IFAD Interest Rates Applicable for the Third Quarter 2019

1. IFAD hereby publishes the interest rates and service charges for the third quarter (Q3) of 2019 inclusive of:
 - Ordinary and intermediate term loans – approved before 1 January 2019
 - Ordinary term loans – approved after 1 January 2019
 - The service charge for highly concessional loans and the interest rate and service charge for blend terms – approved after 15 February 2019
2. As of January 2019, IFAD recalculates its annual reference interest rate each quarter – effective from the first day of January, April, July and September respectively.
3. The IFAD reference rate applicable to loans on ordinary and intermediate terms is based on:
 - Special drawing rights (SDR) weighted and individual, LIBOR/EURIBOR 6-month composite rate of the five currencies that constitute the SDR basket (United States dollar, Japanese yen, euro, British pound sterling and Chinese renminbi), available on the first business day of the respective quarter
 - A spread that may contain adjustments for:
 - loan denomination currency
 - average repayment maturity
 - country income category

I. Ordinary and intermediate term loans – approved before 1 January 2019¹

Table 1

Ordinary and intermediate term loans – approved before 1 January 2019

<i>Lending terms</i>	<i>Q3 2019 SDR</i>	<i>Q3 2019 US\$</i>	<i>Q3 2019 EUR</i>
Ordinary	2.29%	3.22%	1.00%
Intermediate	1.15%	1.61%	0.50%

Note: For reference to IFAD historical rates for ordinary and intermediate term loans approved before 1 January 2019, please refer to **annex I**.

II. Ordinary term loans – approved after 1 January 2019²

4. IFAD no longer offers new loans on intermediate terms.
5. The IFAD reference rate on ordinary loans consists of a market-based (LIBOR/EURIBOR) variable rate and a spread.

¹ These rates are inclusive of the spread applied by IFAD, being consistent with the International Bank for Reconstruction and Development (IBRD) spread applied to its variable loans with an average maturity of between 18 and 20 years and include no adjustment for the increase in maturity premium effective 1 July 2018.

² IFAD adopted a revised loan pricing methodology in 2018, endorsed by the Executive Board on 13 December 2018 (see EB 2018/125/R.45/Rev.1 – Update of Financing Terms) and subsequently approved by the Governing Council on 15 February 2019 (see GC 42/L.7 – Amendments to the Policies and Criteria for IFAD Financing). The IFAD reference rate for ordinary loans will vary on a loan-by-loan basis, reflecting the borrower-specific components of the IFAD reference rate, i.e.:

- The loan denomination currency.
- The nature of the spread, being either variable or fixed, and inclusive of:
 - pricing by average repayment period.
 - pricing adjustment by country income category.

6. The IFAD reference rate of interest for ordinary loans will vary on a loan-by-loan basis and reflect the combination of the selected loan denomination currency, the nature of the spread (variable or fixed), the average repayment maturity premium and the country income categorization.
 7. For the purpose of determining the income category of the borrower, IFAD will classify the borrower into one of four pricing groups (which can be viewed using the following link: www.ifad.org/en/document-detail/asset/41030654).
 8. An example of how the IFAD reference rate for ordinary loans is calculated is presented in annex III.
