

IFAD LEAF MOBILE APPLICATION

LEAF

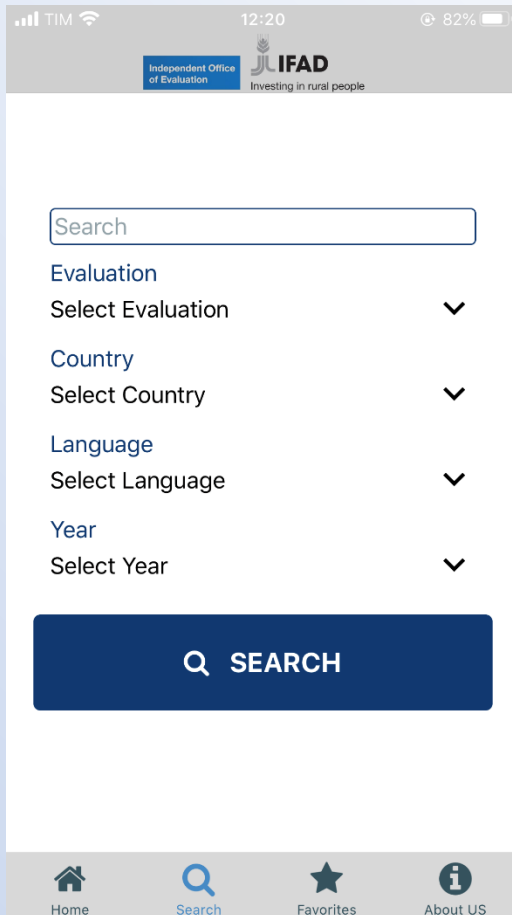

What is IFAD Leaf?

- A mobile application that enhances the **transparency** of IFAD's operations providing swift access to IOE reports
- Immediately find IOE reports thanks to the **custom filters** and save them for offline view by adding them to **Favorites**

- IOE's vast repository of knowledge can be **directly** viewed in a manner **optimized for mobile use**, as opposed to the existing website

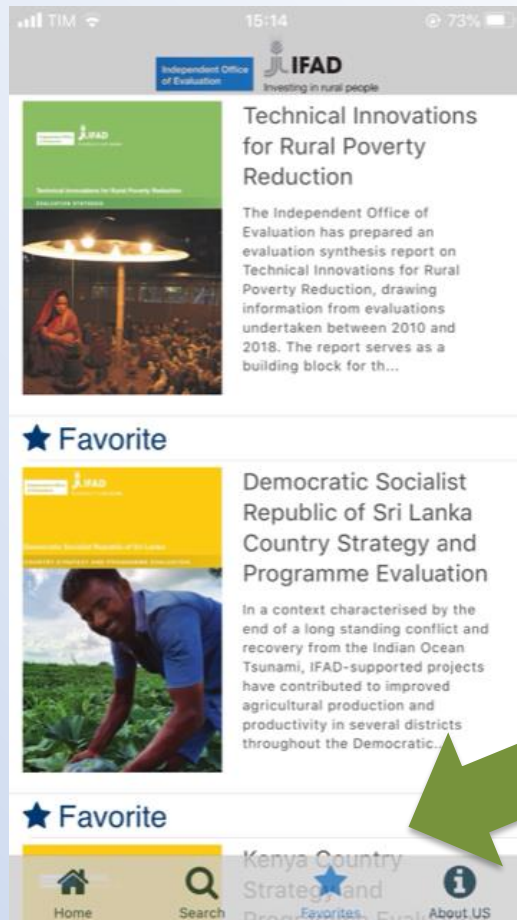

How does it work?

SEARCH:

Leaf allows users to search through IOE evaluations quickly and accurately, thanks to filters and word searches directly inside the reports

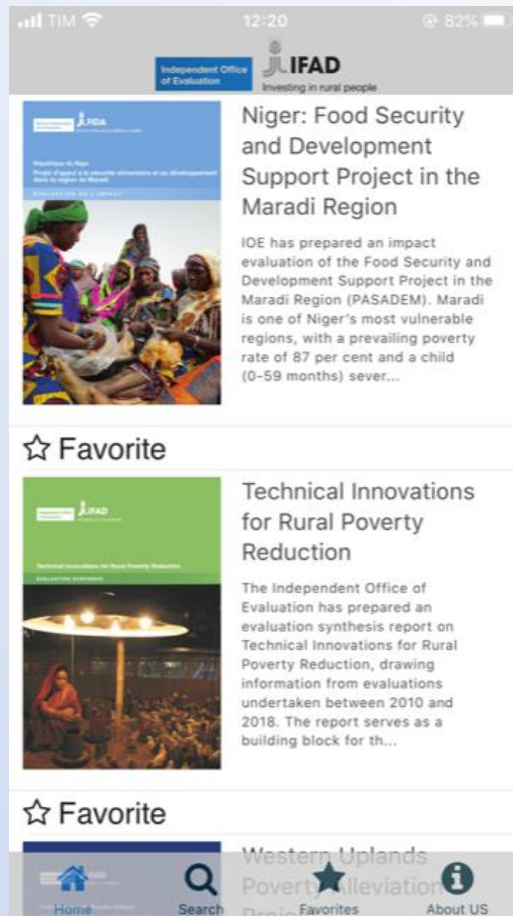

How does it work?

SAVE:

Leaf provides users with the possibility to save evaluations on their device by adding them to the **Favorites** folder, as well as to cache searches

How does it work?

LEARN:

Learn from IOE's evaluations towards the increase of the impact of IFAD's operations for sustainable and inclusive rural transformation
