# IFAD12 Impact Assessment implementation progress

April 2023

IFAD12 Impact Assessment - Overview

IFAD12 Impact Assessment sample: 16 preliminary projects sampled from those closing between 2022 and 2024 – communication with Country/Govt. counterparts completed (15% of portfolio).

Random Selection:
- Regionally stratified sampling.
- Application of protocol and exclusion criteria.

Cost Effectiveness:
- **Synergies** between project end-line data collection and IA activities, when possible.
- **Toolkits** produced in IFAD11 are used to streamline IFAD12.

IFAD12 IA Sample

Preliminary Sample as of April 2023

IFAD12 Impact Assessments - Progress

Progress to date:
- One completed: Turkey
- Seven ongoing: Nepal; Colombia; Uzbekistan; Benin; Montenegro; Madagascar; Mongolia.

Most IA activities to be implemented in 2023
- Continue efforts to reconcile M&E data collection with IA data.
- For timely and high-quality delivery, collaboration with partners: e.g. FAO, IFPRI, Texas A&M University, Universidad de los Andes.

IFAD 11 Recap

IFAD11 Results Recap

Impacts based on 24 IAs, (25% of IFAD portfolio): IFAD investments increased **incomes of 77.4 million people by more than 10%.**

Investing **$92 in IFAD's operations** increased the **income of a beneficiary by more than 10%.**

Important Lessons getting integrated into operations and strategy:

Invest in mid-streams of Agri-Food Systems.

Scale-up climate adaptation for sustained rural resilience.

Transforming gender norms and practices hard but essential.

Integrate nutrition components and budgets for improved diets and food security.

RESEARCH AND IMPACT

IFAD11 Impact Assessments - Microsite

Methodology, Knowledge, Data, Research Publications.

Data Dashboard: visual representation by country/indicators.

Descriptive analysis: impacts of COVID19 on IFAD beneficiaries.

Persons with Disabilities: lessons and descriptive data from 14 projects using Short Set of Disability Questions.

IFAD11 data – Answering key operational and strategic questions (ongoing)

IFAD11 data from 48,000 households combined with other data are used to answer enduring questions under four categories:

Nutrition and Food Security:

How diverse are diets of IFAD beneficiaries?

Socio-economic profile:

What is the socio-economic profile of IFAD beneficiaries?

Small-scale producers:

What is the extent of small-scale producers (crops, livestock, micro-enterprises) and family farms among IFAD beneficiaries?

Fertilizer prices:

What is the effect of fertilizer, fuel and food price increases on IFAD beneficiaries?

Thank you!
