# Overview of supplementary funds received, committed and used in 2021

## I. Introduction

1. Supplementary funds are resources received and administered by IFAD for the benefit of the Fund's developing country Member States on conditions that are mutually agreed upon by IFAD and the donor(s).
2. Supplementary funds include resources provided by Member States, non-Member States and other donors such as international organizations and funds, the private sector and foundations. Supplementary funds are provided for project financing and cofinancing, technical assistance, thematic activities and as sponsorship for individuals participating in IFAD's Junior Professional Officer (JPO) programme. In addition, IFAD administers supplementary funds on behalf of the International Land Coalition (ILC).
3. This note provides the Executive Board with an update on the total supplementary fund portfolio managed by IFAD, including new funds mobilized in 2021, the providers of these funds and the initiatives/activities to which the funds were allocated. It also provides information on the JPO programme, though this is not included in the overall assessment and calculations.

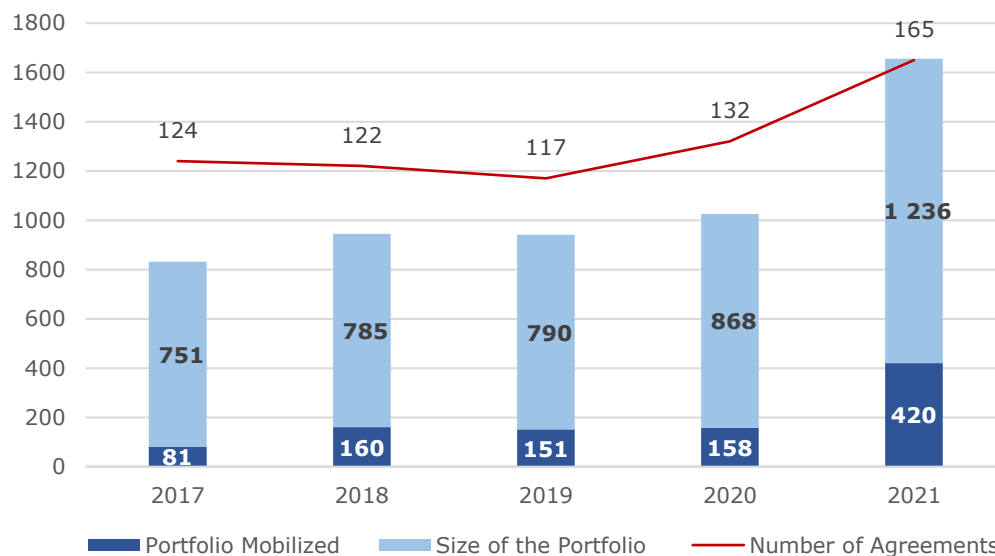

## II. Overview of IFAD's supplementary fund portfolio in 2021

4. **Status of the portfolio.** On 31 December 2021, IFAD's ongoing supplementary fund portfolio consisted of agreements signed with 25 Member States and their institutions, 14 international organizations and six foundations, for a total amount of US\$1.236 billion.<sup>1</sup> Donors contributed to 19 multi-donor facilities and initiatives; furthermore, there are 77 ongoing agreements that cofinance IFAD-led projects and 22 ongoing agreements related to single-donor thematic initiatives. Detailed information on the donors providing these funds and a list of all agreements can be found in tables 1 and 2 of the appendix. IFAD is currently negotiating a pipeline of approximately US\$400 million.
5. Figure 1 provides an overview of the ongoing portfolio's evolution during the period 2017 to 2021 in terms of size, number of agreements and new funding mobilized during the respective year. The overall size of the portfolio increased by approximately 42 per cent in 2021 compared to 2020, representing a significant increase over the gradual increases in previous years.

---

<sup>1</sup> In estimating United States dollar-equivalent values for the portfolio as of 31 December 2021, the exchange rates used were those as at 31 December 2021. The portfolio includes ongoing agreements in 2021 at all stages from signature to implementation. In addition, agreements with a completion date in 2021 are included in the assessment.

Figure 1  
**Portfolio size during the period 2017–2021**  
(Millions of United States dollars)

6. **Funds mobilized in 2021.** The increase in the portfolio is caused by the spike in new supplementary funds mobilized in 2021. As seen in figure 1 and reflected in table 3 of the appendix, new contributions of US\$419.6 million<sup>2</sup> entered the portfolio. IFAD signed 49 new supplementary fund contribution agreements and one top-up agreement with 26 donors. The details of the signed agreements, including information on donors, programmes financed and contribution amounts, is presented in table 3 of the appendix.
7. The spike in new supplementary funds mobilized in 2021 was largely driven by the increased cooperation with global climate and environment funds, which provided a total of US\$224.9 million in supplementary funds (a 469 per cent increase over 2020, when US\$39.5 million was received from these partners). The largest proportion of the growth in funding from climate and environment funds came from the Green Climate Fund (GCF), with new contributions of US\$191.5 million for programmes in Brazil and the Sahel region. Furthermore, new agreements were signed with the Adaptation Fund for projects in Cameroon, Djibouti, Liberia and small island developing states; the Global Environment Facility for projects in Indonesia, Peru and Somalia; and the Least Developed Countries Fund for projects in Somalia and Sudan.
8. Several bilateral donors also contributed to IFAD’s climate adaptation focus through the enhanced Adaptation for Smallholder Agriculture Programme (ASAP+). For the new phase of IFAD’s flagship programme on climate adaptation, launched in 2020 as part of the Twelfth Replenishment of IFAD’s Resources (IFAD12), new agreements were signed with Denmark, Germany, Ireland and Sweden.
9. In 2021, IFAD continued to receive supplementary funds to cofinance its COVID-19 response. Agreements were signed with the European Commission, providing liquidity support and debt relief to financial institutions and clients in IFAD’s Rural Financial Intermediation Programme in Ethiopia, and with Australia for rural and agricultural stimulus activities in the Pacific Islands. Furthermore, IFAD received two supplementary fund contributions from the United Nations COVID-19 Response and Recovery Fund, administered by the United Nations Development Programme, for projects in Panama and Viet Nam. Supplementary fund agreements to cofinance IFAD investment projects were also signed with

<sup>2</sup> This figure includes the funds received for the JPO programme.

France to support the resilience of organizations for transformative smallholder agriculture in The Gambia; with Netherlands, to strengthen resilience of smallholder farmers in the Sahel, Horn of Africa and the Middle East and North Africa region; and with Norway, to advance resilient and nutrition-sensitive smallholder aquaculture in Kenya, Mozambique and the United Republic of Tanzania.

10. In addition, donors provided funds for various thematic initiatives, including: (i) the African Agricultural Transformation Initiative (AATI), which was launched in 2021 and received initial funding from the Bill & Melinda Gates Foundation; (ii) the Financing Facility for Remittances (FFR), which received funding from Germany; (iii) the Global Donor Platform for Rural Development (GDPRD), which received contributions from the European Union, Finland, France, Italy and the United Kingdom; (iv) the second phase of the Platform for Agricultural Risk Management (PARM) Horizon 2, which received funding from France; (v) the Private Sector Financing Programme, which received funding from Luxembourg; (vi) the Smallholder Agri-SME Finance and Investment Network (SAFIN), which received contributions from France, Italy and the Small Foundation; (vii) Farmers' Organizations for African, Caribbean and Pacific programme, which received funding from the European Union; (viii) Agricultural Research for Development on agroecological transitions for building resilient and inclusive food systems, which received funding from the European Union; and (ix) single-donor thematic initiatives, which received funding from the Bill & Melinda Gates Foundation for the gender transformative mechanism; from Italy for indigenous women and youth, from the Visa Foundation for the creation of rural youth employment opportunities in Africa; from the World Food Programme to support the Food Systems Summit's independent dialogues with producers and indigenous peoples; and others.
11. The GCF, European Union and the Netherlands were the main contributors under new agreements signed in 2021, with US\$191.5 million (equivalent to 46 per cent of total new agreements signed), US\$39.1 million (9 per cent) and US\$34.1 million (8 per cent), respectively. Of the total new supplementary fund agreements signed in 2021, 64 per cent of the funds were provided by international organizations, including the climate and environment funds, the European Union and United Nations entities, 29 per cent were provided by IFAD Member States and the remaining 7 per cent were provided by foundations.
12. In 2021, IFAD received payments for new and ongoing agreements totalling US\$182.4 million (details are provided in tables 4 and 5 of the appendix).
13. **Sources of funds – overall portfolio.** The European Union continues to be the largest contributor of supplementary funds overall. However, together, the global climate and environment funds now contribute the largest share of the portfolio (see figures 2 and 3). As at 31 December 2021, global climate and environment funds accounted for 35 per cent of the ongoing portfolio, with US\$435.4 million under 50 agreements – the GCF being the most significant among these funds, contributing US\$211.4 million, equivalent to 17 per cent of the portfolio. The European Union provided 27 per cent, or US\$330.4 million, under 25 ongoing agreements. The Global Agriculture and Food Security Program accounted for 5 per cent, or US\$65.2 million. The largest Member State contributors under the current portfolio are Germany (US\$75.4 million), Denmark (US\$57.8 million), the Netherlands (US\$41.3 million), Sweden (US\$37.6 million) and Norway (US\$32.2 million). The Bill & Melinda Gates Foundation provides a total of US\$28.7 million. Overall, international organizations and funds provide 68 per cent of the supplementary fund portfolio, while Member States provide 29 per cent and foundations, 3 per cent.

14. As seen in figures 2 and 3, 89 per cent of IFAD’s supplementary fund portfolio (US\$1.1 billion) is provided by eight donors and the five global climate and environment funds, while the remaining 11 per cent consists of funds provided by 33 donors in the amount of US\$131.9 million.

Figure 2  
**Major supplementary fund donors as of 31 December 2021**  
 (Millions of United States dollars)

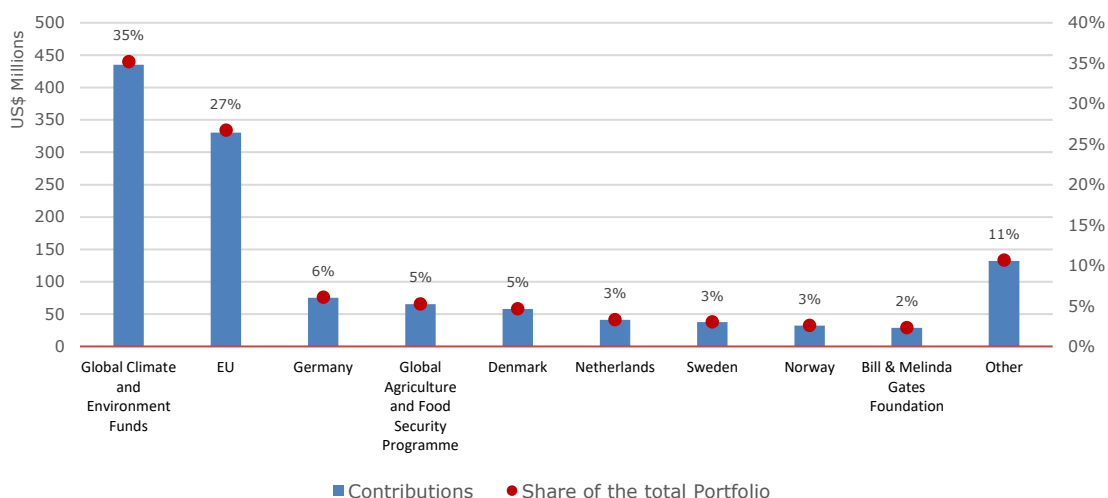

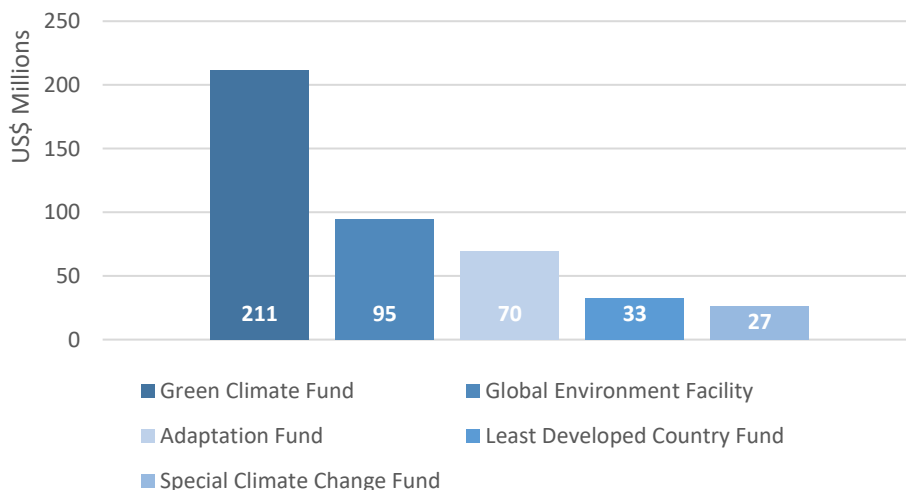

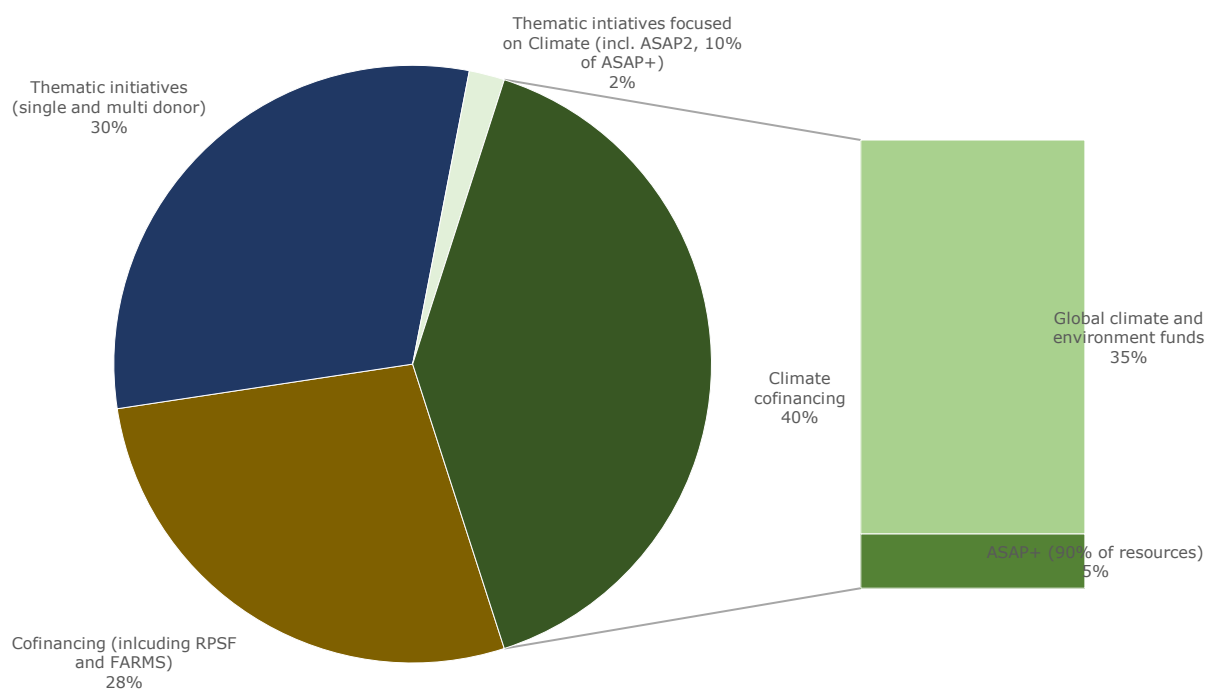

Figure 3  
**Breakdown of global climate and environment funds in the portfolio as at 31 December 2021**  
 (Millions of United States dollars)

15. **Use of funds – overall portfolio.** Supplementary funds contribute to the achievement of IFAD’s cofinancing targets, currently set at 1:1.5 under IFAD12, while strengthening key thematic areas of work. Sixty-eight per cent (US\$836.1 million) of the supplementary funds were allocated to cofinancing IFAD investments, while the remaining 32 per cent (US\$399.8 million) were used to support global and thematic initiatives.
16. As mentioned above, supplementary funds supporting IFAD’s investment projects with climate finance and additional climate resources are increasingly important. As seen in figure 4, climate cofinancing consisting of supplementary funds received

from global climate funds and IFAD Member States through ASAP+<sup>3</sup> amounted to 40 per cent (US\$495.3 million) of the overall portfolio.

Figure 4  
Use of the ongoing supplementary fund portfolio as at 31 December 2021

17. Non-climate-related cofinancing supported IFAD-led projects addressing the impact of COVID-19 across all regions through the Rural Poor Stimulus Facility (RPSF), and in the Pacific Islands, Panama and Viet Nam. Cofinancing was further provided through the Facility for Refugees, Migrants, Forced Displacement and Rural Stability, supporting projects in Jordan, Niger and Somalia. In addition, project-specific cofinancing supported a range of IFAD investment projects focused on agricultural production, food and nutrition and inclusive financial services/value chain development and market access, particularly in low-income and lower-middle-income countries and countries in fragile situations.
18. The regional distribution of supplementary funds cofinancing IFAD projects is depicted in figure 5, as follows: 24 per cent of cofinancing resources were provided to projects in the West and Central Africa region, followed by 18 per cent in East and Southern Africa, 17 per cent in Latin America and the Caribbean, 14 per cent in Near East, North Africa and Europe, and 8 per cent in Asia and the Pacific, with the remaining 19 per cent allocated to regional or global programmes. The regional distribution is aligned with IFAD's strategic priorities, with 42 per cent allocated to sub-Saharan Africa. The regional distribution varies significantly between climate- and non-climate-related cofinancing. Climate funds had a particular focus on projects in West and Central Africa (30 per cent of climate cofinancing) and Latin America and the Caribbean (28 per cent of climate cofinancing), whereas non-climate-related funds were allocated primarily to East and Southern Africa (34 per cent of non-climate cofinancing), followed by regional or global programmes (27 per cent of non-climate cofinancing).

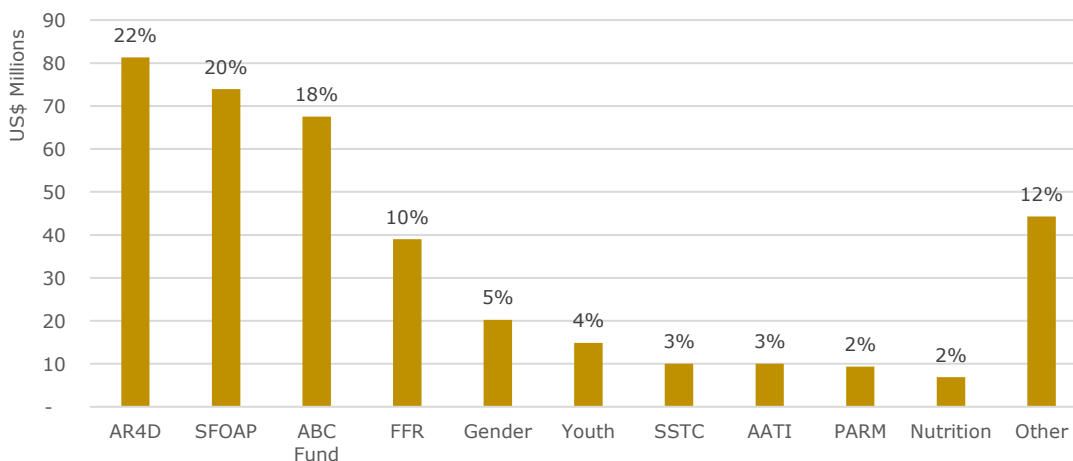

<sup>3</sup> Some 90 per cent of resources under the ASAP+ pillar of the Rural Resilience Programme Trust Fund is allocated to cofinance IFAD investments; the remaining 10 per cent supports IFAD's thematic work on climate.

Figure 5  
Regional distribution of supplementary funds for cofinancing IFAD projects

19. Supplementary funds in support of global thematic initiatives directly and indirectly complement and expand the impact of IFAD’s programme of loans and grants (PoLG). These were provided as follows: (i) US\$81.3 million for agricultural research for development through the CGIAR; (ii) US\$73.9 million for support to farmers’ organizations; (iii) US\$67.6 million for the Agribusiness Capital (ABC) Fund; (iv) US\$39.0 million for the FFR; (v) US\$20.2 million for IFAD’s work on gender mainstreaming and gender transformative programming; (vi) US\$14.9 million for youth; (vii) US\$10 million for South-South and Triangular Cooperation; (viii) US\$10 million for the AATI; (ix) US\$ 9.3 million for PARM; (x) US\$6.9 million for IFAD’s work on nutrition; and (xi) the remaining US\$52.6 million for a range of other thematic initiatives, including IFAD’s work on indigenous people, food loss reduction and the work of the ILC, the GDPRD and SAFIN, which are hosted at IFAD.

Figure 6  
Thematic distribution of supplementary funds for global and thematic initiatives

20. **Junior Professional Officer programme.** The supplementary fund portfolio also finances IFAD's JPO programme. As at 31 December 2021, IFAD employed 34 JPOs, 20 of which were located at headquarters and 14 in the field in Brazil, Cameroon, China, Egypt, Ethiopia, Ghana, Kenya, Nigeria, Panama, Senegal, South Africa, Türkiye and Viet Nam. The Member States sponsoring the programme include Finland (2), France (2), Germany (5),<sup>4</sup> Italy (3), Japan (4), Korea (4), Netherlands (4), Sweden (6) and Switzerland (4).

### III. Conclusions

21. The current portfolio of supplementary funds, totalling US\$1.236 billion, highlights the significant role of supplementary resources as the third pillar of financing in IFAD, complementing core and borrowed resources. The significant increase in the portfolio and the mobilization of supplementary funds over the past few years shows that many Member States and other development partners consider IFAD a valued and trusted partner to collaborate with on a range of priority areas linked to IFAD's core mandate.
22. In particular, supplementary funds play an increasingly important role in complementing and expanding the impact of IFAD's PoLG. Supplementary funds enable IFAD to scale up its investment projects and undertake high-impact innovative thematic activities.
23. Through the development and adoption of a strategic framework for supplementary resources, together with relevant operating procedures, IFAD ensures that the mobilization, management and implementation of these funds are aligned with IFAD's strategic priorities and best practices. As part of the framework, internal governance and interdepartmental coordination of supplementary resource mobilization and management were strengthened through the establishment of a resource mobilization committee. IFAD has also introduced a new mechanism for pipeline entry of supplementary fund resource mobilization initiatives that ensures that supplementary funds have strong management and oversight, are aligned with IFAD's mandate, complement IFAD's PoLG and support agreed-upon corporate priorities and innovative and emerging areas of interest.
24. Going forward, IFAD will continue to strengthen the management, mobilization and implementation of supplementary funds. In particular, it will seek to better leverage its financial and administrative capacity to strengthen the Fund's coordination role for Sustainable Development Goal 2.

---

<sup>4</sup> Including one Senior Professional Officer sponsored by the German Agency for International Cooperation.

<b>African Agricultural Transformation Initiative (AATI)</b>					
<p>The African Agricultural Transformation Initiative (AATI) was created by four founding partners: the International Fund for Agricultural Development (IFAD), the Bill &amp; Melinda Gates Foundation (BMGF), McKinsey &amp; Company, and the Alliance for a Green Revolution in Africa (AGRA).</p> <p>AATI aims to foster inclusive and sustainable agricultural transformation across the African continent. Over five years (2021-2026), the AATI will seek to establish new (and strengthen existing) national agencies designed to support delivery of agricultural transformation policies and programmes. The initiative is expected to help governments to achieve their goals of reducing rural poverty, improving food security, building climate resilience, and promoting rural economic growth. A central AATI unit led by an Executive Director will support the initiative and will be housed at IFAD offices in Nairobi, Kenya. In addition to the central unit, the AATI also includes a steering committee and an advisory board that provides support and guidance.</p> <p>In 2021, the EB approved the use of US\$2 million for the AATI from the regular grants programme, as well as to set up a dedicated AATI Trust Fund, and to enter into a supplementary funds agreement with BMGF worth US\$10 million. As of 31 December 2021, US\$3 100 000 of this amount was received from BMGF. In addition to the US\$2 million grant from IFAD and the US\$10 million grant from BMGF, McKinsey &amp; Company will provide a substantial in-kind contribution with AGRA providing on-the-ground support.</p> <p>As of December 2021, AATI finalised the procedure for selecting the first pilot countries and initiated the process of engaging with potential countries to assess and prioritize readiness and select countries for pilots. In addition to this, IFAD in consultation with other AATI partners also finalized the job description of the AATI Executive Director in preparation for a vacancy announcement by IFAD Human Resources Division (HRD).</p>					
<b>Bill &amp; Melinda Gates Foundation</b>	BMGF contribution to African Agricultural Transformation Initiative (AATI) Government Capacity Support	07-10-2021	31-12-2025	10 000 000	3 100 000

<sup>5</sup> Includes ongoing agreements at all stages from signature to completion in 2021.

Donor	IFAD Multi-donor programmes related current agreements	Start Date of Agreement	End Date of Agreement	Total value - Agreement	Received as at 31/12/2021
<b>Agribusiness Capital Fund (ABC Fund)</b>					
<p>The ABC Fund serves to invest in smallholder organizations and rural agricultural businesses to preserve existing jobs and generate new rural employment opportunities and growth. It complements IFAD's work by supporting private sector enterprises directly through the provision of investments in selected entities operating within agriculture value chains that are broadly supported by IFAD projects via public types of interventions. The ABC Fund provides loans and, in time, equity investments adapted to the needs of rural SMEs, farmers' organizations, agripreneurs and rural finance institutions. The Fund was launched as a private fund regulated under Luxembourg law on 12 February 2019.</p> <p>Luxembourg was the first supporter of this initiative, providing a contribution of EUR 5 million in December 2017. In December 2018, the European Union, made a commitment of EUR 45,750,000 in support of the Financing Instruments and the Autonomous Technical Assistance of the Instrument. An initial EUR 20 million was invested in 2019 by the European Union with IFAD acting on its own name and on account of the European Union holding these shares. The European Commission is committed to subscribe to additional shares with a nominal value of EUR 20 million upon the satisfaction of certain conditions. In February 2019, IFAD acting in its own name but on behalf of and on the account of the State of the Grand Duchy of Luxembourg subscribed shares with a nominal value of EUR 4.475 million. Supported by financing received from the Swiss Agency for Development and Cooperation, IFAD made an equity investment in ABC Fund with a nominal value of EUR 8.419 million. This was an investment subscribed on 24 June 2020. An important milestone achieved was the subscription in December 2021 of the first private sector investment through the purchase of B shares in the amount of US\$5 million by Bank of America (BoA).</p> <p>The year 2021 was the second full year of ABC Fund implementation. Despite the continued dampening effects of COVID, the ABC Fund experienced significant portfolio growth in 2021, approving a total of 21 projects for a total amount of EUR 26.863 million. Fifteen of these projects were disbursed resulting in a growth in the portfolio outstanding from EUR 6.523 million at EOY 2020 to EUR 22.3 million by EOY 2021 based on information from the Fund Manager. Although less than what was originally projected for outstanding portfolio (EUR 30 million), the amount still represents important growth and an enhanced market presence and source of additionality of the ABC Fund in what continues to be a difficult environment created by COVID 19.</p> <p>Information provided by the Fund Manager also indicates that the ABC Fund continued to demonstrate significant outreach and development results. To date, the ABC Fund has impacted 349,308 small farmers of which 143,703 were female farmers and 71,538 youth. ABC Fund investments also have sustained 2,750 permanent rural jobs, 29% of which have gone to women and 30% have gone to youth.</p>

<b>Agricultural Research for Rural Development (AR4D)</b>					
<p>AR4D has been a strategic area for collaboration between the European Union (EU) and IFAD since 2007. In 2010, EU began to support specific projects under the global approved CGIAR Research Programmes. In the recent past, this support has expanded to include other research institutions. In the last 15 years, the EU provided a total contribution, to the AR4D Cluster, of about EUR 272.5 million. At present there are three programmes being supported as elaborated below.</p> <p>1. The Putting Research into Use for Nutrition, Sustainable Agriculture and Resilience, under CGIAR 7, commenced in 2015 comprising nine (9) projects implemented by CGIAR institutes and one by INBAR. Three more projects were supported in 2018 under top up financing with the total financing of all 13 projects coming to EUR 30 million (excluding IFAD co-financing). The objective of the programme is to develop and test innovative approaches that impact positively on the livelihoods, nutrition or resilience of pilot rural communities and smallholder farmers and to generate lessons for scaling up. All the projects except three have closed. Projects that were on-going during the reporting period include:</p> <p>(i) The building Livelihoods and Resilience to Climate Change in East and West Africa, which is implemented by CIAT (CCAFA). In 2021, the project successfully identified and implemented various CSA options; identified, validated and characterized 12 priority agricultural value chains and established strong Public-Private Partnerships (PPPs), among other achievements.</p> <p>(ii) The sustainable and Diversified Rice-based Farming Systems under Africa-Rice, which developed RiceAdvice, an android-based decision support tool for providing farmers with field-specific management guidelines for rice production systems in Africa. The project also developed a Digital data collection and decision support tool for standard and performance indicators for the Sustainable Rice Platform (SRP). The project further identified 70 innovations - promising improved crop management practices which were tested on-station and on-farmers' fields.</p> <p>(iii) Epidemiology and Control of Peste des petits ruminants in East and West Africa (ECO-PPR) by ILRI. Some successes include PPR diagnostic conducted and results relayed to local governments and national surveillance systems to inform action for surveillance, coordination, and implementation of control of the disease. Capacity for thermos-tolerant vaccine production has also been established as well as validating of vaccines and diagnostic tools in collaboration with national partners.</p> <p>2. In 2019, a new programme was launched namely the Comprehensive Africa Agriculture Development Programme (CAADP) ex-Pillar IV implemented by ASARECA, AFAAS, CCARDESA, CORAF and FARA – "Africa regional and sub-regional Research organisations". This programme is supported as part of the Development Smart Innovation through Research in Agriculture (DeSIRA) Framework of the EU. DeSIRA aims at supporting research and innovation projects in Africa, Asia and Latin America. In line with this, CAADP XP4 seeks to improve the capacities of the Africa Regional and Sub-regional Organizations for Agricultural Research and Innovation organizations to support their agricultural-knowledge and innovation partners at national level in order to transform agriculture and food systems and influence policy formulation through effective linkages to and use of climate relevant science/knowledge. Total funding for the programme is EUR 30 million.</p> <p>In 2021 capacity, strengthening activities enhanced effectiveness of the five organizations in implementing the programme and strengthening linkages amongst them, as well as with their respective authorising bodies i.e. RECs, AUC and AUDA. It also enabled them to attract additional resources, thereby extending the scope of the programme's impact. Other outstanding achievements include 83 multi-stakeholder partnerships established or strengthened to achieve diverse objectives including generation and scaling up of CSA innovations and, integrating gender and nutrition in CSA interventions. Fourteen (14) countries were supported to implement climate-relevant policy reforms while 12 policies have been presented for dialogue and endorsement. The work stream on foresight picked momentum with the operationalisation of the Africa Foresight Academy and implementation of foresight exercises in three countries. Knowledge management (KM) and data capture strategies were developed. KM portals to operationalise the strategies were also developed, made inter-operable and launched. 178 knowledge products were generated and disseminated mainly through online channels. The five organisations jointly organised the KM4AgD Challenge, which culminated in the "Accra Declaration on KM4AgD agenda" for Africa.</p>					

3. Also in 2021, EU and IFAD started a new programme with the objective to better align policy, investment, and technical support to climate-informed agroecological transitions by farmers in low- and middle- income countries. This will be supported through the development and adoption of holistic metrics for food and agricultural systems performance; inclusive digital tools and; transparent mechanisms to engage private sector engagement and foster investment, through suitable systems of incentives. The programme will be implemented by ICRAF, CIAT and Bioversity International. This is complemented by the Climate-resilient agroecological transitions of agrifood systems implemented by the National University of Ireland Galway. Therefore, the programme consists of four projects, which have been successfully designed and will be officially launched through a start-up workshop in July 2022. The programme will be implemented in Ethiopia, Kenya, India, Vietnam, Peru, Brazil, Burkina Faso, Ghana, Brazil and Colombia. Total funding for the programme is EUR 11.5 million.

<b>Enhanced Adaptation for Smallholder Agriculture Programme (ASAP+)</b>					
<p>Against the current backdrop of growing climate impacts, widespread conflict and COVID-19 response and recovery, it is clear that ASAP is as – if not more – relevant and urgent today as when it was launched 10 years ago, in 2012. Building upon the success and lessons of ASAP1, ASAP+ focuses on addressing the current and projected climate change drivers of food insecurity by building multi-dimensional resilience among poor rural producers and vulnerable communities. Empowering them to react to the uncertainty caused by climate change on food security and nutrition and to reduce greenhouse gases through interventions that also yield food security benefits.</p> <p>ASAP+ currently has six donors who have pledged over US\$65 million collectively. Austria and Qatar were the first supporters of this initiative providing contributions of EUR 2 million and US\$500,000 respectively in December 2020. Denmark are the most recent donor with a contribution of almost US\$30 million in 2021.</p> <p>The first project in the ASAP+ portfolio was approved in March 2022. This project totalling US\$37 million (of which US\$17 million comes from ASAP+) will concentrate in three regions in the state of Maranhão. The project will contribute to reducing rural poverty while decreasing deforestation and environmental degradation. It will increase the resilience of 64,000 people and reduce/sequester approximately 6 million tons of CO2 equivalent. The project will focus on integrated landscape management, socio-biodiverse value chains and strengthening institutional capacity.</p> <p>ASAP+ also currently has a strong pipeline of six more projects spanning multiple regions:</p> <ul style="list-style-type: none"> <li>• Burkina Faso: The “Strengthening Smallholder Resilience to Climate Change” project will build on and enhance the implementation of the government-piloted approach of integrated sustainable agricultural models. In this approach, groups of small-scale farmers are supported with access to: financial services, agricultural inputs such as drought tolerant seeds, extension support services, small-scale irrigation for market gardens, appropriate storage facilities; and access to resilient markets.</li> <li>• Niger: The “Family Farming Development Programme (ProDAF) – Diffa” project will strengthen the resilience of vulnerable households through the adoption of climate adaptation practices and technologies that contribute to sustainable land management and better agronomic practices, as well as improved water resources management.</li> <li>• Somalia: The “Adaptive Agriculture and Rangeland Rehabilitation Project (A2R2)” will contribute to improved water resources and rangelands management; eco-agriculture and climate-proof livelihoods; forest/habitat rehabilitation; and improved governance and information systems for land degradation and biodiversity conservation.</li> <li>• Yemen: The “Rural Livelihood Development Project” will enhance the resilience and adaptation to climate change efforts in rural Yemen. It will reduce the poverty and vulnerability of the targeted communities and benefit at least 175,000 people in five governorates, with a strong focus on targeting women and youth.</li> <li>• Ethiopia: The “Programme for Participatory Agriculture and Climate Transformation (PACT)” project will promote climate smart agriculture approaches (e.g. conservation agriculture practices), water resources development (irrigation, livestock, domestic), watershed management activities, agricultural productivity enhancement, as well as creation of green jobs.</li> <li>• Malawi: The “Programme for Rural Irrigation Development (PRIDE)” will contribute to the development of resilient land and water management systems on both rain-fed and irrigated lands and; work on the transfer of knowledge to smallholders through trials and demonstrations whilst ensuring linkages to viable markets.</li> </ul> <p>This pipeline of projects is currently undergoing design and is expected to be approved and enter into force in 2022-2023.</p>

<b>FACILITY FOR REFUGEES, MIGRANTS, FORCED DISPLACEMENT AND RURAL STABILITY (FARMS)</b>					
<p>In accordance with the information note presented to the 118th session of the Executive Board (document EB 2016/118/INF.6), IFAD established FARMS to address the causes and consequences of the current refugee and forced displacement crisis, which lies within IFAD's mandate, and to support efforts to bridge the humanitarian/development financing gap. Indeed, in recent years, forced displacement has become a global challenge of unprecedented scale: 89.3 million people worldwide were forcibly displaced at the end of 2021, a number that has doubled over the last decade, surged by several crises – some new, some longstanding and some resurfacing after years. The Near East and North Africa region remains at the epicentre of global displacement challenges with about 16 million displaced people, mainly in Iraq, Syria, Yemen, and their neighbouring countries. The crisis has created severe humanitarian and development challenges and it is being further exacerbated by the socio-economic impacts caused by external shocks such as the COVID-19 pandemic and most recently the Ukraine crisis, which are weighing heavily on the world's most vulnerable, including displaced people. The crisis threatens further destabilization as host communities struggle to absorb displaced peoples. For example, Jordan is currently host to about 1.4 million Syrians, who comprise nearly 15 per cent of the total population. Only 20 per cent of registered Syrian refugees live in the main refugee camps, several of them are located in rural areas.</p>					
<p>This influx of refugees puts refugees in positions of immense vulnerability and places enormous pressure on both host communities and refugees in terms of livelihoods, natural resource management and food systems, especially in the context of the current global pandemic and the Ukraine conflict. FARMS' aim is to help host communities cope with the pressures of the crisis and provide refugees and internally displaced peoples with remunerative livelihoods – building skills and capacities that will serve them well on an eventual return to their homes. The Facility has three pillars: (a) Co-financing of IFAD ongoing and pipeline investment projects, (b) Regional and country-specific grants, and (c) Policy engagement, knowledge management and communication outreach. When established, FARMS aimed to have an overall envelope of US\$100 million. At the current date, the Facility has mobilised approximately US\$35.5 million. By the end of 2019, IFAD signed seven agreements with different Donors (in total). The total FARMS portfolio size is about US\$40 million (if IFAD grant resources are included). FARMS is currently active in Jordan, Niger, and Somalia thanks to the contribution of the European Union, Italy, Norway, the Open Society Foundation (OSF), the OPEC Fund and Switzerland. Most of FARMS projects are still at early stage of implementation, also due to the context of fragility that explains the slow progress in some countries. The Norway-financed FARMS project in Niger is the most advanced in terms of results at this stage of the programme implementation.</p>					
<p>In 2021, the Small-ruminant Investments and Graduating Households in Transition (SIGHT) Project, Jordan showed notable progress in the implementation of the graduation approach which is funded through the FARMS facility. The pilot phase was successfully initiated reaching 198 beneficiaries exceeding the original target of 150. Out of these beneficiaries, 175 received the necessary capacity building and seed capital to establish their own microbusiness while 23 beneficiaries were placed in full time jobs in different sectors. The percentage of Syrian refugees in the pilot phase is 66% while women and youth represent 49% and 42% respectively. Project disbursement under the FARMS facility reached US\$2,184,833 as at 31 December 2021. Based on the plans and current progress of 2022, the SIGHT project is expected to utilize US\$7,206,185 (79% of total allocation) by the end of December 2022. The "Food Security promotion project for pastoralists and agro-pastoralists in Puntland" in Somalia was launched in mid-June 2019 and has on-track physical implementation on the ground, despite the limitations from the COVID-19 pandemic and protracted insecurity situation in Somalia. Moreover, the project has adjusted its plans and supported the Government in its efforts for awareness campaign on COVID-19. The project's interventions, including the provision of solar irrigation and of an innovative off-grid box system, provide renewable energy sources for irrigation and electricity, and supply clean water for the project's beneficiaries; thereby providing crucial cushions against the effects from the ongoing Ukraine crisis.</p>

<b>FINANCING FACILITY FOR REMITTANCES (FFR)</b>					
<p>The Financing Facility for Remittances (FFR) is an IFAD managed multi-donor facility aimed at enhancing the development impact of migrants' remittances and diaspora investment in countries of origin, financing innovative projects and supporting capacity building, policy engagement and research in these fields. Thanks to the FFR, IFAD is globally recognized as one of the key actors in the global remittance ecosystem.</p>					
<p>Since 2006, the FFR has grown from a US\$4 million facility to a US\$65 million multi-donor facility (including co-funding) with a portfolio of more than 60 projects in over 50 countries across the developing world. Through the promotion of innovative investment, transfer and financially inclusive mechanisms, projects implemented by the FFR have successfully addressed the main gaps affecting the link between remittances, diaspora investment and development. As a result, poor rural households have been empowered to advance on the road to financial independence.</p>					
<p>In 2021, the FFR team increased its technical expertise and presence in the field with the appointment of three Regional Remittances and Inclusive Digital Finance (RIDF) Officers in Kenya, Senegal and South Africa, while the credibility of the facility at international level was reaffirmed at the highest level. During the year the FFR mainly focused its operations in Africa with the launch of six national calls for proposals for innovative partnerships with the private sector in, and the in-depth analysis of the regional remittance market through its Remitscope web-portal. At the same time the FFR team experienced an increased number of requests for technical support by IFAD regional divisions which was duly provided.</p>					
<p>In parallel, the FFR provided technical support and advice to the G20 Italian Presidency in the context of the Global Partnership for Financial Inclusion (GPII), successfully delivering the template for the new G20 countries' National Remittance Plans and a study on the impact of COVID-19 on global remittances, authored jointly with the World Bank.</p>					
<p>During the year, the team also organized the 2021 edition of the Global Forum on Remittances, Investment and Development (GFRID), as the platform to build and strengthen partnerships for innovative solutions on remittances. Furthermore, the FFR led the implementation of the annual UN Migration Network work plan on remittances, run the International Day of Family Remittances (IDFR) awareness raising campaign "Recovery and resilience through digital and financial inclusion", and had its work highlighted in the 2021 UN Secretary-General's report on migration. On research, it is also worthwhile to highlight the publication of country diagnostics on the remittance markets in 6 countries (the Gambia, Ghana, Kenya, Morocco, Senegal and Uganda) and the in-depth analysis of the remittance market in the Palestine, which highlighted the complex reality and provided a number of recommendations for its improvement.</p>					
<p>The FFR continues to receive support and additional contributions from both the donor community and IFAD, which allows it to scale up the impressive results reached thus far, and to mainstream remittances and diaspora impact investment within IFAD's programme of loans and grants. Over the years, increasing support was extended to the FFR from a number of donors. Contribution agreements were signed between IFAD and the EU, Luxemburg, Spain, the Swiss Development Agency (SDA), UNCDF, and more recently with the Swedish International Development Cooperation Agency (SIDA), which joined the FFR in 2020, and the German Cooperation Agency (GIZ), sponsoring two editions of the GFRID Summit.</p>

<b>Global Donor Platform for Rural Development (GDPRD)</b>					
<p>The Global Donor Platform for Rural Development (GDPRD or “the Platform”) is a network/partnership platform of 40 bilateral and multilateral development agencies, international financial institutions, intergovernmental organizations and foundations. It was established in 2003 on the wave of the Aid Effectiveness agenda, to lobby for increased public and private investments in agriculture and rural development. Starting from January 2020, the Secretariat of the GDPRD has been hosted by IFAD, in the Global Engagement, Partnership and Resource Mobilization Division (GPR).</p> <p>The annual membership fees constitute the budget of the Secretariat, which is used to finance the implementation of the annual work programme, and cover staffing costs and other HR/communications/administrative expenses for the functioning of the Secretariat. Platform members can also top-up their annual “core” contribution with “non-core”, supplementary contributions, either earmarked or non-earmarked. Currently, the Platform enjoys a total budget of EUR 600,000 in core annual contributions, plus EUR 100,000/year in additional special contributions, by the United States, earmarked to cover the expenses of two thematic working groups. In 2021, in addition to the membership fees, the Platform Secretariat received an in-kind contribution from the Norwegian Agency for Development Cooperation (NORAD) amounting to NOK 445,000 (EUR 46,673.74), which was used to support the thematic working group on Rural Youth Employment.</p> <p>Building on the Platform’s vision, in 2021 the Platform and its members were involved in preparations for the United Nations Food Systems Summit (FSS). Through the year, the Platform organized a series of meetings, events and donor discussions to galvanize members’ views towards a focused engagement by the Platform in the FSS. In the lead-up to the FSS, the GDPRD, the European Commission, IFAD and the United States Agency for International Development (USAID) organized on 9 September 2021 a high-level event, on “Leveraging Change: The Role of Donors in Food Systems Transformation”. The event focused on the critical role of donors in supporting food systems transformation through their investments in initiatives and programmes that build the foundation for collaborative efforts across food systems. At the event, the Platform launched a stocktaking report on “Donor Contributions to Food Systems” a report providing an overview of the scale of food systems-related funding and actions currently supported by donors and assessing the degree to which donors are adopting a food systems’ framing to guide their investments and programmes.</p> <p>On the occasion of the FSS, the GDPRD released a “Declaration of Intent on Food Systems Transformation” that underscores the integrated approach needed to tackle issues of poverty and inequality, health and nutrition, gender equality, environment, biodiversity loss, climate change and other challenges. It emphasizes the important role that donors can play in supporting the commitments and actions of governments, civil society and the private sector in response to the Summit and in line with the 2030 Agenda for Sustainable Development.</p> <p>As a follow-up event to the FSS, the Platform organized on 21 December 2021 a virtual donor round table on “Supporting Country-level Food Systems Transformation Pathways: What Can Donors Do Differently?” The round table highlighted the valuable role of the FSS in bringing together stakeholders from different sectors, ministries and countries to cooperate on food systems transformation challenges. It provided clear messages about how donors can support the development of detailed national pathways to guide action, and help maintain the momentum and the direction of the FSS.</p> <p>In 2021, the GDPRD also worked on the development of a white paper on “Transforming Food Systems: Directions for Enhancing the Catalytic Role of Donors”, released in April 2022, which focuses on strategies and investment options to guide donors in following up on Summit pathways. Key areas of attention in the white paper include: (i) strengthening coordination; (ii) mobilizing responsible investments; (iii) engagement of private sector; (iv) supporting policy innovation; (v) investing in research and data systems; (vi) strengthening governance; (vii) strengthening universal social protection mechanisms, disaster preparedness and emergency relief programmes.</p>

<b>Indigenous Peoples Assistance Facility (IPAF)</b>					
<p>In 2006, the Indigenous Peoples Assistance Facility has been transferred to IFAD from the World Bank where it was established in 2003. IPAF is an innovative funding instrument that indigenous communities can use to find solutions to the challenges they face. The objective of the Facility is to strengthen indigenous peoples' communities and their organizations. It finances small projects that foster self-driven development.</p>					
<p>In 2018 the David and Lucile Packard Foundation provided supplementary funding to the fifth cycle of the Facility (2018-2021) to finance two projects selected for grant financing in the Democratic Republic of the Congo and in Indonesia. After successful implementation of these resources the Foundation is processing a second grant to the sixth cycle of the IPAF (2022-2026). This time resources will be allocated for core funding of IPAF.</p>					
<p>In 2020, Sida decided to make a supplementary fund contribution of SEK 38,000,000 focused on livelihoods and resilience to climate change of indigenous peoples. Part of this funding will finance the sixth IPAF cycle (2022-2026), which will support small scale projects proposed by indigenous peoples' organizations to confront the challenges of climate change and interlinked drivers of vulnerability. 2021 was the year to plan and update this innovative tool, as projects will now be three year long and with a funding ranging from 20,000 to 70, 000 USD. The next IPAF call for proposals will focus on biodiversity, resilience and adaptation and will be implemented by the indigenous peoples' organizations: FIMI (for LAC), Tebtebba (for APR) and SWT (for Africa). It will be launched at the end of July 2022.</p>					
<p>As part of the same supplementary fund from Sida, work is in progress to facilitate access to climate financing for indigenous peoples, inspired by the increased recognition of their role as crucial stewards of nature. This component has prioritized projects identified by regional ECG teams and IPs focal points through a call for proposals to support design and implementation of GCF-GEF-Adaptation fund project. Furthermore a stocktake on projects focusing on climate change targeting indigenous peoples is ongoing.</p>

<b>INTERNATIONAL LAND COALITION (ILC)</b>					
<p>IFAD has received funding from the European Union and Germany, for the support of the International Land Coalition (ILC) Strategy 2016-2021. These funds are provided directly to ILC in line with the terms of the IFAD-ILC MoU. ILC received additional funding from Swedish SIDA, Swiss Development Cooperation, Wellspring Philanthropic Fund, Ford Foundation, and RVO in support of its strategy. The ILC's goal is to realize land governance for and with people at the country level, responding to the needs and protecting the rights of those who live on and from the land. To achieve this change, ILC members seek changes in policies, practices and agendas at country, regional and global level. In the third year of implementing its strategy, ILC also moved towards becoming a network of platforms for action, each with their own strategy, membership, governance, and facilitator.</p> <p>In 2020, ILC further supported transformative strategies and capacities of member-led platforms in over 30 countries with over 750 member organizations and partners actively engaged across those platforms. ILC contributed to 72 policies and 115 practices having changed over the last triennium (2019-2021). ILC-supported national partnerships that first came together around a common strategy have grown to become more fully a national expression of what ILC is globally: an alliance driven by people's organisations, moving collectively towards a common goal of people-centred land governance to meet the land targets of the SDGs. These National Land Coalitions are member-led, including both ILC members and non-members, and are tailored to the situation in country, but can call upon the expertise of the ILC and fellow members in other countries to address injustice by securing land rights and removing obstacles to land reforms. Over the triennium, ILC put out 243 knowledge products (including 62 good practices), held 74 training and capacity strengthening events for 3231 participants (of which 63% were women), while ILC members carried out 1019 joint advocacy actions including as declarations, position papers, shadow reports, campaigns and marches.</p> <p>ILC members are collecting and managing 'people-centred' data, according to their own priorities. ILC is assisting in the production of 'Shadow Reports' which help hold governments accountable to their own commitments, especially the SDGs. By doing so, they are able to show the complex realities of land governance on the ground, provide information they need to advocate for their rights, while holding governments accountable to the promises they make. ILC supports these initiatives by providing tools and training to generate and use people-centred data. These initiatives are participatory, consultative and respond to the data demands of members.</p> <p>Other highlights that illustrate ILC's achievements include: the interest expressed by the Nepalese government in using LANDex, a global index developed by ILC to help democratise data and help keep governments and businesses accountable; the SDG Land Momentum Group, facilitated by ILC, exposed that only seven out of 47 countries reported on SDG land-related targets at the 2020 High Level Political Forum; ILC's community of practice on multi-stakeholder platforms Land Collaborative initiated the first learning cycle on private sector engagement; a Collective Women's Land Rights Commitment widely endorsed during the Beijing+25 Conference (Generation Equality Forum); leadership training, mentoring and solidarity network for 41 women within the coalition; ILC held three independent dialogues as part of the UN Food Systems Summit; 19 NES platforms engaged with the UN Decade of Family Farming, and seven countries adopted family farming policies as a result; the Participatory Rangelands Management Project secured more than 246,773.4 hectares of rangelands for pastoralists in Tanzania and Kenya; NES Cameroon developed code of conduct to increase women's participation in decision making in relation to customary land management; and a new member in Montenegro successfully blocked military exercises on communal land in with support of Land Rights Now Campaign.</p>

<b>MAINSTREAMING GENDER EQUALITY &amp; Gender Transformative Mechanism</b>					
<p>On 26 November 2012 IFAD signed a 5-year joint programme with UN Women, FAO and WFP for accelerating progress towards the economic empowerment of rural women (RWEE-Joint Programme). The UNDP-Multi-partner Trust Fund (MPTF) is the programme's administrative agent; Norway and Sweden were the two funders of the initiative. The Joint Programme is articulated around four outcome areas: (i) Improved food security and nutrition; (ii) Increased income opportunities; (iii) Enhanced leadership and participation; and (iv) More gender responsive policy environment. The Joint Programme also enhances the role of young women by specifically targeting them throughout its four outcome areas and its activities. The following seven countries were targeted for the implementation of the Joint Programme: Ethiopia, Guatemala, Kyrgyzstan, Liberia, Nepal, Niger and Rwanda. IFAD implemented activities in Guatemala, Kyrgyzstan, Nepal, Niger and Rwanda, focusing on the promotion of household methodologies, calculation of the baselines with the Empowerment in Agriculture Index, and support of vulnerable women through rural-pastoral kits and reached approximately 80,000 rural women. The Programme participants achieved an 82 percent increase in agricultural production, made over US \$3,600,000 from on-farm and off-farm sales, and generated almost US \$2 million through savings and loan schemes. The Programme also resulted in greater economic autonomy for rural women, more gender equitable household relations and increased numbers of women in leadership positions. In 2022, the Joint Programme will continue with a second phase and replicate its holistic partnership model in Pacific Islands, Tanzania, Tunisia and Nepal.</p> <p>In 2018, a contribution of EUR 836,740 was mobilised to from EU for a four-year long RBA collaboration to support the three agencies to embed gender transformative approaches in policy dialogue, programmes, institutional culture and their working modalities. In 2021, the Joint Programme on Gender Transformative Approaches speed-up its implementation to compensate the delay accumulated during the linked to the COVID-19 outbreak. Good progress has been made towards achieving the four Joint Programme outputs and JP GTA's role at the forefront of global initiatives to mainstream gender transformative approaches has been cemented. Gender Transformative Activities have been scaled up within the Rome-based Agencies, capacity development efforts and field work has been expanded into the JP GTA's two focus countries, Ecuador and Malawi, where new partnerships have also been built with development actors.</p> <p>Institutional mind-set shift within each RBA, its staff, implementing partners and technical experts have been promoted through technical labs, peer-to-peer and other capacity building sessions instrumental to foster gender transformative programming. The JP GTA and the three RBAs have also contributed to ensuring that GTAs are integrated in important high-level policy initiatives and dialogues, such as the Workstream on Gender Equality and Women's Empowerment of the Committee on World Food Security (CFS), the Food Systems Dialogues on Gender Equality, Women's Empowerment for Food and Nutrition Security as well as the European Union's new Action Plan on Gender Equality and Women's Empowerment in External Action (GAP III) 2021-2025. Marking the 16 Days of Activism against Gender-Based Violence Campaign, IFAD also hosted an online learning event in December 2021 adopting the Forum Theatre technique to spotlight common oppressive actions that may eventually lead to gender-based violence (GBV). It was one of the first attempts to apply the so-called 'Theatre of the Oppressed' methodology in an online session. The initiative raised awareness about unconscious gender bias and its impact in the workplace, field operations and daily life. In November 2021, the JP GTA launched its <a href="#">website that functions as resource hub</a> to increase awareness, provide learning opportunities and share knowledge products about gender transformative approaches.</p> <p>At its September 2019 session (EB 2019/127/R), the Executive Board approved the receipt of supplementary funds from BMGF. This contribution included a dedicated USD 500,000 planning grant to design a Gender Transformative Mechanism (GTM). The objective of this scoping grant was to support IFAD gender team to design the scope and implementation modalities of the GTM in the context of climate adaptation. The design process was led by the Gender team at IFAD, supported by regular consultations with country teams of the proposed countries and an IFAD inter-departmental working group. Subsequently, IFAD's Executive Board approved the receipt of funding from the BMGF, the first non-member state to contribute to the GTM. It also authorized the President to accept future resources for the GTM, with no limitation on the amount. The first tranche of US\$ 16 M was received in November 2021 and a kick off technical workshop between the IFAD and BMGF gender teams took place in December 2021 (Rome). With the funding, two country investments and one design, or 1.1 million households are expected to directly benefit from GTM's initial investment in Burkina (Burkina Faso, the Agricultural Value Chains Support Project in the Sud-Ouest, Hauts-Bassins, Cascades, and Boucle du Mouhoun Regions (PAFA-4R); India, the Maharashtra Rural Women's Enterprise Development Project (Nav Tejaswini); and Ethiopia, the Participatory Agriculture and Climate Transformation Programme.</p>					

<p>Financing agreements are in the process of being signed with the governments of Burkina and India. Technical workshops are being conducted with country and project teams to kick off implementation in both countries. Following the approval of the PACT concept note by the Government of Ethiopia and IFAD, the design in Ethiopia has just started. As part of the first year milestones, a resource mobilisation plan has been finalized for the implement of the long term vision of the GTM. The long-term vision of the GTM is to empower by 2030 over 20 million rural people to achieve gender transformative results in agriculture, strengthening climate resilience and wellbeing in rural households and communities across 27 projects and an estimated 20 countries.</p>

<b>MAINSTREAMING CLIMATE ADAPTATION (ASAP2)</b>					
<p>Since 2017, the second phase of the Programme (ASAP2), which covers the period from September 2017 to 31 December 2025, is being implemented in parallel to ASAP1 and will contribute to achieving IFAD's climate mainstreaming objectives and outcomes over the Strategic Framework 2016–2025 implementation period. It was decided that, in order to strengthen the environmental sustainability and climate resilience of poor rural people's economic activities, IFAD needed to continue integrating technical assistance activities for climate change adaptation in its investment programmes.</p> <p>Under ASAP2 contributions of US\$14.6 million are being programmed into technical assistance projects that support IFADs entire climate focused portfolio. ASAP2 technical assistance activities sustain the design of new corporate tools for climate-informed programming, inform capitalization studies and leverage resources from global climate funds to address the additional costs of climate change in IFAD's agricultural programmes. The ASAP2 outcomes also include climate mainstreaming in IFAD's Programme of Loans and Grants, private sector engagement, women's engagement, support to the nexus between climate change and nutrition and policy engagement in the field of climate change. To date, 35 technical assistance projects have been financed, which have currently disbursed approximately 83.7 per cent of the received contributions.</p>

<b>NUTRITION SENSITIVE AGRICULTURE</b>					
<p>IFAD is continuing the work to improve the mainstreaming of nutrition into its operations, through scaling-up of capacity, strengthening of IFAD and project staff on nutrition-sensitive agriculture and food systems, dissemination of guiding materials and tools, provision of technical support at design and implementation of nutrition-sensitive projects.</p> <p>Under the NORAD Supplementary Funds Agreement "Technical Assistance to Sustain Inclusive and Sustainable Nutrition - sensitive Agriculture", six (6) country budgeted work plans to top-up seven (7) IFAD-funded nutrition-sensitive investment were approved by IFAD and the recipient governments in 2021. These are PADAAM and PADMAR projects in Benin, PAPFA in Burkina Faso, DEFIS in Madagascar, FARMSE in Malawi, IAMDP in Sudan and SIRP in Zimbabwe. Out of the seven (7) projects, SIRP and IAMDP received their first budget disbursements in the last quarter of 2021.</p> <p>The 2021, NORAD SF allocation has contributed to provide technical assistance on nutrition to these projects, to elaborate nutrition strategies and action plans to better articulate and integrate nutrition into the investment projects and to strengthen nutrition M&amp;E and targeting approaches of the most nutritionally vulnerable. In addition to this, NORAD SF country baseline surveys were launched in Burkina and Zimbabwe and project staff capacities were strengthened through training on nutrition-sensitive agriculture and food systems.</p> <p>Furthermore, technical assistance on nutrition and social inclusion has been provided to 8 projects at design and implementation of IFAD-funded nutrition-sensitive projects. This includes projects receiving NORAD SF top-up as well as other project within the country portfolio to ensure a well- balanced programmatic approach to integrating nutrition (for example technical support was provided during DEFIS, IAMDP, FARMSE, PAPFA and PAFA-4R implementation support, supervision and mid-term review missions).</p>

<b>PLATFORM FOR AGRICULTURE RISK MANAGEMENT Horizon 2</b>					
<p>With the support from the European Union, France, and Italy, and in strategic partnership with the New Partnership for Africa's Development (NEPAD) and Germany, IFAD launched the Platform for Agricultural Risk Management (PARM) in December 2013, as an outcome of G20 discussions on agricultural growth and food security.</p> <p>PARM is a global partnership for agricultural risk management (ARM) for development. It has the global mandate to contribute to sustainable agricultural growth, boost rural investment, reduce food insecurity, and improve resilience to climate and market shocks of poor rural households through a better management of risks. PARM plays the role of a technical provider and knowledge broker with the objectives to: (a) develop methodologies for risk analysis and adoption of holistic risk management strategies; (b) strengthen local expertise and enhance national stakeholders' awareness and capacities to manage agricultural risks; (c) improve the generation, access, exchange of knowledge and partnerships on ARM related issues; (d) facilitate the integration of ARM into policy planning, projects/programmes design and investment in the agricultural sector.</p> <p>PARM has advanced its second operational phase, called Horizon 2 (2019-2024), leveraging generous funds from the European Commission (EUR 2 millions), Agence Française de Développement (AFD) (EUR 4.4 million), Italian Agency for Development Cooperation (AICS) (EUR 1.8 million), and IFAD itself (EUR 0.6). PARM will continue to bring evidence and build capacity on ARM at a global and country level, and investing more resources in the design of ARM programmes for investments, with a more structured involvement of public-private-partnerships. PARM will continue to provide public goods in terms of risk assessments, ARM tools analyses and CD actions, sharing global ARM policy knowledge, and policy engagement.</p> <p>The COVID-19 pandemic of the past three years has added an entirely new layer of risks to farmers and governments across the world. Particularly, poor smallholder farmers in Africa face the greatest risks on all fronts: production and yield risks, price and market risks, financial risks, political risks, and human or personal risks. In this context, the PARM Secretariat continued to deliver its demand-driven services to assist governments in managing agricultural sector risks. Currently, the Secretariat operates in Burkina Faso, Ethiopia, Niger, Senegal, and Madagascar, with ongoing dialogues to work with other potential countries, including Uganda and Tunisia. Although the pandemic has led to mobility restrictions in the last two years, the Secretariat managed to adapt its operations, ensuring the smooth implementation of its activities at the country level. With this, the Secretariat had the chance to contribute to turn the most significant risk of our time into an opportunity to reshape the way risks are managed.</p> <p>Particularly for the year 2021, the Secretariat strengthened its country engagements on ARM, providing technical assistance, capacity development and knowledge management support while bringing forward the ARM agenda at the global level. In 2021, PARM strengthened the policy engagement on ARM at country level, resulting in i) the approval of an action plan in Senegal, ii) the official finalization of the Risk Assessment phase and the launch of the Project Design phase in Burkina Faso and iii) consolidation of a design (for investment) on ARM in Ethiopia. Moreover, the Steering Committee (represented by PARM's donors and strategic partners) has presented and approved Madagascar as a potential PARM Horizon 2 country during its meeting held on 8 December 2021. PARM also developed capacities of over 180 stakeholders through implementing three pieces of training in Ethiopia and two learning events in Burkina Faso and Senegal on ARM strategies. The Platform started promoting new investments on ARM in the selected countries involving Gov., donors and private sector. PARM successfully stimulated knowledge sharing and exchange on ARM through the Forum for Agricultural Risk Management (FARM-D) Community of Practice with 397 news members, 28 webinars promoted and 80 knowledge resources disseminated to over 9,000 practitioners.</p> <p>PARM practical toolkit on assessing risks at the value chain level has been developed and published to guide practitioners and partners on ARM. The platform as developed a dedicated gender strategy and integrated gender into studies, KM products, Capacity Development actions and event organizations.</p> <p>PARM's role as a global initiative contributing to food security and global stability through risk management tools has been continuously recognized in the context of the annual meetings and declarations of the G20.</p>

<b>Private Sector Financing Programme (PSFP)</b>					
<p>As part of the Consultation on the Twelfth Replenishment of IFAD's Resources, the Private Sector Financing Programme (PSFP) was created as a financing facility designed to promote increased investment into small-scale agriculture. More specifically, it is aimed at improving the income, food security, job-creation, empowerment and resilience of rural poor and small producers, women and rural youth in particular, in Low Income Countries, Low- and Middle-Income Countries and countries in fragile situations.</p> <p>PSFP complements IFAD's work by providing benefits for IFAD's target groups (rural poor, women and youth) and priorities (climate, food security and nutrition). The programme is able to achieve this by offering financial instruments that private sector actors need and cannot obtain from other players, for instance by providing counter-cyclical funding during crises times (COVID-19 and debt distress) and by offering technical expertise, funded activities and Technical Assistance.</p> <p>Throughout 2021, PSFP focused mainly on the search and assessment of potential Non-Sovereign Operations (NSOs), following a rigorous screening process to find potential investees for counter-cyclical funding to address the negative effects of the Covid-19 pandemic, particularly evident in the agricultural and rural sector. In July 2021, the first NSO Loan Agreement with an investee in Nigeria was signed and subsequently in December 2021, two more NSOs from Madagascar and Mozambique were approved by the Executive Board.</p> <p>The Government of the Grand Duchy of Luxembourg made a contribution of EUR 2 million to PSFP channelled through the Private Sector Trust Fund (PSTF).</p>

<b>Rural Poor Stimulus Facility (RPSF)</b>					
<p>In April 2020 IFAD launched the Rural Poor Stimulus Facility (RPSF), a multi-donor facility, in response to the challenges caused by the global COVID-19 pandemic. The Facility seeks to improve the resilience of rural livelihoods in the context of the crisis by ensuring timely access to inputs, information, markets and liquidity.</p> <p>IFAD initiated the Facility with US\$40 million of seed funding from grant resources and has mobilized an additional US\$52.6 million from donors. Between August and December 2020, Canada, Sweden, the Netherlands, Germany and Switzerland provided contributions to the RPSF.</p> <p>The first financing round of the RPSF was launched in June 2020 to allocate the US\$40 million in seed funding contributed by IFAD. The funds were allotted to single-country projects (85 per cent) and a pool of multi-country projects (15 per cent). In the single-country pool, funds were distributed across 59 eligible countries using an index of COVID-19 risk combined with countries' rural population and prevalence of food insecurity. In early December 2020, once the final contribution to the facility was confirmed, IFAD launched the second financing round to allocate contributions from donors. The allocation mechanism of the second financing round replicated that of the first, also encouraging projects approved under the first round of the RPSF to obtain top ups.</p> <p>During 2021, an additional 54 proposals (composed of 13 new projects and 41 additional financings) worth US\$48.6 million were approved through the RPSF. Cumulatively, this contributed to RPSF being comprised of 64 projects (55 single country projects and 9 multi-country projects) worth \$86.6 million in total, whereby funding is distributed primarily to low-income (51%) and lower-middle-income (43%) countries, with the remaining 5% allocated to upper-middle-income countries. Approximately 47% of funding has gone to countries in fragile situations. By end of 2021, \$56.7 million (65% of the approved funds) had disbursed to advance projects' implementation.</p>

<b>SUPPORT TO FARMERS' ORGANIZATIONS</b>					
<p>The support to Farmers' Organisations (FO) is currently delivered by IFAD through complementary programmes: i) Farmers' Organizations for Africa, Caribbean and Pacific (FO4ACP), ii) FO4Asia and Asia and Pacific Farmers Programme (APFP) and iii) FO4Latin America.</p> <p>In addition to reaching important results, these programmes have laid the foundation of strong and continuously strengthened strategic partnerships between IFAD and like-minded donors such as the European Commission (EC), Organizations of ACP states (OACPs), Swiss Agency for Development Cooperation (SDC), Agence Française de Développement (AFD).</p> <p><b>Farmers' Organizations for Africa, Caribbean and Pacific Countries (FO4ACP)</b> is a capacity-building programme aimed at increasing income and improving livelihood, food, nutrition security and safety of family farming in the targeted geographical areas, through greater integration of family farms in the value chains. The programme's primary stakeholders and beneficiaries are FOs and their smallholder members in ACP countries. The programme is implemented in 70 countries (ACP) through about 100 farmers' organizations with a potential outreach of 52 million small holder farmers. The direct recipients are: i) in Africa, the regional FOs members of PAFO (EAFF, PROPAC, ROPPA, SACAU, UMNAGRI) and AgriCord, ii) in the Pacific regional FOs PIFON and iii) in the Caribbean, AgriCord and FAO Regional Office. In the Caribbean, the smallholders' FOs have not constituted a single and inclusive regional apex organization of the region. Therefore, a competitive call for proposals was adopted to identify the direct implementation partners for the programme.</p> <p>The total cost of the FO4ACP programme, including the recently approved top-up financing of EUR 10 million, is estimated at EUR 52.5 million and comprises a European Commission's contribution of EUR 50 million and co-financing by IFAD of US\$3 million (approximately EUR 2.7 million according to the exchange rate of the approval day).</p> <p>The FO4ACP intervention will focus on the following priority areas:</p> <ol style="list-style-type: none"> <li>a. Facilitating the integration of smallholder and FOs in value chains by strengthening the FOs capacity to effectively provide economic services to their members and improve and access to finance and de-risking instruments;</li> <li>b. Supporting FOs capacity to influence policy dialogue and the governance mechanisms of the value chains at all levels;</li> <li>c. Supporting the institutional development of FOs through capacity building and contributing to the financing of FOs' core costs;</li> <li>d. Facilitating knowledge sharing between ACP FOs through the promotion of exchanges among peers for innovation, generation of knowledge products, replication and scaling up in the areas of production, processing and marketing.</li> </ol> <p>After an extremely difficult year 2020, marked by the unprecedented global Covid-19 pandemic, farmers' organizations bounced back in 2021, supporting their smallholder members in the best possible way, despite the ever-challenging circumstances. While programme implementation almost came to a halt in 2020, 2021 brought some relieve and allowed to relaunch activities and speed up the actions working towards the programme's overall objectives.</p> <p>The analysis of the impact of Covid-19 on smallholder farmers conducted by the regional farmers' organizations contributed significantly to decision-making processes aiming at supporting appropriate responses for the agricultural sector and smallholder farmers in the different regions. Over the duration of the crisis, farmers' organizations had to strengthen the role they play, and take up new roles to support their members effectively. The multiple roles farmers' organizations played and recommendations for a way forward are documented in the publication "<a href="#">Multiple roles of farmers' and producers organizations during the Covid-19 crisis</a>".</p> <p>In Africa, FO4ACP operated in synergy with the SAFE 2020 programme, under IFAD's Rural Poor Stimulus Facility, which provided complementary funds to respond to the smallholder farmers' most urgent needs during the Covid-19 crisis. The complementarity and flexibility to adapt action enabled the farmers' organizations to fulfil more and new roles to respond to the needs of their smallholder members during the pandemic. While FOs engaged simultaneously in political, economic, sanitary, social and humanitarian roles, lessons are learned and documented to reflect on further strengthening of the institutions into the post-Covid-19 era.</p>					

In this context, IFAD started negotiations with the European Commission and the Organization of ACP countries (OACPS) in May 2021 with the objective of elaborating a mitigation and recovery action in the framework of the FO4ACP programme. The consultations involved all programme stakeholders resulting in the elaboration of the FO4ACP Covid-19 Mitigation Action.

The action is fully integrated into the on-going FO4ACP programme framework across the existing five components and relies on the implementation arrangements already established. The overall objective of the FO4ACP Covid-19 Mitigation Action is to support smallholders and farmers-lead enterprises to recover from the economic impacts of the Covid-19 crisis and strengthen their resilience in the face of future crises. The action is financed by the European Commission and an additional top-up of EUR 10 million was formalized in September 2021.

Overall, the physical execution of the plan of works results aligned with the planning underlining an extraordinary resilience and adaptability capacity of the farmers' organizations. It should be noted that the action was launched in the Caribbean a year later than in Africa and the Pacific. The level of financial execution is approximately in line with the physical execution.

With FO4ACP support, a total of about 287,706 individual producers benefited from FOs/FLEs economic services through Agricord and RFOs. Under Component 2, the programme reached a number of 163 policies and programmes influenced by FOs, which is far beyond the 80 initially targeted.

**FO4Asia** was signed towards the end of 2020 for the total amount of 14 988 000 EUR. Total direct costs consist of EC contribution of EUR 11 943 925 and IFAD contribution of EUR 2 208 000. The key programme partners are: (i) the Asian Farmers Association for Sustainable Rural Development (AFA) in consortium with La Via Campesina (LVC), representing 17 national federations and organizations of smallholder farmers in 13 countries, representing about 43 million farmers; and (ii) AgriCord. As for the sister programmes key objectives are improved economic services, advocacy and policy influencing and institutional strengthening.

In 2021, with FO4A support, the consortium AFA-LVC reported around hundred thousand farmers were provided with economic services under Component 1 – with an estimated percentages of 50 for women and 20 for the youth. These are the direct and indirect beneficiaries of proposals funded under the regional challenge fund. Other than the regional challenge fund, there are also proposals funded under the national challenge fund, projects that are funded by the IFAD country program. Major lesson learned in implementing component 1 activities is the realization that supporting the farmers in their economic activities produce the best impact especially when financing is matched with technical support – coaching among farmers and experts, linking the FOs with each other either face-to-face or virtual for peer-to-peer learning exchange, and connecting the farmers/FOs to the market.

Under Component 2, FOs were able to lobby policies and programs that support farmers' access to financing thereby contributing to the increase in their production. Some of the gains achieved under this component include the reduction of loan interest, identification of flagship commodity for production and marketing support, approval of the law that institutionalizes the funds for farmers, access to portal for selling products, amendment of the law removing the restrictive provisions in market access to cooperatives, and getting additional funds from other agencies. It is during the pandemic that FOs engaged in policies that are more livelihood-related.

**FO4LA Programme.** On December 28, 2020, the Contribution Agreement No. FOOD/2020/419-668T was signed between IFAD and the EU for the implementation of the FO4LA Program. The implementation period is 36 months from 1 January 2021. The total cost of the program is estimated at EUR 2.22 million, fully financed by the contribution of the EU. IFAD has the role of coordinating and supervising the execution of the program. IFAD signed two (2) Grant Agreements with the Recipients and key partners identified during program design: COPROFAM, the regional network of producer organizations in Latin America, and AgriCord, effective 22 July 2021.

The overall objective of FO4LA is to increase income and to improve livelihood, food and nutrition security and safety of family farmers affiliated to targeted FOs within Latin America. The program's specific objectives are: FOs and farmer-led enterprises improve technical and economic services along the value chains; FOs influence policies and business environments for the transformation of family farming and the development of sustainable, adaptive economic initiatives and farmer-led enterprises; FOs are accountable organizations able to effectively perform their institutional functions. The key program partners are the Confederación de Organizaciones de Productores Familiares del Mercosur (COPROFAM) and AgriCord. The program comprises four components: Component 1: Delivery of economic services along priority value chains, Component 2: Enabling the business environment, Component 3: Institutional development of FOs, and Component 4: IFAD programme coordination and M&E.

The programme targets smallholder and family farmer members of the national and subnational FOs affiliated to COPROFAM and supported by AgriCord's agri-agencies

in 9 countries in Latin America: Argentina, Brazil, Bolivia, Chile, Colombia, Ecuador, Paraguay, Peru, and Uruguay. The provision of demand-driven services and support to business plans will reach 12 national/subnational FOs in a sub-set of 4 countries (3 FOs per country): Brazil, Bolivia, Paraguay, and Peru. The estimated number of small producers directly benefited in the plans is about 12 thousand. Advocacy and representation of farmers in policy dialogue and policy reform will reach an estimated 10 million family farmers through the implementation of conducive policies and a favourable political environment derived from the institutional strengthening of the platform and networks of farmer organizations at the regional and national levels, encompassing the widest geographical coverage of the 9 targeted countries. 2021

From July to December 2021, most of the activities carried out by the program partners were related to the installation of the committees that govern the programme – the Regional Coordination Committee, the National Execution Committees and the Global Steering Committee; selection of the 12 Producer Organizations (PO) in the four (4) countries (Bolivia, Brazil, Paraguay and Peru) that will receive support to implement business plans, training and technical assistance activities and preparation of activity/business plans with POs in close collaboration between COPROFAM and its members and AgriCord and its Agri-agencies.

In 2021, the programme was still in an early stage of implementation, so a supervision mission was not carried out. However, throughout the year several exchanges and accompaniments were carried out with the partners to design the (sub)projects, agree on the process of joint management of the Program between both organizations, select the beneficiary POs and prepare a successful start-up. The main activities planned for 2022 refer to the approval and implementation of the business plans with the Producer Organizations, training activities and exchanges, policy dialogue, knowledge management and communication. In 2022, IFAD will carry out a supervision and implementation support mission.

<b>FARMERS' FORUM</b>					
<p>The Farmers' Forum (FAFO) is a bottom-up process of consultation and dialogue between small farmers' and rural producers' organizations, IFAD and governments for rural development and poverty reduction. Established in 2006 as a permanent feature of the IFAD Governing Council and operationalized through IFAD-funded investment projects and grant programmes, the Farmers' Forum is fully aligned with IFAD's strategic objectives, and is rooted in concrete partnership and collaboration at country and regional levels. Over years, the FAFO process has demonstrated its relevance and indeed changed the way IFAD and FOs are working together. Since its inception, FAFO has received supplementary funding from Italy, Switzerland, France, Finland and BMGF.</p> <p>During the 6th Global meeting of the Farmers' Forum held in Rome in February 2016, members agreed to decentralise the FAFO process and to begin holding regional level FAFOs in order to 'be closer' to the farmers and to foster greater involvement of IFAD regional divisions and country programmes. The FAFO members also decided to use the IFAD geographical structure for the regional FAFOs in order to facilitate interactions with the regional divisions. Furthermore, it was decided to organise the regional FAFOs in concomitance with the IFAD regional divisions' implementation workshops.</p> <p>The regional FAFOs have been organised between 2017 and 2019 in four regions (May 2017 Uganda – ESA, April 2018 Mauritania – WCA, October 2018 Indonesia - APR, May 2019 Uruguay -LAC) gathering a total of 245 FOs' leaders coming from 74 countries and 579 participants from IFAD staff, IFAD-funded projects' staff, and other partners. A lead organization in each region (AFA for APR, EAFF for ESA, COPROFAM for LAC and ROPPA for WCA) was mandated to set up a regional FAFO Steering Committee (SC) whose mission was to articulate a roadmap for the decentralized FAFO in its region. One key concrete outcome of the regional FAFOs are 55 national action plans as a contribution of FOs-IFAD projects-IFAD staff national working groups, presenting lists of activities to implement in order to further develop IFAD-FO's partnership.</p> <p>In 2019, the focus was on the preparatory works for the seventh edition of the Global Meeting of the Farmers' Forum that took place in February 2020. As an input for this Global Meeting, the most relevant achievement in 2019 was the elaboration of the Partnership in Progress Report 2016 -2019. The report assess the evolution of partnership between farmers' organizations (FOs) and IFAD at national, regional and global levels over the 2016-2019 period. It provides both quantitative and qualitative analysis of this partnership. The quantitative analysis is based on a survey submitted to IFAD Country Directors and provides key trends of the partnership in IFAD COSOP and investment projects' designs and implementation. It also provides an analysis of the grants portfolio supporting FOs and its key outcomes. For the first time, the Report takes stock of the experience of the regional FAFOs. Based on a review of several case studies, it proposes a qualitative analysis of IFAD-FOs partnership in its diverse aspects.</p> <p>The 2020 Global meeting of the Farmers Forum (6-11 February 2020) was the first one after a four-year period during which four regional FAFOs were organized and organized in conjunction with the first year of the UN Decade of Family Farming. The meeting brought together 91 farmers' leaders and representatives (45 per cent were women), representing millions of small-scale farmers, pastoralists and fisher peoples in Africa, Asia and the Pacific, Europe, Latin America and the Caribbean, and the Middle East, for the purpose of exchanging views on the evolution of the partnership with IFAD.</p> <p>IFAD President, Gilbert Houngbo, opened the forum with the members of the FAFO Steering Committee, after which the above-mentioned Partnership in Progress Report 2016-2019 was presented. Thematic working groups addressed the following issues: climate change and the transition to agro-ecology, UN Decade of Family Farming and the engagement of the farmers' organizations in the preparations of the Food Systems Summit, women's leadership, youth engagement and new instruments for IFAD's 12th replenishment. A synthesis of deliberations and recommendations was presented at the closing session and at the plenary of IFAD's Governing Council on 11 February 2020.</p> <p>This session came at a time where IFAD is going through deep reforms such as the decentralization of operational staff and the creation of sub-regional Hubs to come closer to its clients. In 2021 the next round of regional FAFOs will start, with NEN as the first region.</p>					

Following the FAFO global meeting in 2020, another series of regional FAFO meetings were to take place between 2021 and 2023. Due to the outbreak of COVID19 just after the global meeting in 2020, the Regional meetings shifted to 2022 and 2023 (in presence, hybrid or virtual modalities depending on the evolution of the pandemic).

<b>Smallholder and Agri-SME Finance and Investment Network (SAFIN)</b>					
<p>SAFIN is the only global multi-stakeholder network advancing inclusive agri-SME finance, designed to bridge the silos among the providers, seekers and enablers of finance by fostering greater connection, coordination and collaboration among these players. With more than 50 member institutions from across the agri-finance ecosystem, SAFIN is a dynamic space for knowledge sharing, advocacy and co-creation around initiatives with the potential to move more capital and other non-financial resources towards agri-SMEs.</p> <p>The initiative to establish SAFIN was jointly launched in 2017 by the Italian Government, Ministry of Foreign Affairs and International Cooperation, and IFAD. Since its inception, SAFIN has undertaken two distinct implementation phases: a Pilot Phase from 2018-2020 and SAFIN 2.0 from 2021-2025. Since 2021, the network operates around five focus areas building on the achievements and lessons learned from the pilot. The new focus areas and their key objectives are described below:</p> <ul style="list-style-type: none"> <li>• Convene-Bringing the ecosystem together to build trust and mutual understanding: This focus area has two major objectives. The first is to nurture relationships and trust among network members to build a foundation for collaboration. The second is to engage the broader community of actors operating in or around agri-SME finance to foster better mutual understanding, a shared sense of direction, and better alignment of efforts.</li> <li>• Track-Mapping out opportunities for innovative collaborations: This focus area aims to enable members to learn about innovative work in agri-SME finance that others in the network are doing. Particular focus is placed on initiatives that are at an early stage, offering room for members to influence or co-create.</li> <li>• Focus-Fostering shared understanding of strategic issues and knowledge gaps for the future of agri-SME finance: At a time when many members struggle with large information flows about different issues of potential relevance to the ecosystem, this focus area is about the need for shared “sense-making” and prioritization about the truly game-changing issues, what is known about them, what new learning is needed, and what members can do with that learning.</li> <li>• Influence-Bringing an agri-SME finance focus to country-led initiatives for private investment towards sustainable food systems: This focus area aims to catalyse new investments in agri-SMEs and effective agri-SME finance solutions, by seeking to influence and leverage country-led initiatives to support private investment in the sector and/or in food systems more broadly.</li> <li>• Co-create-Aligning around effective financial solutions to emerging challenges in the sector: This focus area is about leveraging member's capacities to design, finance, or generate potential “pipeline” for new financial or technical assistance instruments, with a focus on responding to challenges that require innovative financial solutions, such as COVID19, the need to shift towards sustainable food systems, climate change and resilience.</li> </ul> <p>2021 marked the launch of SAFIN 2.0 and the initial implementation of the five focus listed above. The main activities from this period are described below:</p> <ul style="list-style-type: none"> <li>• Convene: In 2021, SAFIN hosted 12 learning events for collective learning that reached over 1400 agri-finance practitioners, including the SAFIN Annual Plenary Meeting. The bulk of SAFIN's learning events in 2021 focused on the theme of 'green finance for agri-SME investment' as part of the broader learning agenda identified by SAFIN member institutions. Informed by a landscape mapping exercise of existing knowledge resources on green finance, SAFIN co-hosted a two-day workshop with the Improving Capacity Building in Rural Finance Partnership (CABFIN) focusing on the state of green finance in agriculture, the main challenges in improving the enabling environment around green investments and some recent innovations in this field. This was followed by a webinar with representatives of Rabobank and Samunnati to share learnings from their enduring partnership in green finance for agriculture in India. SAFIN and the Consultative Group on International Agricultural Research (CGIAR) also co-organized a workshop on effective partnership models in this space, examining a partnership linking local financial intermediaries to global green finance providers and one at the science-investor interface. The SAFIN Secretariat captured the key learnings from these activities in two learning notes, offering recommendations on the role of blended solutions in green finance for agri-SME investment, and the success factors in lasting partnerships in this area. Finally, the SAFIN Annual Plenary Meeting was held in October 2021, where representatives of member institutions examined the present and future of agri-SME finance, and pooled their expertise around four new or upcoming initiatives.</li> <li>• Influence: SAFIN members continued efforts to champion agri-SME finance in various global forums, with a specific focus on the United Nations Food Systems Summit (UNFSS). SAFIN engaged in the UNFSS process by organizing three Independent Dialogues where over 260 participants, including agri-SMEs themselves, exchanged views on game-changing solutions with the potential to empower small businesses with financial and other resources. The SAFIN Senior Coordinator was appointed as a Food Systems Champion and as the Finance Lead of the Summit's Action Track 4 (Advance equitable livelihoods), both of which had cascading effects on the Network's recognition as a leading voice around the theme of agri-SME finance. SAFIN also collaborated with the Summit Secretariat and Wasafiri to establish the Good Food SME Hub- a virtual platform for knowledge exchange and collaboration among agri-food entrepreneurs and Enterprise Support Organizations (ESOs). Building on the evidence base on blended finance the pilot phase, SAFIN collaborated</li> </ul>					

with Convergence on a report examining how large sums of private finance can be invested in the agri-food sector to maximize impact at SME and small farmer levels. SAFIN also participated in the Good Food Finance Network to ensure continued recognition of the importance of agri-SME finance when pursuing green and nutrition impact through finance. Additionally, the Secretariat undertook over 30 public engagements and supported member institutions in the design or organization of various advocacy events such as the Inclusive Finance India Summit, the Agri-Food Transition Summit, and the Global SME Finance Forum.

- **Focus:** During 2021, SAFIN continued its work to address strategic knowledge gaps with the potential to influence the future of agri-SME finance. This began with efforts to address the long-standing need for a shared definition and segmentation of agri-SMEs, by co-developing a flexible agri-SME taxonomy that can be adapted to different countries and value chains with ISF Advisors. Building on the taxonomy, SAFIN supported the Council of Smallholder Agricultural Finance (CSAF) to build evidence around the link between the use of concessional finance for additionality in mobilizing finance for agri-SME investors, in agri-SME growth and ultimately in development impact. Additionally, SAFIN contracted Nourishing Africa to conduct a comprehensive mapping exercise of agri-SME ESOs in sub-Saharan Africa, documenting their business model sustainability and effectiveness. This exercise resulted in a learning brief, detailed report and database of ESOs operating in eight countries in the region, released in early 2022.
- **Co-create:** As a network, SAFIN works to connect institutions, initiatives and resources towards the goal of improved access to finance for agri-SMEs. In 2021, SAFIN facilitated stronger partnerships between Small Foundation and two African institutions that focus on agri-SME finance- the African Rural & Agricultural Credit Association (AFRACA) and the Uganda Agribusiness Alliance (UAA). During 2021, the recommendations from the IPF country pilots in India and Nigeria were undertaken by SAFIN members, ACCESS Development Services and AFEX Commodities Exchange (AFEX) respectively. In India, this resulted in approximately US\$13 million being earmarked by the State Government of Rajasthan for a programme to provide an improved variety of seeds to small farmers, support the establishment of millet processing units and establish a Center of Excellence on millet. In Nigeria, AFEX offered financing and processing support to ASPs that in turn provided input financing packages to 5,000 small farmers worth about US\$1.4 million. Following SAFIN's engagement in the Finance in Common Summit 2020, the Secretariat also continued to support the International Fund for Agricultural Development (IFAD) and Agence Française de Développement (AFD) in the establishment of the Platform for Green and Inclusive Food Systems in 2021. Finally, SAFIN also brokered collaboration between the Asian Farmers' Association for Sustainable Rural Development (AFA), the Global Agriculture and Food Security Program (GAFSP) and CARE International for the development of a potential financing facility for farmers' organizations in Asia and the Pacific.
- **Network development:** To better facilitate the member-led implementation model during SAFIN 2.0, the Secretariat developed a new tool for discovery of opportunities for collaboration and location of expertise in the network. SAFIN welcomed four additional members in 2021: Agricultural Cooperative Development International/Volunteers in Overseas Cooperative Assistance (ACDI/VOCA), AgDevCo, Setuka Partners and the SME Finance Forum. Early in the year, a new Steering Committee for the period of 2021-2023 was elected by the SAFIN membership to represent various communities such as farmers' organizations, donors and development finance institutions (DFIs), agribusiness companies and platforms, financial institutions and investors, as well as development partners and technical assistance providers. The Secretariat also added an in-depth Member Engagement Dashboard to its package of tools for monitoring and evaluation. This complete toolkit captures new collaborations taking place among SAFIN member institutions and engagement in network activities, thereby informing the evolution of network activities.

<b>South-South and Triangular Cooperation (SSTC)</b>					
<p>The China-IFAD SSTC Facility was established in March 2018 following a contribution of US\$10 million in Supplementary Funds from the People’s Republic of China (PRC) to the International Fund for Agricultural Development (IFAD). As the first Facility specifically dedicated to SSTC in IFAD, it has been a key driver of IFAD’s corporate agenda in SSTC; supporting investment in the mainstreaming themes of the organisation and complementing the Fund’s response to global crises. Now in its fourth year of implementation, the Facility is covering all five geographic regions where IFAD operates; with interventions reaching more than 30 countries through a portfolio of 17 funded projects.</p> <p>The Facility also fully aligns with the new SSTC Strategy which emphasizes increased mainstreaming of SSTC in the Fund’s operations to support partnership building, policy engagement, innovation and knowledge generation for rural transformation. Through the Facility’s Strategic Guidance Note revised in line with operational developments, the calls for proposals have defined priority areas that reflect IFAD’s engagement in development initiatives. This ensures complementarity with the Fund’s programme of loans and grants, and facilitates the integration of SSTC within on-going operations. As an example, in 2021, four new projects were approved to contribute to the COVID-19 crisis response, aligning with IFAD’s own initiatives to mitigate the effects of the pandemic. The projects will pilot the latest agricultural innovations to reach the most vulnerable rural poor through diversified forms of SSTC including promotion of digital platforms and tools - an essential part of the Fund’s support to the resilience and recovery of small-holder farmers and fisher folk.</p> <p>At the time of this report, among the seventeen approved projects, five projects have reached their completion dates and have entered the three-month closing stage. One project was cancelled. Therefore, 11 projects will be taken forward into 2022. To ensure the continued implementation of these projects and the fulfilment of their objectives, a 3-year extension of the completion date of the Supplementary Funds Agreement was approved in March 2021. Accordingly, the end date of the Agreement was amended to 31 December 2024.</p>
