Progress report on implementation of the performance-based allocation system

Governing Council — Thirty-third Session
Rome, 17-18 February 2010

For: **Information**

Note to Governors

This document is submitted for the information of the Governing Council.

To make the best use of time available at Governing Council sessions, Governors are invited to contact the following focal point with any technical questions about this document before the session:

Brian Baldwin

Senior Operations Management Adviser

telephone: +39 06 5459 2377

e-mail: b.baldwin@ifad.org

Queries regarding the dispatch of documentation for this session should be addressed to:

Deirdre McGrenra

Governing Bodies Officer

telephone: +39 06 5459 2374

e-mail: d.mcgrenra@ifad.org

Progress report on implementation of the performance-based allocation system

I. Introduction

1. At its twenty-sixth session, held in February 2003, the Governing Council endorsed the view that the Executive Board would henceforth approach the performance-based allocation required by the Lending Policies and Criteria in a more systematic way and along the lines of the approach found at other international financial institutions (IFIs), and adopt a performance-based allocation system (PBAS). Authority was delegated to the Executive Board to develop the details of the system's design and implementation.
2. Several other development finance institutions use performance-based allocation systems, including: the African Development Bank (AfDB), the Asian Development Bank (AsDB), the Caribbean Development Bank (CDB), the Global Environment Facility (GEF), the Inter-American Development Bank (IDB) and the International Development Association (IDA) of the World Bank. All these IFIs implement a system that assesses both performance and need, and together with IFAD, meet annually to review issues and progress.
3. The PBAS is based on annual allocation exercises that operate in the context of three-year cycles, or "allocation periods". Within each cycle, IFAD reviews the ex ante allocations annually to reflect the results of the annual country performance assessments, as these capture significant changes in country needs and/or achievements in the sphere of policy and institutional frameworks. The first allocation exercise covered the period 2005-2007. The current exercise covers the 2007-2009 period, which coincides with the Seventh Replenishment period. The Report of the Consultation on the Seventh Replenishment of IFAD's Resources¹ confirmed that the uniform system of allocation across the IFAD lending programme as a whole would become effective in the 2007 programme of work (i.e. the first year of the Seventh Replenishment period), and that fixed regional allocations would no longer apply.

II. Adjustments to the PBAS

4. After these systems were introduced, it was recognized by all practitioners that adjustments and improvements were needed. At its April 2006 session, the Executive Board agreed that:
 - (a) In line with the Agreement Establishing IFAD, the resources of the Fund would continue to be used with "due regard to a fair geographic distribution". Moreover, with the application of a uniform system of allocation as from 2007, IFAD would, in line with the decisions reached during the Seventh Replenishment, "continue to direct at least the current percentage share of resources to sub-Saharan Africa, provided that the performance of individual countries warrants it".
 - (b) The weight of 0.45 was regarded as a "point of balance" where population still carried significant influence as a determinant of "needs" in the formula but at the same time allowed performance and gross national income (GNI) per capita to have a strong role. It was therefore agreed that the formula would be modified accordingly to reflect a revised weight of population at 0.45.
 - (c) There was broad agreement that, given IFAD's specific focus on rural poverty, the use of rural population (rather than total population) would respond better

¹ IFAD's Contribution to Reaching the Millennium Development Goals: Report of the Consultation on the Seventh Replenishment of IFAD's Resources (2007-2009) (document GC 29/L.4).

to IFAD's mandate. In this regard, it was agreed that the concept of rural population would be applied as of the 2008 work programme.

III. PBAS working group

5. After April 2006, a working group was convened to develop a broader understanding of evolving issues in PBAS implementation. In the Report of the Consultation on the Eighth Replenishment of IFAD's Resources approved by the Governing Council in February 2009, the Board was requested to mandate the PBAS working group to continue its functions and, as well, to review the practices of other IFIs and identify ways to improve the system. Possible areas for examination include: the relative weight of different elements of the PBAS formula, the current level of minimum and maximum allocations and the possible need for exceptional allocations for particularly vulnerable countries, in addition to the current support extended to post-conflict countries. The reallocation approaches of other IFIs also needed to be examined. The working group is due to meet in November 2009 to appoint a new chairperson, review the issues raised by other IFIs and the proposals for allocation management in the 2010-2012 allocation period.

IV. Multilateral development bank/IFI PBAS technical meeting

6. The Caribbean Development Bank hosted the fifth PBAS technical meeting in April (IFAD hosted the meeting in 2008). In summarizing the status of PBAS implementation, it was noted that while each organization is making minor adjustments to the PBAS to better reflect the requirements of the organization, no major changes have been made to the systems since their adoption, with the exception of GEF, where members have called for the simplification of the system. Participants highlighted some of the important features of their systems and emerging development issues.

Fragile states

- AfDB sets aside 7.5 per cent of resources for a fragile state facility including supplemental financing, arrears clearance and targeted support. No formal reports on the use or results of this supplemental financing are yet available.
- AsDB has no formal policy on additional funds but does use technical assistance resources when appropriate and has increased these resources for fragile states by about 20 per cent in 2008-2010 as compared with the 2004-2006 period.
- IDA has no formal resource allocation apart from the additional allocations provided to countries designated as post-conflict countries.
- CDB has allocated about US\$40 million for fragile states, in particular Haiti.

Response to natural disasters

- AsDB offers limited disaster and emergency assistance financing, which is designed to mitigate immediate losses of priority assets, capacity or productivity over a term of two to three years. AsDB has a general allocation of 4.5 per cent for Western Pacific Warm Pool countries.
- IDA allocates ("front-loading") additional resources from the next year's resources.

Response to food and economic crises

- IDA emphasizes (like IFAD) fast-track project processing and speedier disbursement, financed mainly through PBAS resources with some flexibility in terms of front-loading allocations.

V. Application of the PBAS in 2009

7. The practice introduced for the 2007-2009 allocation period included only those countries designated as "active" for new commitments where IFAD expected to have lending or Debt Sustainability Framework (DSF) grant operations in 2007-2009. As a result 90 countries were identified as potentially requiring financing² which has facilitated more reliable, and higher, allocations at the country level (only nine countries required the minimum allocation) and reduced the extent of reallocations required when countries do not subsequently use their allocations.
8. On this basis, final country scores and allocations have been assigned annually, to be combined with the provisional figures for subsequent years in the allocation period, to provide an overall country allocation for the three-year allocation period. The provisional allocations are by nature indicative and subject to changes in annual performance (based on assessment of projects at risk, rural sector performance and the IDA resource allocation index), population and GNI per capita. Where appropriate, weighted averages have been used to reduce statistical variance over time. With the move to uniform allocations, the data have been subject to interregional review and benchmarking to ensure consistency in assessments and, as a result, the scoring approach of the Rural Sector Performance Assessment indicators has been improved. In this regard, the Latin America and the Caribbean Division worked closely with the Regional Unit for Technical Assistance (RUTA) throughout the allocation period to assess and compare scores throughout the region. This process has provided consistency in both approach and assessment and is conducive to policy dialogue on specific country and subregional issues, using the country strategic opportunities programme (COSOP) annual review, for example, as a basis for discussions.
9. All loans and country-specific grants presented to the Executive Board for approval in 2009 have been within the country's PBAS three-year allocation. As discussed at the December 2008 Executive Board, the allocations for 2009 reflected the inclusion of Liberia and Haiti so as to facilitate entry into the pipeline of projects for Board approval in 2009. During 2009, Eritrea was also included, without upsetting the balance of all the other country allocations. In line with the implementation of DSF, those countries assessed as **not** at risk of future debt distress (classified as "green") and therefore continuing to be eligible for loans from IFAD, have received slightly higher allocations, in line with the DSF policy. The DSF classification for countries for 2010 is attached (annex I). Countries classified as post-conflict by IDA have received additional allocations during the 2007-2009 allocation period in line with the post-conflict methodology.
10. In 2007 and 2008, the first two years of the allocation period, no reallocations were required among countries. This was also the case in other agencies that have adopted the PBAS. However, in developing the PBAS within IFAD, the Executive Board recognized that there would be situations in which it would not be possible to deliver on commitments against ex ante country allocations within the allocation period owing, for example, to a lack of demand for IFAD loans or the absence of opportunities to engage in operations in priority activities as identified in the results-based COSOPs. In such cases, the unused allocation would be reabsorbed into the allocable resource pool³ for redistribution through the prevailing PBAS allocation system (document EB 2003/79/R.2/Rev.1, paragraph 40).
11. In 2009, therefore, all unused PBA resources from the 2007-2009 allocation period were treated as part of the allocable pool of resources for the allocation period. This included allocations to countries that did not require finance (for either loans or DSF grants) in 2009 and any other allocations unused in 2009. These unused resources

² "Active" refers only to new financing commitments and does not refer to the level or status of ongoing portfolios.

³ The concept of the pool as a source of funds for reallocation was also noted in the section on reallocation of uncommitted resources in document EB 2003/79/C.R.P.3.

were reallocated to programmes with absorptive capacity, in line with their PBAS country score (i.e. according to standard PBA methodology). Moreover, no country was reallocated more than 10 per cent of the resources available for reallocation. The final scores and allocations for the 2007-2009 allocation period are given in annex II.

VI. The updating of the 2009 country scores and 2010 country allocations

12. In the fourth quarter of 2009, updated data on performance (both portfolio and rural sector performance) became available and the process of updating country scores for 2009 has been undertaken. The updated data will be reflected in the final 2009 country scores and 2010 country allocations (which represent the first allocations in the 2010-2012 allocation period), which will be tabled at the December Executive Board and subsequently disclosed in accordance with the procedures agreed for disclosure of PBAS information on the IFAD website (www.ifad.org/operations/pbas). As in the previous allocation period, the scores provided for 2010 are final, as they are based on the 2009 country scores, and the allocations for 2011 and 2012 are provisional, and subject to change in line with changes in the annual country scores.
13. In the 2010-2012 allocation period, with the increase in resources available, it has not been necessary to delineate specific "active" countries and divisions have identified PBAS allocations for countries based on planned project activities and COSOPs. However, in order to continue to manage the allocations in the three-year period, countries that are expected to use only part of their potential allocation have been capped at the expected level of financing. This should further reduce the need for reallocations and provide better planning parameters for other countries.

Debt sustainability analysis for 2010 programme of work
