## **Vue d'ensemble des fonds supplémentaires reçus, engagés et utilisés en 2023**

### **I. Introduction**

1. Les fonds supplémentaires<sup>1</sup>, qui comprennent les contributions au cofinancement de projets, à l'assistance technique et aux activités thématiques, jouent un rôle déterminant eu égard à l'ambition du FIDA d'élargir ses activités de rassembleur de financements au service du développement. Ils contribuent à l'élargissement du programme de travail intégré du FIDA et à l'augmentation de son impact, tout en permettant à l'institution de compléter ses ressources budgétaires par des honoraires de gestion.
2. Composante de plus en plus importante du financement du développement mondial, les financements à but spécifique (qu'on appelle « fonds supplémentaires » au FIDA) jouent un rôle clé et croissant dans le système des Nations Unies pour le développement et au sein des institutions financières internationales. Au cours des dernières années, la croissance de ces ressources a toujours été supérieure à celle du financement de base des organisations multilatérales et pourrait s'accroître davantage. Cependant, la part du financement à but spécifique dans le système des Nations Unies s'établit en moyenne à 50%. Au FIDA, bien que le portefeuille de fonds supplémentaires ait augmenté ces dernières années, la part de ces ressources reste bien plus faible.
3. La présente note fournit au Conseil d'administration des informations actualisées sur le portefeuille de fonds supplémentaires géré par le FIDA, et notamment sur les nouveaux fonds mobilisés en 2023, leurs bailleurs et les initiatives ou activités auxquelles ils ont été alloués. Des informations sont également communiquées au sujet du Programme des administrateurs auxiliaires, mais celui-ci n'est pas pris en compte dans l'évaluation d'ensemble ni dans les calculs.

### **II. Vue d'ensemble du portefeuille de fonds supplémentaires du FIDA en 2023**

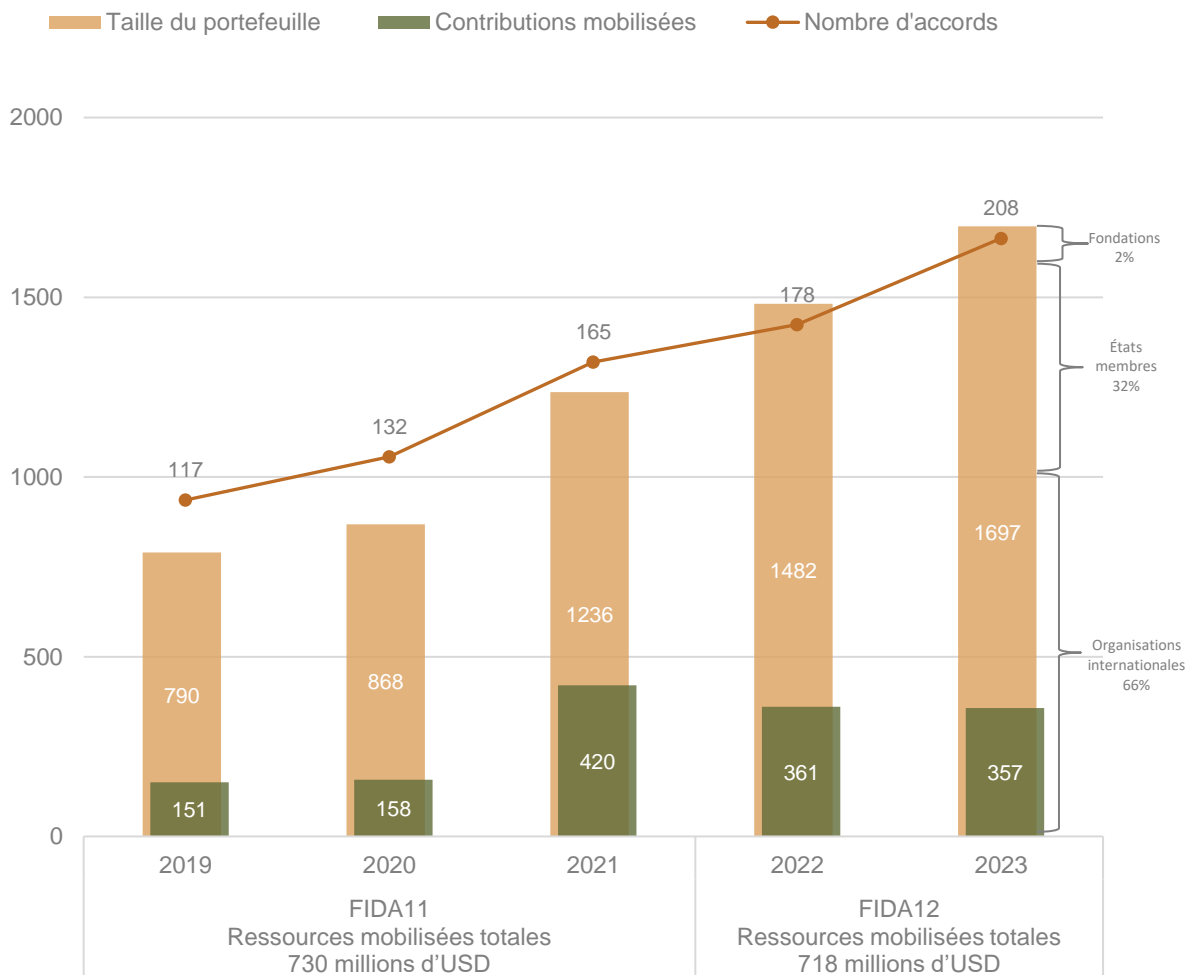

4. Le portefeuille des fonds supplémentaires a connu une forte croissance ces dernières années. La figure 1 donne un aperçu de l'évolution du portefeuille en cours entre 2019 et 2023, une période qui correspond aux cycles des Onzième et Douzièmes reconstitution des ressources du FIDA (FIDA11 et FIDA12); sont indiqués, pour chaque année, le volume du portefeuille, le nombre d'accords conclus et le montant des nouvelles contributions mobilisées. Le niveau des fonds supplémentaires mobilisés au cours des deux premières années de FIDA12 (718 millions d'USD) a augmenté de plus de 100% par rapport à la même période de FIDA11 (309 millions d'USD). Il en va de même de la taille du portefeuille total en cours, à savoir une augmentation de près de 100% du volume des ressources, et un accroissement de plus de 50% du nombre d'accords. Compte tenu des dernières tendances en matière de mobilisation, on s'attend à ce que le niveau des fonds supplémentaires mobilisés dans le cadre de FIDA12 atteigne environ 1 milliard d'USD.

---

<sup>1</sup> Les fonds supplémentaires sont des ressources destinées aux États membres en développement du FIDA qui sont reçues et administrées par le Fonds selon des conditions mutuellement arrêtées avec les donateurs. Ils sont fournis à des fins de financement et de cofinancement de projets, d'assistance technique, d'activités thématiques et de parrainage de participants au Programme des administrateurs auxiliaires du FIDA. En outre, le FIDA administre des fonds supplémentaires pour le compte de la Coalition internationale pour l'accès à la terre. Ces fonds proviennent notamment d'États membres, d'États non membres ou d'autres donateurs, tels que des organisations et des fonds internationaux, des entités du secteur privé et des fondations.

5. Au 31 décembre 2023, le portefeuille d'initiatives en cours financées par des fonds supplémentaires du FIDA, qui est analysé dans le présent rapport, était régi par 208 accords signés avec 28 États membres et leurs institutions, 19 organisations internationales et 6 fondations, pour un montant total de 1,697 milliards d'USD. Les donateurs ont financé 20 mécanismes, fonds d'affectation spéciale et initiatives multidonateurs; à l'heure actuelle, il existe en outre 97 accords de cofinancement pour des projets menés par le FIDA et 39 accords portant sur des initiatives thématiques à donateur unique. On trouvera dans les tableaux 1 et 2 de l'appendice des renseignements détaillés sur les donateurs et la liste de l'ensemble des accords.

Figure 1  
**Évolution de la taille du portefeuille entre FIDA11 et FIDA12**  
(en millions d'USD)

6. **Composition du portefeuille de fonds supplémentaires en cours - donateurs.** Au 31 décembre 2023, 66% du portefeuille de fonds supplémentaires en cours provenaient d'organisations et de fonds internationaux (1 113 million d'USD); 32% d'États membres (540,7 millions d'USD); et 2% de fondations (43 millions d'USD).
7. Comme le montre la figure 2, les fonds supplémentaires proviennent principalement des 5 fonds mondiaux pour l'action climatique et l'environnement (34% du portefeuille total ou 570,4 millions d'USD), le Fonds vert pour le climat (FVC) étant le plus grand contributeur parmi ces fonds (334,5 millions d'USD). Toutefois, si les fonds mondiaux sont pris séparément, le principal bailleur est la

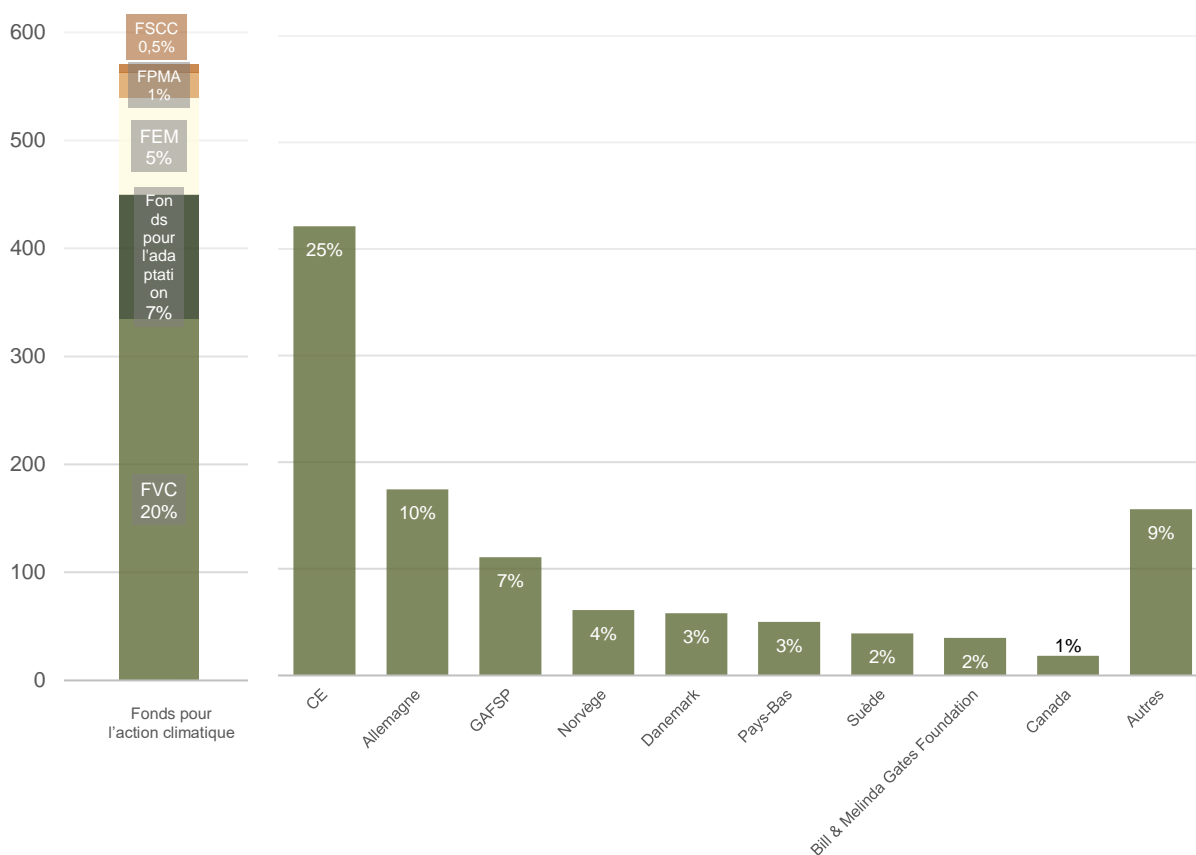

Commission européenne, représentant 25% du portefeuille total (une somme équivalant à 421,4 millions d'USD, dont 137,4 millions d'USD mobilisés en 2023).

8. L'Allemagne arrive au premier rang des États membres bailleurs de fonds supplémentaires, sa contribution représentant 10% du portefeuille en cours, soit 174,6 millions d'USD. Viennent ensuite la Norvège (4% du portefeuille ou 61,3 millions d'USD), le Danemark (58,4 millions d'USD), les Pays-Bas (50,3 millions d'USD), la Suède (39,4 millions d'USD) et le Canada (18,3 millions d'USD). S'agissant des fondations, la Fondation Bill & Melinda Gates Foundation a versé un total de 35,2 millions d'USD.
9. Quarante-huit pour cent du portefeuille de fonds supplémentaires du FIDA (1,54 milliard d'USD) ont été injectés par les 14 donateurs présentés dans la figure 2, y compris les 5 fonds mondiaux pour l'action climatique et l'environnement, et les 9% restants proviennent de 39 donateurs (156 millions d'USD).

Figure 2

**Principaux bailleurs de fonds supplémentaires au 31 décembre 2023**

(en millions d'USD et en % du total)

FSCC : Fonds spécial pour les changements climatiques; FPMA: Fonds pour les pays les moins avancés; FEM: Fonds pour l'environnement mondial; FVC: Fonds vert pour le climat; GAFSP: Programme mondial sur l'agriculture et la sécurité alimentaire.

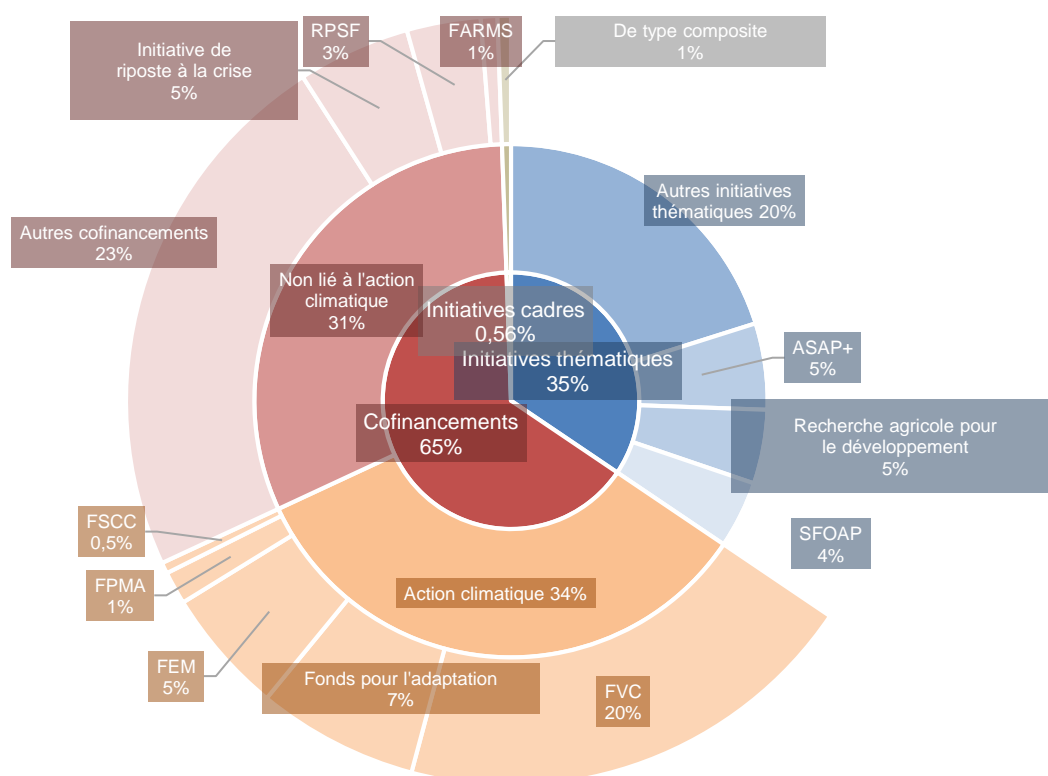

10. **Composition du portefeuille de fonds supplémentaires en cours – objectif et priorités.** Les fonds supplémentaires jouent un rôle de plus en plus important dans le programme de travail du FIDA et financent également dans une large mesure les initiatives thématiques. Ils sont alignés sur le mandat, le cadre relatif à l'efficacité du développement et les stratégies de pays et thématiques du FIDA. Ils contribuent à l'obtention d'un ratio de cofinancement de 1:1,5 (cible fixée dans le cadre de FIDA12) et financent des priorités institutionnelles telles que le Programme de participation du secteur privé au financement (PPSPF), le Programme élargi d'adaptation de l'agriculture paysanne (ASAP+) et d'autres

domaines thématiques tels que la coopération Sud-Sud et triangulaire (CSST), les peuples autochtones, la jeunesse, la nutrition, l'égalité femmes-hommes, l'innovation et la participation à l'élaboration des politiques.

11. En 2023, 65% (1,10 milliard d'USD) des fonds supplémentaires ont été alloués au cofinancement des investissements du FIDA, et plus de 50% de ces ressources étaient destinées à des projets visant à atténuer les effets des changements climatiques. Comme le montre la figure 3, le cofinancement de l'action climatique au moyen de fonds supplémentaires provenant de fonds mondiaux pour l'action climatique et l'environnement a représenté 34% (570,4 millions d'USD) du portefeuille total. Des fonds supplémentaires ont également été alloués au cofinancement d'actions ou de projets non liés à l'action climatique: i) les répercussions de la guerre en Ukraine; ii) les projets menés au titre du Mécanisme pour les réfugiés, les migrants et les déplacés forcés, en faveur de la stabilité rurale (FARMS) au Proche-Orient et en Afrique du Nord; iii) la sécurité alimentaire, la nutrition et le renforcement de la résilience pour stimuler la production et la productivité agricoles financés par le Programme mondial sur l'agriculture et la sécurité alimentaire; iv) d'autres domaines tels que l'agroécologie, les services financiers inclusifs, le développement de filières et l'accès aux marchés.

Figure 3

**Utilisation du portefeuille de fonds supplémentaires au 31 décembre 2023**

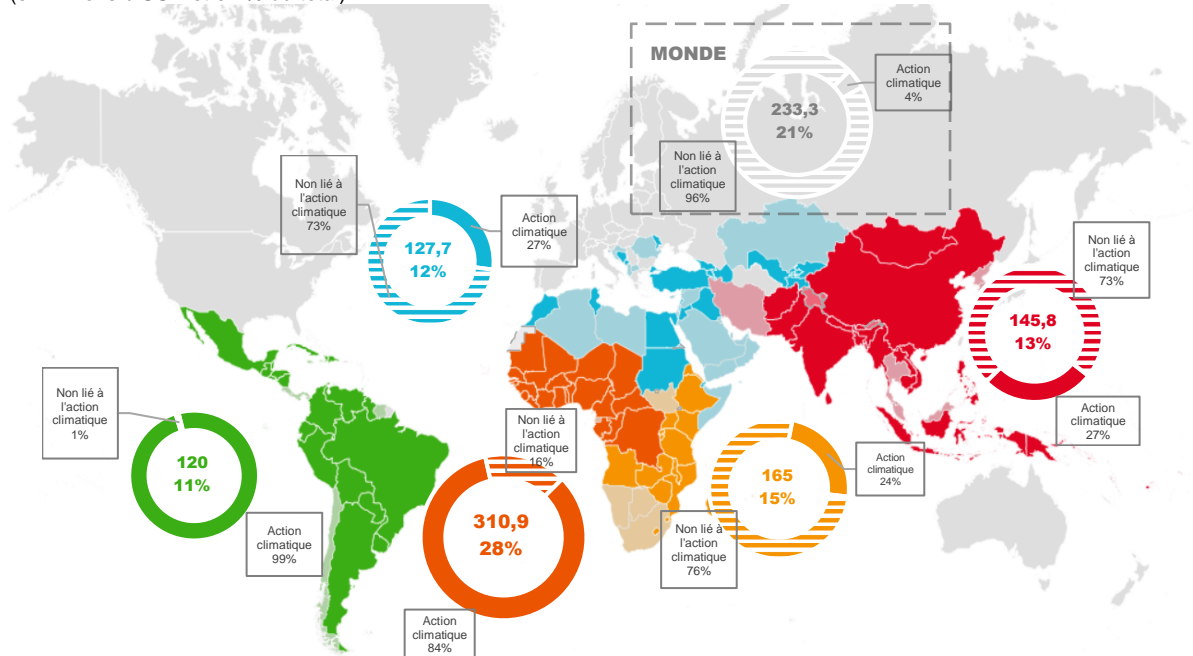

SFOAP: programme d'appui aux organisations paysannes en Afrique; RPSF: Mécanisme de relance en faveur des populations rurales pauvres

12. À l'heure actuelle, plus de 40% des fonds supplémentaires destinés au cofinancement servent à appuyer des investissements dans des pays d'Afrique subsaharienne. La figure 4 donne un aperçu de la répartition régionale des fonds supplémentaires destinés au cofinancement. La répartition entre cofinancements liés ou non à l'action climatique varie d'une région à l'autre. En Afrique subsaharienne, 28% des fonds servent à financer des investissements en Afrique de l'Ouest et du Centre et 15%, en Afrique orientale et australe. En outre, 13% des fonds ont été alloués à des investissements dans la région Asie et Pacifique; 12%,

au Proche-Orient, en Afrique du Nord et en l'Europe; et 11%, en Amérique latine et dans les Caraïbes. Les 21% restants financent des initiatives régionales multidonateurs comme le Mécanisme de relance en faveur des populations rurales pauvres et l'Initiative de riposte à la crise. En ce qui concerne les fonds alloués à l'action climatique et à l'environnement, l'accent a été mis sur les investissements du FIDA en Afrique de l'Ouest et du Centre (50% du cofinancement pour l'action climatique), en Amérique latine et dans les Caraïbes (22% du cofinancement pour l'action climatique) et au Proche-Orient et en Afrique du Nord (16% du cofinancement pour l'action climatique).

Figure 4

**Répartition régionale<sup>2</sup> des fonds supplémentaires destinés au cofinancement de projets du FIDA**  
(en millions d'USD et en % du total)

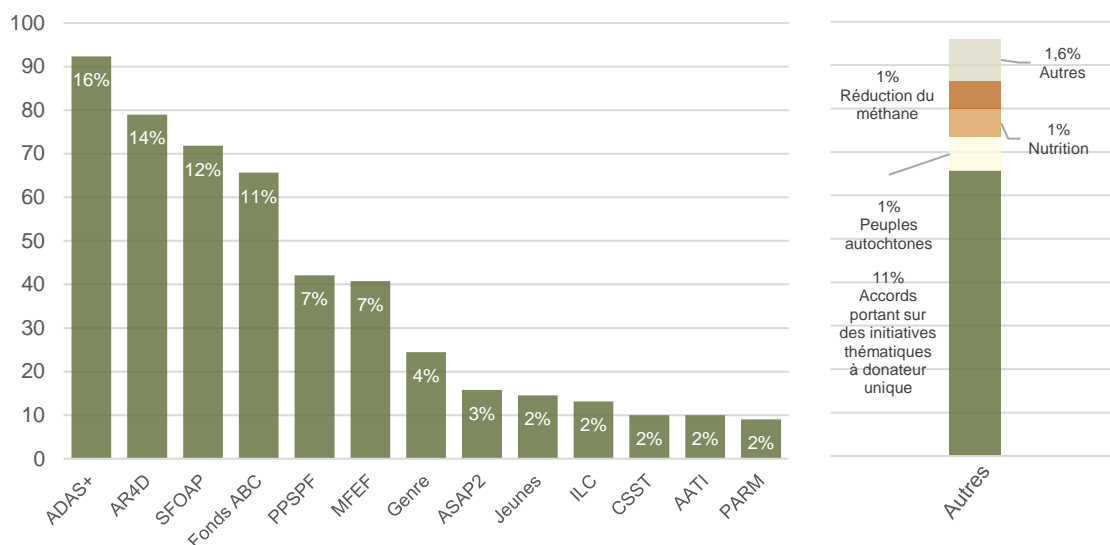

13. Les fonds supplémentaires destinés à appuyer des initiatives thématiques, des initiatives multidonateurs et des initiatives cadres représentent 35% (594,1 millions d'USD) du portefeuille. Ces initiatives complètent et étendent, directement et indirectement, l'impact du programme de prêts et dons du FIDA. Celles qui sont axées sur l'environnement et les changements climatiques, l'égalité femmes-hommes, la nutrition et les jeunes renforcent la mise en œuvre des thématiques transversales du Fonds et permettent d'intégrer ces dimensions dans les programmes de pays. En outre, ces ressources permettent au FIDA de renforcer la concertation avec les peuples autochtones et les organisations paysannes et sont essentielles à la réalisation de ses activités novatrices dans le domaine de la finance rurale, dans les zones touchées par un conflit et dans la recherche en faveur du développement rural.
14. La figure 5 résume l'orientation thématique de l'utilisation des fonds supplémentaires du FIDA: i) 92,3 millions d'USD pour l'ASAP+ et 15,8 millions d'USD pour le guichet ASAP2 du Programme pour la résilience du monde rural (PRMR); ii) 79 millions d'USD pour la recherche agricole pour le développement

<sup>2</sup> Les cartes figurant sur le site web du FIDA sont établies par l'unité chargée du système d'information géographique (SIG) et ont une valeur strictement indicative. Les limites, couleurs, appellations et autres détails figurant sur ces cartes ne correspondent pas à une quelconque prise de position du FIDA quant au statut juridique d'un territoire ou au tracé de ses frontières.

(AR4D) par l'intermédiaire du Groupe consultatif pour la recherche agricole internationale (GCRAI); iii) 71,8 millions d'USD pour l'appui aux organisations paysannes; iv) 65,6 millions d'USD pour le Fonds d'investissement pour l'entrepreneuriat agricole (Fonds ABC); v) 42,1 millions d'USD pour le PPSPF; vi) 40,8 millions d'USD pour le Mécanisme de financement pour l'envoi de fonds (MFEF); vii) 24,5 millions d'USD pour les activités du FIDA sur l'intégration des questions de genre et les initiatives de nature à transformer les rapports femmes-hommes; viii) 14,5 millions d'USD pour les initiatives en faveur des jeunes; ix) 13,1 millions d'USD pour la Coalition internationale pour l'accès à la terre (ILC); x) 10 millions d'USD pour la CSST; xi) 10 millions d'USD pour l'Initiative de transformation de l'agriculture en Afrique (AATI); xii) 9,1 millions d'USD pour la Plateforme pour la gestion des risques agricoles (PARM); xiii) les 96 millions d'USD restants pour diverses autres initiatives thématiques, notamment les activités du Fonds concernant les peuples autochtones, la réduction des émissions de méthane et la nutrition, ainsi que la Plateforme mondiale des donateurs pour le développement rural (GDPRD) et le Réseau de financement et d'investissement en faveur des PME agricoles et de l'agriculture paysanne (SAFIN), dont les équipes travaillent dans les locaux du FIDA.

Figure 5

**Répartition des fonds supplémentaires alloués à des initiatives mondiales et thématiques**  
(en millions d'USD)

Note: AR4D = recherche agricole pour le développement

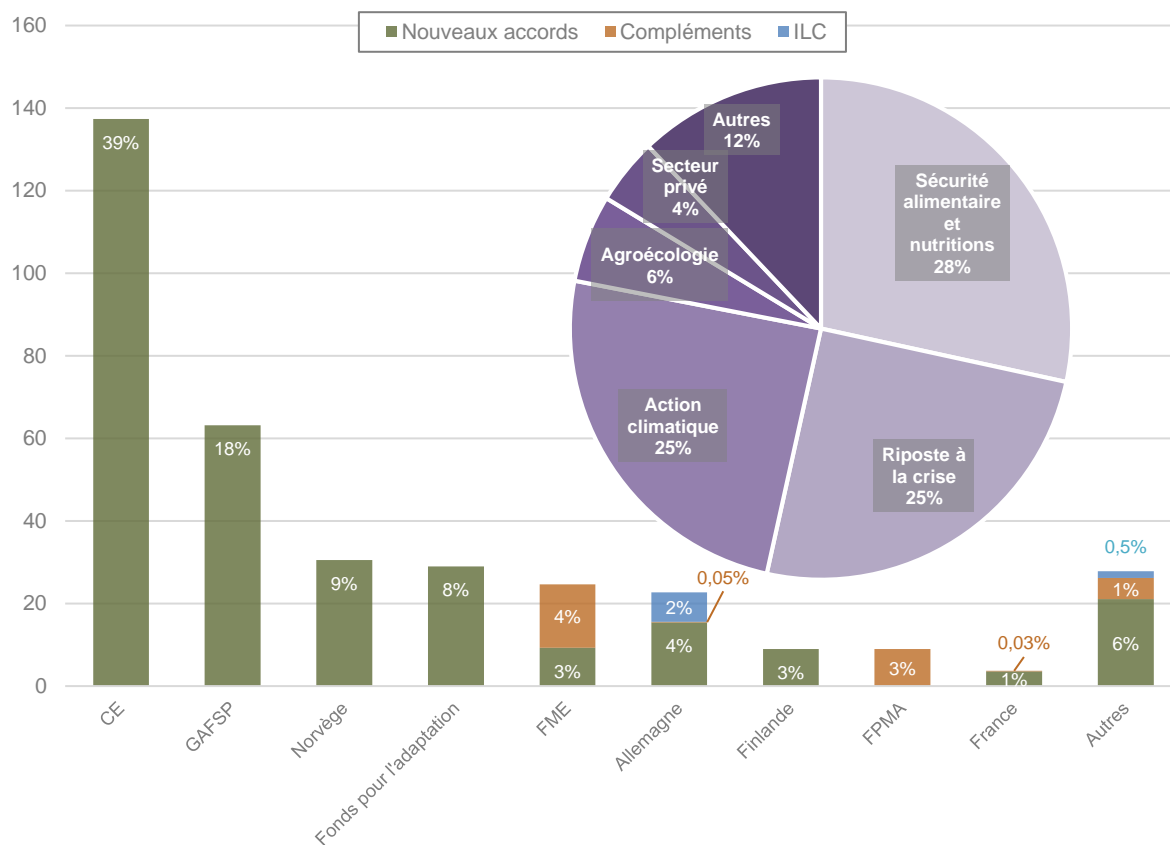

15. **Les mobilisations de fonds supplémentaires en 2023.** En 2023, le FIDA a signé 51 nouveaux accords relatifs à des fonds supplémentaires, 10 accords portant sur des compléments, 7 accords relatifs à des fonds supplémentaires au nom de l'ILC et 9 accords relatifs au Programme d'administrateurs auxiliaires, pour un montant total de 357 millions d'USD. Ces accords ont été signés avec 18 États membres, 10 organisations et fonds internationaux, y compris des fonds mondiaux pour l'action climatique et l'environnement, et 4 fondations. Six nouveaux donateurs ont effectué une contribution au cours de l'année: l'Autorité arabe pour les investissements et le développement agricoles, Landesa, Tenure Facility, ONU-Femmes, Wellspring Facility et le Global Methane Hub. On trouvera au tableau 3 de l'appendice des précisions sur les accords signés, y compris sur les donateurs, les programmes financés et le montant des contributions.
16. **La mobilisation de fonds supplémentaires est restée sur une trajectoire ascendante en 2023,** une tendance qui confirme que de nombreux États membres et autres partenaires de développement considèrent le FIDA

comme un partenaire apprécié et digne de confiance avec lequel ils peuvent collaborer dans divers domaines prioritaires liés à son mandat principal.

17. Comme le montre la figure 6, les nouveaux fonds proviennent principalement de la Commission européenne, qui a apporté au total 137,4 millions d'USD en fonds supplémentaires, soit 39% des fonds mobilisés, pour appuyer les activités du FIDA en Éthiopie, au Kenya et au Pakistan, et pour atténuer les effets des crises provoquées par la guerre en Ukraine. Les autres contributeurs importants sont le GAFSP, la Norvège et le Fonds pour l'adaptation, avec respectivement 63,2 millions d'USD (18% du montant total des nouveaux accords signés), 30,6 millions d'USD (9%) et 29 millions d'USD (8%).
18. Sur la totalité des nouveaux accords relatifs à des fonds supplémentaires signés en 2023, 76% des ressources ont été fournies par des organisations internationales, 23% par des États membres du FIDA et le 1% restant par des fondations.
19. Cinquante pour cent des fonds mobilisés étaient destinés à cofinancer les investissements du FIDA; 47%, à appuyer différentes initiatives thématiques; 2%, à appuyer les activités de l'ILC (qui est installée dans les locaux du FIDA); et 1%, au programme des administrateurs auxiliaires. Des accords relatifs à des fonds supplémentaires ont été signés pour appuyer des activités novatrices dans des domaines thématiques allant de l'agroécologie aux envois de fonds, en passant par des initiatives visant à ouvrir les marchés du carbone et à réduire les émissions de méthane. En outre, le PPSPF a reçu un appui financier supplémentaire de l'Allemagne d'un montant de 15,2 millions d'EUR. Le GDPRD, qui est installé dans les locaux du FIDA depuis 2010, a reçu des contributions de l'Allemagne, de la Finlande, de la France, de l'Irlande, des Pays-Bas, de la Suisse et de la Bill & Melinda Gates Foundation.
20. Des accords relatifs à des fonds supplémentaires destinés au cofinancement ont été signés avec le GAFSP pour renforcer la sécurité alimentaire, la nutrition et la résilience au Bangladesh, au Burkina Faso, au Lesotho, au Tchad, au Togo et au Yémen; avec les fonds mondiaux pour l'action climatique et l'environnement pour la réalisation de programmes d'adaptation aux changements climatiques et d'atténuation de leurs effets au Congo, en Indonésie, au Monténégro, en Somalie et au Viet Nam. En outre, une part importante des contributions mobilisées pour le cofinancement en 2023 était également destinée à soutenir les activités du FIDA visant à atténuer les effets des crises provoquées par la guerre en Ukraine, la Commission européenne et la Norvège ayant versé 89 millions d'USD.
21. Le Conseil d'administration du FIDA a collaboré avec les États-Unis pour mettre en œuvre l'initiative Vision for Adapted Crops and Soils (VACS, Vision pour les cultures et sols adaptés) en tant que pilier du fonds fiduciaire du Programme pour la résilience du monde rural, en vue de financer des activités novatrices d'adaptation agricole. Les États-Unis se sont engagés à verser 50 millions d'USD en faveur de cette initiative, somme qui sera reçue en 2024 et qui n'est donc pas visée par la présente évaluation.

Figure 6  
**Fonds mobilisés en 2023 – contributeurs et secteurs**  
(en millions d'USD)

22. Le FIDA a reçu des fonds totalisant 249,5 millions d'USD au titre de nouveaux accords ou d'accords en cours en 2023 (on trouvera des précisions à cet égard dans les tableaux 4 et 5 de l'appendice).
23. **Programme des administrateurs auxiliaires.** Les fonds supplémentaires financent également le Programme des administrateurs auxiliaires. Le FIDA comptait 27 salariés participant à ce programme à la fin de l'année 2023, parrainés par les États membres suivants: Allemagne (3), Chine (5), Corée (1), Danemark (1), Finlande (1), France (2), Italie (4), Japon (4), Pays-Bas (3), Suède (1) et Suisse (2). Dix-neuf d'entre eux travaillent au siège et huit sur le terrain, au Bangladesh, en Côte d'Ivoire, en Égypte, au Ghana, en Inde et au Kenya.

### III. Conclusions

24. Pour mobiliser davantage de fonds supplémentaires, le FIDA doit renforcer sa capacité à réunir, à gérer et à distribuer ces ressources de manière efficiente et efficace, en gérant les risques et en veillant à ce qu'il existe une correspondance étroite entre les fonds et son mandat et ses priorités, et à ce qu'ils soient intégrés dans ses principales activités. C'est pourquoi, ces dernières années, le FIDA a investi dans diverses réformes visant à renforcer la mobilisation et la gestion des fonds supplémentaires et à faire de ceux-ci le troisième pilier de la mobilisation des ressources, notamment l'établissement d'un cadre stratégique pour la mobilisation et la gestion des ressources supplémentaires et la clarification des rôles et des responsabilités en matière de gouvernance.
25. Pour s'assurer que sa position stratégique dans le cadre de ses activités de mobilisation de ressources reste solide, le FIDA doit continuer à renforcer son

programme de ressources supplémentaires; à cette fin, il doit: i) renforcer la concertation structurée avec les États membres et les autres partenaires de développement clés sur les priorités triennales en matière de mobilisation de ressources supplémentaires; ii) élaborer des modalités et des procédures pour les ressources supplémentaires autres que les dons; iii) renforcer son approche de la gestion des fonds fiduciaires et des initiatives multidonateurs; iv) renforcer la structure organisationnelle et institutionnelle et les capacités nécessaires à la mobilisation et à la gestion de ces ressources.

Donor	IFAD Multi-donor programmes related current agreements	Start Date of Agreement	End Date of Agreement	Total value - Agreement	Received as at 31/12/2023
<b>African Agricultural Transformation Initiative (AATI)</b>					
<p>The African Agricultural Transformation Initiative (AATI) is an initiative co-founded by the International Fund for Agricultural Development (IFAD), the Bill &amp; Melinda Gates Foundation (BMGF), the Alliance for a Green Revolution in Africa (AGRA), McKinsey &amp; Company and is hosted by IFAD.</p> <p>The AATI seeks to establish new (and strengthen existing) national agencies designed to support delivery of agricultural transformation policies and programmes, with the support of a central AATI unit. In addition to the Central Unit, the AATI include Steering Committee (SC) and an advisory board that will provide support and guidance. The initiative is expected to achieve three primary outcomes: (i) More inclusive, efficient, effective and impactful support provided to rural producers in flagship priority areas; (ii) Improvement of institutional capacity and capability in governments, and (iii) increased awareness and knowledge dissemination on success models, tools and approaches to agriculture.</p> <p>With regards to country engagements, the AATI had engaged with and held inception missions to Malawi, Senegal, Ghana, Kenya, Tanzania, Sierra Leone and Nigeria. Subsequently, AATI's SC has endorsed the setting up of Agriculture Transformation Offices (ATO's) in Tanzania and Sierra Leone. With regard to Tanzania, the AATI's support responded to two distinct requests by the Government: The establishment and operationalization of an Agriculture Transformation Office (ATO) and the design of an Agriculture Master Plan (AMP) to guide the transformation agenda. Following the co-designed project document, the ATO Tanzania was officially launched on September 5, 2023, during the AGRF in Dar es Salaam, Tanzania, by Honourable Hussein Mohammed Bashe, Minister of Agriculture, Honourable Abdallah Ulega, Minister of Livestock and Fisheries, and Ms. Boly, Executive Director of AATI, marking the culmination of dedicated efforts. Aligned to the guidance received by the Government, the first phase of recruiting personnel for the ATO in Tanzania has been completed. The Director came onboard in January and 9 consultants have been recruited since March 2024. The co-design of the Agriculture Master Plan (AMP) followed a consultative process with the final high-level validation of 15 flagships and the prioritization of the commodities. The co-design process and the handover of the AMP was concluded in March 2024. With regard to Sierra Leone, the organizational chart of the ATO, based on the six pillars of the Feed Salone strategy, has been endorsed by the Ministry in December 2023, and the organigram and related budget was approved by AATI SC members. The ATO vacancies have been published and the recruitment process is ongoing and expected to be finalized within the coming months (May - June 2024).</p> <p>The AATI received two formal support requests from Nigeria in 2023: one from the Senior Special Assistant to the President on Agribusiness and Productivity Enhancement, and another from the Federal Ministry of Agriculture and Food Security (MoAFS). Following Steering Committee approval, an introductory mission in February 2024 aimed to understand the needs and the agricultural transformation context. The Government showed interest in establishing an Agricultural Transformation Office, however, the immediate priority lies in mitigating the pressing food security crisis, which if addressed could serve as the foundation on which a pathway for agricultural transformation can be built. The Vice President's office requested support for a Food Security War Room (FSWR). Subsequently, a team of consultants has been deployed to assist in the set-up and operationalization of the FSWR for a period of 4 months. Based on the learnings from the FSWR establishment, MoAFS requested broader support, including continued FSWR support, facilitate the development of the Ministry's strategic framework, establishment of a robust coordination mechanism, design and deployment of an implementation architecture and formulation and activation of a strategic communication plan.</p> <p>As part of the Initiative's partnership efforts, IFPRI supported the work during the diagnostic phase of the AMP in Tanzania by utilizing the Rural Investment and Policy Analysis (RIAPA) data and modeling system, which serves as its primary tool for forward-looking, economy-wide country-level analysis. This system acts as a simulation laboratory for testing policies, investments, and economic shocks. RIAPA assists policymakers in gaining a deeper understanding of the trade-offs linked to policy and investment decisions. It acknowledges that not all policies or investments yield uniform effectiveness and efficiency in achieving development outcomes, often resulting in both winners and losers simultaneously.</p>					

<sup>3</sup> Includes ongoing agreements at all stages from signature to completion in 2023.

Moreover, the AATI has commenced preparations for a side event scheduled for the margins of the AFS in September 2024 in Kigali, Rwanda. The Initiative will organize a Fireside Chat focused on approaches to fostering agricultural and food systems transformations. This discussion will highlight the importance of appropriate delivery infrastructure and identifying catalytic points to foster agriculture transformation involving the Ministers of Agriculture from countries such as Tanzania, Sierra Leone, and Nigeria, along with another segment featuring the ATO directors. Moreover, the AATI explored potential partnership opportunities with organizations such as AATF, GIZ, AfDB, USAID and IsDB.

In line with its mandate, the Initiative adds an important value to the activities of its founding partners including IFAD, by creating and supporting agricultural delivery infrastructures which strongly contributes to improved agricultural transformation in Sub-Saharan Africa. Within this framework, the Initiative :

- Acts as a catalyst and contributes to the positioning of agriculture transformation as the main driver of economic growth, job creation and poverty alleviation in Africa;
- Contributes to sustainable agricultural interventions;
- Through improved systems, facilitates a wide range of partnerships and resources to the countries it supports;
- Participates in the design and testing of new tools essential to agricultural transformation.

The AATI initial budget for 5 years is \$23,061,239. Of this amount, \$12,000,000 have been secured (\$10,000,000 from BMGF and \$2,000,000 from IFAD) and \$11,061,239 represents the resource gap to be mobilized. So far, US\$6,011,090 of this amount was received from BMGF and US\$2 000 000 from IFAD. In addition, McKinsey & Company provided a substantial in-kind contribution which includes on-the-ground support in Tanzania of the diagnostic phase. The Initiative is hosted and administered by IFAD and is financed through a Trust Fund created in IFAD to receive additional contributions.

While the year 2022 marks the launch of the Initiative and its engagements with piloted countries, the year 2024 mark so far stronger continued engagements in countries such as Tanzania and Sierra Leone while continuing to build relationships in Nigeria.

<b>Bill &amp; Melinda Gates Foundation</b>	BMGF contribution to African Agricultural Transformation Initiative (AATI) Government Capacity Support	07-10-2021	31-12-2025	10 000 000	6 011 090

Donor	IFAD Multi-donor programmes related current agreements	Start Date of Agreement	End Date of Agreement	Total value - Agreement	Received as at 31/12/2023
<b>Agribusiness Capital Fund (ABC Fund)</b>					
<p>The ABC Fund serves to invest in smallholder organizations and rural agricultural businesses to preserve existing jobs and generate new rural employment opportunities and growth. It complements IFAD's work by supporting private sector enterprises directly through the provision of investments in selected entities operating within agriculture value chains that are broadly supported by IFAD projects via public types of interventions. The ABC Fund provides loans, and, in time, equity investments adapted to the needs of rural SMEs, farmers 'organizations, agri-preneurs and rural finance institutions. The Fund was launched as a private fund regulated under Luxembourg law on 12 February 2019.</p>					
<p>Luxembourg was the first supporter of this initiative, providing a contribution of EUR 5 million in December 2017. In December 2018, the European Union made a commitment of EUR 45,750,000 in support of the Financing Instruments and the Autonomous Technical Assistance of the Instrument. An initial EUR 20 million was invested in 2019 by the European Union with IFAD acting on its own name and on account of the European Union holding these shares. The last instalment of EUR 20,000,000 was split into two equal tranches of EUR 10,000,000 each (which have now become the second and third tranches) upon approval of an amendment to the Funding Agreement in 2022. The amendment was executed in May 2022 and disbursement of the 2nd tranche was made in December 2022. The 3rd tranche of EUR 10,000,000 is still outstanding, and its disbursement remains tied to the successful fundraising of a corresponding total of EUR 10,000,000 in A, B and/or C Shares and/or notes. In February 2019, IFAD acting in its own name but on behalf of and on the account of the State of the Grand Duchy of Luxembourg subscribed shares with a nominal value of EUR 4.475 million. Supported by financing received from the Swiss Agency for Development and Corporation, IFAD made an equity investment in ABC Find with a nominal value of EUR 8.419 million. This was an investment subscribed on 24 June 2020. An important milestone achieved was the subscription in December 2021 of the first private sector investment through the purchase of B shares in the amount of US\$5 million by Bank of America (BoA).</p>					
<p>Within an evolving context generated by post COVID economic volatility and the Ukraine crisis, the ABC Fund approved in 2023 a total of 9 projects for an amount of EUR 12.4 million. The portfolio outstanding also stabilized at EUR 30.2 million compared to EUR 31.6 million at EOY 2022. Information provided by the Fund Manager Bamboo Capital Partners indicates that the ABC Fund continued to demonstrate significant outreach and development results. To date, the ABC Fund has impacted 724,764 small farmers of which 442,553 were female farmers and 269,303 youth. ABC Fund investments also have sustained 3,495 permanent rural jobs, 46% of which have gone to women and 72% have gone to youth. Likewise, as of 31 December 2023, the ABC Fund has invested in 33 investees cumulatively since inception, including 4 farmer cooperatives, 14 agricultural SMEs and 15 financial intermediaries. It also increased its geographic expansion across its portfolio, adding two new countries to its active portfolio and investing in a total of 12 countries globally since inception.</p>

<b>Agricultural Research for Rural Development (AR4D)</b>					
<p>AR4D has been a strategic area for collaboration between the European Union (EU) and IFAD since 2007. Initially, IFAD was channelling EU core support to CGIAR and in 2010, EU began to support specific projects designed with IFAD under the global approved CGIAR Research Programmes. In the recent past, this support has expanded to include other research institutions.</p> <p>in total, the EU provided a total contribution, to the AR4D programmes of about EUR 272.5 million (based on my calculation it is 289.65 if we include all programmes managed by AR4D). In 2023, there were three programmes being implemented, these are as follow:</p> <p>1. The Putting Research into Use for Nutrition, Sustainable Agriculture and Resilience, commenced in 2015 comprising nine (9) projects implemented by CGIAR institutes and one by INBAR. Three more projects were supported in 2018 under top up financing with the total financing of all 13 projects coming to EUR 30 million. IFAD provide an additional and parallel financing to the programme in the amount of USD 9 million). The programme was completed in May 2024 and closed in December 2024</p> <p>The objective of the programme was to develop and test innovative approaches that impact positively on the livelihoods, nutrition or resilience of pilot rural communities and smallholder farmers and to generate lessons for scaling up. Details of achievements of the programme were detailed in the 2 following publications posted in IFAD webpage: <a href="#">PRUNSAR Catalogue of Innovations</a>; <a href="#">PRUNSAR Knowledge Directory</a></p> <p>PRUNSAR achieved its objectives to put research into use at scale in sustainable agricultural systems with large potential impacts on nutrition and resilience: At least 319,000 smallholder producer households in 30 countries received advisory services, participated in co-creation, testing and validation innovative solutions, and used new approaches or technologies; over 40 pieces of evidence proving adoption of new practices leading to improved food security or nutritional outcomes were produced; Over 126 approaches or new technologies were scaled up (or ready for scale-up) by national systems; over 9 food groups were introduced to target populations and 5 biofortified crops were promoted and At least 266 publications were produced</p> <p>2. In 2019 the Comprehensive Africa Agriculture Development Programme (CAADP) ex-Pillar IV was launched which is being implemented by ASARECA, AFAAS, CCARDESA, CORAF and FARA i.e. the five Africa regional and sub-regional Research and extension organisations.</p> <p>The focus of CAADP XP4 is to strengthen the architecture and governance of ASARECA (Association for Strengthening Agricultural Research in Eastern and Central Africa), AFAAS (African Forum for Agricultural Advisory Services), CCARDESA (Centre for Coordination of Agricultural Research and Development for Southern Africa), CORAF (West and Central African Council for Agricultural Research and Development) and FARA (Forum for Agricultural Research in Africa), enabling them to effectively support national agricultural research and innovation systems as well as extension services, in order to enhance the performance of these systems in contributing to the achievement of national agricultural development goals and targets.</p> <p>Total funding for the programme is EUR 30 million and it is supported as part of the Development Smart Innovation through Research in Agriculture (DeSIRA) Framework of the EU. DeSIRA aims at supporting research and innovation projects in Africa, Asia and Latin America.</p> <p>To date capacity strengthening activities have enhanced the effectiveness of the five organizations , strengthening linkages amongst them as well as with their respective authorising bodies i.e. RECs, AUC and AUDA. It also enabled them to attract additional resources of about USD 26m, thereby extending the scope of the programme’s impact. Other outstanding results achieved by CAADP organisations include; 30 policy dialogues, 21 joint activities, 58 multi-stakeholder partnerships and 53 innovation platforms. A total of 67 partner institutions were influenced through periodic meetings on climate-smart agriculture (CSA). While the capacity of 52 experts was</p>					

strengthened through Knowledge Management for Agricultural Development (KM4AgD) challenges and these certified KM experts, in turn, developed KM strategies and policies for their countries and organisations. Furthermore 276 knowledge products were produced by the organisations.

Notable successes that underscore the effectiveness of the CAADP-XP4 program's strategies and interventions were reported, for example: in Senegal and Cameroon, sustainable agricultural practices and resilient crop varieties were integrated into programs to address climate change. CORAF played a key role in providing enhanced training to farmers and local experts in CSA and agroecological practices in WCA, significantly boosting their capacity to cope with environmental challenges. It also included promoting women's empowerment through support to cooperatives and inclusion in agribusiness training programs. Another major achievement was the significant capacity-building of the AFAAS secretariat. AFAAS, through its country Fora, has developed a strong advocacy system and is able to dialogue with the government and influence policy effectively.

3. The operations of the Agroecological TRANSITIONS programme began in 2022 with the objective to better align policy, investment, and technical support to climate-informed agroecological transitions by farmers in Ethiopia, Kenya, India, Vietnam, Peru, Brazil, Burkina Faso, Ghana, Brazil and Colombia. The transition toward agroecology is being catalysed through the development and adoption of holistic metrics of food and agricultural systems performance (ICRAF); inclusive digital tools (CIAT); transparent mechanisms to engage private sector engagement and foster investment through suitable systems of incentives (Bioversity); and decision support tools for improved nutrition and sustainable jobs for food system transformation in selected city-regions (University of Ireland Galway). Therefore, the programme consists of four projects with total funding of EUR 11.5 million.

In 2023, ICRAF performed an extensive systematic review of over 8,740 articles, catalogued more than 10,000 metrics, and developed a meta-framework for holistic systems assessments, which will support the design of sustainability metrics beyond the farm scale. They also engaged with 73 stakeholders across five countries, forming partnerships to integrate biodiversity and social metrics into existing tools.

The CIAT-led Inclusive Digital Tools project achieved significant milestones by developing an API for integrating the SECTOR rice carbon calculator and the FarmMore app in Vietnam, aiding farmers in sustainable practices and performance monitoring. Additionally, in Brazil, the Solis app was created to enhance communication between farmers and extension staff for improved climate-resilient agroecological management.

The Private Sector Incentives and Investments project led by Bioversity focused on scaling agroecological practices through private and public sector incentives, enhancing supply chain traceability in Peru, Vietnam, and Ethiopia. They conducted thorough reviews of company sustainability reports and stakeholder interviews, developed a database of private sector companies, and promoted multi-stakeholder platforms for policy engagement.

The EcoFoodSystems project led by Galway University, despite initial delays, advanced in team setup, stakeholder workshops, and country analysis. They focused on survey design, data collection, and life cycle analysis in Ethiopia, Vietnam, and Colombia, targeting food supply chain resilience and socially inclusive job opportunities, with plans to accelerate activities in the latter half of 2024.

<b>Crisis Response Initiative (CRI)</b>					
<p>Launched in May 2022, CRI is an initiative to channel grant resources to protect productive livelihoods from the impact of the current crisis on agricultural input, food and fuel markets and prices, while at the same time allowing small-scale rural producers to benefit from new local market opportunities that may result from the crisis. Designed to protect and support development impact gains and progress in building resilience, the CRI builds on the lessons learned in the context of the Rural Poor Stimulus Facility (RPSF), whose results are being embedded into our longer-term work. Its activities are, therefore, strongly complementary to IFAD's programme of work, as they address needs and implement activities directly anchored in it.</p> <p>The CRI focuses on four pillars: i. Ensuring small-scale farmers, fishers and livestock producers have affordable access to inputs such as breeding stock, seeds, fodder, fuel, fertilizer, and technology; ii. Improving food systems and production by investing in small-scale infrastructure to improving productive capacity and reduce post-harvest losses.</p> <p>The CRI approved projects will be implemented in 16 countries: Somalia, Yemen, Afghanistan, Ethiopia, Mozambique, Haiti, Madagascar, Burundi, Eritrea, the Central African Republic (CAR), Malawi, Mali, Niger, Chad, Uganda, and The Gambia. Projects have a budget between US\$ 3.0 up to US\$ 10.0 million. Out of the 16 country projects, 11 projects are implemented by the Government through an IFAD anchor project and 4 projects are implemented through a third party implementor (NGO or Rome Based Agency). Out of the 16 countries, 8 countries will undergo a Rapid Assessment, in the spirit of continued commitment to learn from our operations in crisis and post-crisis situations.</p>

<b>Enhanced Adaptation for Smallholder Agriculture Programme (ASAP+)</b>								
<p>The Adaptation for Smallholder Agriculture Programme (ASAP1) was launched in 2012 to enhance the resilience of smallholder farmers to climate change. The programme has recently received commendation for its performance and impact in the Programme Completion Review by FCDO (UK) released in 2023. ASAP's investments have helped build the climate resilience of 6.8 million smallholder farmers in developing countries across the world. Against the current backdrop of growing climate impacts, widespread conflict and COVID-19 response and recovery, ASAP is as – if not more – relevant and urgent today. Building upon the success and lessons of ASAP1, ASAP+ focuses on addressing the current and projected climate change drivers of food insecurity by building multi-dimensional resilience among poor rural producers and vulnerable communities. Empowering them to react to the uncertainty caused by climate change on food security and nutrition and to reduce greenhouse gases through interventions that also yield food security benefits.</p> <p>ASAP+ has received a total of US\$75.8 million, with an additional US\$16.2 million as receivable contributions, for a total of US\$92 million, against the overall target of US\$500 million. As of now the programme has disbursed US\$2,121,847 coming for the implementation of activities under PAGES in Brazil and PRIDE in Malawi which have disbursed US\$1,452,907 and US\$668,940 from the ASAP+ trust fund respectively. ASAP+ will support the following 10 projects:</p>								
<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;"><i>Project location and name</i></th> <th style="text-align: left;"><i>Project overview</i></th> <th style="text-align: left;"><i>Status</i></th> </tr> </thead> </table>						<i>Project location and name</i>	<i>Project overview</i>	<i>Status</i>
<i>Project location and name</i>	<i>Project overview</i>	<i>Status</i>						
<b>Burkina Faso</b> Programme to Strengthen Smallholder Resilience to Climate Change (PSSRC)	This programme aims to enhance smallholder resilience to climate change through investments in proven adaptation practices, Indigenous technologies and nature-based solutions. It focuses on improving access to water for agriculture, and promoting crop and income diversification. The programme also strengthens the implementation of integrated sustainable agricultural models piloted by the Government.  <b>ASAP+ financing:</b> US\$7 million.	Implementation to start in May 2024						
<b>Chad</b> Strengthening Productivity and Resilience of Agropastoral family Farms Project (RePER)	RePER's general objective is to sustainably increase food and nutrition security, along with the income of rural households in the project area. Its development objective is to improve the performance and increase the resilience of the targeted agropastoral family farms. ASAP+ financing will strengthen the resilience of family agro-pastoral farms by (i) improving access to water and disseminating environmentally friendly techniques that are resilient to climate change in production and post-harvest activities; (ii) improving access to climate information, setting up ecological monitoring systems and environmental and climate education; (iii) reducing emissions, preventing deforestation and improving household living conditions by promoting energy-efficient stoves.  <b>ASAP+ financing:</b> US\$7 million	Implementation of ASAP+ component to start in May 2024						
<b>Niger</b> Family Farming Development	The objective is to sustainably reduce poverty, ensure food, nutrition and water security, and strengthen the adaptive capacity of rural households. The programme will build on and upscale the ongoing ProDAF investments to strengthen the resilience of vulnerable households through climate adaptation practices and technologies, better agronomic practices, and	Portfolio temporarily suspended <sup>4</sup>						

<sup>4</sup> The de-facto government situation in Niger since 26 July 2023 has caused sanctions from the regional bodies and government inability to settle its arrears with major IFIs including IFAD. Now that the sanctions have been lifted on Niger (24 February 2024), we expect that Niger will be able to settle its arrears and to see reengagement materialise for the financing agreement to be signed and project to effectively start its activities including ASAP+ components.

Programme in the Diffa Region (ProDAF)	improved water resources management. The programme will collaborate with other interventions funded by the Global Environment Facility (GEF), Green Climate Fund and ASAP in Niger. <b>ASAP+ financing:</b> US\$7 million.	
<b>Somalia</b> Adaptive Agriculture and Rangeland Rehabilitation Project (A2R2)	A2R2's objective is to enhance the climate resilience of poor rural households in Somalia through sustainable natural resources management. A2R2 aims to improve water resources and rangelands management, eco-agriculture and climate-proof livelihoods, as well as forest and habitat rehabilitation, and improved governance and information systems for land degradation and biodiversity. A pilot microfinance facility will target vulnerable groups, particularly women and youth, for climate-resilient income-generating activities. Funding for ASAP+ will cofinance funding from GEF's Least Developed Countries Fund (LDCF) and the Global Agriculture and Food Security Program. <b>ASAP+ financing:</b> US\$7 million.	Pending internal approval
<b>Yemen</b> Rural Livelihood Development Project (RLDP)	RLDP aims to enhance resilience and adaptation to climate change, reducing poverty and vulnerability. It focuses on women and youth in vulnerable areas, and aims to benefit 175,000 people. The objective is to improve food and nutrition security, increase sustainable agriculture production, and build resilience through community-based planning, climate-resilient infrastructure and climate-smart agriculture. The project has received approval from the Executive Board and is cofinanced by the Rural Poor Stimulus Facility, the Swiss Agency for Development and Cooperation, and GEF's LDCF. <b>ASAP+ financing:</b> US\$7 million.	Pending Internal Approval
<b>Ethiopia</b> Participatory Agriculture and Climate Transformation Programme (PACT)	PACT aims to achieve climate-resilient and inclusive agricultural income growth, along with improved diets for rural households. It supports climate-smart agriculture, water resources development, watershed management and agricultural productivity enhancement. The ASAP+ funds will finance infrastructure and ecosystem enhancements, as well as community livelihood diversification. PACT also receives CompensACTION funds, which complement its existing activities in three target regions. <b>ASAP+ financing:</b> US\$11.4 million.	In Implementation
<b>Malawi</b> Programme for Rural Irrigation Development (PRIDE)	PRIDE aims to empower smallholders and enhance their productivity to meet nutritional demands and provide produce to viable markets. The programme focuses on developing resilient land and water management systems, transferring knowledge to smallholders and ensuring linkages to viable markets. The ASAP+ resources will fund the construction of irrigation systems, increasing productivity in rainfed areas and reversing land degradation. The programme will add at least 20,000 beneficiaries to those targeted by PRIDE, with supplementary funding from the GEF. <b>ASAP+ financing:</b> US\$7 million.	Implementation of ASAP+ component to start in May 2024
<b>Lesotho</b> Regeneration of Landscapes and Livelihoods Project (ROLL)	The CompensACTION pilot will be embedded in the ongoing ROLL project. It features a Regeneration Coalition Facility, aiming to support the setting up of local multi-stakeholder initiatives, as well as a Regeneration Opportunities Fund, which can invest in activities proposed by the coalitions and that have returns on water-related ecosystem services. The CompensACTION pilot enhances the Regeneration Opportunities Fund's ecosystem services payment system to include water efficiency, carbon sequestration and innovative carbon financing. <b>ASAP+ financing:</b> US\$4.4 million.	Pending internal approval
<b>Brazil</b> Amazon Sustainable	The project will target 20,000 family farms associated with rural organizations, including Indigenous and traditional communities, women and youth in three regions of the state of Maranhão. It aims to reduce rural poverty while decreasing deforestation and environmental degradation in the Amazon region of Maranhão, increasing the resilience of 64,000 people and reducing approximately 6 million tons of CO2 equivalent.	In implementation

Management Project (PAGES)		<b>ASAP+ financing:</b> US\$17.1 million.			
<b>Brazil</b>	Promotion of PES for Deforestation-free Supply Chains	Brazil will use CompensACTION funds to pilot projects that recognize the potential of payment for environmental services (PES) in incentivizing forest conservation. IFAD proposes a PES pilot fund to promote forest conservation by marginalized communities through deforestation-free value chains. The aim is to assess PES's potential to enable livelihood diversification, increase deforestation-free income sources through non-timber forest product (NTFP) production and improve NTFP market access.			In implementation
		<b>ASAP+ financing:</b> US\$4.4 million.

<b>FACILITY FOR REFUGEES, MIGRANTS, FORCED DISPLACEMENT AND RURAL STABILITY (FARMS)</b>					
<p>In accordance with the information note presented to the 118th session of the Executive Board (document EB 2016/118/INF.6), IFAD established FARMS to address the causes and consequences of the current refugee and forced displacement crisis, which lies within IFAD's mandate, and to support efforts to bridge the humanitarian/development financing gap. Indeed, in recent years, forced displacement has become a global challenge of unprecedented scale: 89.3 million people worldwide were forcibly displaced at the end of 2021, a number that has doubled over the last decade, surged by several crises – some new, some longstanding and some resurfacing after years. The Near East and North Africa region remains at the epicentre of global displacement challenges with about 16 million displaced people, mainly in Iraq, Syria, Yemen, and their neighbouring countries. The crisis has created severe humanitarian and development challenges and it is being further exacerbated by the socio-economic impacts caused by external shocks such as the COVID-19 pandemic and most recently the Ukraine crisis, which are weighing heavily on the world's most vulnerable, including displaced people. The crisis threatens further destabilization as host communities struggle to absorb displaced peoples. For example, Jordan is currently host to about 1.4 million Syrians, who comprise nearly 15 per cent of the total population. Only 20 per cent of registered Syrian refugees live in the main refugee camps, several of them are located in rural areas.</p> <p>This forced displacement of refugees puts refugees in positions of immense vulnerability and places enormous pressure on both host communities and refugees in terms of livelihoods, natural resource management and food systems, especially in the context of fallout of global pandemic and the Ukraine conflict. FARMS' aim is to help host communities cope with the pressures of the crisis and provide refugees and internally displaced persons with remunerative livelihoods – building skills and capacities that will serve them well on an eventual return to their homes. The Facility has three pillars: (a) Co-financing of IFAD ongoing and pipeline investment projects, (b) Regional and country-specific grants, and (c) Policy engagement, knowledge management and communication outreach. When established, FARMS aimed to have an overall envelope of US\$100 million. At the current date, the Facility has mobilised approximately US\$35.5 million.</p> <p>The Small-ruminant Investments and Graduating Households in Transition (SIGHT) Project has successfully completed all four phases of implementation and has overachieved its outreach target by 4% (2,650 beneficiaries). Of which, 2,005 beneficiaries received seed capital and successfully implemented their microbusinesses with women, youth, and Syrian refugees representing 54%, 44%, and 55% respectively. The project has also been able to place 263 beneficiaries in full time jobs, 92% of which are youth. Overall, SIGHT's outreach through the adapted graduation approach included 52% women, 49% youth, 53% Syrian refugees, 71% poor, and 29% extreme poor. Until the 31 of December 2023 the project has disbursed US\$8,105,761 amounting to 89% of the FARMS allocated budget. The "Food Security promotion project for pastoralists and agro-pastoralists in Puntland" in Somalia was launched in mid-June 2019 and has on-track physical implementation on the ground, despite the limitations from the COVID-19 pandemic and protracted insecurity situation in Somalia. Moreover, the project has adjusted its plans and supported the Government in its efforts for awareness campaign on COVID-19. The project's interventions, including the provision of solar irrigation and of an innovative off-grid box system, provide renewable energy sources for irrigation and electricity, and supply clean water for the project's beneficiaries; thereby providing crucial cushions against the effects from the ongoing Ukraine crisis.</p>

<b>FINANCING FACILITY FOR REMITTANCES (FFR)</b>					
<p>The Financing Facility for Remittances (FFR) is an IFAD managed multi-donor facility aimed at maximizing the impact of migrants' economic contribution (remittances and diaspora investments) for rural development in their countries of origin, with a focus on IFAD's target population. To achieve this goal, the FFR supports innovative projects that (i) promote cheaper and safer remittance transfers to rural areas, (ii) enhance access to and use of digital financial services linked with remittances, and (iii) foster migrant investment and entrepreneurship. Furthermore, it supports capacity building, policy engagement and research in these fields and spearheads scalable innovations and model under the IFAD's operational portfolio. Thanks to the FFR, IFAD is globally recognized as one of the key actors in the global remittance ecosystem.</p>					
<p>Since 2006, the FFR has grown from a US\$4 million facility to a US\$70 million multi-donor facility (including co-funding) with a portfolio of more than 70 projects in over 50 countries across the developing world. Through the promotion of digitization, financial inclusion and innovative investment in rural areas, projects implemented by the FFR have successfully addressed the main gaps affecting the link between remittances, diaspora investment and development. As a result, poor rural households have been empowered to advance on the road to financial independence.</p>					
<p>In 2023, the FFR focused its action on the implementation of 19 innovative partnerships with private sector entities, mainly in Africa, promoting digital remittances and financial inclusion and diaspora investment, and mobilizing over US\$5 million in co-financing, showing great ownership and commitment by the implementing partners. Furthermore, the FFR supported the design and implementation of three IFAD projects in Haiti, Senegal and El Salvador, and provided technical assistance to four African central banks on how to link remittances to financial inclusion. Regular national dialogues on remittances were also organized in seven African countries, where central banks, ministries of finance and private sector entities are fully engaged in discussing challenges in the respective remittance markets, while identifying short-, medium- and long-term measures and initiatives to address them.</p>					
<p>In partnership with the United Nations Office of the Special Adviser on Africa (UN OSAA) and the World Bank, IFAD hosted the eighth Global Forum on Remittances, Investment and Development (GFRID) Summit at the United Nations Office in Nairobi (Kenya) from 14 to 16 June 2023. The GFRID Summit 2023 saw the participation of over 650 practitioners and stakeholders from the public and private sectors and civil society in Africa and around the world. The event was an interactive platform for participants to discuss opportunities and challenges in the post-pandemic landscape. Main remittance corridors and diaspora investment innovations in Africa were a main focus. Within this framework, the Summit was an opportunity to agree on key milestones related to the impact of remittances on achieving the Agenda 2030 for Sustainable Development Goals (SDGs). Its main outcomes and recommendations were shared with all Member States during the 78th Session of the United Nations General Assembly (UNGA) in September, and contributed to feed the discussions at the High-level Political Forum on Sustainable Development (SDG Summit) and High-level Dialogue on Financing for Development.</p>					
<p>Thanks to its positive results, the FFR continues to receive support and additional contributions from both the donor community and IFAD, with the aim to scale up the successful approach within IFAD's programme of loans and grants. In addition, in 2023 the FFR received a new US\$ 6,6 million contribution from the European Union, to expand its intervention to Central Asia. Currently the FFR is funded by contribution agreements signed between IFAD and the EU, Luxemburg, Spain, the Swedish International Development Cooperation Agency (SIDA).</p>

<b>Global Donor Platform for Rural Development (GDPRD)</b>					
<p>The Global Donor Platform for Rural Development (GDPRD) is an informal network of more than 40 bilateral and multilateral donors, international financial institutions, intergovernmental organizations, foundations and development agencies. It was established in 2003 on the wave of the Aid Effectiveness agenda, to lobby for increased public and private investments in agriculture and rural development. Starting from January 2020, the Secretariat of the GDPRD has been hosted by IFAD, in the Global Engagement, Partnership and Resource Mobilization (GPR) Division.</p>					
<p>Annual membership fees make up the Secretariat’s budget, which is used to finance the implementation of the annual work programme, and to cover staffing and administrative costs. Platform members can also top-up their annual “core” contribution with “non-core” supplementary contributions, either earmarked or non-earmarked. The Platform has 13 Board members, Ireland being the most recent addition in 2022. Currently, the total annual budget amounts to EUR 650,000 in core contributions, plus EUR 100,000/year in special contributions by the United States, earmarked to finance activities of the SDG 2 Roadmap Working Group and the Global Donor Working Group on Land.</p>					
<p>The Platform currently manages three workstreams: innovative financing for food systems; donor coordination; and data for food systems and rural development. The Platform also supports three thematic working groups (SDG2 Roadmap Working Group, Global Donor Working Group on Land, and Thematic Working Group on Rural Youth Employment), which are self-standing spaces where interested donors and partners meet and discuss their strategies and initiatives around the specific theme of their respective groups.</p>					
<p><b>Workstreams:</b>  <b>Innovative/blended finance.</b> The Platform’s workstream on innovative finance explores ways in which blended finance and other innovative funds can make donor and public funds more catalytic to support food systems transformation. In 2023, the GDPRD and the Shamba Centre for Food &amp; Climate undertook an enquiry into how donors, philanthropic organizations, public funds and blended capital funds can make their funding more effective to achieve SDG 2. The core message of the enquiry is that, if donors and development banks take higher risks with their grants and lending, every donor dollar has the potential to generate 4 dollars in commercial finance. When this happens, agrifood SMEs will have more financing, domestic lenders will participate, and markets will have more liquidity. The enquiry’s findings were presented and discussed at a High-Level session of the Donor Platform Annual General Assembly (AGA) on <a href="#">Sustainable Finance: Making donor funding more catalytic</a>, emphasizing the critical need for donors to scale up blended finance in the agriculture sector, increase private sector collaboration, de-risk investments and revitalize agri-SMEs to achieve food systems transformation.</p>					
<p>The final report, <a href="#">Unleashing the Catalytic Power of Donor Financing to Achieve Sustainable Development Goal 2</a>, was released in March 2024. Drawing on its recommendations, the GDPRD will establish and host a new multi-donor working group on sustainable/blended finance, with membership and participation open to donor agencies and other stakeholders actively engaging in blending.</p>					
<p><b>Donor Coordination.</b> The Platform’s workstream on donor coordination unpacks the challenges countries face in addressing the national pathways for food systems transformation, explores how donors and development partners can better coordinate their assistance at the country level, and identifies key areas where coordination is most needed. The GDPRD released the flagship report “<a href="#">From Rhetoric to Reality: Donor coordination for food systems transformation</a>”, whose recommendations seek to support donors and their partners in improving their coordination and alignment in food systems and rural development, particularly at the country level. Building on the recommendations of the report, the Platform will undertake a review of complementary funding modalities at country level, providing recommendations for donors on optimizing modalities of development finance.</p>					
<p><b>Data.</b> The last decade has seen a quantum leap in data-driven initiatives in agriculture and rural development. However, gaps remain in availability of reliable data at the country level, as well as in the actual use of available data to inform policymaking. The GDPRD’s workstream on data facilitates better coordination among donors and</p>					

international organizations in this area.

On 13 February 2023, the Platform convened a meeting on [Assessing the Data "Quantum" Leap in Agriculture and Food Systems](#), together with the European Commission, IFAD and the Global Partnership for Sustainable Development Data in Rome to take stock of current data initiatives on agriculture and food security. Thirteen organizations presented data initiatives, including 50x2030, FAO, IFAD, the World Bank, the United Nations Food Systems Coordination Hub, Ceres2030 and Hesat2030. The event report, [New strategic directions for data in agriculture and food systems](#), was released in June 2023. Going forward, the workstream will map out a concrete action plan for the data community, focused on improving information sharing, convening dialogues and workshops to advocate data use in decision-making, and strengthening country capacity.

**2023 Annual General Assembly.** To mark the Platform's 20th anniversary, the [2023 Annual General Assembly](#) (AGA), held at IFAD Headquarters in Rome on 26-27 October under the theme "20 Years of rural development and aid effectiveness: Where are we now and where are we going?", focused on how the aid and development effectiveness landscape has changed in the past two decades. Sessions covered topics such as food systems approaches, donor coordination, sustainable finance, land governance and rural youth employment. The AGA background paper on "[Understanding the new agriculture and food agenda: How is the past shaping the future?](#)" was released as a GDPRD flagship publication in December 2023.

**Communications.** During the year, we actively engaged members and increased outreach through our social media channels including the [website](#), [LinkedIn](#), [Twitter/X](#), an [e-newsletter](#) and a new [Instagram](#) account. We continued the "[Meet Our Members](#)" interview series and our miniseries on IFAD's Farms. Food. Future. podcast. The [Food Systems Recommendations Database](#) has expanded into a microsite with 55 reports and a dashboard spotlighting featured, trending and latest reports.

<b>Indigenous Peoples Assistance Facility (IPAF)</b>					
<p>In 2006, the Indigenous Peoples Assistance Facility has been transferred to IFAD from the World Bank where it was established in 2003. IPAF is an innovative funding instrument that indigenous communities can use to find solutions to the challenges they face. The objective of the Facility is to strengthen indigenous peoples' communities and their organizations. It finances small projects that foster self-driven development. In 2018 the David and Lucile Packard Foundation provided supplementary funding to the fifth cycle of the Facility (2018-2021) to finance two projects selected for grant financing in the Democratic Republic of the Congo and in Indonesia. After successful implementation of these resources, the Foundation has processed a second grant to the sixth cycle of the IPAF (2022-2026). The USD 200 000 grant agreement with <a href="#">David and Lucile Packard Foundation</a> was signed during October 2022 for a core support to IPAF focusing on institutional strengthening and knowledge management.</p>					
<p>In 2020, Sida decided to make a supplementary fund contribution of SEK 38,000,000 focused on livelihoods and resilience to climate change of indigenous peoples. Part of this funding is financing the sixth IPAF cycle (2022-2026) and will support small scale projects ranging from 20,000 to 70, 000 USD for a maximum three-year project duration.</p>					
<p>As of August 2022, IFAD has entered into agreement with FIMI, Tebtebba and SWT (IPAF regional co-managers) for the implementation of IPAF sixth cycle for a total of USD 3 116 340 committed in the three grant agreements. On the 9th of August the sixth <a href="#">IPAF call for proposals</a> was launched and closed on 27th of September with around 670 proposals submitted by APR, Latin America and the Caribbean and Africa. The proposals were screened and reviewed (with an enhanced evaluation matrix compared to previous cycles) by technical indigenous consultants/experts on indigenous peoples' issues in the period under review.</p> <p>In 2023 IFAD approved a USD 2.5 grant to match Sida and Packard resources for the 6<sup>th</sup> IPAF cycle thus allowing to increase number of IPAF projects to be funded. In November 2023 the IPAF board selected 53 Awardees from 42 different countries across Africa, Asia and the Pacific, Latin America and the Caribbean, representing 53 Indigenous Peoples groups (press release <a href="#">here</a> and full list of awardees <a href="#">here</a>). Start-up workshops took place in each region engaging all sub-grantees in: (i) trainings on finance, knowledge management and M&amp;E; (ii) exploring linkages with IFAD operations at country level; and (iii) strengthening their networks of Indigenous Peoples communities and organisations. Furthermore, representatives from the IPAF network participated in the Twenty-Third Session of the UN Permanent Forum on Indigenous Issues (theme: "Enhancing Indigenous Peoples' right to self-determination in the context of the United Nations Declaration on the Rights of Indigenous Peoples: emphasizing the voices of Indigenous youth) where discussions were held about direct channelling of climate funding towards Indigenous Peoples.</p>					
<p>In addition, in order to enhance more regular exchanges and collaboration among the three IPAF partners, in October 2023 a workshop was organised with them in IFAD HQ to discuss and improve respective M&amp;E and KM strategies and to decide the implementation of Packard funds with joint activities. Partners decided to invest in KM activities that will engage sub-grantees across the three regions and join international events and fora to share IPAF experiences.</p>					
<p>As part of the same supplementary fund from Sida (component 2), on February 2022 a Call for interest was issued to IFAD Regional Climate Leads to identify climate financed projects (GCF, GEF, ASAP+) that require technical assistance at design phase to be supported by indigenous peoples' consultants or an indigenous peoples' organization to ensure project's compliance with the IFAD/GCF/GEF policies, guidelines and safeguards. Projects have been identified/engaged in Latin America and the Caribbean (4), in East and Southern Africa (3) and Asia and the Pacific (2) where indigenous consultants/specialists were hired to support project design i.e. SECAP compliance and preparation of Indigenous Peoples Plans, adherence to Free, Prior and Informed Consent and Indigenous Peoples Planning Frameworks. This work has been continued with more funds from regional teams being co-invested. Free, prior and informed consent processes and designed have been carried out in India, Colombia, Kenya in 2023 and 2024. Furthermore, youth consultations for the COSOP Ethiopia were conducted in November 2023 with 60 young individuals between 20 and 35 years participating (of which 53% young women). This participatory and youth-centered consultation was a first of its kind. The participants, primarily pastoralists and agro-pastoralists, were engaged in Jijiga (Somali region), Dire Dawa and Wukro (Tigray).</p>					
<p>Co-financed by Sida supplementary funds (component 3), <a href="#">the sixth global meeting of the Indigenous Peoples' Forum at IFAD</a>, took place on 9, 10 and 13 February 2023 and focused on <b>Indigenous Peoples' Climate Leadership: Community-based solutions to enhance resilience and biodiversity</b>. The Forum is a platform for meaningful</p>					

dialogue where Indigenous Peoples' representatives convey their concerns, requests and recommendations to improve the partnership with IFAD and the effectiveness of its engagement with Indigenous Peoples.

On December 2023, supplementary Funds from NORAD have been received to complement the work carried in the Indigenous Peoples Assistance Facility (IPAF), the focus of these funds will be on the IPAF seventh cycle in the African region including institutional strengthening of Indigenous Peoples' organizations in Africa. Currently, discussions are ongoing with SWT to develop a proposal for institutional strengthening focusing on Indigenous women-led organizations in Africa that will also feed the process leading to the 7<sup>th</sup> IPAF Call for proposals.

<b>INTERNATIONAL LAND COALITION (ILC)</b>					
<p>IFAD received funding from the European Union, Germany and Switzerland, for the support of the International Land Coalition (ILC) Strategy 2030. These funds are provided directly to ILC in line with the terms of the IFAD-ILC MoU. ILC received additional funding from Wellspring Philanthropic Fund and the Netherlands Enterprise Agency (RVO) in support of its strategy. The ILC's goal is people-centered land governance: secure land rights, responding to the needs and protecting the rights of those who live on and from the land, and prioritizing women, whose leadership brings the greatest change.</p> <p>Land is not just a physical resource; it's a cornerstone for IFAD's mission, touching various aspects of global development. It plays a critical role in climate action, with Indigenous territories and local communities safeguarding biodiversity hotspots and carbon sinks. However, challenges such as unclear land rights and centralized management can lead to conflict and speculation, affecting investment and stability. To address such challenges, collaboration between ILC and IFAD focuses on sustainable impact, policy engagement, and knowledge dissemination.</p> <p>ILC's 2030 Strategy focuses on three strategic objectives: SO1: National Land Coalitions advance people-centered land governance (ILC has successfully supported national land coalitions in thirty countries. These are at the center of accelerating the recognition, defense, protection and redistribution of land rights in their countries); SO2: People's data is produced and used to hold governments and corporations accountable (ILC facilitates the local and national collection, use and management of people's data on land rights, especially by people's organizations); SO3: Regional and global advocacy builds political commitment to people-centered land governance (ILC amplify the voices of our members –especially women and youth– in global and regional advocacy spaces, uniting across borders).</p> <p>Following the 2030 strategy, ILC established land rights as a building block in the fight against climate change and started to play a key role in developing land-related indicators to monitor the Global Biodiversity Framework. ILC members gained further visibility in the field of climate change at international meetings, including at the Bonn Climate Change Conference, as well as in regional climate weeks in Asia, Africa and in New York. ILC amplified the voices of people who live on and from the land at arguably the most important global meeting of the year; COP28. Our network stepped forward as true experts in climate mitigation, adaptation, and sustainable agriculture. At the summit, through policy recommendations and a public-facing campaign, we positioned land rights as critical to strengthening the capacity of smallholders, farmers, pastoralists, and Indigenous Peoples to respond to the climate crisis.</p> <p>The ILC network worked to transform agendas into collective action and impact. In 2023, ILC-supported National Land Coalitions and regional and global platforms forged wide partnerships across 68 countries, bringing together 253 members and 616 diverse partner organizations to work for transformational change in people-centered land governance. ILC members contributed to securing land rights for 28,621 people, whereas indirect reach extended to 223,462 people. Direct impact: securing of 88,742 hectares, indirect impact on a further 207,497 hectares. In terms of changes in policies, practices, and agendas- ILC members effectively influenced land governance on multiple fronts across the regions. These partnerships positively influenced 23 national policies, 20 practices, and 17 Agenda Changes.</p> <p>ILC moved into the implementation of the 2030 strategy with focus on 5 areas: 1 GAINING GROUND FOR CLIMATE, NATURE AND PEOPLE (partnership with the UN Decade for Ecosystem Restoration, ILC was selected as a lead for the implementation of Challenge 5 (communities) of the UN DECADE'S ACTION PLAN, engagement at COP 27 and COP 15 to bring member perspectives into global discussions); 2 BUILDING A YOUTH MOVEMENT (first ever GLF Youth brought together 100+ youth from across the network; the leadership programme continued) 3 MAKING GOOD ON OUR GENDER AND DEFENDER PLEDGES (continued member engagement in ILC's gender action plan; data work on defenders and Protection Funds providing direct resources to defenders under legal and physical peril in Africa and the Latin America/Caribbean) 4 PARTNERSHIPS FOR CHANGE (joint programming and advocacy efforts in support of National Land Coalitions and regional and global processes, including the VGGT+10 initiative to increase commitment to implementation across 10 countries; an updated IFAD-ILC Roadmap for collaboration in nine priority countries (projects and policy engagement) to secure land tenure; a partnership with Rainforest Trust (RFT), a US-based conservation foundation, to explore the possibility of collaborating on the intersection of community land rights and ecosystem management and restoration); 5 CAMPAIGNING (20 platforms engaged in ILC-led campaigns and advocacy work to amplify member's voices and give visibility to land rights as a globally relevant issue).</p>					

For details on 2023 activities and results, see ILC’s Annual Report at: <a href="https://www.landcoalition.org/en/accountability/">https://www.landcoalition.org/en/accountability/</a>

<b>MAINSTREAMING GENDER EQUALITY &amp; Gender Transformative Mechanism</b>					
<b>The Gender Transformative Mechanism in the context of Climate Adaptation (GTM)</b>					
<p>At its September 2019 session (EB 2019/127/R), the Executive Board approved the receipt of supplementary funds from the Bill and Melissa Gates Foundation (BMGF). This contribution included a dedicated US\$500,000 planning grant to design a Gender Transformative Mechanism (GTM). The objective of this scoping grant was to support IFAD gender team to design the scope and implementation modalities of the GTM in the context of climate adaptation. The design process was led by the Gender team at IFAD, supported by regular consultations with country teams of the proposed countries and an IFAD inter-departmental working group. Subsequently, IFAD's Executive Board approved the receipt of funding from the BMGF, the first non-member state to contribute to the GTM. It also authorized the President to accept future resources for the GTM, with no limitation on the amount. The first tranche of the US\$16 million grant was received in November 2021 and a kick-off technical workshop between the IFAD and BMGF gender teams took place in December 2021 (Rome). This funding was for two country investments in <b>Burkina Faso</b> with the Agricultural Value Chains Support Project in the Sud-Ouest, Hauts-Bassins, Cascades, and Boucle du Mouhoun Regions (PAFA-4R) and in <b>India</b> with the Maharashtra Rural Women's Enterprise Development Project (Nav Tejaswini). The funding also included a scoping design in <b>Ethiopia</b> to assess the GTM opportunities in the Participatory Agriculture and Climate Transformation Programme. This resulted in the submission of supplemental request in September 2022 of US\$6.6M to support the full design of GTM/PACT and strengthen the monitoring, evaluation and learning framework of the GTM increasing the total GTM grant to \$22.6 million. This represents the biggest grant ever received by IFAD from a philanthropic organization.</p> <p>The actual grants to the three projects/ countries are as follows: Burkina Faso US\$5,840,000; India US\$5,250,000 and Ethiopia US\$4,500,000. The resources are used to enhance interventions within the loans focusing on gender and climate: e.g.: gender transformative approaches, institutional strengthening and capacity development for government authorities, gender-sensitive climate smart agriculture, etc.</p> <p>As part of the first-year milestones, a resource mobilization plan was finalized in August 2022 to support the long-term vision of the GTM which triggered the release of US\$600,000. In December 2022, the GTM India Financing Agreement was signed. In 2023, the personnel supporting the implementation of the GTM at HQ and country level was recruited. The Financing Agreement with Burkina Faso was signed in August 2023. Upon meeting the 1<sup>st</sup> disbursement conditions in October 2023, Burkina Faso received the first tranche payment of US\$2.1 million. Currently, the institutional and climate assessment of MAVIM, the implementing agency for GTM India, is nearing completion. MAVIM's Center of Excellence strategy has been developed and validated. Concurrently, the service provider for the GTM baseline in Burkina Faso has been recruited. Negotiations for the signing of the GTM PACT Financing Agreement are ongoing. As per the resource mobilisation plan, beyond the generous initial funding received from the BMGF, the GTM is seeking to secure funding from additional donors to scale up its approach at the nexus of gender, climate and market inclusion in other countries.</p> <p><u>A recap of total spent and commitments for GTM funds is available below:</u></p> <ul style="list-style-type: none"> <li>• IFAD received from BMGF US\$7,108,783 gross and US\$6,516,384 net of Management Fees and UN Levy (3 payments between 2021 and 2022, equivalent to 31% of the total grant amount).</li> <li>• IFAD spent <b>US\$396 891</b> in P1-2022 (8% disbursement rate) and <b>US\$2 782 686</b> in P2-2023 (104% disbursement rate), for a total of \$3,179,577. The disbursement rate picked up with an increase of 96%.</li> <li>• At present, considering the outstanding commitments of <b>US\$2 502 206</b> (upcoming India tranche and outstanding contracts) the total budget execution stands at <b>\$5 681 783</b>.</li> <li>• 87% of the total budget received has been committed or expensed.</li> <li>• Current cash at hand is net of commitment and represents <b>US\$2,734,600.87</b> (42% of budget received).</li> </ul>					

### Joint Programme on Gender Transformative Approaches for Food Security and Nutrition (JP GTA)

In 2018, a contribution of EUR 836,740 was mobilized from the EU for a four-year-long RBA collaboration to support the three agencies in embedding gender transformative approaches in policy dialogue, programs, institutional culture, and their working modalities. The program had a no-cost extension until December 2024.

2023 was an important year for the consolidation and conclusion of country-level implementation, especially in **Ecuador** and **Malawi**, where Gender Transformative Approaches such as the Financial Action Learning System at Scale and "Cerrando Brecha" were scaled up in the countries. In addition, the Cerrando Brecha methodology has scaled up in several Latin America countries such **Dominican Republic, Argentina, Paraguay, Haiti, Peru** through dedicated technical support provided to Project Management Units and implementing partners. With the support of the JP GTA, in the Latin American and Caribbean Region (LAC) a network of Gender and Social Inclusion focal points from IFAD funded programmes was formed in the second half of 2023, to promote peer to peer technical exchanges. with a special focus on Gender Transformative results. Fifteen countries participated.

The JP GTA coordination team played a crucial role during the negotiation process of the Voluntary Guidelines on Gender Equality and Women's and Girls' Empowerment in the Context of Food Security and Nutrition (VG GEWGE). It strengthened the collaboration between agencies and offered a strategic platform for action for the implementation of the Guidelines, leading up to the endorsement of the Voluntary Guidelines on Gender Equality and Women's and Girls' Empowerment in the Context of Food Security and Nutrition (VG GEWGE) by the Committee on World Food Security (CFS) during the 51st session on 24 November 2023.

Under the sponsorship of the JP-GTA, a total of nineteen learning sessions, webinars, and joint peer-to-peer learning initiatives were organized targeting different audiences, including individuals, households, communities, institutions, and the policy/legislation level. Two South-south coordination initiatives have been organized on Gender Transformative Approaches in partnership with Procasur: 1) a [Learning Route in Brazil](#) with participants from 12 countries from Latin America and Africa, and 2) a [Learning Route in Malawi](#) that saw the participation of 23 technical project staff from 13 different countries from Africa and Asia as well as IFAD, FAO, and WFP staff to learn directly from IFAD experience on the ground. Both initiatives offered an opportunity to learn from good practices implemented in the field related to integrating Gender Transformative Approaches (GTAs) in rural development interventions and fostered their scaling-up.

Thirteen JP GTA publications, newsletters, and other knowledge products have been developed or supported by the JP GTA, including a [guide](#) for gendered social norms indicators in food security and nutrition to support the measurement of changes in social norms and the [Guidelines for measuring gender transformative change in the context of food security, nutrition and sustainable agriculture](#).

<b>MAINSTREAMING CLIMATE ADAPTATION (ASAP2)</b>					
<p>Since 2017, the second phase of the Programme (ASAP2), which covers the period from September 2017 to 31 December 2025, is being implemented in parallel to ASAP1 and will contribute to achieving IFAD's climate mainstreaming objectives and outcomes over the Strategic Framework 2016–2025 implementation period. It was decided that, in order to strengthen the environmental sustainability and climate resilience of poor rural people's economic activities, IFAD needed to continue integrating technical assistance activities for climate change adaptation in its investment programmes.</p>					
<p>Like ASAP1, ASAP2-financed initiatives need to be completed by end 2025. As of now, 90% of the funds have been allocated and spent. The overall balance of unallocated ASAP2 funds is US\$1 558 868. The main ongoing ASAP2 financed initiatives are the Ex-ante Carbon-Balance Tool (EX-ACT) and the Global Livestock Environmental Assessment Model-interactive (GLEAM-i) programmes with FAO, and the update of the The Climate Adaptation in Rural Development – Assessment (CARD) tool in collaboration with FAO and FINRES. The Ex-ACT initiative is entering its second phase which will be implemented in 2024-2025 and support the production of up to 65 Ex-ACT analyses. The GLEAM-i initiative will complete in October 2024. The upgrade of the CARD tool within ABC Map should be completed by June 2024.</p>					
<p>Under ASAP2 contributions of US\$15.7 million are being programmed into technical assistance projects that support IFADs entire climate focused portfolio. ASAP2 technical assistance activities sustain the design of new corporate tools for climate-informed programming, inform capitalization studies and leverage resources from global climate funds to address the additional costs of climate change in IFAD's agricultural programmes. The ASAP2 outcomes also include climate mainstreaming in IFAD's Programme of Loans and Grants, private sector engagement, women's engagement, support to the nexus between climate change and nutrition and policy engagement in the field of climate change. To date, 35 technical assistance projects have been financed, which have currently disbursed almost the entire contribution received.</p>

<b>NUTRITION SENSITIVE AGRICULTURE</b>					
<p>IFAD is committed to strengthening nutrition mainstreaming at all levels of the organization and has achieved the corporate goal of 60% of IFAD 12 projects integrating nutrition. Investment in nutrition is guided by IFAD’s Nutrition Action Plan which focuses on support for nutrition sensitive agriculture investments to improve the nutrition status of the most vulnerable rural populations.</p>					
<p>The NORAD Supplementary Funds Agreement “Nourishing People and the Earth through Inclusive and Sustainable Development” is contributing to mainstreaming nutrition in IFAD’s investment portfolio. The NORAD contribution started in 2019 and with two no-cost extensions approved by the donor, the grant will complete implementation on 31 December 2024. It has contributed to building capacity for nutrition sensitive project design and implementation through a number of important activities. Regional trainings have been held in WCA, ESA and NEN for IFAD and government project management staff. The contribution is supporting technical specialists in nutrition during supervision and implementation missions to projects in need of support to improve the delivery of nutrition interventions. Peer-to-peer learning and knowledge sharing through field visits and exchanges by project management units with other IFAD projects has promoted adaptation of innovative approaches and enhanced project delivery.</p>					
<p>One of the main features of the contribution is the provision of country grants to nine nutrition-sensitive projects in seven countries to enhance their nutrition sensitive interventions for a greater outreach and deeper impact. The projects are PADAAM and PADMAR projects in Benin, PAPFA and PAFA4R in Burkina Faso, DEFIS in Madagascar, FARMSE in Malawi, IAMDP in Sudan, COMPRAN in Sao Tomé and Príncipe and SIRP in Zimbabwe. In these countries, the entire country portfolio is benefitting from improved nutrition capacity. To this end, project management staff have been trained in nutrition sensitive agriculture and receive targeted technical support throughout all stages of the grant execution. For example, improving nutrition monitoring and evaluation through the execution of baseline studies in all countries and formative studies on nutrition KAP and women’s workload analysis has strengthened the ability of projects to target the most nutritionally vulnerable, identify appropriate interventions and establish effective partnerships for the implementation of nutrition sensitive actions. These projects are providing lessons on innovative approaches to improve nutrition within the context of IFAD projects.</p>					
<p>The NORAD contribution is not only strengthening nutrition mainstreaming in the targeted projects it is also allowing IFAD to support additional projects with technical support at design and implementation to increase IFAD’s investment in nutrition sensitive projects. With the unfortunate armed conflict in Sudan, the IAMDP project was closed early, and the NORAD grant was not fully executed. A portion of the remaining funds from the NORAD grant to IAMDP are supporting the Near East, North Africa, Europe and Central Asia (NEN) and Asia and Pacific Region (APR) with dedicated nutrition specialists to strengthen nutrition capacity in these two regions. The technical specialists are working to identify capacity needs and provide training and support to IFAD and project management units as well as raising awareness on the contributions of nutrition to sustainable development and the benefits of integrating nutrition into project designs. This work will go far in increasing the number of projects designed as nutrition sensitive and in improving the quality of the on-going nutrition sensitive projects.</p>					
<p>Valuable lessons continue to emerge from the implementation of NORAD SF supported action plans. Innovative approaches to improve access to healthy diets along food value chains are being promoted. Projects are leveraging opportunities to strengthen nutrition through integrated approaches such as the Gender Action Learning System (GALS), SBCC and nutrition education. Project ratings for nutrition remain strong, with approximately 85% of the projects globally, which were rated in 2023, rating four or above.</p>

<b>PLATFORM FOR AGRICULTURAL RISK MANAGEMENT Horizon 2</b>					
<p>With the support from the European Commission, France, and Italy, and in strategic partnership with the African Union Development Agency New Partnership for Africa's Development (AUDA -NEPAD) and Germany, IFAD launched the Platform for Agricultural Risk Management (PARM) in December 2013, as an outcome of G20 discussions on agricultural growth and food security.</p> <p>PARM is a global partnership for Agricultural Risk Management (ARM) for development. It has the global mandate to contribute to sustainable agricultural growth, boost rural investment, reduce food insecurity, and improve resilience to climate and market shocks of poor rural households through a better management of risks. PARM plays the role of a technical provider and knowledge broker with the objectives to: (a) develop methodologies for risk analysis and adoption of holistic risk management strategies; (b) strengthen local expertise and enhance national stakeholders' awareness and capacities to manage agricultural risks; (c) improve the generation, access, exchange of knowledge and partnerships on ARM related issues; and(d) facilitate the integration of ARM into policy planning, institutional capacities,projects/programmes design and investment in the agricultural sector.</p> <p>PARM has advanced its second operational phase, called Horizon 2 (2019-2025), leveraging generous funds from the European Commission (EUR 2 million), Agence Française de Développement (AFD) (EUR 4.4 million), Italian Agency for Development Cooperation (AICS) (EUR 2.675 million), and IFAD itself (EUR 0.745 million). PARM is continuing to bring evidence and build capacity on ARM at global, regional and country level, investing more resources in the design of ARM programmes for investments, with a more structured involvement of public-private-partnerships. In the era of increased frequency and magnitude of agricultural risks inflated by climate variability, building resilience in the agricultural sector, in particular through value chains, de-risking food system and food security have increasingly become urgent not only to protect rural people against the risks affecting their incomes, but also to mitigate the impact of unforeseen global events such as the COVID-19 pandemic and the most recent and more and more frequent global crises like the Ukrainian and Gaza strip ones. Although in most cases the poorest suffer more since their poverty and inequality amplify their exposure and undermine capacities to manage risks, also in medium-high incomes countries the consequences of the global shocks have seriously impacted the national economies and their capacity to copy with.</p> <p>In this context, the PARM Secretariat continued to deliver its demand-driven services to assist governments in managing agricultural sector risks. Currently, the Secretariat operates in Burkina Faso, Burundi, Ghana, Ethiopia, Madagascar, Niger, Senegal and Tunisia. Thanks to the integration of the insurance component (see below) on its portfolio of services, PARM so far has been able to cover all IFAD's regions (APR, ESA, WCA, NEN and LAC Regions).</p> <p>In 2023, the Secretariat strengthened its country engagements on ARM, providing technical assistance, capacity development and knowledge management support while bringing forward the ARM agenda at the global level. Moreover, PARM strengthened the policy engagement on ARM at country level, resulting in i) the design of 1 investment project in Madagascar and ongoing resource mobilisation to fund the implementation of the 4 investment projects designed in 2022 (Burkina Faso, Senegal, Niger and Ethiopia), ii) the completion and approval of the Agricultural Value Chain Risk Assessment Study (AVC-RAS) for maize and groundnut in Madagascar and the launch of the AVC-RAS for olive and cereals in Tunisia, and iii) the pilot phase of the institutionalization (ISNT) project of capacity development (CD) on ARM in Burkina Faso and Madagascar.</p> <p>PARM also developed capacities of over 450 stakeholders through the implementation of 6 training workshops at country level (Burkina Faso, Burundi, Madagascar and Tunisia), and regional level (during the 38th restricted meeting of the "Network for the Prevention of Food Crises – RPCA" in France for West and Central Africa countries and to support regional economic communities). PARM successfully stimulated knowledge sharing and exchange on ARM through the Forum for Agricultural Risk Management (FARM-D) Community of Practice which introduced a new interactive platform and recorded in less than a year, over 500 active members and 295 registered organizations. In 2023, FARM-D promoted over 50 webinars, directly organized 10 webinars, and disseminated over 220 knowledge resources to over 10,000 practitioners through newsletters.</p> <p>With the support of IFAD, the platform organized the global campaign "PARM Stories Challenge – Farming Champions" which received a high participation of over</p>					

40 journalists, filmmakers, and media professionals from Africa and the diaspora. The latter unleashed their creativity by crafting compelling videos that highlight innovative initiatives and self-resilience efforts of Farming Champions (smallholder farmers). After deliberations, 10 top videos have been selected, three of which were classified as winners and seven as finalists. The challenge was organized in partnership with Africa 21, a network bringing together around 700 African journalists from 40 countries with expertise in development topics and a platform for exchange between media practitioners and researchers. Applicants' videos have been reviewed by a seasoned jury made up of experienced journalists (TV5 Monde, Swiss Television and Group Nation Media), UN communications specialists (FAO and IFAD) and a farmers' representative (FIFATA).

PARM has given a more prominent role to the private sector thanks to the involvement of private sector companies in PARM's CD, KM and resource mobilisation activities. Moreover, PARM's new methodology assessing risks by value chains is more interesting for private sector companies. The platform has also developed a concept note addressing how PARM can support the private sector (and vice versa) which identified three main pathways to work with the private sector: (i) support impact investments through social, economic and environmental data analysis; (ii) support traceability and transparency of value chains to enable AVC risk analysis (deforestation-free, etc.); and (iii) create a pipeline of potential NSOs identified through CD workshops and train them for ARM.

PARM's role as a global initiative contributing to food security and global stability through risk management tools has been continuously recognized in the context of the annual meetings and declarations of the G20.

In order to complete its package of services and merge the expertise in-house in the field of agricultural risk management and risk transfer (insurance), PARM has managed the first phase of the Insurance for Rural Resilience and Economic Development (INSURED) programme from 2018 to 2023.

Upon demand from IFAD Country Offices (ICOs) and Governments, the program developed climate risk insurance linked to agriculture in IFAD-financed projects and programmes.

As of 31 December 2023, the insurance component of PARM succeeded to:

- (i) Embed agricultural and climate risk insurance within 28 IFAD programs spanning 17 countries covering LAC, ESA and APR Regions;
- (ii) Leverage investment of US\$ 11M for agricultural and climate risk insurance through IFAD's Program of Loans and Grants (PoLG);
- (iii) Protect 630,000 rural individuals under 150,000 insurance policies in 4 countries, with over 50% being women;
- (iv) Enhance climate resilience by facilitating USD 24.1 million in coverage and payouts worth US\$ 3 million made to about 73,000 of those insured; and
- (v) Publish an Insurance Toolkit as well as 23 knowledge products, including briefs, web stories and podcasts to give partners practical guidance on making insurance work for smallholders.

The impact on raising awareness and interest in-house on agricultural and climate risk insurance was confirmed by its recognition by SKD as one of the 5 most viewed initiatives on IFAD website for the year 2023, and ongoing demand from IFAD member countries even after the completion of phase I. During the closure period, PARM entered into discussions with its donor Sida (Swedish International Development Cooperation Agency, main donor of INSURED I) towards the development of a concept note for INSURED phase II which will be fully integrated with IFAD priorities and PARM program of work and coordination structure.

<b>Private Sector Financing Programme (PSFP)</b>					
<p>As part of the Consultation on the Twelfth Replenishment of IFAD's Resources, the Private Sector Financing Programme (PSFP) was created as a financing facility designed to promote increased investment into small-scale agriculture. More specifically, it is aimed at improving the income, food security, job-creation, empowerment and resilience of rural poor and small producers, women, and rural youth in particular, with a special focus on Low Income Countries, Low-Middle-Income Countries, and countries in fragile situations.</p>					
<p>PSFP complements IFAD's work by providing benefits for IFAD's target groups (rural poor, women, and youth) and priorities (climate, food security and nutrition). The programme can achieve this by offering financial instruments that private sector actors need and cannot obtain from other players, for instance by providing counter-cyclical funding during crises times and by offering technical expertise, such as Technical Assistance.</p>					
<p>Throughout 2023, PSFP focused mainly on the design and deployment of Non-Sovereign Operations (NSOs), following rigorous screening and due diligence processes to provide solutions to investees that are fully in line with PSFP's investment approach and donor's requirements. In 2023 three NSOs have been approved by the Executive Board, namely NBS Bank, ARCAFIM and Hamkorbank, respectively in September, November, and December, for a total committed amount of US\$97.5 million. The drafting of the loan agreements is currently under development and disbursements are expected for 2024. During 2023, a total of US\$6.7 million have been disbursed. Namely, US\$1.7 million have been disbursed to Futuro in two tranches - a first tranche of US\$1 million in February and US\$0.7 million in July, and US\$5 million in a single tranche to AMK in August.</p>					
<p>In 2023, the European Commission (EC) agreement allocated further EUR 11.3 million to the PSFP, with EUR 5.6 are already available, some of which will be directed to provide technical assistance to NSOs. Additional EUR 13.9 million have been mobilized from Germany and directed to the PSFP channeled through the Private Sector Trust Fund (PSTF).</p>

<b>Rural Poor Stimulus Facility (RPSF)</b>					
<p>In April 2020 IFAD launched the Rural Poor Stimulus Facility (RPSF), a multi-donor facility, in response to the challenges caused by the global COVID-19 pandemic. The Facility seeks to improve the resilience of rural livelihoods in the context of the crisis by ensuring timely access to inputs, information, markets and liquidity. IFAD initiated the Facility with US\$40 million of seed funding from grant resources and has mobilized an additional US\$52.6 million from donors. Between August and December 2020, Canada, Sweden, the Netherlands, Germany and Switzerland provided contributions to the RPSF. In total, US\$ 89.0 million was made available to used for financing RPSF Projects, following the removal of fees made available to IFAD to manage the program.</p>					
<p>The facility successfully targeted, allocated and implemented its resources to support rural poor people facing the impacts of COVID-19. It did so by targeting those countries most vulnerable to the pandemic, using an index of COVID-19 risk combined with countries' rural population and prevalence of food insecurity. The first financing round of the RPSF was launched the first financing window using the IFAD seed funds began in July 2020, and was allocated across 53 projects (though three would be cancelled prior to or during implementation). This round was completed by November 2020. The funds to be allocated through the second financing window beginning in January 2021 were mainly used to scale up projects approved in the first window, though a few new projects were also added. During 2021 and in 2022, an additional 14 new projects were approved. Through its approvals and by early 2022, IFAD allocated 100 per cent of its available US\$ 89.0 million across 64 projects in all five of IFAD's regions, comprised of 55 single country projects and nine multi-country projects. Funds were spread across each of the RPSF Four Pillars, namely: (I) Provision of inputs, (II) Access to markets, (III) Access to finance, and (IV) Digital services for agricultural information. The majority of 2022 was focused on the implementation and completion of RPSF projects.</p>					
<p>On 30 September 2022, the Rural Poor Stimulus Facility (RPSF) completed, as did the implementation of 62 its projects. Two specific cases with donor approval were extended for one year, which included RPSF funds to an existing project in Yemen, and to Afghanistan, which completed on 30 September 2023. Results across all projects show that the RPSF directly assisted 3.7 million people through its dedicated four pillars of support, translating to supporting 19.7 million household members. Some key areas of support included nearly 1 million people received access production inputs or technologies, more than 260,000 received support to collect, store or transport their products for markets, more than 70,000 rural producers benefitting from new loans or improved terms on loans through supported rural financial service providers, and 1.5 million receiving remote trainings on areas improving production or income generation, and 2.5 million connected to e platforms for marketing, sending and receiving money and more. Very often one person may have received multiple, complementary areas of support.</p>					
<p>In terms of measurable outcomes measured through rapid contribution assessments conducted on a sample of projects through core surveys, more than 2.7 million households (an estimated 14.4 million people) found that their resilience was maintained or improved after the RPSF, despite the shocks brought on by the pandemic and even subsequent global events. Additionally, 2.8 million households (15.2 million people) and 2.9 million households (15.5 million people) found the same to be true for their levels of production and numbers of meals – indicating that nearly 3 million households were experiencing sustained or often improved food security. Finally, 2.4 million households (12.9), 2.3 million households (12.4 million people) and 2.2 million households (11.9 million people) found the same to be true for their levels of sales, total income and assets – indicating more than 2 million households were experiencing sustained or often improved financial situations.</p>

<b>SUPPORT TO FARMERS' ORGANIZATIONS</b>					
<p>The support to Farmers' Organisations (FO) is currently delivered by IFAD through complementary programmes: i) Farmers' Organizations for Africa, Caribbean and Pacific (FO4ACP), ii) Farmers' Organizations for Asia (FO4A) and Asia and Pacific Farmers Programme (APFP) and iii) Farmers' Organizations for Latin America (FO4LA).</p> <p>In addition to reaching important results, these programmes have laid the foundation of strong strategic partnerships between IFAD and like-minded donors such as the European Commission (EC) and the Secretariat of the Organisation of African, Caribbean, and Pacific States (FOACPS).</p> <p><b>FO4Programmes are capacity-building programmes</b> (namely FO4ACP, FO4A, FO4LA) aimed at increasing income and improving livelihood, food, and nutrition security and safety of smallholder and family farmers across about 95 countries in four continents, effectively providing support in social and economic aspects, reaching out vulnerable rural populations.</p> <p>The programme's specific objectives (SO) are:</p> <ul style="list-style-type: none"> <li>• SO# 1: FOs and farmer-led enterprises (FLEs) improve technical and economic services to their members along the value chains.</li> <li>• SO# 2: FOs influence policies and business environments for the transformation of family farming and the development of sustainable, adaptive economic initiatives and FLEs.</li> <li>• SO# 3: FOs are accountable organizations able to effectively perform their institutional functions.</li> </ul> <p><b>Farmers' Organizations for Africa, Caribbean, and Pacific Countries (FO4ACP).</b>  Implemented in 70 ACP countries through about 100 FOs, FO4ACP stands as the biggest programme with a potential outreach of 52 million smallholder farmers, representing its primary stakeholders and beneficiaries. The total cost of the programme – including the top-up financing of EUR 10 million approved in 2021 – is estimated at EUR 52.7 million. Specifically, it comprises a joint contribution of EUR 50 million from EC and OACPS, together with IFAD co-financing of USD 3 million (approximately EUR 2.7 million). The cut-off date for the implementation of activities is set for January 2025, while programme closure is scheduled for June 2025.</p> <ul style="list-style-type: none"> <li>• In Africa, FO4ACP is implemented by the PanAfrican Farmers' Organization (PAFO), and its five regional FOs, namely the Eastern Africa Farmers Federation (EAFF), the Plateforme Sous Régionale des Organisations Paysannes d'Afrique Centrale (PROPAC), the Réseau des Organisations Paysannes et de Producteurs de l'Afrique de l'Ouest (ROPPA), the Southern African Confederation of Agricultural Unions (SACAU) and the Union Maghrébine et de l'Afrique du Nord des Agriculteurs (UMNAGRI). Moreover, it is co-implemented by AgriCord, a non-profit global alliance of agri-agencies (AAs) mandated by FOs in Europe, Canada, Africa, and Asia. AAs provide specialized services, tools, and approaches to answer the needs of different segments of FOs.</li> <li>• Within the Caribbean region, considering the absence of an apex organization, the programme is co-coordinated by AgriCord, FAO Regional Office for Latin America and Caribbean, PROCASUR Corporation, and the Latin American and Caribbean Network of Fair-Trade Small Producers and Workers (CLAC). These organizations work with FOs and cooperatives, focusing on strengthening FOs' capacity to access finance and market, providing rural services especially to rural youth and women.</li> <li>• Finally, in the Pacific region, FO4ACP is directly implemented and coordinated by the Pacific Islands Farmers' Organization Network (PIFON), responsible for implementing regional level activities. Affiliated national FOs execute activities at the national level.</li> </ul> <p>FO4ACP interventions focus on the following priority areas:</p> <ul style="list-style-type: none"> <li>• Facilitating the integration of FOs and their smallholder farmers members in value chains and access to finance, by respectively strengthening FOs capacity to provide economic services to their members and improving de-risking instruments.</li> <li>• Supporting FOs capacity to influence policy dialogue and value chains' governance mechanisms at all levels.</li> <li>• Supporting FOs' institutional development through core costs' financing contribution and capacity-building activities.</li> <li>• Facilitating knowledge sharing among ACP FOs through the promotion of peer exchanges for innovation, generation of knowledge products, replication, and scaling up in the areas of production, processing, and marketing.</li> </ul>					

Year 2020 was extremely difficult due to the unprecedented global Covid-19 pandemic, and the programme implementation almost came to a halt. Despite the ever-challenging circumstances, FOs bounced back in 2021, bringing some relieve and allowing to relaunch activities and speed up actions working towards the programme's overall objectives. The analysis of the impact of Covid-19 on smallholder farmers conducted by the RFOs contributed significantly to decision-making processes aiming at supporting appropriate responses for the agricultural sector and smallholder farmers in the different regions. Over the duration of the crisis, FOs had to strengthen their role and take up new roles to support their members effectively. Multiple roles played and recommendations for a way forward are documented in the publication "[Multiple roles of farmers' and producers organizations during the Covid-19 crisis](#)".

In Africa, FO4ACP operated in synergy with the SAFE 2020-RPSF project (completed in 2022), jointly developed by FOs, PAFO members, and AAs members of AgriCord involved in FO4ACP as an emergency support facility, in response to the Covid-19 crisis. The project focused on providing emergency support to rural populations and smallholder farmers during the challenging times brought about by the emergency, aiming at supporting agricultural production and livelihoods in the face of the pandemic. The total budget allocated was about USD 1.5 million, with additional funding of USD 500.000 to extend the project.

Within this framework, in May 2021 IFAD started consultations with the EC and OACPS, involving all programme stakeholders to elaborate a mitigation and recovery action in the context of FO4ACP, resulting in the elaboration of the *FO4ACP Covid-19 Mitigation Action*. The overall objective was to support smallholders and FLEs to recover from the economic impacts of the Covid-19, strengthening their resilience in the face of future crises. The amendment process led to 18-months extension of the programme implementation period. Nowadays, the action is fully integrated into the programme framework; in line with its specific objectives, new activities were planned under the four components. The allocation of resources maintained the same budget percentages among the components, according to the overall programme framework. The Mid-term review (MTR) of the programme took place in the first half of 2022, focused mainly on Africa and the Pacific, as the Caribbean started implementation one year later. At MTR, the cumulative budget execution corresponded to 51% of the total allocated budget. In May 2023 – about a year after the MTR – a successful knowledge management (KM) hybrid event was organized and hosted by PAFO, in Kigali (Rwanda), to review the progress made and share experiences and promising practises among FO4ACP implementing partners, fostering networking opportunities by connecting opinions and suggestions from 91 in-person and 180 online-attending key stakeholders. The event included several thematic sessions, encompassing presentations, discussions, and group works focusing on six crucial areas related to FO4ACP's work: access to finance (I), member services and implementation of business plans (II), climate change and resilience (III), agroecology (IV), political commitment, advocacy, and data collection for informed decision-making (V), and inclusive approaches in FO4ACP activities (VI). Furthermore, an interactive marketplace was organized, as an informal space to allow participants interactions with exhibitors during various breaks, providing them the opportunity to showcase their work and exchange ideas. A total of 41 case studies were gathered, of which 29 officially presented during the sessions, and 12 informally discussed within the framework of the marketplace. All case studies addressed a topic related to one of the six thematic areas discussed during the event.

In 2023, all 15 grant agreements have been amended to integrate the additional financing and the programme extension. As of December 2023, IFAD cumulatively disbursed EUR 33 million to programme recipients, corresponding to 71% of total allocated resources. Overall, the execution of the programme's workplan is aligned with the established objectives: FO4ACP was able to reach more than 120 NFOs (out of 83 initially targeted) in 51 countries through 6 RFOs in Africa and the Pacific, and AgriCord and FAO in the Caribbean. A total of approximately 320.590 individual producers benefited from the economic initiatives of either FOs or FLEs. In 2023, more than EUR 10 million were mobilized by private and public sector through bankable business plans, and the total value of production sold thanks to FOs negotiations and business to business (B2B) meetings amounted to over EUR 65 million. Under component 2, over 270 policies and programmes were influenced by FOs. Component 3 strengthened member's representation in FOs governance bodies, improved financial accountability and developed appropriate FOs management tools, reaching FOs membership of over 60 million people. Under component 4, investments in recipients' communication and visibility contributed to an enhanced recognition of FOs work and legitimacy, as well as to the visibility of the FO4ACP programme and donors, reaching almost 3000 public references quoting either the programme or the involved FOs.

**FO4Asia** – IFAD forged ties with two sub-programme implementing arms - the Asian Farmers Association for Sustainable Rural Development, Inc. or AFA, in consortium with the La Via Campesina (LVC); and with the AgriCord, based in Brussels, Belgium. The FO4A builds on the capacities of farmer organizations and cooperatives, as active partners in policy advocacy, capacity and institution building, and providing economic services to member-farmers, leading to rural and farmer-led business enterprises. FO4A has a total cost of EUR 14,988,000. This includes the maximum amount of EUR 12,780,000, as EU contribution. The Delegation Agreement FOOD/2020/419-639 was signed between IFAD and EU on 14 December 2020. The programme aims at improving economic services, strengthening policy advocacy, and enhancing capacities of FOs in Asia, for improved incomes, livelihoods, food and nutrition security and environmental sustainability.

For year 2023, under the AFA/LVC sub-programme, the total target number of sub-national FOs (SNFOs) was 450 priority FOs (PFOs). These PFOs are providing economic services to their members, registered as legal organization in the country, and with enough number of members for scale. Out of the 450 PFOs, 250 were chosen as lead FOs. These LFOs are those that are ready (or have an ongoing) business operations. Out of the 250, 100 are targeted for business financing under the program, while the remaining 150 will be for fund sourcing with other partners/donors. A total of 3M or 12.5% of the total 24M members in the platform were identified to benefit from favorable policies. Out of this, a total of 360,000 or 12% of 3M are prioritized for economic services, and are expected to have increases in income from program interventions. Based on the results of programme implementation, most of the indicators have already reached the targets for 2023, while the others are above the 50% mark.

For AgriCord, FO membership figures have been on the rise. Until 2023, cumulatively, over 950,000 members have joined the partner FOs, of which, are 616,000 women and 238,000 men, including 95,000 youth of both sexes. Between 2022 and 2023, an incremental increase of over 190,000 members alone was reported. Such an upward trend can only reflect the increased trust put by farmers in the FOs, in particular the women and youth. AgriCord reported making remarkable progress, despite the challenges faced by the partners and members in Asia, and the Alliance continued to achieve and even exceed most indicators in 2023. With this, the performance ratio is above 50 % or higher for most indicators. For instance, the production goods with a total value of EUR 16 million (target EUR 10 million) and a volume of 166,000 tons were marketed by the end of 2023. The increase in marketed goods can be observed across projects. Farmers' organizations were able to secure EUR 2.1 million (target EUR 1.7 million) in credits and investments. Combined with growing membership figures, these results indicate the increasing maturity of farmers' organizations.

**FO4LA** - On December 28, 2020, the Contribution Agreement No. FOOD/2020/419-668T was signed between IFAD and the EU for the implementation of the FO4LA Programme. The implementation period was 42 months from 1 January 2021. The total cost of the program is estimated at EUR 2.22 million, fully financed by contributions of the EU. IFAD had the role of coordinating and supervising the whole programme execution. IFAD signed 2 Grant Agreements with the recipients and key partners identified during program design: COPROFAM (the Confederación de Organizaciones de Productores Familiares del Mercosur), and AgriCord. The agreement was effective from 22 July 2021, and targeted smallholder and family farmer members of national and subnational FOs affiliated to COPROFAM and supported by AgriCord's AAs in 9 countries in Latin America: Argentina, Brazil, Bolivia, Chile, Colombia, Ecuador, Paraguay, Peru, and Uruguay.

The final evaluation of FO4LA was conducted between September and December 2023, and analysed the programme's performance, comparing the results obtained with the objectives established in the design document, the annual work plan and budget (AWPB), and against the indicators and targets of the updated logical framework. The process pointed out a successful implementation of the activities across all programme components.

The provision of demand-driven services and support to business plans reached 15 national/subnational FOs in a sub-set of 4 countries: Brazil, Bolivia, Paraguay, and Peru. Over 8.300 farmers benefited from the economic services offered by FOs. The programme also influenced 30 sectorial policies and programmes on topics such as organic production, school feeding, government procurement, and rural youth, among others. Additionally, it increased the membership and participation of youth and women in decision making within FOs, as well as in advocacy spaces. FO4LA contributed to an increase in the volume and value of goods marketed across various value chains (from 16.8 to 22.4 tonnes, for a total value rising from EUR 30.4 million to EUR 34.8 million) and mobilized nearly EUR 1 million in complementary private investments. Support was also provided for capacity building through technical assistance and trainings, using various management tools. A total of 66 management tools and 14 best practices were catalogued, showcasing significant progress in strategic planning and operational management. Moreover, the programme demonstrated satisfactory budget execution, with comprehensive application of the planned resources across all components. The cumulated expenses amounted to EUR 2 million (100%), disaggregated in EUR 985.000 from AgriCord and EUR 1.015.000 from COPROFAM. Two videos were filmed in 2023, to capture the essence of the programme through the lives of two FO4LA beneficiaries in Brazil (videos available here: [video 1](#), [video 2](#)).

#### **FO4Programmes evaluation process**

Starting from December 2023, IFAD undertook the evaluation process of the FO4Programmes, with the aim of critically reviewing outcomes and impacts and offering recommendations to shape future IFAD-backed initiatives supporting FOs. A team of 9 expert, including FO4Programmes Task Managers, has been created, collaborating with IFAD staff at country level and keeping regular interactions with FOs and key institutions in a participatory manner. In order to determine the effectiveness, efficiency, sustainability, and achievements of FOs' activities across the various targeted regions, and to generate insights for crafting a new proposal for the subsequent generation of FOs supporting programmes, the evaluation team will focus on economic initiatives, sustainable agriculture, food security, nutrition, family income effects, resilience to climate change and shocks, community empowerment, and advocacy for family farming policies, assessing programme outputs, financial progress, and collaborative arrangements, with the aim of identifying scalable good practices and knowledge to be shared with IFAD, EU, and other key stakeholders.

The FO4Programmes evaluation process includes the following key aspects:

- Performance and outcome analysis: examine the implementation and results achieved by the FO4 Programmes, assessing their alignment with initial objectives, design documents, and logical framework indicators, evaluating the relevance and unique benefits of the support provided, and the effectiveness of utilizing grant programmes for funding.
- Implementation assessment: scrutinize the governance, arrangements, and institutional partnerships of the programmes to identify deviations, challenges, or bottlenecks in implementation, evaluating the potential for sustainability post-completion. Moreover, the integration of cross-cutting themes (e.g., gender, climate change, youth, nutrition) will be reviewed, assessing IFAD's role in quality support, fund management, and integration of FO4 activities within country programmes.
- Lessons and recommendations: highlight lessons learned, innovations, best practices, and comparative advantages, proposing recommendations for future programmes regarding objectives, focus areas, management, M&E, and sustainability.

The evaluation process is set for a duration of about 5 months, with a debriefing meeting scheduled in Brussels (EC HQ) by the end of June 2024.

<b>FARMERS' FORUM</b>					
<p>The Farmers' Forum (FAFO) is a bottom-up process of consultation and dialogue between small farmers' and rural producers' organizations, IFAD and governments for rural development and poverty reduction. Established in 2006 as a permanent feature of the IFAD Governing Council and operationalized through IFAD-funded investment projects and grant programmes, the Farmers' Forum is fully aligned with IFAD's strategic objectives and is rooted in concrete partnership and collaboration at country and regional levels. Over years, the FAFO process has demonstrated its relevance and indeed changed the way IFAD and FOs are working together. Since its inception, FAFO has received supplementary funding from Italy, Switzerland, France, Finland and BMGF.</p> <p>The Support to the Farmers' Forum (FAFO) Process pursued the overall objective to strengthen the capacity of smallholder farmers and rural producers to overcome poverty through the collective action of their membership-based organizations in synergy with public agricultural development policies and programs. The agreement between the Swiss Development Cooperation (SDC) and IFAD entered into force on September 3, 2018 for a total duration of nearly five years and a total amount of US\$800,000. An amendment for the no cost extension of the completion date of the activities to ensure their effective implementation was requested by IFAD and signed on May 23rd, 2022, thus bringing the final date of the agreement to 31st May 2023. The extension was requested to overcome delays in the implementation of originally planned activities that occurred due to the outbreak of the Covid-19 pandemic, during which, due to restrictions imposed, regional meetings that were to be held in presence could not take place.</p> <p>At the sixth global meeting of the Farmers' Forum held in Rome in 2016, major changes in the organization and governance of the process were agreed upon. These included the decentralization of the FAFO process to strengthen the impact of the Forum at the national level, which took place with the support of the SDC. The decentralization aimed to establish closer connections with farmers organizations and their members and enhance the involvement of IFAD regional divisions and country programs. FAFO is now organized on a four-year cycle, with global meetings every four years and regional meetings organized in between.</p> <p>The seventh global meeting of the Farmers' Forum, held on 6, 7, 10 and 11 February 2020, organized by IFAD with the financial support of SDC, in conjunction with the forty-third session of the Governing Council of IFAD, stands out as one of the largest global meetings in terms of participation. The global meeting brought together 91 farmers' leaders and representatives (45 per cent were women), representing millions of small-scale farmers, pastoralists and fisher peoples in APR, ESA, LAC, NEN and WCA for the purpose of exchanging views on the evolution of the partnership with IFAD. Over forty representatives from partner organizations, such as non-governmental organizations (NGOs), foundations, international organizations, United Nations (UN) agencies, research institutes and universities, joined the meeting as observers. These included the Secretariat of the African, Caribbean and Pacific Group of States (ACP Secretariat), AgriCord and several of its members, AMEA, Crocevia, the European Union (EU) and the European Commission (EC), the Food and Agriculture Organization (FAO), the World Rural Forum (WRF), PROCASUR and Slow Food.</p> <p>The global meeting included the organization of five regional working group sessions, focusing on evaluating collaboration progress and outlining future steps in IFAD's working regions. Additionally, five thematic working groups were convened to deliberate on critical subjects such as climate change and the transition to agroecology, the United Nations Decade of Family Farming (UNDIFF), the involvement of farmers' organizations in the preparations for the 2021 Food Systems Summit, women's leadership, youth in agriculture, and new instruments for IFAD12. A number of side events to allow further discussion of topics emerging during the thematic working groups and regional meetings were also organized. The Synthesis of Deliberations of the 2020 FAFO was adopted and discussed with IFAD Management and Executive Board members, and delivered to the IFAD Governing Council meeting, based on the discussions and contributions made in the debates. The Synthesis of Deliberations highlighted the need for urgent global action to address the impacts of climate change on rural communities and food systems. It emphasized the importance of implementing policies in favor of small-scale food producers and contributing to the 2030 Agenda for Sustainable Development and the UN Decade of Family Farming.</p>					

Since the 6th Global Meeting of the Farmers' Forum held in 2016, thanks to the FAFO's decentralization process, regional meetings have been held among the global ones to "be closer" to farmers and to encourage greater involvement of IFAD's regional divisions and country programs.

The second cycle of regional meetings of the Farmers' Forum took place in all regions where IFAD operates in 2022 and 2023 thanks to SDC support. In particular, the regional meetings of the FAFO were held in East and Southern Africa (ESA), West and Central Africa (WCA), Asia and the Pacific (APR), Latin America and the Caribbean (LAC), Near East, North Africa, Europe and Central Asia (NEN).

Regional Meeting	Organization	Place	Date
Middle East and North Africa	UMNAGRI	Tunis	17-18 October 2022
Europe and Central Asia	IFAD	Istanbul	19 October 2022
Asia and the Pacific	AFA	Bangkok	26-28 October 2022
West and Central Africa	ROPFA	Abidjan	15-18 November 2022
East and Southern Africa	EAFD	Dar es Salaam	24-25 November 2022
Central America and the Caribbean	COPROFAM - CLAEH	Panama	23-24 January 2023
South America	COPROFAM - CLAEH	Montevideo	26-27 January 2023

The major items discussed during the regional FAFO meetings (organized in 2022 and 2023) included the most critical circumstances faced by family farmers and their organizations, with a focus on the challenges posed by Covid-19, climate change, and the Russia-Ukraine war. The progress of IFAD-FO partnerships was reviewed to assess achievements, identify challenges, and draw lessons learned. Participants also aimed to identify areas of potential and stronger interaction and collaboration, particularly in advocating for the effective implementation of the United Nations Decade of Family Farming (UNDF) processes within the United Nations Declaration on the Rights of Peasants and Other People Working in Rural Areas (UNDROP) framework. As a result, action plans were developed to strengthen partnerships, collaboration, cooperation, and coordination between farmers' organizations (FOs) and IFAD, as well as IFAD projects.

<b>Smallholder and Agri-SME Finance and Investment Network (SAFIN)</b>					
<p>The Smallholder and Agri-SME Finance and Investment Network (SAFIN) is a multi-stakeholder partnership of aiming to advance inclusive access to finance for small-scale farmers and agricultural small and medium enterprises (SMEs). SAFIN was designed to increase opportunities for collaboration and shared understanding among the providers, recipients and enablers of agricultural finance. The initiative to establish SAFIN was jointly launched by IFAD and the Government of Italy in 2017.</p>					
<p>SAFIN has since grown from a core group of 25 institutions to a community of over 60 organizations spanning the investment value chain of agri-SME finance. SAFIN offers these institutions a pre-competitive space for knowledge exchange, joint advocacy and co-development of collaborative initiatives to move more capital and other non-financial resources closer to agricultural SMEs. Since 2018, SAFIN’s activities have informed the design of SME-focused investments worth over US\$250 million.</p>					
<p>SAFIN’s work has been supported by contributions from IFAD, donors and philanthropic organizations, including the Agence Française de Développement (AFD), Argidius Foundation, the European Commission (EC), the Italian Agency for Development Cooperation (AICS), the New Venture Fund, Small Foundation and the U.S. Agency for International Development (USAID).</p>					
<p>Throughout 2023, SAFIN continued the implementation of its key priorities for the period of 2021-2025:</p>					
<ul style="list-style-type: none"> <li>• <b>Convene:</b> SAFIN brokered knowledge among agri-finance players through its Annual Plenary Meeting and online events, growing its average event participant by 25%. The annual meeting took place at IFAD headquarters in October 2023, where SAFIN members celebrated network achievements and emphasized its move towards more joint ventures building on the sector insights emerging from publications. Two additional events were hosted- one focused on effective business development services (BDS) for agricultural enterprises in Africa and another diving into the evidence gap in the agri-SME finance sector. Similar to previous years, SAFIN documented the learnings from these events through session recordings, blogs and summary reports.</li> <li>• <b>Focus:</b> In early 2023, SAFIN published four thematic reports, whose recommendations were taken up by various member institutions to improve their agri-finance operations. A SAFIN-funded Evidence review for agricultural SME finance led to the launch of the Agri-SME Evidence Fund by Aceli Africa and the International Growth Center (IGC) to inform future impact investments in sub-Saharan Africa. A IFAD-SAFIN survey on financing farmer organizations has been instrumental in the design of a blended finance instrument by IFAD to channel more capital to cooperatives in Africa, Asia and Latin America. AGRA’s Agribusiness Dealroom has integrated findings on the delivery and fee payment models of BDS from a recent study conducted by SAFIN and its partners to enhance its support to agricultural enterprises.</li> <li>• <b>Influence:</b> SAFIN stepped up its strategic influence and global engagement efforts at high-visibility regional and international forums. In May 2023, SAFIN, IFAD and the Italo-Latin American Institute (IILA) co-organized an ‘Agri-food SMEs Forum’ at the MACFRUT Fair to highlight green finance experiences in LAC. In July 2023, SAFIN supported the design of a high-level discussion with the private sector and hosted an SME-focused exhibition booth at the United Nations Food Systems Summit +2 Stocktaking Moment. In September, the network hosted 4 side events at the Africa Food Systems Forum highlighting the key learnings on four themes- green finance, financing farmer organizations and enterprise support. In November 2023, SAFIN joined the African Agri-Investment Indaba as a strategic partner to design an investment discovery session connecting smaller agribusinesses to investors in Africa. Throughout the year, the Secretariat also engaged in public advocacy through its communication channels in support of these major events and others such as COP28.</li> <li>• <b>Track:</b> The SAFIN Secretariat enhanced its tools for members to track and engage in new opportunities for collaboration and innovation during 2023. This work entailed upgrading its members’ portal and monthly bulletin with sector highlights, as well as hosting quarterly coordination meetings for members to share insights about their upcoming work. During these meetings, new member initiatives seeking partners were highlighted, including IFAD’s new Africa Rural Climate Adaptation Finance Mechanism (ARCAFIM), the Nutritious Food Financing Facility by Incofin Investment Management and the Global Alliance for Improved Nutrition (GAIN), and AGRA’s planned initiative to provide technical assistance to high-impact enterprises in Africa.</li> </ul>					

- **Co-create:** SAFIN adopted a new approach, Peer-Designed Ventures (PDVs), to leverage the shared knowledge and standards developed by its members for collaborative investments in the sector. Using working groups as an entry point, the PDVs facilitate the co-design of new initiatives that align with the programmatic needs of SAFIN members in priority regions. In APR, a member working group is co-developing a financing solution to increase access to green finance for farmer organizations, while the LAC working group has selected biodiversity financing as its main focus for future collaboration. A similar working group is planned for the sub-Saharan Africa in 2024.

**Network Development:** In addition to these activities, SAFIN welcomed six new reputable institutions to its network- Argidius Foundation, the Centre for Agriculture and Bioscience International (CABI), Incofin Investment Management, Opportunity International, the Norwegian Agency for Development Cooperation (NORAD) and SEED. The Secretariat also completed a rebranding exercise to better highlight the role of agricultural SMEs in transforming food systems and secured additional funding from Argidius Foundation and USAID.

<b>South-South and Triangular Cooperation (SSTC)</b>					
<p>The China-IFAD SSTC Facility, IFAD's first facility dedicated to SSTC, was established in 2018 with a supplementary contribution of US\$10 million from the People's Republic of China. As of 2023, Facility-funded interventions reached near 40 countries through a portfolio of 17 projects and an investment of US\$7.77 million. The Facility fully aligns with IFAD's SSTC Strategy 2022-2027 which emphasizes increased mainstreaming of SSTC in the Fund's operations to support partnership building, policy engagement, innovation and knowledge generation for rural transformation. From 2018 to 2023, the Facility-funded projects organized 158 capacity development and policy dialogue events, developed 162 knowledge products, engaged 228 experts, and facilitated 126 business-to-business linkages, benefiting 44,085 smallholder farmers with 70,361 indirect beneficiaries in developing countries.</p> <p>In 2023, among six (6) active projects, three (3) projects reached their completion dates and have entered the closure stage, and three (3) projects were under implementation and will be taken forward into 2024. These active projects organized 66 capacity development and policy dialogue events, developed 24 knowledge products, engaged 24 experts, and facilitated 23 business-to-business and SSTC linkages, benefiting 28,386 smallholder farmers directly, mainly in Tanzania, Rwanda and Kenya. Below are detailed examples of achievements in these areas through active projects in 2023:</p> <ol style="list-style-type: none"> <li>1. Knowledge and Policy Exchange: Almost all SSTC projects include knowledge exchange activities such as policy dialogues, training events (both online and on-site), workshops, and exchange visits, and publish knowledge products. For instance, in Cuba, 18 training sessions were conducted on topics like crop management, integrated pest management, and the evaluation of crop varieties in a local context, involving over 1,000 participants from various value chains. Additionally, this project also organized a study tour to China to promote knowledge exchange and dialogue between Cuba and China.</li> <li>2. Technical Assistance: This aspect primarily involves importing expertise from the Global South and transferring solutions and innovations between developing countries. For example, in the STARLIT project in Rwanda and Kenya, farmers received solar-powered irrigation systems, which doubled maize yields. Training in equipment maintenance was also provided to young people, ensuring the sustainability of the technology, and creating jobs for rural youth.</li> <li>3. Business Collaboration: The Facility has enabled partners from the Global South to build technical contacts and forge both business-to-business (B2B) and private-public partnerships, aimed at promoting inclusive rural development. For example, in the PROSCAWA project, an online fish marketing platform was developed to enhance market linkages within the aquaculture value chain, now managed by private sector partners in Nigeria and Ghana.</li> <li>4. Trade Facilitation: This component promotes national policies and trade agreements that support the development of export-oriented agricultural sectors. In the SSUCORETA project, trade partnerships were established with neighboring countries such as Kenya, South Sudan, Uganda, Rwanda, Burundi, and the DR Congo to export dried cassava chips from Tanzania.</li> </ol> <p>These results exemplify the Facility's continuous efforts and significant strides made in its priority areas, directly benefiting thousands of smallholder farmers and contributing to sustainable agricultural practices across developing nations.</p>
