Recommendation for approval
The Executive Board is invited to approve the recommendation contained in paragraph 61.

I. Context

A. National context and rationale for IFAD involvement

National context
1. The Republic of Malawi is a low-income country, with a per capita GDP of US$338 in 2017. In that year the agricultural sector contributed about 30 per cent of GDP, 80 per cent of Malawi's foreign earnings and 77 per cent of total employment. Climate-related and political and governance shocks have contributed to economic stagnation and a low pace of poverty reduction. Public debt has doubled over the last decade, reaching 55 per cent of GDP in 2017.

2. The agricultural sector, largely rainfed and dominated by subsistence smallholder farmers, supports the livelihoods of the majority of its population, involving 78 per cent of total households. Crop production accounts for 74 per cent of all rural incomes. Productivity is low, exacerbated by a low uptake of improved farm inputs/technologies. About 55 per cent of farmers cultivate less than 1 hectare, making it difficult for them to produce a surplus for marketing.

Special aspects relating to IFAD's corporate mainstreaming priorities
3. In line with IFAD's mainstreaming commitments for the Eleventh Replenishment of IFAD's Resources, the programme has been classified as:
   - Climate-focused;
   - Gender-transformational;
   - Nutrition-sensitive; and
   - Youth-sensitive.

4. Environmental degradation and climate change are major development issues that have adversely impacted on food security, water quality and energy security.

5. The 2017 Gender Inequality Index for Malawi was 0.619, ranking it 148th out of 160 countries. Youth constitutes 51 per cent of the population, with the youth unemployment rate exceeding 40 per cent in 2017. The agriculture sector offers many opportunities for job creation for youth, but their participation is constrained by challenges that include limited access to finance, land and inputs, limited capacity, and perceptions that farming is not a profitable business.

6. Malawi ranked 87th out of 119 countries on the 2018 Global Hunger Index and suffers from serious levels of hunger and malnutrition.

Rationale for IFAD involvement
7. IFAD has contributed to improving the livelihoods of 1.88 million rural poor households in Malawi, through investments totalling US$226.9 million. In recent years there has been a strategic shift by the Government to commercialization of smallholder agriculture, through strengthening access to markets and financial services, as well as a focus on adaptation to climate change, as the key drivers for poverty reduction. In this regard, IFAD also realigned its support to the Government by supporting commodity development through the Rural Livelihoods and Economic Enhancement Programme (RLEEP, 2009-2017). RLEEP is the first value chain (VC) programme in Malawi to have piloted commercial partnerships, under the public-private-producer partnerships (4Ps) model.
8. The Transforming Agriculture through Diversification and Entrepreneurship Programme (TRADE) builds on RLEEP’s results and responds to the 2017-2022 Malawi Growth and Development Strategy and the Government’s priority areas as set out in the National Agriculture Policy (NAP) and the National Agriculture Investment Plan (NAIP). TRADE also contributes to strategic objective 2 (SO2) and SO3 of IFAD’s Strategic Framework 2016-2025.

B. Lessons learned

9. TRADE builds on lessons from previous IFAD programmes in Malawi, the 2017 country programme evaluation of the Independent Office of Evaluation and its 2019 evaluation synthesis on “Inclusive Financial Services for the Rural Poor”.

10. The country programme evaluation’s recommendations were that future IFAD investments should: (i) diagnose the capacity of national and local government institutions; (ii) support and build on collective institutions for beneficiaries; (iii) enhance the resilience and climate change adaptability of smallholders’ farming systems; and (iv) have a marketing development focus. TRADE has incorporated these recommendations, with its focus on strengthening farmers’ organizations, agribusiness development and supporting smallholder farmers to enhance their productivity, while addressing climate change.

11. Access to financial services. RLEEP supported the establishment of 637 village savings and loan associations (VSLAs), linking formal financial institutions and savings and credit cooperatives. VSLAs increased smallholders’ access to finance, through direct access to loans or through financial institutions. TRADE will strengthen access to finance through VSLAs and financial institutions.

12. Farm business schools (FBSs). Under RLEEP, 20,974 lead farmers graduated from FBSs. These have been a useful tool for transforming participants’ mindsets from subsistence farming to agribusiness. TRADE will thus scale up and strengthen the FBS curriculum to equip smallholder producers and non-farmer actors with business skills.

13. The agricultural commercialization grants allowed RLEEP to reach 37,500 households, against its target of 24,000. Good results were achieved due to robust intervention systems, competitive selection processes and stringent performance evaluation of grant recipients. These lessons are reflected in the design of TRADE’s Agricultural Commercialization and Innovation Fund (ACIF).

II. Programme description

A. Programme objectives, geographic area of intervention and target groups

14. TRADE focuses on promoting climate-smart agriculture and nutrition mainstreaming in all programme activities, in line with SO1 of the 2016-2022 country strategic opportunities programme (COSOP): “smallholder households become resilient to natural shocks and enhance food and nutrition security”. It also responds to the COSOP’s SO2: “smallholder households access remunerative markets and services” by focusing on commercial value chains.

15. Programme objectives. TRADE’s overall goal is to contribute to improving the sustainable livelihoods of rural people in Malawi. The programme’s development objective is increased VC commercialization and the resilience of rural poor and smallholder producers. This objective will be achieved by supporting: climate-smart interventions; access to commodity markets; access to improved rural financial services, market and business development services; and enhanced private sector partnerships.
16. **Geographic areas of intervention.** TRADE will initially cover 11 districts and seven commodities (groundnuts, soybean, sunflower, Irish potato, dairy, beef and honey). The aim is to optimize RLEEP’s impact and consolidate and scale up successes and good practices in the 11 districts, while bringing in additional commodities, which may lead to expansion to new districts.

17. **Targeting and target groups.** TRADE is expected to reach about 300,000 households (1.32 million people), of which 127,000 households will be direct beneficiaries and 173,000 households will benefit indirectly from access to roads and employment opportunities. It will target very poor households, women and youth. TRADE will focus on rural households, with the potential to improve their participation in the commercialization of selected commodities, and to graduate from poverty. TRADE will target at least 55 per cent women and 50 per cent youth. TRADE’s targeting strategy is focused on nutritionally vulnerable people.

B. **Components/outcomes and activities**

18. The programme will have three components:

(i) **Component 1 – sustainable producer-private partnerships.** The objective is to support smallholder farmers organized in producer organizations/groups to improve their productivity and market linkages, in partnerships with small and medium-sized enterprises, in the form of 4Ps or similar partnerships.

(ii) **Component 2 – enabling environment for smallholder commercialization.** The objective is to improve the enabling environment for commercial agriculture, including policies, regulatory framework and infrastructure development.

(iii) **Component 3 – institutional support, programme management and coordination.** The aim is to strengthen the capacity of smallholder farmers to participate in commercial relationships, by developing an ecosystem of services, creating inclusive and equitable arrangements.

C. **Theory of change**

19. TRADE’s theory of change is based on the hypothesis that by increasing the integration and participation of smallholder producers in commercially profitable VCs and enhancing their resilience to climate change, combined with improving nutrition outcomes, the programme will sustainably improve rural people’s livelihoods. This will be achieved through the following outcomes: (i) increased sales and revenue for smallholder producers, increased productivity and quality of products and adoption of climate-smart agriculture technologies/practices; (ii) a conducive environment created for the commercialization of smallholder agriculture; and (iii) an enhanced institutional performance and knowledge base for VC programming.

D. **Alignment, ownership, and partnerships**

20. **Alignment.** TRADE is aligned with: Sustainable Development Goal (SDG) 1 and SDG 2, through its overall goal of improving the sustainable rural livelihoods; SDG 5 and SDG 8, by promoting gender equality and youth inclusion; SDG 13, by strengthening environmental sustainability and the climate resilience of selected VCs and infrastructure; and SDG 17, by supporting 4Ps.

---

1 Mchinji, Ntchisi, Dedza, Blantyre, Kasungu, Nkhata Bay, Rumphi, Karonga, Lilongwe, Thyolo and Chitipa.
22. **Country ownership and alignment with national priorities.** TRADE will contribute to Malawi’s NAP (2016-2020) and NAIP (2018-2023), its Vision 2020 and the Malawi Growth and Development Strategy 2017-2022. The NAP targets profitable commercial farming through specialization of smallholder farm production, output diversification and value addition in downstream VC to which TRADE is aligned.

23. **Partnerships.** Partnership opportunities include the World Food Programme’s “Food Assistance for Assets” and “Purchase for Progress” and its goat VC programmes, which focus on youth and women. Synergies will also be built, in component 1, with the African Development Bank-financed Climate Adaptation for Rural Livelihoods and Agriculture and the United Nations Development Programme’s Malawi Innovation Challenge Fund.

24. **Costs, benefits and financing**

25. **Programme costs**

26. A summary breakdown of programme costs, by component and financier, is presented below.

Project financing and cofinancing strategy and plan

27. TRADE will be financed by: an IFAD loan (US$51.1 million, on highly concessional terms); an IFAD grant (US$18.9 million); the Government of Malawi (US$15.3 million); an OPEC Fund for International Development (OFID) loan of US$20.0 million; the private sector (US$11.7 million); and programme beneficiaries (US$8.3 million).

Disbursement

28. The programme management unit (PMU) will manage TRADE special accounts (in United States dollars) for external financing, and will prepare all disbursement requests and justifications. Local currency accounts will be maintained at commercial banks and will be subject to Credit Ceiling Authority arrangements. Counterpart funding will finance the government portion of expenditure in cash and in respect to taxes and duties.

Summary of benefits and economic analysis

29. TRADE is expected to reach 1.32 million people. The programme will initially support investments in the groundnuts, soybean, sunflower, dairy, red meat, Irish potato and honey VCs. The programme may later support the cassava, red sorghum and goat VCs, and provide some support to the legume VCs, covered under the recently closed RLEEP.

30. Programme profitability indicators. TRADE’s overall economic internal rate of return (EIRR) is estimated at 18.9 per cent. The economic net present value (ENPV) is 62.4 billion Malawian kwacha (US$84.4 million). As the ENPV is positive and EIRR is above the social discount rate (SDR), the project is deemed economically viable and acceptable for investment.

31. Sensitivity analysis. The sensitivity analysis assessed the robustness of proposed interventions. The proxies analysed were: reduction of programme benefits; increase in programme costs; and delays in the accrual of programme benefits by one and two years. The results show that a reduction of programme benefits of up to 20 per cent does not jeopardize TRADE’s economic viability. However, were benefits to be reduced by 30 per cent, the EIRR of the project would fall below the SDR, and net present value would fall below zero, rendering programme interventions no longer worthy of investment. An increase of programme costs of a maximum of 30 per cent would not seriously jeopardize TRADE, as its ENPV would remain positive and its EIRR would continue well above the SDR. Finally, a delay in accrual of programme benefits of two years would not compromise TRADE’s economic profitability.

Exit strategy and sustainability

32. Exit strategy mechanisms are largely embedded in the design of each of TRADE’s (sub)components, as follows:

(i) Sustained outcomes, through establishment of commercial partnerships – such as the market-led producer-private partnerships – are likely to continue to exist and provide benefits to both private sector and smallholder producers. District-level commodity platforms will continue to foster relationships between farmers, private businesses and local government. Interventions to strengthen resilience to environmental conditions and climate change will support viable VCs.

(ii) In terms of policies, advanced trade and export policies and stakeholder dialogue – through national VC platforms – will enable a positive impact in commercialization. A regulatory framework for supply contracts will enhance trust between VC actors and ultimately safeguard programme investments.
III. Risks

A. Programme risks and mitigation measures

33. At country level, the following risks have been identified that could potentially impact smooth start-up, implementation and achievement of intended development objectives and long-term impacts.

Table 4

</table>

Overall Medium

B. Environment and social category

34. Environment and social sustainability and climate resilience. Intensification and expansion of VCs comes with environmental, social and climate risks. The risks have been analysed within the framework of the Social Environment and Climate Assessment Procedures (SECAP) review note, and mitigation measures have been identified and mainstreamed into design. An Environmental and Social Management Framework (ESMF) has been developed and relevant environmental and social impact assessments (ESIAs) will be undertaken during implementation for selected infrastructure investments, in compliance with both national and SECAP requirements.

35. The programme is classified as category A. Potential negative impacts will be site-specific, and adequate mitigation measures and opportunities are identified.
within the SECAP review note, the draft ESMP and the ESMF. Particular attention is given to promotion of greener technologies, together with good environmental and social management practices along all VC segments from pre-production to post-harvest solutions. A number of features aimed at addressing social and environmental opportunities in each VC are foreseen in subcomponent 1.2.

C. Climate risk classification
36. The climate risk category is high. Climate projections indicate an increase in drought, exacerbating ongoing degradation processes and resulting in increased erosion, as well as changes in pasture and feed availability for livestock. Malawi is highly exposed and vulnerable to climate change, with the intended programme outcomes having a high risk of being negatively affected by climate change. Primary risks relate to increasing temperatures and more erratic rainfall, leading to changes in pasture and feed availability for livestock. The increasing occurrence of extreme events poses an erosion risk to productive lands and public infrastructure, with prolonged dry spells adversely affecting productivity.

37. A basic climate risk analysis is provided within the SECAP review note to inform the programme on best mitigation measures, including measures to reduce greenhouse gas emissions in the dairy and beef VCs. Climate factsheets for each VC will be drawn up under the Adaptation for Smallholder Agriculture Programme.

D. Debt sustainability
38. Malawi’s external debt is assessed to be at moderate risk of distress, with some absorption space. Fiscal discipline should be strengthened to avoid accumulation of domestic debt at high interest rates. To enhance resilience, efforts should be made to further diversify the economy, broaden the revenue base and strengthen public financial management.2

IV. Implementation
A. Organizational framework
Programme management and coordination
39. The lead implementing agency for TRADE is the Ministry of Local Government and Rural Development, which will work closely with a wide range of stakeholders from public institutions and the private sector to commodity platforms, commodity up-takers and other institutions supporting agribusiness in Malawi.

40. Programme oversight will be provided by a programme steering committee comprising both public and private sector members, chaired by the Ministry’s permanent secretary. The programme steering committee’s multisectoral composition will ensure harmonization and integration of support in government programmes and ensure its contribution to the Government’s strategic priorities and sectoral development objectives.

41. Implementation and coordination of the programme will be undertaken by the PMU, headed by a national programme coordinator reporting to the Ministry’s permanent secretary. The PMU will be granted authority to undertake all financial and procurement management activities, lead and supervise programme implementation, and provide specialist technical inputs. The PMU staff will be recruited competitively under performance-based contracts. Its recruitment and contracting will require IFAD approval. The programme will ensure that activities at district level are fully owned by the district councils.

2 International Development Association and the International Monetary Fund. Malawi: Joint Debt Sustainability Analysis – 2018 Update.
Financial management, procurement and governance

42. **Financial management.** The Ministry of Local Government and Rural Development has prior experience in the implementation of IFAD-funded programmes, including RLEEP. IFAD will provide comprehensive training to the finance team in the PMU on IFAD’s financial management requirements and disbursement procedures, as well as providing coaching during supervision missions.

43. **Budgeting.** The programme will be implemented based on approved AWP/Bs. The budgeting process will be undertaken jointly between the PMU, participating programme partners and implementing agencies.

44. **Internal controls.** At programme level, internal controls will be established to ensure that programme resources are utilized for their intended purposes and are reaching the intended beneficiaries. Procedures and record maintenance at all levels will be documented in the programme implementation manual and consistently applied. The programme implementation manual also includes specific provisions regulating set-up of internal controls, effective monitoring and review of transactions, accounting software requirements, and all other financial management practices, with guidance notes.

45. **Accounting and reporting.** The PMU will be the financial management and reporting hub, responsible for posting, reconciling and reporting on programme finances. Accounting of TRADE will be done through an off-the-shelf computerized accounting software package, to be customized to generate financial reports for government and IFAD. The programme will use cash basis of accounting standards.

46. **Internal audit.** As part of the Ministry of Local Government and Rural Development, the PMU will be subject to its internal audit procedures. In the event that the department is unable to include TRADE in its annual internal audit programme, TRADE may contract a private internal audit firm to provide more specific support for internal review of controls, proposed improvements and issuance of recommendations.

47. **External audit.** TRADE will be audited by the National Audit Office and subject to compliance with the audit submission deadlines, so as to avoid potential sanctions, including the suspension of disbursements. In accordance with IFAD’s financial reporting and audit requirements, TRADE will prepare and submit annual financial statements to IFAD, audited by the National Audit Office, together with the auditor’s opinion and management letter, no later than six months following financial year-end.

48. **Procurement.** Procurement of goods and services to be financed from the loan will be subject to Government of Malawi procedures. A procurement specialist will be recruited to support the PMU and the Ministry of Local Government and Rural Development, and to advise on the conformity of government procedures with IFAD procurement guidelines.

B. **Planning, monitoring and evaluation, learning, knowledge management and communications**

49. **Planning.** The results-based AWP/B will guide programme implementation, including in defining programme activities and outputs (linked to the logical framework), defining funding requirements and setting targets. The previous year’s performance and challenges will guide development of the AWP/B for the subsequent year. The annual planning and implementation cycle will be aligned with the Government’s planning cycle.

50. The PMU will be responsible for the preparation of AWP/Bs, in collaboration with VC specialists, field coordinators and district councils. Planning at district and
community levels will be through participatory processes engaging farmer-based organizations and beneficiaries, thus including disadvantaged groups.

51. **Monitoring and evaluation (M&E).** TRADE’s M&E system will be guided by the theory of change and logical framework. The system will support data collection, collation and analysis at different levels, enabling programme managers to identify implementation bottlenecks, make informed decisions and take timely corrective actions to improve programme performance. An M&E plan will be developed during start-up to define concepts, roles and responsibilities. The indicator targets values – estimated at design, based on the economic and financial analysis and RLEEP results – will be confirmed during the start-up phase, based on baseline survey results. M&E functions will be supported by a management information system. An information and communications technology-based system will be developed to ensure real-time access to information in areas where internet access is unreliable. A geographical information system will be integrated. Beneficiaries will be able to provide feedback through an SMS (text messaging) platform.

52. **Reporting.** Field coordinators will prepare monthly reports based on the information collected. Quarterly reports will be prepared by service providers. Reporting on key programme indicators and disaggregation by sex and age will be required and clearly set out in the service providers’ contracts. The PMU will prepare biannual and annual reports capturing physical progress (outputs and outcomes), as well as expenditure against budget.

### Innovation and scaling up

53. **TRADE’s activities aim at the commercialization of the selected VCs, piloting partnership opportunities to evaluate their effectiveness and profitability before scaling up.** The ACIF will give priority to investments by VC actors that will bring innovations to VC development and create sustainable market linkages for smallholder producers. Once these innovations prove profitable in specific VCs, extension planning areas and districts, they will be replicated in other areas. Likewise, the successful VC development and innovations implemented under RLEEP will be scaled up by TRADE to other extension planning areas and districts.

### C. Implementation plans

#### Implementation readiness and start-up plans

54. To enhance implementation readiness, implementation in the initial 11 districts in year 1 and 2 will be built on the existing VC gap analysis performed upon closure of RLEEP.

55. **SECAP compliance.** Due to the scope of roads rehabilitation, the programme has been assigned environmental and social category “A”, calling for preparation and dissemination of an ESMF, identifying potential risks and mitigation measures and specifying selection criteria for the siting of subprojects. The ESMF also provides the relevant guidance to the PMU for site-specific ESMPs/ESIAs, in compliance with IFAD’s SECAP requirements.

#### Supervision, midterm review and completion plans

56. The project will be directly supervised by IFAD.

57. TRADE shall conduct an end-of-programme evaluation to assess its impact on the targeted beneficiaries. This will provide valuable information in preparing the programme completion report and lessons for future programming.

### V. Legal instruments and authority

58. A programme financing agreement between the Republic of Malawi and IFAD will constitute the legal instrument for extending the proposed financing to the borrower/recipient. A copy of the negotiated financing agreement is attached as appendix I.
59. The Republic of Malawi is empowered under its laws to receive financing from IFAD.
60. I am satisfied that the proposed financing will comply with the Agreement Establishing IFAD and the Policies and Criteria for IFAD Financing.

VI. Recommendation
61. I recommend that the Executive Board approve the proposed financing in terms of the following resolution:

RESOLVED: that the Fund shall provide a loan on highly concessional terms to the Republic of Malawi in an amount of thirty seven million fifty thousand special drawing rights (SDR 37,050,000) and upon such terms and conditions as shall be substantially in accordance with the terms and conditions presented herein.

RESOLVED FURTHER: that the Fund shall provide a Debt Sustainability Framework grant to the Republic of Malawi in an amount of thirteen million seven hundred thousand special drawing rights (SDR 13,700,000) and upon such terms and conditions as shall be substantially in accordance with the terms and conditions presented herein.

Gilbert F. Houngbo
President
Negotiated financing agreement: "Transforming Agriculture through Diversification and Entrepreneurship Programme"

(Negotiations concluded on 26 November 2019)

IFAD Loan No: __________
IFAD DSF Grant No: __________

Programme name: Transforming Agriculture through Diversification and Entrepreneurship (TRADE) ("the Programme")

The Republic of Malawi (the "Borrower/Recipient")

and

The International Fund for Agricultural Development (the "Fund" or "IFAD")

(each a "Party" and both of them collectively the "Parties")

WHEREAS the Borrower/Recipient has requested a loan and a grant from the Fund for the purpose of financing the Programme described in Schedule 1 to this Agreement;

WHEREAS, the Programme shall be co-financed by the OPEC Fund for International Development;

WHEREAS, the Fund has agreed to provide financing for the Programme;

NOW THEREFORE, the Parties hereby agree as follows:

Section A

1. The following documents collectively form this Agreement: this document, the Programme Description and Implementation Arrangements (Schedule 1), the Allocation Table (Schedule 2) and the Special Covenants (Schedule 3).

2. The Fund’s General Conditions for Agricultural Development Financing dated 29 April 2009, amended as of December 2018, and as may be amended hereafter from time to time (the "General Conditions") are annexed to this Agreement, and all provisions thereof shall apply to this Agreement. For the purposes of this Agreement the terms defined in the General Conditions shall have the meanings set forth therein, unless the Parties shall otherwise agree in this Agreement.

3. The Fund shall provide a Loan and Grant (the "Financing") to the Borrower/Recipient, which the Borrower/Recipient shall use to implement the Programme in accordance with the terms and conditions of this Agreement.

Section B

1. A. The amount of the Loan is thirty seven million fifty thousand Special Drawing Rights (SDR 37 050 000).

B. The amount of the Grant is thirteen million seven hundred thousand Special Drawing Rights (SDR 13 700 000).
2. The Loan is granted on highly concessional terms and shall be free of interest but shall bear a fixed service charge of three fourths of one percent (0.75%) per annum payable semi-annually in the Loan Service Payment Currency and shall have a maturity period of forty (40) years, including a grace period of ten (10) years starting from the date of approval of the Loan by the Fund’s Executive Board.

3. The Loan Service Payment Currency shall be in United States dollars.

4. The first day of the applicable Fiscal Year shall be 1st July.

5. Principal and service charge shall be payable on each 1st May and 1st November.

6. There shall be one Designated Account (DA) in USD, for the exclusive use of the Programme opened in the Reserve Bank of Malawi managed by the Ministry of Finance, Economic Planning and Development of the Borrower/Recipient. Corresponding operating accounts in Malawian Kwacha (MWK) will be opened in commercial banks.

7. The Borrower/Recipient shall provide counterpart financing for the Programme in the amount of approximately fifteen million three hundred thirty thousand United States dollars (USD 15 330 000) equivalent. These funds will finance the Borrower/Recipient cash contribution, and taxes and duties.

Section C

1. The Lead Programme Agency shall be the Ministry of Local Government and Rural Development (MLGRD) under the overall leadership of the Secretary for Local Government and Rural Development supported by the Directorate of Rural Development.

2. The Additional Programme Parties are described in Schedule 1 paragraph 9.

3. A Mid-Term Review will be conducted as specified in Section 8.03 (b) and (c) of the General Conditions; however, the Parties may agree on a different date for the Mid-Term Review of the duly implementation of the Programme.

4. The Programme Completion Date shall be the sixth (6th) anniversary of the date of entry into force of this Agreement and the Financing Closing Date shall be six (6) months later, or such other date as the Fund in consultation the Borrower/Recipient may designate by notice to the Borrower/Recipient.

5. Procurement of goods, works and services financed by the Financing shall be carried out in accordance with the Borrower/Recipient’s procurement procedures as per the Public Procurement and Disposal of Assets Act Number 27, 2017, to the extent of their consistency with IFAD Procurement Guidelines and Procurement Handbook. The Malawi Government Public Procurement Regulations of 2004 shall be applicable up until the new Regulations compliant with the new Public Procurement Act and Disposal of Assets go into effect. TRADE shall employ the Desk Instructions for Public Procurement as published by the Public Procurement and Disposal Authority (PPDA) as part of its operational manuals on procurement.

6. MLGRD will procure an independent third party to supervise works under the Programme.
Section D

1. The Fund will administer the Loan and Grant and the Fund and the Borrower/Recipient jointly supervise the Programme.

Section E

1. The following are designated as additional general conditions precedent to withdrawal:

   (a) Key Programme staff positions shall have been filled by personnel acceptable to IFAD in accordance with Section II paragraph 8 of Schedule 1 to this Agreement;

   (b) The Borrower/Recipient shall have established a Programme Steering Committee (PSC) as referred to under section II paragraph 7 of Schedule 1 to this Agreement; and

   (c) The IFAD No Objection to the Programme Implementation Manual (PIM) shall have been obtained;

2. The following are designated as additional grounds for suspension of this Agreement:

   (a) The Programme Implementation Manual (PIM) or any provision thereof, has been waived, suspended, terminated, amended or modified without the prior agreement of the Fund and the Fund, after consultation with the Borrower/Recipient, has determined that this waiver, suspension, termination, amendment or modification has had, or is likely to have, a material adverse effect on the Programme; and

   (b) The Programme Management Unit (PMU) staff has been appointed, transferred or removed from the Programme without the prior consent of the Fund as referred to Schedule 1.

3. In accordance with the Borrower/Recipient's Public Finance Management Act 2003, the Financing Agreement will be signed by the Minister responsible for Finance and which will be followed by the ratification by the Parliament of the Borrower/Recipient.

4. The following are the designated representatives and addresses to be used for any communication related to this Agreement:

   For the Borrower/Recipient:

   Minister of Finance, Economic Planning and Development
   Ministry of Finance, Economic Planning and Development
   P.O. Box 30049
   Capital Hill
   Lilongwe 3
   Malawi

   For the Fund:

   The President
   International Fund for Agricultural Development
   Via Paolo di Dono 44
   00142 Rome, Italy
This Agreement, [dated _____], has been prepared in the English language in two (2) original copies, one (1) for the Fund and one (1) for the Borrower/Recipient and shall enter into force upon its signature of both Parties on the date of countersignature.

Schedule 1

Programme Description and Implementation Arrangements

I. Programme Description

1. **Goal.** The goal of the Programme is to improve sustainable livelihoods of rural people in Malawi.

2. **Objectives.** The development objective is “Increased value chain commercialisation and resilience of rural poor and smallholder producers”. The development objective will be achieved through a holistic approach to addressing the agriculture commercialisation challenge. TRADE will seek to: (i) increase production and productivity by smallholder farmers, (ii) functionally upgrade smallholder farmers and the rural poor to undertake new functions such as processing, storage, packaging to capture more value, (iii) improving horizontal linkages by strengthening the capacities of cooperatives to provide market access functions to smallholder farmers, and (iv) improve vertical linkages between stakeholders at different functional levels of the commodity chain, including private sector. TRADE will also support rural entrepreneurs, focusing on youths and women to develop and sustain their agribusiness enterprise opportunities and ensuring that commodities are nutrition sensitive.

3. **Components.** TRADE will be implemented through three inter-linked components: (1) Sustainable producer-private partnerships; (2) Enabling environment for smallholder commercialisation (3) Institutional support and Programme management and coordination.

**Component 1: Sustainable Producer-Private Partnerships.** The objective of this component is to support smallholder farmers to improve productivity and commercialisation, and to strengthen private sector engagement in the target commodities. The component foresees significant efforts to strengthen smallholder farmers’ productive capacity to be able to participate in the commercialization of targeted commodities. Through this component state and on-state service providers will be contracted to strengthen producer organizations and farmer groups and develop smallholders’ skills to run farming as business. The Agricultural Commercialization Innovation Fund (ACIF) will be set up to support viable investments to enhance productivity and strengthen commercial activities through 4P or similar arrangements. In this regard ACIF will finance business plans of producer organizations.

TRADE support in this component will be through two sub-components: (i) Sustainable intensification and commercialization; and (ii) Capacity development of farmers and Farmer Based Organizations (FBOs).

**Component 2: Enabling Environment for Smallholder Commercialization.** This component seeks to improve commercial environment for TRADE supported commodities. It is comprised of two sub-components: (i) Enabling environment for commercial agriculture which will focus on three activities: (a) support to commodity platforms to improve their skills in negotiation, policy lobbying and advocacy (b) legal and regulatory support to strengthen commercial partnerships between smallholders and private sector, and (c) market information and market intelligence; and (ii) construction and rehabilitation of basic, need-based public infrastructure essential for promotion of commercial agriculture for the TRADE supported commodities.

**Component 3: Institutional Support and Programme management.** The objective of this component is to strengthen the capacity of smallholder farmers to participate in commercial relationships under component 1 by developing an eco-system of services that will create inclusive and equitable arrangements. This will be achieved through two sub-components: (i) Capacity building and value chain governance; and (ii) Programme management and knowledge management. Activities include: (a) capacity building for public sector and non-state actors; and (b) programme management and knowledge management.
4. **Target Population.** TRADE is expected to reach a total of about 300,000 households (approximately 1.3 million people), of which about 127,000 households will be direct beneficiaries of TRADE support. About 173,000 households will benefit indirectly from access road construction and employment opportunities generated by commercial activities and infrastructure construction. The programme will focus on rural households with potential to improve their participation in the commercialisation of selected commodities and graduate from poverty. TRADE will target at least 55% women and 50% youth between 18 and 35 years.

5. **Programme area.** TRADE will initially cover eleven (11) districts during the first and second year of implementation, building on the achievements of RLEEP Project. The aim is to optimize RLEEP’s impacts, consolidate and scale up successes and good practices in the eleven districts while bringing in additional commodities, which may lead to expansion to additional districts. The interventions for the seven (7) commodities will be based on the gap analysis conducted at completion of RLEEP which identified critical gaps to realization of optimum impacts and sustainability of RLEEP investments. The selection of new commodities in the third year will be guided by domestic and export market opportunities and potential for commercial partnerships between smallholder producers and private sector. The new districts will be selected based on the following criteria: (i) concentration of households engaged in production of selected commodities; (ii) potential for reaching critical mass of ultra-poor and transient poor smallholders in the respective commodity; (iii) social and demographic trends, including poverty levels; (iv) suitability of the particular production systems and local conditions, labour availability, and (v) connectivity to market and existence of commercial partners. The scope of expansion will be determined by available financial resources, implementation capacity and programme timeframe of six (6) years.

II. Implementation Arrangements

6. **Lead Programme Agency.** The lead implementing agency for TRADE is MLGRD.

7. **Programme Steering Committee.** The Programme oversight will be provided by a Programme Steering Committee (PSC) comprising both the public and private sector, chaired by the Secretary for Local Government and Rural Development. Members of PSC will be the (1) Secretary for Local Government and Rural Development; (2) Secretary to the Treasury; (3) Secretary for Agriculture, Irrigation and Water Development; (4) Secretary for Industry, Trade and Tourism; (5) Secretary for Youth, Sports and Culture; (6) Secretary for Gender, Children, Disability and Social Welfare; (7) Secretary for Transport and Infrastructure; (8) Malawi Bureau of Standards; (9) Civil Society Agriculture Network (CISANET); (10) Malawi Union of Savings and and Credit (MUSSCO); (11) National Smallholder Farmers Association of Malawi. The PSC will be supported by a Technical Committee of which membership will be drawn from the technical professionals from institutions that form the PSC. The structure, operational modalities and Terms of Reference for the Technical Committee will be defined in the ACIF manual to be approved by IFAD.

8. **Programme Management Unit.** The day-to-day implementation and coordination of the programme will be undertaken by a dedicated Programme Management Unit (PMU) headed by a National Programme Coordinator (NPC) reporting to the Secretary for Local Government and Rural Development. The PMU will be granted authority to undertake all financial and procurement management activities, lead and supervise programme implementation and provide specialist technical inputs. The recruitment and contract renewal of key PMU staff will require prior consent from IFAD. Key PMU staff includes the NPC, Finance Manager, and Procurement Manager.

9. **Implementing partners.** MLGRD will work closely with a wide range of stakeholders from public institutions and the private sector, such as Ministry of Agriculture, Irrigation
and Water Development (MoAIWD); Ministry of Industry, Trade and Tourism (MITT); Ministry of Gender, Children and Community Development; Ministry of Information, Civic Education and Technology; Ministry of Gender, Children, Disability and Social Welfare; Ministry of Transport and Public Infrastructure; Ministry of Youth, Sports and Culture; Ministry of Finance, Economic Planning and Development; Farmers Union of Malawi; Malawi Investment and Trade Centre; Malawi Bureau of Standards; CISANET; commodity platforms, commodity up takers and other institutions supporting agri-business in Malawi.

10. ACIF Review Committee. A committee of experienced experts in agribusiness will be set up to review the proposals or business plans for ACIF (matching grants) eligibility. The structure, operational modalities and ToRs for the committee will be defined in the ACIF manual to be approved by IFAD.

11. Monitoring and Evaluation (M&E). M&E: The Programme Monitoring and Evaluation (M&E) system will support data collection, collation and data analysis at different levels. This will allow programme managers to identify implementation bottlenecks, make informed decisions and take timely corrective actions to improve programme performance. An M&E plan will be developed during the start-up workshop to define M&E concepts, roles and responsibilities.

12. Knowledge Management (KM). The Programme will support KM interventions to improve generation of knowledge/innovations, sharing and learning. The Programme will develop a knowledge management and communication strategy to outline systems, processes and responsibilities to ensure that the Programme will generate, capture, analysis, document, package and disseminate knowledge and lessons learnt through various KM activities.

13. Programme Implementation Manual. The Programme shall be implemented in accordance with the approved Annual Work Plan and Budget (AWPB), and Procurement Plan and the PIM, the terms of which shall be adopted subject to the Fund’s prior approval. The PIM shall include, among other things: (i) terms of reference, implementation responsibilities and appointment modalities of all Programme staff and consultants; (ii) Programme operating manuals and procedures; (iii) monitoring and evaluation systems and procedures; (iv) a detailed description of implementation arrangements for each Programme component; (v) modalities for the selection of service providers to be based on transparent and competitive processes; (vi) financial management and reporting arrangements including accounting, approval of payments, financial reporting, internal controls, fixed asset management, as well as internal and external audit; and (vii) the good governance and anti-corruption framework.
## Schedule 2

### Allocation Table

1. **Allocation of IFAD Loan and DSF Grant Proceeds.** (a) The Table below sets forth the Categories of Eligible Expenditures to be financed by the IFAD Loan and the DSF Grant and the allocation of the amounts to each category of the Financing and the percentages of expenditures for items to be financed in each Category:

<table>
<thead>
<tr>
<th>Category</th>
<th>IFAD Loan Amount Allocated (expressed in SDR)</th>
<th>IFAD DSF Grant Amount Allocated (expressed in SDR)</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Works</td>
<td>7 700 000</td>
<td>2 900 000</td>
<td>100% net of OFID, Beneficiaries and Government Contribution</td>
</tr>
<tr>
<td>2. Equipment and Materials</td>
<td>1 000 000</td>
<td>400 000</td>
<td>100% net of OFID, Beneficiaries and Government Contribution</td>
</tr>
<tr>
<td>3. Consultancies</td>
<td>7 900 000</td>
<td>2 900 000</td>
<td>100% net of Government and other co-financiers contribution</td>
</tr>
<tr>
<td>4. Training</td>
<td>3 500 000</td>
<td>1 300 000</td>
<td>100% net of Government contribution</td>
</tr>
<tr>
<td>5. Credit, Guarantee Funds</td>
<td>9 500 000</td>
<td>3 500 000</td>
<td>100% net of Private Sector and Beneficiaries contribution</td>

<tr>
<td>6. Salaries and Allowances</td>
<td>3 700 000</td>
<td>1 400 000</td>
<td>100% net of Government contribution</td>
</tr>
<tr>
<td>Unallocated</td>
<td>3 750 000</td>
<td>1 300 000</td>
<td></td>
</tr>
<tr>
<td><strong>TOTAL</strong></td>
<td><strong>37 050 000</strong></td>
<td><strong>13 700 000</strong></td>
<td></td>
</tr>
</tbody>
</table>

(b) The terms used in the Table above are defined as follows:

(i) “Consultancies” includes studies, workshops, meetings, technical assistance;

(ii) “Equipment and Material” includes vehicles;

(iii) “Salaries and Allowances” includes operating expenditures.
2. Disbursement arrangements

(a) Retroactive financing. As an exception to section 4.08(a) (ii) of the General Conditions, specific eligible expenditures incurred as of 1st November 2019 until the date of entry into force of this Agreement shall be considered eligible up to an amount equivalent to two hundred thousand United States dollars (USD 200 000) for activities relating the selection and contracting of a specialized agency to facilitate the recruitment of TRADE key staff. Activities to be financed by retroactive financing and their respective category of expenditures and source of financing will require prior no objection from IFAD to be considered eligible. Pre-financed eligible expenditures shall be reimbursed to the Borrower once additional conditions precedent to the first disbursement of funds specified in Section E.1 are fulfilled.
Schedule 3

Special Covenants

In accordance with Section 12.01(a)(xxiii) of the General Conditions, the Fund may suspend, in whole or in part, the right of the Borrower/Recipient to request withdrawals from the Financing Accounts if the Borrower/Recipient has defaulted in the performance of any covenant set forth below, and the Fund has determined that such default has had, or is likely to have, a material adverse effect on the Programme:

1. Within six (6) months of entry into force of the Financing Agreement, the Programme will procure and install a customized accounting software as it is the practice in IFAD on-going supported projects, to satisfy International Accounting Standards and IFAD’s requirements.

2. Within six (6) months of entry into force of the Financing Agreement, the Lead Programme Agency will enter into Memorandum of Understandings (MoU) with implementing partners that will structure the collaboration, define roles, responsibilities and duties with regards to implementation, financial management, accounting and reporting.

3. Planning, Monitoring and Evaluation. The Borrower/Recipient shall ensure that a Planning, Monitoring and Evaluation (PM&E) system shall be established within twelve (12) months from the date of entry into force of this Agreement.

4. Targeting and Social Inclusion Plan. The Lead Programme Agency shall develop a social inclusion plan for the Programme to ensure that gender concerns shall be mainstreamed in all Programme activities throughout the implementation period, in order to offer equal opportunities under the Programme to men, women, women headed households, youth and other disadvantaged groups.

5. Compliance with the Social Environmental and Climate Assessment Procedures (SECAP). The Borrower/Recipient through the Lead Programme Agency shall ensure that the Programme will be implemented in compliance with IFAD’s SECAP.

6. Environment and Social Safeguards. The Borrower/Recipient shall ensure that: (a) all Programme activities are implemented in strict conformity with the Borrower/Recipient’s relevant laws/regulations; (b) all Programme activities give special consideration to the participation and practices of ethnic minority population in compliance with IFAD’s Policy on Indigenous Peoples (2009), as appropriate; (c) proposals for civil works include confirmation that no involuntary land acquisition or resettlement is required under the Programme. In the event of unforeseen land acquisition or involuntary resettlement under the Programme, the Borrower/Recipient shall immediately inform the Fund and prepare the necessary planning documents; (d) women and men shall be paid equal remuneration for work of equal value under the Programme; (e) recourse to child labour is not made under the Programme; (f) the measures included in the Targeting and Social Inclusion Plan prepared for the Programme are undertaken, and the resources needed for their implementation are made available, in a timely manner; and (g) all necessary and appropriate measures to implement the Targeting and Social Inclusion Plan to ensure that women can participate and benefit equitably under the Programme are duly taken.

8. *Sexual Harassment, Sexual Exploitation and Abuse.* The Borrower/Recipient and the Programme Parties shall ensure that the Programme is carried out in accordance with the provisions of the IFAD Policy on Preventing and Responding to Sexual Harassment, Sexual Exploitation and Abuse, as may be amended from time to time.

3 Poverty data to be disaggregated by the categorization of the poor by the Malawi National Support Policy
4 55% female, 50% youth
5 20% women-headed households
6 This indicator will contribute to the COSOP indicator “smallholder households reporting decreased incidence of hunger, measured by the number of meals per day”. The survey will be complemented by questions on food items consumed following the Minimum Dietary Diversity for Women questionnaire and on the number of meals per day
7 About 80% of total households targeted (including RLEEP HHs)
8 Average production increase based on EFA Production Analysis (G) Improved production
9 Average income increase based on EFA Income Analysis (F)
10 55% female, 50% youth
11 55% female 50% youth
