President’s report

Proposed loan to the Republic of Yemen for the Rainfed Agriculture and Livestock Project

For: Approval
Note to Executive Board Directors

This document is submitted for approval by the Executive Board.

To make the best use of time available at Executive Board sessions, Directors are invited to contact the following focal point with any technical questions about this document before the session:

Abdalla Rahman
Country Programme Manager
telephone: +39 06 5459 2348
e-mail: ab.rahman@ifad.org

Queries regarding the dispatch of documentation for this session should be addressed to:

Deirdre McGrenra
Governing Bodies Officer
telephone: +39 06 5459 2374
e-mail: d.mcgrenra@ifad.org

Republic of Yemen

Rainfed Agriculture and Livestock Project

Loan summary

Initiating institution: International Development Association (IDA)
Borrower: Republic of Yemen
Executing agencies: Ministry of Agriculture and Irrigation (components 1 and 2)
Social Fund for Development (component 3)
Total project cost: US$42.2 million
Amount of IFAD loan: SDR 10.85 million (equivalent to approximately US$16.6 million)
Terms of IFAD loan: 40 years, including a grace period of 10 years, with a service charge of three fourths of one per cent (0.75 per cent) per annum
Cofinancer: International Development Association (IDA)
Amount of cofinancing: US$19.6 million
Terms of cofinancing: Highly concessional
Contribution of borrower: US$0.4 million
Contribution of beneficiaries: US$5.6 million
Appraising institution: IFAD
Cooperating institution: IDA
Proposed loan to the Republic of Yemen for the Rainfed Agriculture and Livestock Project

I. The project

A. Main development opportunity addressed by the project

1. The project addresses the growing stress on available natural resources caused by a rapidly increasing population with greater demands and expectations. The project will: halt and reverse the accelerating trend of resource degradation through participatory natural resource management initiatives; upgrade and diversify rainfed agricultural and livestock production; and promote microfinance and microenterprise development, marketing and partnerships with the private sector.

B. Proposed financing

Terms and conditions

2. It is proposed that IFAD provide a loan to the Republic of Yemen in the amount of SDR 10.85 million (equivalent to approximately US$16.6 million) on highly concessional terms to partially finance the Rainfed Agriculture and Livestock Project. The loan will have a term of 40 years, including a grace period of 10 years, with a service charge of three fourths of one per cent (0.75 per cent) per annum.

Relationship to the IFAD performance-based allocation system (PBAS)

3. The computed 3-year PBAS allocation for Yemen (2007-2009) is US$16.591 million, approximately equivalent to the IFAD loan for this project.

Country debt burden and absorptive capacity of the State

4. The country’s handling of its external debt has improved, mainly due to high oil prices and a surge in private investment in response to ongoing reforms. External debt stood at US$5.4 billion in 2006 (28 per cent of GDP). The debt-service ratio stood at 2.7 per cent of GDP, and foreign exchange reserves at US$7.5 billion (19 months of imports). Total disbursements from all IFAD operations in Yemen in 2006 amounted to SDR 2.6 million. The Government’s repayment record for IFAD loans is good.

Flow of funds

5. IFAD loan proceeds will be channelled through a special account for the Social Fund for Development (SFD) for eligible expenditures. SFD is an autonomous public agency, strongly committed to poverty reduction, and recognized as the leading institution in Yemen in this field.

Supervision arrangements

6. The IFAD loan will be administered by the International Development Association (IDA). IDA will supervise the project at least once annually. Continuous support and oversight on procurement, disbursement, administrative matters and technical implementation will be provided by the World Bank office in Sana’a. The IFAD Field Presence Officer in Sana’a will provide support as appropriate. IFAD will also undertake at least one follow-up mission annually, focusing on targeting, gender sensitivity and impact achievement.

Exceptions to IFAD General Conditions for Agricultural Development Financing and operational policies

7. No exceptions are foreseen.

Governance

8. The following provisions are intended to enhance the governance aspects of IFAD financing: (i) use of private auditors; (ii) competitive service provision through competitive contracting; (iii) introduction of best practices for the promotion of
microfinance; and (iv) partnership with elected local government councils in the sustainable operation and maintenance of project-provided economic infrastructure.

C. Target group and participation

Target group
9. The project will target about 185,000 households, including landless households, smallholder farmers having rainfed acreage with little irrigation and small numbers of livestock, and pastoralists with little or no cropland. About 30 per cent of the households in these groups are headed by women, and their participation in all project activities will be actively sought.

Targeting approach
10. Within the five project governorates, the project will target 23 districts, which have been identified through participatory socio-economic surveys as the poorest and most disadvantaged. In accordance with the IFAD Policy on Targeting, targeting within each district will focus on identifying the poorest communities with the highest proportion of rural poor producers.

Participation
11. Participation includes: community selection, sensitization and mobilization; formation of rural producer groups (RPGs) and committees (RPCs); provision of training and technical support to assist communities in: (i) organizing at community and intercommunity levels and managing their organizations; (ii) undertaking initiatives; (iii) preparing and prioritizing subprojects that they have identified; (iv) assuming responsibility for the operation and maintenance, on a sound financial and technical basis, of project-supported social and economic investments; and (v) accessing services and input and output markets.

D. Development objectives

Key project objectives
12. The overall project goal is to reduce rural poverty in the project area and improve natural resource management. The development objectives are to: (i) help producers upgrade and diversify agricultural and livestock production and processing and marketing systems, and protect their assets (soil, water, rangeland, seed and animals); and (ii) empower rural communities to organize, participate in and gain benefit from community-based development planning and execution and to improve their access to public and private services, input and output markets and rural finance.

Policy and institutional objectives
13. Important objectives of the project are to: (i) help the Ministry of Agriculture and Irrigation improve its capacity to fulfil its core supervisory and regulatory functions; (ii) support SFD in building capacities and reorienting activities towards productive investments that address the income aspects of poverty; (iii) contribute towards establishment of a sustainable microfinance system with significant outreach in the project area; and (iv) empower RPG/Cs to establish sustainable, participatory systems for the management of community initiatives and resources.

IFAD policy and strategy alignment
14. The project is fully aligned with IFAD’s strategic objectives of strengthening the capacity of the rural poor and their organizations and increasing access to financial services and markets. It accords with the objective of the country strategic opportunities paper to contribute to rural employment creation, income generation and natural resource conservation.
E. Harmonization and alignment
Alignment with national priorities
15. The project is aligned with the Government’s poverty reduction strategy as articulated in the Socio-Economic Development Plan for Poverty Reduction 2006-2010. The plan calls for reducing poverty by focusing, among other priorities, on: (i) labour-intensive investment projects and programmes, especially in agriculture, industry and tourism; (ii) partnerships with the private sector, civil society and donors to develop small and medium-sized enterprises; (iii) microfinance services for the poor, especially for rural women; and (iv) enhanced capacity of local authorities to generate and manage resources to reduce poverty through local initiatives.

Harmonization with development partners
16. IDA is cofinancing the project in the amount of US$19.6 million. The project will enable cross-fertilization with several donor-supported activities, including SFD’s pilot Integrated Interventions Program, under which participating communities will receive additional funding for social infrastructure and management needs. The World Bank-supported Public Works Project and the Rural Access Project may finance additional infrastructure as necessary.

F. Components and expenditure categories
Main components
17. The project has four components: (1) a farmer-based system of seed improvement and management; (2) livestock husbandry and health services; (3) productive rural development; and (4) project management. IFAD and IDA will cofinance component 3, while IDA will fully finance components 1, 2 and 4.

Expenditure categories
18. For the IFAD/IDA cofinanced component 3, there are seven expenditure categories: (i) civil works (45.2 per cent of total component cost); (ii) equipment (0.2 per cent); (iii) training (4.6 per cent); (iv) support to RPGs through agricultural inputs, demonstrations and technology transfer (26.5 per cent); (v) technical assistance and studies (1.2 per cent); (vi) microcredit, including capacity-building in partner microcredit organizations and loan funds (14 per cent); and (vii) operation and maintenance (8.2 per cent).

G. Management, implementation responsibilities and partnerships
Key implementing partners
19. These partners will include the Ministry of Agriculture and Irrigation for components 1 and 2 and SFD for component 3. Other implementers of component 3 include the district councils in the project area, collaborating microfinance institutions (MFIs) and project beneficiaries.

Implementation responsibilities
20. The Ministry will be responsible for overall coordination and management of components 1 and 2. SFD will be responsible for the implementation and coordination of activities for component 3 through its Agricultural and Rural Development Unit. RPGs of common economic interest at the community and intercommunity levels will identify, supervise and assume operational and management responsibility for community and group investments executed by private contractors. MFIs will be recruited to implement a microcredit programme.

Role of technical assistance
21. The IFAD loan includes an allocation of US$390,000 for technical assistance, including that to SFD to build capacities and reorient activities. Collaborating MFIs will receive support to implement best practices and to refine their business plans, develop new service products and marketing strategies, improve credit analysis and loan tracking capabilities, and upgrade financial management and loan recovery
capacities. Support to community-based associations will focus on community organization, business development and natural resource management skills.

**Status of key implementation agreements**

22. In addition to the standard loan agreement between IFAD and the Government, a subsidiary agreement will be executed between SFD and collaborating MFIs, specifying the conditions for implementing the microfinance subcomponent.

**Key financing partners and amounts committed**

23. An IDA credit of US$19.6 million, signed September 2006, will fully finance components 1, 2 and 4 and cofinance 31.1 per cent (US$9.99 million) of component 3. Government financing of about US$0.4 million will cover the cost of taxes for components 1 and 2. The beneficiaries’ contribution of US$5.6 million (17.3 per cent of component 3 costs) will include labour, local materials and the cash share of their investments.

**H. Benefits and economic and financial justification**

**Main categories of benefits generated**

24. The project will benefit rural poor households by increasing incomes, agricultural and livestock production and food security and by creating on- and off-farm jobs. These gains will stem from: improved production technology, water management, seed for rainfed agriculture, and veterinary and livestock services; higher on- and off-farm investments; and better margins on sales of produce – as producer groups help members achieve the scale of production necessary to exploit economies of scale and strengthen their bargaining power.

**Economic and financial viability**

25. A series of likely typical farm models were constructed and evaluated. Results show positive incremental returns per hectare. Expected increases in farmers’ income as a result of the project range from 16.7 to 18.8 per cent. The overall economic rate of return is about 17.7 per cent. Benefits from livestock investments have been calculated based on herd-size estimates at project area and national levels. About 30 per cent of the total herd in the project area is expected to benefit from improved access to veterinary services, with an increase in meat and milk productivity of 40 per cent five years after project completion.

**I. Knowledge management, innovation and scaling up**

**Knowledge management arrangements**

26. Assisted by its field presence in Yemen, IFAD will organize yearly national project implementation workshops, allowing project staff and other implementing partners to share lessons learned across projects and to inform relevant policy forums. Small brochures will be produced to record the lessons learned.

**Development innovations that the project will promote**

27. The most innovative project feature in the Yemeni context is the reorientation of SFD towards interventions in rural development activities that go beyond construction of social infrastructure. Under this project, SFD will support productive investments that address the income aspects of poverty. SFD will thus gain experience and develop the institutional capacity to become the leading agency in economic as well as social rural development and to assume a pioneering role in reducing rural poverty in the country.

**Scaling-up approach**

28. Project implementation will allow SFD to gain experience and learning in mainstreaming participatory natural resource management, economic infrastructure development and provision of expanded-outreach microfinance services that can be replicated in other parts of the country.
J. **Main risks**  
**Main risks and mitigation measures**

29. One risk is that RPG/Cs will cease to function once the project ends. This risk will be mitigated by allowing groups to form on the basis of common economic interests and need and by providing capacity-building. Another risk – that cultural traditions may prove too entrenched to allow rural women to become involved in project activities, particularly in decision making and management – will be mitigated by gender training and the development of a gender strategy and programme for the project, with the assistance of a long-term, woman gender consultant.

**Environmental classification**

30. The project was assigned a Category B classification under World Bank environmental guidelines. No significant cumulative or irreversible environmental impacts of the project were assessed. An environmental management plan was designed to address potential adverse environmental and social impacts. The plan proposed: (i) a process and criteria for screening small-scale infrastructure projects; (ii) a monitoring and evaluation programme to track project environmental impacts; and (iii) an environmental capacity-building and awareness programme for participating public/private-sector institutions and local populations.

K. **Sustainability**

31. By promoting the formation and capacities of RPG/Cs on the basis of common economic interests and need, the project will contribute to a sustainable and fully participatory system for natural resource management and for continuing development through the community’s own initiative and resources.

**II. Legal instruments and authority**

32. A project loan agreement between the Republic of Yemen and IFAD will constitute the legal instrument for extending the proposed loan to the borrower. Important assurances included in the negotiated agreement are attached as an annex.

33. The Republic of Yemen is empowered under its laws to borrow from IFAD.

34. I am satisfied that the proposed loan will comply with the Agreement Establishing IFAD.

**III. Recommendation**

35. I recommend that the Executive Board approve the proposed loan in terms of the following resolution:

RESOLVED: that the Fund shall make a loan to the Republic of Yemen in various currencies in an amount equivalent to ten million eight hundred and fifty thousand special drawing rights (SDR 10,850,000) to mature on or prior to 15 April 2047 and to bear a service charge of three fourths of one per cent (0.75 per cent) per annum, and to be upon such terms and conditions as shall be substantially in accordance with the terms and conditions presented herein.

Lennart Båge  
President
Important assurances included in the negotiated project loan agreement

(Negotiations concluded on 10 August 2007)

**Pest management**

1. The Government of the Republic of Yemen (the Government) will comply with the International Code of Conduct on the Distribution and Use of Pesticides and ensure that pesticides procured under the project do not include any pesticides classified as extremely hazardous or highly hazardous by the World Health Organization.

**Gender**

2. The Government will ensure that gender balance exists, to the extent possible, in all project activities.

**Fraud and corruption**

3. The Government will promptly bring to the attention of IFAD any allegations or claims of fraud and/or corruption in relation with the implementation of the project properly brought to its attention through the appropriate means, in accordance with its national laws and regulations.

**Suspension**

4. (a) IFAD may suspend, in whole or in part, the right of the Government to request withdrawals from the loan account upon the occurrence of any of the events set forth in the General Conditions, or if:

   (i) IFAD, after consultation with the Government, has determined that the material benefits of the project are not adequately reaching the target group or are benefiting persons outside the target group to the detriment of target group members;

   (ii) The Government has defaulted in the performance of any covenant set forth in of the project loan agreement and such default has continued unremedied for a period of thirty (30) days, and IFAD has determined that such default has had, or is likely to have, a material adverse effect on the project;

   (iii) The Development Credit Agreement (DCA) between the Government and the IDA has been suspended or cancelled, or any of the events specified in Section 5.01 of the DCA have occurred;

   (iv) IFAD has given notice to the Government that credible allegations of corrupt or fraudulent practices in connection with the project have come to the attention of IFAD, and the Government has failed to take timely and appropriate action to address the matters to the satisfaction of IFAD;

   (v) Procurement has not been or is not being carried out in accordance with the provisions of the DCA.

(b) IFAD will suspend, in whole or in part, the right of the Government to request withdrawals from the loan account if the required audit has not been satisfactorily concluded within twelve (12) months of the financial reporting date.
Conditions precedent to withdrawals

5. No disbursement may be made for expenditures under category III (rural finance) of the loan allocation table until IFAD has approved the detailed plan for the implementation of subcomponent 3 (rural financial services) of the project submitted by the lead project agency.

Conditions precedent to effectiveness

6. The project loan agreement will become effective upon the fulfilment of the following conditions precedent:
   (a) the DCA has entered into effect;
   (b) the Government has duly opened the special account;
   (c) the project loan agreement has been duly signed, and the signature and performance thereof by the Government has been duly authorized and ratified by all necessary administrative and governmental action; and
   (d) a legal opinion, issued by the Minister of Legal Affairs in respect of the matters set forth in the project loan agreement and in form and substance acceptable to IFAD, has been delivered by the Government to IFAD.
