## Planned project activities 2009-2010

1. At the second session of the Executive Board, it was agreed that information on planned project activities would be presented to the Board regularly to enable members to keep abreast of developments in IFAD's project/programme pipeline and prospective lending and, should they so desire, to comment on planned operations at an appropriate stage of the development cycle.
2. To this end, part I of this document provides a comprehensive listing, by stage of processing and by region, of all projects and programmes that have entered the pipeline as part of the results-based country strategic opportunities programmes or after approval of the concept note. In addition, as agreed with the Executive Board in September 2003, IFAD has made available on its website – at <http://www.ifad.org/operations/pipeline/index.htm> – information on projects and programmes that have reached an advanced stage of design and are thus likely to be presented at a future session of the Board. Each of these operations is described in a two-page information note, which is updated upon completion of each major step in the project cycle. Following discussions with Board members regarding the desirability of receiving information on new planned interventions well in advance, dates for future key country meetings are being provided to facilitate in-country discussion/consultation. Additional details about future country meetings and project- and programme-related documentation are available on request from the primary IFAD contact given in this document.
3. In September 2006, the Executive Board approved a new framework for a results-based country strategic opportunities programme (COSOP), as provided in document EB 2006/88/R.4. The results-based COSOPs will also serve as the vehicle for entry of projects/programmes into IFAD's official pipeline. Some of these pipeline projects/programmes will be processed within the current 2007-2009 cycle of the performance-based allocation system (PBAS), while others will be included in subsequent PBAS allocation periods. Part II provides information on planned COSOPs and subregional strategic opportunities programmes (SRESOPs) and, where available, identifies dates of forthcoming country meetings and stakeholder consultation meetings.
4. As agreed at the Board session in April 2001 (document EB 2001/72/R.28), part III of this document provides information on all COSOPs and SRESOPs reviewed to date by the Operational Strategy and Policy Guidance Committee (OSC) as well as those reviewed by the Board.
5. The current session of the Board will review three COSOPs (Haiti and Pakistan and The Sudan).

### Overview

6. The current document includes the 68 projects/programmes in IFAD's official pipeline. The chart below shows the distribution of the official pipeline in IFAD's five administrative regions. Thirty-seven per cent of the operations in IFAD's current pipeline are planned to be implemented in the countries covered by IFAD's Western and Central Africa Division and Eastern and Southern Africa Division. The figure increases to 46 per cent for sub-Saharan Africa.

7. In view of the expanded programme of work (10 per cent larger than in 2008) and the anticipated increase in the context of the Eighth Replenishment of IFAD's Resources, efforts to build up the pipeline will continue throughout 2009. This is necessary not only to boost support for agriculture and rural development but also to ensure that sufficient projects/programmes are ready in the event of slippages or in case additional design work is required prior to Board presentation.
8. The renewed emphasis by international assistance on agriculture and rural development also offers opportunities for expanded project cofinancing with strategic partners. The current pipeline includes projects to be cofinanced with the World Bank, the African Development Bank, the Asian Development Bank and Agence Française de Développement.
9. The projects/programmes included in IFAD's pipeline are selected on the basis of existing COSOPs<sup>1</sup> and governments' poverty reduction strategy papers or national development plans. The IFAD Strategic Framework 2007-2010 will continue to guide IFAD's work into the Eighth Replenishment period. A new strategic framework will be delivered to the Executive Board in December 2010 to steer IFAD's activities in the period 2011 onwards. Areas of work in which IFAD is already engaged but that require increased emphasis in the changing global context include: (i) increasing agricultural productivity for improved food security and poverty reduction; (ii) combating natural resource degradation and the effects of climate change; (iii) supporting other donors in increasing the financing to agriculture and rural development; (iv) sharing knowledge and experience; (v) strengthening the focus on land issues; (vi) leveraging international remittances; and (vii) working with organizations of rural producers.
10. As shown in part II, IFAD is contemplating submitting 15 results-based COSOPs to the Board, in the context of the 2009 programme of work.

<sup>1</sup> Countries with minimal PBAS allocations or countries where a small country programme is envisaged do not require a COSOP. In such cases, the information that would normally be included in a COSOP is incorporated into the relevant sections of any project/programme design document that is drafted (document EB 2006/88/R.4).
