis drawing from secondary (global and country specific) as well as primary data sources to inform nutrition interventions. Various mechanisms that have ensured this success at IFAD include strengthening partnership with specialised agencies (CGIARs and the A4NH, Wageningen University, NGOs; tapping into the knowledge generated through IFAD supported research, grants and impact assessments. Other mechanisms include, documenting best practices and establishment of knowledge sharing platforms that encourage IFAD and project staff to learn from each other.</p>

PLATFORM FOR AGRICULTURE RISK MANAGEMENT: Multi-donor facility 2013-2018					
<p>IFAD, with the support of the EU, France, and Italy, and in strategic partnership with the New Partnership for Africa's Development (NEPAD) and Germany, launched the Platform for Agricultural Risk Management (PARM) in December 2013. PARM is a partnership-based initiative aiming at fostering responsible investment in rural areas and agriculture. The aim of the platform is to assess and qualify agricultural risks in partner countries, develop appropriate strategies to challenge such risks and contribute to establishing the conditions necessary for food and nutrition security. Its main role will consist of: (a) improving the area of risk agricultural management, (b) assist national stakeholders in setting up a process to develop agricultural risk management strategies, (c) developing effective tools to measure efficiency and effectiveness of risk management systems, (d) building capacity among African nations on agricultural risk management topics, (e) act as a broker between the private and public sector and between those in need of risk management expertise and those who can provide it; and, (f) strength regional cooperation on agricultural risk management.</p> <p>In 2018 PARM entered in its last programming year before the completion of its first phase (11 June 2019). During its first years of implementation has consolidated its pillars of action and became a global reference on Agricultural Risk Management. PARM is now the Platform that brings together: the methodological rigour of the holistic approach; the inclusive and participatory process; the focus on risk assessment and management capacities on the field; and the partnership with key experts and institutions. PARM policy engagement with the governments and key stakeholders in the country has allowed developing an attractive package of ARM tools and initiatives that directly respond to the priorities identified by the governments and stakeholders. Given the positive results achieved by PARM during the current program (2013/2018) and considering the increased demand on ARM and from new potential countries, a new phase called PARM Horizon 2 (2019-2024) was designed to continue engaging with Governments at policy level through the integration of ARM into the national strategies and investment plans, but also completing the service providing technical assistance in the design of specific ARM programs and projects.</p>

SUPPORT TO FARMERS' ORGANIZATIONS					
<p>The support to Farmers' Organisations (FO) is delivered by IFAD through 4 complementary programmes: The Support to Farmers' Organizations (FO) in Africa Programme (SFOAP) and the Farmers' Fighting Poverty in Africa (FFP/AFRICA), which together form the Farmers' Africa programme; and the Medium-Term Cooperation Programme with Farmers' Organisations in Asia and the Pacific (MTCP 2) and FFP/ASEAN which together form the ASEAN Farmers' Organisations Support Programme (AFOSP). Since 2009 these programmes have mobilised over EUR 65 million in support of FO, mainly from the EU, Switzerland, France and IFAD.</p> <p>SFOAP was established in 2009 with EUR 5 million financing from the EU and US\$1.5 million financing from IFAD. It was the first programme to be initiated by the four regional networks of FOs in sub-Saharan Africa (EAFF, PROPAC, ROPPA and SACAU). In 2012 Italy, Finland and Switzerland agreed to jointly co-finance SFOAP's transition from pilot phase to a main phase. The main phase was launched in January 2013 through additional supplementary funds by the EU (EUR 15 million), France (EUR 1 million), Switzerland (EUR 2 million), and USD 2.5 million from IFAD. This phase builds on the successes and lessons learned from the pilot phase and scales up programme activities and outreach. The programme aims to further strengthen and consolidate the institutional capacity of FOs and give them a greater say in agricultural policies and programmes. It also supports the development of FOs' economic services to facilitate the integration of smallholder farmers in value chains. The addition of a fifth regional network, UMNAGRI, has expanded the geographical area to the North Africa region. The programme now supports 68 national farmers' organizations (NFOs) in 49 countries, their five regional networks. SFOAP has generated some interesting results for the participating FO, which include: an additional 500,000 members recorded; approximately USD 14 million mobilised from public sources and over USD 5.7 million from the private sector; increases in productivity between 30% and 150%; increases in revenues up to 350% for some participating farmers; increased solicitations to participate in policy task forces and stronger influence in national agricultural policies.</p> <p>The first phase of MTCP was implemented from 2009- 2012, with a budget of USD 1.9 million. In 2015 the EU agreed to support MTCP2 with additional EUR14.4 million. MTCP2 aims to strengthen the capacities of farmers organizations in Asia and the Pacific to deliver better, improved and inclusive services to their members and to engage in effective dialogues with governments, thereby making FOs more viable, responsive and accountable to their members, more respected by their partners and with greater participation in policy-making and program implementation processes of governments and IFAD country operations. The programme now supports 150 FOs representing 20 million small-scale farming families in 25 countries in Southeast and South Asia and the Pacific.</p> <p>FFP/AFRICA (2013-2016) and FFP/ASEAN (2015-2019) are initiatives of the global Farmers Fighting Poverty programme established by AgriCord, the network of agri-agencies for development cooperation with structural links to farmers and rural members' organizations in their home countries (10 agri-agencies and 4 associated farmers' organisations). FFP/AFRICA focuses solely on FOs in sub-Saharan Africa. The total cost of the programme is EUR 20.2 million, which includes a contribution from the EU of EUR 11.9 million. An additional EUR 8.3 million is to be provided by agri-agencies, their governments and other donors. FFP/ASEAN is implemented in 6 countries of south-east Asia, with an overall budget of EUR 7.2 million, of which EUR 6.7 million from the EU and EUR 500,000 as co-financing from the agri-agencies. Both programmes involve mainly FOs at local level and national value chain specialized FOs from the local to national level. One of the main pillars of Farmers Fighting Poverty is the funding of small organizations and local associations. FFP/Africa has also recorded some interesting results, including: approximately 20.000 farmers accessing improved inputs; 800 linkages created with market outlets and over 600 agreements signed with the private sector; increases in volume produced varying from 15% to 90% and reported productivity increases from 11% to 250%.</p>

FARMERS' FORUM-Ongoing					
<p>The Farmers' Forum (FAFO) is a bottom-up process of consultation and dialogue between small farmers' and rural producers' organizations, IFAD and governments for rural development and poverty reduction. Established in 2006 as a permanent feature of the IFAD Governing Council and operationalized through IFAD-funded investment projects and grant programmes, the Farmers' Forum is fully aligned with IFAD's strategic objectives, and is rooted in concrete partnership and collaboration at country and regional levels. Over the past 8 years, the FAFO process has demonstrated its relevance and indeed changed the way IFAD and FOs are working together. Since its inception, FAFO has received supplementary funding from Italy, Switzerland, France, Finland and BMGF.</p> <p>During the 6th Global meeting of the Farmers' Forum held in Rome in February 2016, members agreed to decentralise the FAFO process and to begin holding regional level FAFOs in order to 'be closer' to the farmers and to foster greater involvement of IFAD regional divisions and country programmes. The FAFO members also decided to use the IFAD geographical structure for the regional FAFOs in order to facilitate interactions with the regional divisions. Furthermore it was decided to organise the regional FAFOs in concomitance with the IFAD regional divisions' implementation workshops. As such, from 20 to 23 May 2017, 40 Farmers' Leaders from 12 countries and 28 farmers organizations, organized the First Regional Farmers' Forum in Eastern and Southern Africa (ESA FAFO Meeting) in Kampala, Uganda. The Forum was held in conjunction with the IFAD Regional Implementation Workshop, centred around the theme of Financial Inclusion for Rural Transformation, and was also attended by approximately 260 representatives from IFAD funded projects in 17 countries and by IFAD staff from HQ.</p> <p>During the Regional FAFO, the FOs, ICOs and IFAD funded projects developed 15 Country-level action plans to outline the next steps and agreed actions for the initiation/strengthening of the country level partnerships. A regional FAFO has also been organised in WCA - in Nouakchott, Mauritania from 8 to 12 April 2019, in conjunction with the West and Central Africa Division Regional Implementation Forum. At the closing session of the Regional FAFO WCA 2018, the Secretary General of ROPPA presented the Nouakchott Declaration of FOs. This statement represents the main result of the event and the commitments of the FOs that guided and will guide the partnerships at country level over the period 2018-2019. The Declaration recognizes the important contribution of the host country: the Islamic Republic of Mauritania, as well as IFAD and the Italian Cooperation Agency, to the Forum. It recognizes the increasingly important role of FOs and their members as contributors and drivers of national economies. In addition, the Declaration contains recommendations to governments, such as to: (i) encourage the institutionalization of national and regional dialogue forums; (ii) invest in public infrastructure related to agriculture, fisheries, pastoralism and handicrafts; (iii) assist small producers in accessing technology, rural finance, markets and insurance.</p>

Smallholder and Agri-SME Finance and Investment Network (SAFIN)					
<p>SAFIN is an inclusive partnership of actors operating in different parts of the ecosystem for agricultural and related rural small and medium enterprise (SME) investment, with a focus on access to finance and complementary services. Partners share the recognition that smallholder farmers and other rural SMEs are key investors in inclusive and sustainable rural economies and food systems. They further share an appreciation of the many challenges and gaps in the ecosystem around such investments, and an interest in joining forces to address these. The network provides partners with a pre-competitive space to align their efforts and to scale up and multiply their positive impact, via activities and tools for shared learning, peer support, frank and open dialogue, and the identification of opportunities for coordinated action.</p> <p>The initiative to establish the SAFIN was jointly launched in 2017 by the Italian Government, Ministry of Foreign Affairs and International Cooperation, and IFAD. Italy has been a participant in the process of developing the network, particularly through the participation of Italian Agency for Development Cooperation, but also through the participation of Coopermondo/ Confcooperative and CIHEAM Bari.</p> <p>2018 was a year of formalization of SAFIN, with the launch of a website and the definition of a governance structure with a Steering Committee representing the diverse communities involved. It has been a year of implementation of activities under five workstreams agreed by partners in 2017, namely related to: 1) piloting in 4 countries (Jamaica, Dominican Republic, Nigeria and Uganda) an investment prospectus framework, aiming to align partners' programmatic activities and investments around strategic opportunities and gaps in specific value chains and countries; 2) building up a knowledge base on blended finance and its relevance in agriculture and rural development; 3) identifying innovative business models for technical assistance delivery to agri-SMEs; 4) global policy engagement and advocacy; and 5) coordination of partners' research agendas. As of early December, SAFIN counted 46 partners, some of them Secretariats of networks or multi-stakeholder platforms or apex farmers' organizations representing many other organizations.</p>

TECHNICAL ASSISTANCE FACILITY TO THE AFRICAN AGRICULTURE FUND First multi-donor fund established at IFAD (including a joint multi-donor agreement between Italy-AGRA-UNIDO)					
<p>TAF's main objective is to support the economic development of Small and Medium Enterprises (SMEs) and small farmers operating in the agriculture sector in Africa. By doing so, TAF enables small businesses, small-scale farmers, farmers' organizations, and cooperatives to benefit, either directly or indirectly, from the African Agriculture Fund (AAF). In practice this means that TAF links small-scale farmers and micro-entrepreneurs and their associations with portfolio companies that receives investments from the AAF. TAF may also develop and strengthen the capacity of third-party providers of services, inputs, productive assets and equipment to serve the linkage scheme partners. Moreover, TAF support can also be directly provided at SMEs allowing them to optimize their operations and secure long-term growth.</p> <p>TAF has reached completion in May 2018. It was expected to reach 15,000 smallholder farmers and micro-enterprise beneficiaries; and enable 7 AAF SME Fund portfolio companies to achieve a 50% increase in sales thereby creating 6,000 jobs and generating a US\$4 million increase in beneficiary annual incomes generated through increased sales and employment opportunities. TAF invested EUR 5.78 million in completing 78 projects around 12 portfolio companies and, in doing so, supported the medium-term economic development of 6 SMEs (who adopted practices) and 35,990 smallholder farmers and micro entrepreneurs operating in the agriculture sector in Africa; with 26,261 (50% women) beneficiaries directly linked to portfolio companies (175% above the 15,000 target); and 5,493 jobs created and/or maintained (92% of 6,000 target).</p> <p>The contribution agreements signed with AGRA (US\$150,000) and UNIDO (US\$75,942) completed on 11 May 2016, and therefore are not included in the calculation below.</p>

WEATHER RISK MANAGEMENT FACILITY					
<p>The Weather Risk Management Facility (WRMF) started in 2008 and aims to increase the resilience of smallholder agriculture and rural livelihoods with inclusive insurance. It focuses on providing technical assistance in insurance, with specific expertise in agricultural insurance to IFAD partner countries and within the IFAD-financed portfolio. This sits within the Platform for Agricultural Risk Management (PARM) and is further supported by a variety of strategic partnerships across the industry. It approaches insurance as one part of a holistic approach to agricultural risk management. The three main pillars of WRMF activities are (i) Design and implementation support of holistic agricultural insurance schemes linked to IFAD's portfolio; (ii) Knowledge Management and capacity enhancement and (iii) Public goods and global engagement.</p> <p>In 2018, IFAD completed a ground-breaking research and development project on using satellite data to scale-up index insurance (https://www.ifad.org/en/web/latest/story/asset/39915604). The project was financed by the French Development Agency (AFD) and implemented together with the World Food Programme and other public and private partners. Key findings and recommendations for the sector were widely disseminated, and support provided to scale-up the approach within the IFAD-financed Agricultural Development and Rural Entrepreneurship Programme II (PADAER II) in Senegal.</p> <p>WRMF was awarded over 3.8 million USD in funding from Sida to implement a new 4-year programme - INSURED – Insurance for Rural Resilience and Economic Development. INSURED is a technical assistance programme for IFAD, the IFAD-financed portfolio, and its public and private partners. The programme's overall goal is to increase resilience, capacity to manage risks, and improve livelihoods of poor rural households. The objective is to protect incomes and promote investments in the development of smallholder agriculture. In practice, INSURED assists governments and decision makers to define areas of climate insurance investment as part of rural development/agricultural risk management strategies; provides technical assistance for the design and implementation of climate insurance linked to IFAD's portfolio; it builds capacity of local public and private partner institutions, and shares lessons for scaling-up.</p> <p>Technical assistance is provided directly to IFAD's portfolio and at corporate level to translate lessons into strategies and operational guidelines. It also gives a comprehensive package of services to at four core countries across in APR and ESA, which will benefit from country assessment and policy dialogue, as well as implementation linked to IFAD's in-country programmes and capacity building. 2018 was INSURED's inception year during which the programme was set-up and activities started. Core countries were selected: Cambodia, Indonesia, Uganda and Zambia. A partnership agreement was signed with ILO's Impact Insurance Facility who began country assessment activities. In-country insurance technical assistance was also provided to during IFAD-financed project design and implementation in Cambodia, Indonesia, and Zambia.</p>
