Recommendation for approval

The Governing Council is invited to approve the following decision:

"The Governing Council considered and approved the financial statements showing the financial position of IFAD at 31 December 2018 and the results of its operations for the year ended on that date, as contained in appendices A to L inclusive of the current document and the external auditor's report thereon, and the attestation on the effectiveness of internal controls over financial reporting of the external auditor."

Consolidated Financial Statements of IFAD as at 31 December 2018

(including a Management assertion report and an independent external attestation on the effectiveness of internal controls over financial reporting)

- 1. At its 126th session in May 2019, the Executive Board reviewed the audited financial statements of IFAD for the 2018 fiscal year (appendices A to L inclusive), and the report of the external auditor thereon, both contained in this document.
- 2. These statements, prepared in accordance with International Financial Reporting Standards as recommended by the International Accounting Standards Board, were examined in detail by the Audit Committee at its 152nd meeting.
- 3. The Executive Board now submits them to the present session of the Governing Council with a recommendation for their approval, in accordance with regulation XII(6) of the Financial Regulations of IFAD.
- 4. IFAD issued the Management assertion report on the operational effectiveness of internal controls over financial reporting, as at 31 December 2018. This followed an independent review and testing by external consultants whose work was based on the framework provided by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). This assertion report provides an additional assurance as to the credibility and reliability of the financial statements.
- 5. The external auditors expressed an unqualified/favourable opinion on the consolidated financial statements of the Fund as at 31 December 2018. In addition, they issued the external attestation on the effectiveness of internal controls over financial reporting.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1

BRIEF DESCRIPTION OF THE FUND AND THE NATURE OF OPERATIONS

The International Fund for Agricultural Development (herein after IFAD or the Fund) is a specialized agency of the United Nations. IFAD formally came into existence on 30 November 1977, on which date the agreement for its establishment entered into force, and has its headquarters in Rome, Italy. The Fund and its operations are governed by the Agreement Establishing the International Fund for Agricultural Development.

As an international financial institution, IFAD enjoys a de facto preferred creditor status (PCS). As is the case for other international financial institutions, PCS is not a legal status, but is embodied in practice and granted by the Fund's stakeholders (176 Member States). The concept of PCS receives consistent universal recognition from entities such as bank regulators, the Bank for International Settlements and rating agencies.

Membership in the Fund is open to any Member State of the United Nations or any of its specialized agencies, or the International Atomic Energy Agency. The Fund's resources come from Member contributions, special contributions from non-Member States and other sources, and funds derived or to be derived from operations.

The objective of the Fund is to mobilize additional resources to be made available on concessional terms primarily for financing projects specifically designed to improve food production systems, the nutrition of the poorest populations in developing countries and the conditions of their lives. IFAD mobilizes resources and knowledge through a dynamic coalition of the rural poor, governments, financial and development institutions, intergovernmental organizations, non-governmental organizations and the private sector, including cofinancing. Financing from non-replenishment sources in the form of supplementary funds and human resources forms an integral part of IFAD's operational activities.

NOTE 2

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these Consolidated Financial Statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Basis of preparation

The Consolidated Financial Statements of the Fund are prepared in accordance with International Financial Reporting Standards (IFRS) and on a going concern basis, based on the current financial situation and cash flow forecast. Information is provided separately in the Financial Statements for entities where this is deemed of interest to readers of the Financial Statements. The preparation of Financial Statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires Management to exercise judgement in the process of applying accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Consolidated Financial Statements are disclosed in note 3.

New and amended IFRS mandatorily effective

During 2018, some amendments to IFRS became effective for the current reporting period. However, they have no or negligible impact on IFAD's Financial Statements. These amendments include the following:

Table 1		
Pronouncement	Nature of change	Potential impact
IFRS 9: Financial	Hedge accounting	See note 2 section
instruments	Impairment methodology	(b): changes in accounting principles
	Effective from 1 January 2018	
Amendment to IFRS 2: Shared- based payment	Changes to the shared-based payment transaction from cash settled to equity settled	Not applicable to IFAD
Amendments to IFRS 4: Insurance contracts	Guidance for insurers in applying IFRS 9 and IFRS 4	Not applicable to IFAD
Amendments to IFRS 10: Consolidated Financial Statements,	Provides guidance for accounting for loss of control of a subsidiary	Not applicable to IFAD
and International Accounting Standard (IAS) 28: Investments in joint ventures	Effective from 1 January 2018	
IFRS 15: Revenues from contracts with customers	Establishes principles for reporting about the nature timing and uncertainty of revenues and cash flows from contracts with customers	Currently not applicable to IFAD. Revenues derive from contributions from Member States (IAS 20) or financial instruments (IFRS 9)
	Effective from 1 January 2018	<i></i>

IFRS not yet mandatorily effective

Table 2

Pronouncement	Nature of change	Potential impact
IFRS 16: Leases	Provides principles for the recognition, measurement presentation and disclosure of leases for both parties of a contract (lessee and lessor)	IFAD does not have significant leasing commitments, therefore the new standard will not have a significant impact
	Effective from 1 January 2019	

There are no other standards or interpretations that are not yet effective that would be expected to have material impact on the Fund.

(b) Changes in accounting principles

IFRS 9: Financial instruments has been issued in phases over a number of years, with entities allowed to early-adopt the various versions of the standard. It consists of sections on classification and measurement, impairment and hedge accounting.

The first phase covered classification and measurement, which IFAD adopted in 2010.

From 1 January 2018, the complete IFRS 9 financial instruments standard became mandatory.

IFAD adopted the section pertaining to impairment on January 2018. The section pertaining to hedge accounting is not applicable to derivative instruments currently adopted by the Fund.

Consistent with the transition rules of IFRS 9 implementation, there has been no restatement of the 2017 comparatives.

The new impairment requirements are based on an expected credit loss (ECL) model and replace the incurred loss model. The ECL model applies to financial assets recorded at amortized cost, such as loans, debt securities and loan commitments.

Prior to 1 January 2018, the impairment of financial assets held at amortized cost was calculated based on strong evidence of creditworthiness deterioration of an issuer of a financial security. Impairment was deducted from the related asset balances in the balance sheet and charged to the income statement

Subsequent to 1 January 2018, IFAD established a forward-looking ECL methodology with a three-stage model for impairment.

An allowance is recognized of either 12-month or lifetime ECLs, depending on whether there has been a significant increase in credit risk since initial recognition of the related financial instrument. The measurement of ECLs reflects a probability-weighted outcome, the time value of money and the best available forward-looking information. The new model incorporates forwardlooking information through the inclusion of macroeconomic factors. Section h(v) provides additional details.

Forward-looking impairment is deducted from asset balances in the balance sheet and charged to the income statement.

The table below provides a summary of the impact of implementing the IFRS 9 impairment section on the 2018 opening balances.

The table also provides details on the provisioning required for the Haiti Debt Relief Initiative approved in 2010 (EB 2010/99/R.8). The allowance reflects the portion of debt relief that will be absorbed by IFAD. Additional details are provided in appendix K.

Table 3

	Carrying 1 Jan 2018	Changes	Restated 1 Jan 2018
Consolidated bala	ance sheet *		
Accumulated allowance loan impairment Nominal terms	(69.4)	(32.2)	(101. 6)
Haiti Debt Relief	0	(15.2)	(15.2)
Fair value	59.2	(39.2)	19.9
Accumulated allowance loan impairment	(10.2)	(86.6)	(96.8)
IFAD-only balance	e sheet*		
Accumulated allowance loan impairment Nominal terms	(69.4)	(30.0)	(99.4)
Haiti Debt Relief	0	(15.2)	(15.2)
Fair value	59.2	39.4	19.8
Accumulated allowance loan impairment	(10.2)	(84.6)	(94.76)

* The effect of the allowance for securities at amortized cost amounts to US\$29,284.

(c) Area of consolidation

Financing in the form of supplementary funds and other non-core funding forms an integral part of IFAD's operations. The Fund prepares consolidated accounts that include the transactions and balances for the following entities:

- Special Programme for sub-Saharan African Countries Affected by Drought and Desertification (SPA);
- IFAD Fund for Gaza and the West Bank (FGWB);
- Other supplementary funds including technical assistance grants, cofinancing, associate professional officers (APOs), programmatic and thematic supplementary funds, the Belgian Fund for Food Security Joint Programme (BFFS.JP) and the Global Environment Facility (GEF);
- IFAD's Trust Fund for the HIPC Initiative;
- IFAD's ASMCS Trust Fund;
- Administrative account for Haiti Debt Relief Initiative;
- Spanish Trust Fund; and
- ASAP Trust Fund.

These entities have a direct link with IFAD's core activities and are substantially controlled by IFAD. In line with the underlying agreements and recommendations establishing these entities, IFAD has the power to govern the related financial and operating policies. IFAD is exposed or has rights to the results of its involvement with these entities, and has the ability to affect those results through its power over the components. Accordingly, these entities are consolidated in IFAD's Financial Statements. All transactions and balances among these entities have been eliminated. Additional financial data for the funds are provided upon request to meet specific donor requirements. All entities included in the consolidation area have a fiscal period corresponding to the solar vear.

Entities housed in IFAD

These entities do not form part of the core activities of the Fund and IFAD does not have power to govern the related financial and operating policies. As such, they are not consolidated as they are not substantially controlled. As at 31 December 2018, the only entity hosted by IFAD is the International Land Coalition (formerly known as the Popular Coalition to Eradicate Hunger and Poverty).

(d) Sponsorship

Since 2018, IFAD has partnered with the European Union, the Government of Luxembourg and the Alliance for the Green Revolution in Africa to establish the Agribusiness Capital Fund (ABC Fund), a private sector fund that aims to boost investments in small rural agribusinesses across emerging markets. IFAD currently has a sponsorship role with no control or exposure to the results of its sponsorship activity.

(e) Translation and conversion of currencies

Items included in the Consolidated Financial Statements are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The Consolidated Financial Statements are presented in United States dollars, which is IFAD's functional and presentation currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the net profit or loss of the period in which they arise.

The results and financial position of the entities/funds consolidated that have a functional currency different from the presentation currency are translated into the presentation currency and are reported under other comprehensive income/loss as follows:

- Assets and liabilities expenditures are translated at the closing rate and revenue and expenditures are translated at the yearly average rate; and
- All resulting exchange differences are recognized as a separate component of other comprehensive income.

(f) Measurement of financial assets and liabilities

Financial assets and liabilities are measured and classified in the following categories: amortized cost or at fair value through profit and loss (FVTPL). The classification depends on the contractual cash flow characteristics (contractual terms give rise on unspecified dates to cash flows that are solely payments of principal and interest on the principal outstanding) and on the business model for their management (the intention or not to hold these financial assets and liabilities until their maturity). Financial assets and liabilities are accounted for at amortized cost only when the Fund's business model is to hold the assets/liabilities until maturity and collect the arising contractual cash flows (just principal and interest). All other financial assets and liabilities are accounted for at FVTPL.

(g) Equity

This comprises the following three elements: (i) contributions (equity); (ii) General Reserve; and (iii) retained earnings.

(i) Contributions (equity)

Background to contributions

The contributions to the Fund by each Member when due are payable in freely convertible currencies, except in the case of Category III Members up to the end of the Third Replenishment period, which were permitted to pay contributions in their own currency whether or not it was freely convertible. Each contribution is to be made in cash or, to the extent that any part of the contribution is not needed immediately by the Fund in its operations, may be paid in the form of nonnegotiable, irrevocable, non-interest-bearing promissory notes or obligations payable on demand.

A contribution to IFAD replenishment resources is recorded in full as equity and as receivable when a Member deposits an instrument of contribution, except for qualified instruments of contribution, which are subject to national appropriation measures and which will be proportionally reduced upon fulfilment of those conditions. Amounts receivable from Member States as contributions and other receivables including promissory notes, have been initially recognized in the balance sheet at their FVTPL in accordance with IFRS 9.

Allowance for contribution impairment losses

The Fund has established a policy on provisions against overdue Member States' contributions while still maintaining PCS as follows:

If there is evidence that an identified loan or receivable asset is impaired, a specific provision for impairment is recognized. Impairment is quantified as the difference between the carrying amount and the collectable amount. The criteria used to determine whether there is objective evidence of an impairment loss include:

- Delinquency in contractual payments of principal and interest;
- Cash flow difficulties experienced by the borrower;
- Breach in contracts or conditions; and
- Initiation of bankruptcy proceeding.
- In such cases, provisions will be set up:
- Whenever a payment of an instalment against an instrument of contribution or a payment of a drawdown against a promissory note becomes overdue by 24 months, a provision will be made equal to the value of all overdue contribution payments or the value of all unpaid drawdowns on the promissory note(s) outstanding.
- Whenever a payment of an instalment against an instrument of contribution or a payment of a drawdown against a promissory note becomes overdue by 48 months or more, a provision will be made against the total value of the unpaid contributions of the Member or the total value of the promissory note(s) of that Member related to the particular funding period (i.e. a replenishment period).
- The end of the financial year is currently used for determining the 24- and 48-month periods.

(ii) General Reserve

The General Reserve may only be used for the purposes authorized by the Governing Council and was established in recognition of the need to cover the Fund's potential over-commitment risk as a result of exchange rate fluctuations, possible delinquencies in loan service payments or in the recovery of amounts due to the Fund from the investment of its liquid assets. It is also intended to cover the risk of over-commitment as a result of a decrease in the value of assets caused by fluctuations in the market value of investments.

During 2017, Management conducted a review of the adequacy of the General Reserve, which was examined by the Audit Committee at its 145th meeting and by the Executive Board at its 121st session. Recommendations were approved by the Governing Council at its 41st meeting, applicable from fiscal year 2018. The review included a comparison with other international financial institutions. It recognized the intrinsic value of the Reserve as a mechanism to ensure a sound financial framework and enhance flexible risk mitigation measures in light of the evolution of IFAD's business model and its increasing borrowing activities.

As per Financial Regulation XIII, "annual transfers from the accumulated surplus to the General Reserve shall be determined by the Executive Board after taking into account the Fund's financial position in the context of the review/approval of yearly audited financial statements of the Fund".

(iii) Retained earnings

Retained earnings represent the cumulative excess of revenue over expenses inclusive of the effects of changes in foreign exchange rates.

(h) Loans

(i) Background to loans

IFAD loans are made only to developing states that are Members of the Fund or to intergovernmental organizations in which such Members participate. In the latter case, the Fund may require governmental or other guarantees. A loan enters into force on the date that both the Fund and the borrower have signed it, unless the financing agreement states that it is subject to ratification. In this case, the financing agreement shall enter into force on the date the Fund receives an instrument of ratification. All IFAD loans are approved and loan repayments and interest are payable in the currency specified in the loan agreement. Loans approved are disbursed to borrowers in accordance with the provisions of the loan agreement.

Currently, the lending terms of the Fund are as follows:

(a) Special loans on highly concessional terms shall be free of interest but bear a service charge of 0.75 per cent per annum and have a maturity period of 40 years, including a grace period of 10 years; (b) loans on hardened terms shall be free of interest but bear a service charge of 0.75 per cent per annum and have a maturity period of 20 years, including a grace period of 10 years; (c) loans on blend terms shall be free of interest but bear a service charge of 0.75 per cent per annum plus a spread and have a maturity period of 20 years, including a grace period of 10 years (these are applicable from 2013 onwards); (d) loans on intermediate terms shall have a rate of interest per annum equivalent to 50 per cent of the variable reference interest rate, as determined annually by the Executive Board, and a maturity period of 20 years, including a grace period of 5 years; (e) loans on ordinary terms shall have a rate of interest per annum equivalent to 100 per cent of the variable reference interest rate, as determined annually by the Executive Board, and a maturity period of 15 to 18 years, including a grace period of 3 years; and (f) no commitment charge shall be levied on any loan.

(ii) Loans to non-Member States

At its twenty-first session in February 1998, the Governing Council adopted resolution 107/XXI approving the establishment of a fund for the specific purpose of lending to Gaza and the West Bank (FGWB). The application of article 7, section 1(b), of the Agreement Establishing IFAD was waived for this purpose. Financial assistance, including loans, is transferred to the FGWB by decision of the Executive Board and the repayment thereof, if applicable, is made directly to IFAD's regular resources.

(iii) Heavily Indebted Poor Countries (HIPC) Initiative

IFAD participates in the International Monetary Fund/World Bank original and enhanced HIPC Initiative as an element of IFAD's broader policy framework for managing operational partnerships with countries that face the risk of having arrears with IFAD in the future because of their debt-service burden. Accordingly, IFAD provides debt relief by forgiving a portion of an eligible country's debt-service obligations as they become due.

In 1998, IFAD established a Trust Fund for the HIPC Initiative. This fund receives resources from IFAD and from other sources, specifically dedicated as compensation to the loan-fund account(s) for agreed reductions in loan repayments under the Initiative. Amounts of debt service forgiven are expected to be reimbursed by the Trust Fund on a pay-as-you-go basis (i.e. relief is when debt-service obligations become due) to the extent that resources are available in the fund.

The Executive Board approves each country's debt relief in net present value terms. The estimated nominal equivalent of the principal components of the debt relief is recorded under the accumulated allowance for the HIPC Initiative, and as a charge to the HIPC Initiative expenses in the statement of comprehensive income. The assumptions underlying these estimates are subject to periodic revision. Significant judgement has been used in the computation of the estimated value of allowances for the HIPC Initiative.

The charge is offset and the accumulated allowance reduced by income received from external donors to the extent that such resources are available. The accumulated allowance for the HIPC Initiative is reduced when debt relief is provided by the Trust Fund.

In November 2006, IFAD was granted access to the core resources of the World Bank HIPC Trust Fund, in order to assist in financing the outstanding debt relief once countries reach completion point. Financing is provided based on net present value calculation of their future debt relief flows.

(iv) Measurement of loans

Loans are initially recognized at fair value on day one (based on disbursement to the borrower) and subsequently measured at amortized cost using the effective interest method. The fair value is calculated using an enhanced fair value tool by applying discount rates to the estimated future cash flows on a loan-byloan basis in the currency in which the loans are denominated.

(v) Accumulated allowance for impairment losses

IFAD has established the forward-looking ECL methodology to calculate an allowance for loan impairment. The methodology embeds PCS features. It is applied to financial assets recorded at amortized cost such as loans and debt securities. The Fund is required to recognize an allowance for either 12 months or lifetime ECLs, depending on whether there has been a significant increase in credit risk since initial recognition. ECL reflects a probability-weighted outcome, time value of money and the best available forward-looking information through the inclusion of macroeconomic factors.

ECL comprises a three-stage model based on changes in credit quality since initial recognition/origination of the financial instrument. Origination is the date on which disbursement conditions have been met. Impairments are reported based on either 12-month or lifetime ECLs, depending on the stage allocation of the financial instrument. The stage allocation also determines if interest income for the financial instrument is reported on the gross carrying amount, as for stage 1 and 2, or the net of impairment allowance, as for stage 3.

The staging model relies on a relative assessment of credit risk (i.e. a loan with the same characteristics could be included in stage 1 or stage 2, depending on its credit risk at origination). As a result, the same counterpart could have loans classified in different stages.

Stage 1 includes "performing" financial instruments that have not had a significant deterioration in credit quality since initial recognition or have a low credit risk at reporting date. For these instruments, the ECL is a probability-weighted result of default events that are possible within the next 12 months after the reporting date. Low-risk assets (investment grade) are classified as stage 1.

Stage 2 includes "under-performing" financial instruments that have had a significant increase in credit risk since initial recognition, but for which there is no objective evidence of impairment. For these assets, the lifetime ECL results from all possible default events over the expected lifetime, weighted with the probability of default (PD). Interest income is computed on the gross carrying amount.

Stage 3 includes "non-performing" financial instruments when there is objective evidence of impairment/default at the reporting date. For these instruments, lifetime ECLs are recognized. According to IFRS 9, interest is computed on the net carrying amount. Considering that the Fund fully provides for the interest accrued, the calculation is determined on the gross basis.

Movements between stages depend on the evolution of the financial instrument's credit risk from initial recognition to reporting date. Movements, whether improvements or deterioration, may therefore cause volatility in the impairment allowance balances.

IFAD has adopted some rebuttable presumptions associated with days past due. In line with the debt servicing procedures, financial instruments overdue by more than 75 days are classified at stage 2 while financial instruments overdue by more than 180 days are classified at stage 3.

The carrying amount of the financial instrument is reduced through an allowance account and the loss amount is recognized in the income statement.

Interest and service charges for financial instruments classified at stages 1 and 2 are recognized following the accrual basis, while for financial instruments classified at stage 3, interest and service charges are recognized as income only when actually received.

(i) Investments

(i) Classification and Measurement

The Fund's investments are classified at FVTPL or at amortized cost. Investments are classified at amortized cost when they belong to a portfolio managed by the Fund based on a business model to hold those securities until their maturity, by collecting solely maturing interest and principal in line with the contractual characteristics. If the above conditions are not met, the Fund carries investments at FVTPL. Fair value is determined in accordance with the hierarchy set in note 3. For securities at FVTPL, both realized and unrealized security gains and losses are included in income from investments as they arise. Both realized and unrealized exchange gains and losses are included in the account for movements in foreign exchange rates as they arise. All purchases and sales of investments are recognized on the trade date. Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured at their FVTPL. The majority of derivatives are used as hedging instruments (although they do not qualify for hedge accounting) and therefore changes in the fair value of these derivative instruments are recognized immediately in the statement of comprehensive income.

(ii) Accumulated allowance for securities held at amortized cost

Securities held at amortized cost are subject to an impairment allowance calculated based on an ECL methodology similar to the accounting policy established for loans. A three-stage model for impairment is applied based on changes in the credit quality of the financial instrument since origination. The origination of the financial instrument is the date on which the instrument was purchased by the Fund. Considering the Investment Policy requirements adopted by the Fund, the investment portfolio held at amortized cost is classified at stage 1 since the financial instruments are investment grade, and therefore low credit risk instruments.

(j) Cash and cash equivalents

Cash and cash equivalents comprise cash in hand and deposits held at call with banks. They also include investments that are readily convertible at the balance sheet date. Net investment payables and investments at amortized cost are excluded from readily convertible investments for cash flow purposes.

(k) Contributions (non-equity)

Contributions to non-replenishment resources are recorded as revenues in the period in which the related expenses occur. For project cofinancing activities, contributions received are recorded as revenues in the period in which the related grant becomes effective. Contributions relating to programmatic grants, APOs, BFFS.JP and other supplementary funds are recorded in the balance sheet as deferred revenues and are recorded as revenue by the amount of project-related expenses in the statement of comprehensive income. Where specified in the donor agreements, contributions received (including management fees) and interest earned thereon, for which no direct expenses have yet been incurred, are deferred until future periods to be matched against the related costs. This is consistent with the accounting principle adopted with regard to IFAD's combined supplementary funds and serves to present the underlying nature of these balances more clearly. A list of such contributions can be found in appendix E.

Individual donors provided human resources (in the form of APOs) to assist IFAD in its activities. The contributions received from donors are recorded as revenues and the related costs are included in staff costs.

(I) Grants

The Agreement Establishing IFAD empowers the Fund to provide grants to its Member States, or to intergovernmental organizations in which its Members participate, on such terms as the Fund deems appropriate.

Grants are recorded as expenses on disbursable date for the approved amount and as a liability for undisbursed amounts at fair value in accordance with IFRS 9. Following the approval by the Executive Board of the revisions to the General Conditions for Agricultural Development Financing (April 2009), grants become disbursable when a recipient has the right to incur eligible expenditure.

Cancellations of undisbursed balances are recognized as an offset to the expense in the period in which they occur.

(m) Debt Sustainability Framework

Under the DSF, countries eligible for highly concessional lending receive financial assistance on a grant rather than a loan basis. Principal amounts forgone by IFAD are expected to be compensated on a pay-as-you-go basis (according to the underlying loan amortization schedule) by the Member States, while the service charge is not meant to be compensated. In line with the accounting policy on contributions-equity DSF principal compensation, contributions will be recorded in full as equity and as receivable when a Member deposits an instrument of contribution, except for qualified instruments of contribution, which are subject to national appropriation measures that will be proportionally reduced upon fulfilment of those conditions. Amounts receivable from Member States as contributions and other receivables, including promissory notes, have been initially recognized in the balance sheet at their FVTPL in accordance with IFRS 9. Principal compensation will be negotiated during future replenishment consultations (see note 28(b), Contingent assets). DSF financing is subject to IFAD's General Conditions for Agricultural Development Financing. DSF financing is implemented over an extended time-horizon and recognized as expenditure in the statement of comprehensive income in the period in which conditions for the release of funds to the recipient are met.

(n) Borrowing

Financial liabilities are accounted for at amortized cost. IFAD has signed several borrowing agreements with sovereign institutions at variable rate debt. Maturity could vary from 20 years to 40 years. IFAD may not prepay loans outstanding without incurring penalties. Interest rates are variable (linked to EURIBOR plus a spread). Borrowing activities are now subject to the Sovereign Borrowing Framework as approved by the Executive Board in April 2015 (EB 2015/114/R.17/Rev.1). Borrowed funds are deployed in accordance with IFAD's policies and procedures (with the exception of DSF countries).

(o) Employee schemes

Pension obligations

IFAD participates in the United Nations Joint Staff Pension Fund (UNJSPF), which was established by the United Nations General Assembly to provide retirement, death, disability and related benefits. The Pension Fund is a funded, defined benefit plan. The financial obligation of the Fund to the UNJSPF consists of its mandated contribution, at the rate established by the United Nations General Assembly, together with any share of any actuarial deficiency payments under article 26 of the regulations of the Pension Fund. Such deficiency payments are only payable if and when the United Nations General Assembly has invoked the provision of article 26, following determination that there is a requirement for deficiency payments based on an assessment of the actuarial sufficiency of the Pension Fund as of the valuation date. At the time of this report, the United Nations General Assembly has not invoked this provision.

The actuarial method adopted for the UNJSPF is the Open Group Aggregate method. The cost of providing pensions is charged to the statement of comprehensive income so as to spread the regular cost over the service lives of employees, in accordance with the advice of the actuaries, who carry out a full valuation of the period plan every two years. The plan exposes participating organizations to actuarial risks associated with the current and former employees of other organizations, with the result that there is no consistent and reliable basis for allocating the obligation, plan assets and costs to individual organizations participating in the plan. IFAD, like other participating organizations, is not in a position to identify its share of the underlying financial position and performance of the plan with sufficient reliability for accounting purposes.

After-Service Medical Coverage Scheme

IFAD participates in a multi-employer ASMCS administered by the Food and Agriculture Organization of the United Nations (FAO) for staff receiving a United Nations pension and eligible former staff on a sharedcost basis. The ASMCS operates on a pay-as-you-go basis, meeting annual costs out of annual budgets and staff contributions. Since 2006, an independent valuation is performed on an annual basis.

In accordance with IAS 19R, IFAD has set up a trust fund into which it transfers the funding necessary to cover the actuarial liability. Service costs are recognized as operating expenditure. The net balance between interest costs and expected return on plan assets is recognized in net profit or loss, while re-measurements on assets and liabilities are recognized as the net position in other comprehensive income.

(p) Accruals for long-service entitlements

Employee entitlements to annual leave and long-service entitlements are recognized when they accrue to employees. An accrual is made for the estimated liability for annual leave and long-service separation entitlements as a result of services rendered by employees up to the balance sheet date.

(q) Taxation

As a specialized agency of the United Nations, IFAD enjoys privileged tax-exemption status under the Convention on Privileges and Immunities of Specialized United Nations Agencies of 1947 and the Agreement between the Italian Republic and IFAD regarding the provisional headquarters of IFAD. Taxation levied where this exemption has not yet been obtained is deducted directly from related investment income.

(r) Revenue recognition

Service charge income and income from other sources are recognized as revenue in the period in which the related expenses are incurred (goods delivered or services provided).

(s) Tangible and intangible assets Fixed assets

Major purchases of property, furniture and equipment are capitalized. Depreciation is charged on a straightline basis over the estimated useful economic life of each item purchased as set out below:

Permanent equipment fixtures	
and fittings	10 years
Furniture	5 years
Office equipment	4 years
Vehicles	5 years

Intangible assets

Software development costs are capitalized as intangible assets where future economic benefits are expected to flow to the organization. Depreciation is calculated on a straight-line basis over the estimated useful life of the software (four to ten years). Leasehold improvements are capitalized as assets. Depreciation is calculated on a straight-line basis over their estimated useful life (not exceeding rental period of IFAD headquarters).

NOTE 3

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

(a) Critical accounting estimates and assumptions

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The resulting accounting estimates will, by definition, rarely equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are outlined below:

Fair value and amortized costs of loans, undisbursed grants, deferred revenues, promissory notes and contributions receivable.

For the details about the models applied for fair value calculation of loans, reference should be made to note 2.

The fair value of financial instruments that are not traded in an active market is determined by considering quoted prices for similar assets in active markets, quoted prices for identical assets in non-active markets or valuation techniques.

Financial assets and liabilities measured at fair value on the balance sheet are categorized as follows:

Level 1. Financial assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2. Financial assets and liabilities whose values are based on quoted prices for similar assets or liabilities, or pricing models for which all significant inputs are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3. Financial assets or liabilities whose values are based on prices or valuation techniques requiring inputs that are both unobservable and significant to the overall fair value measurement.

(b) Critical judgement in applying accounting policies

Fair value accounting

Fair value accounting is required in order for IFAD to comply with IFRS. Reconciliations between measurement at fair value and amortized cost using the effective interest method and nominal values have been provided with respect to loans, receivables, undisbursed grants and deferred revenues.

Allowance for impairment losses: Impairment Methodology

Governance

IFAD calculates and reports its impairments based on ECL. The ECL framework is based on the requirements of IFRS 9's financial instruments section and validated by IFAD's Accounting and Controller's Division and Risk Management Unit. The impairment allowances and ECL methodology have been approved by the Associate Vice-President Chief Financial Officer and Chief Controller, Financial Operations Department.

Three-stage model

IFAD recognizes a loss allowance for ECL on financial instruments measured at amortized cost and for loan commitments. The ECL comprises a three-stage model based on changes in the credit quality since initial recognition as described in note 2h(v) above. Impairments are reported based on either 12-month or lifetime ECL, depending on the stage allocation of the financial instrument. The stage allocation also determines if interest income for the financial instrument is reported on the gross carrying amount or the net of impairment allowance.

In order to determine whether there has been a significant increase in the credit risk since origination – and therefore transition to or from stage 2 – a combination of quantitative and qualitative risk metrics are employed.

The Fund has established an internal rating methodology by leveraging public ratings available in the market and by calculating proxies derived from macroeconomic conditions (income level and level of debt distress) and geographical area.

A loan's migration across the Fund's internal credit rating scale is monitored from the instrument's origination date to the reporting date. Following a significant deterioration in its counterparty's creditworthiness, the loan is classified at stage 2.

Depending on qualitative assessments, loans may be placed on a watch list and transitioned to stage 2.

Inputs

The ECL calculation is performed at the level of individual financial instruments. The main components comprise PD, loss given default, exposure at default and discount factor. The model is forward-looking: current and future macroeconomic conditions are incorporated into the model through macro-financial scenarios. A number of critical accounting estimates and judgements are also factored into the model.

Probability of Default (PD)

The Fund uses forward-looking point-in-time (PIT) PD rates to calculate ECL. The PIT PD rates are derived from through-the-cycle (TTC) PD rates adjusted for projected macroeconomic conditions.

TTC PD rates express the likelihood of a default based on long-term credit risk trend rates. TTC PD rates are based on PDs associated to external ratings and are calibrated to reflect IFAD's default experience and PCS. On a yearly basis, TTC PD is reviewed based on IFAD's loss experience.

The cumulative TTC PD rates used in 2018 are set out by internal rating grade according to the methodology detailed below:

Each instrument in the Fund's portfolio has an internal PD associated with it. To calculate ECLs for both stage 1 and stage 2 instruments, a default probability has been retrieved from the PD embedded in the official observable ratings calibrated to the Fund's experience based on IFAD-specific historical default data.

For unrated exposures, a methodology has been developed starting from the rated portfolio and calculating proxies based on a indicators such as income level, region and level of debt distress. For financial instruments at stage 3, the PD has been set at 100 per cent.

Loss given default (LGD) is the magnitude of the likely loss if a default would occur. An LGD is assigned to individual instruments, indicating how much the Fund expects to lose on each facility if the borrower defaults. For financial instruments at stages 1 and 2 the LGD has been determined in relation to the sovereign sector and calibrated in order to benefit from the Fund's recovery experience and PCS.

For financial instruments at stage 3, the LGD has been aligned to prevailing data from other multilateral development institutions.

Exposure at default (EAD) represents the expected exposure in the event of a default. It is measured from discounted contractual cash flows. The discount factor is the contractual effective interest rate of the financial instrument since IFAD lending terms currently do not foresee any additional charge (i.e. commitment fee). Since EAD is modelled at an individual instrument level, all future expected cash flows, including disbursements, cancellations, prepayments and interest, are considered. EAD combines actual and contractual cash flows, and models future disbursements and repayments based on the Fund's own experience.

Macroeconomic scenarios. Unlike the incurred loss model, the IFRS 9 impairment methodology is forwardlooking. The starting point is IFAD's view of current and future macroeconomic conditions, and the credit environment. IFAD considers a range of outcomes in a probability-weighted manner. The purpose is to capture possible non-linear behaviour in the dependence of the ECL on economic conditions. Forward-looking macroeconomic simulations consist of neutral, positive and pessimistic scenarios. Each scenario is assigned a probability of occurrence based on expert judgement and best practices. The probabilities assigned to the pessimistic and optimistic scenarios indicate either a balance or skew in either direction in order to capture the perceived distribution of risks in a forward-looking manner.

Based on expert judgement, Management may adopt temporary adjustments to the model-based ECL impairment allowance in order to reflect additional factors that are not explicitly incorporated into the modelling of ECL or the credit risk ratings (e.g. significant scenarios or events representative of the Fund's peculiar experience).

NOTE 4

CASH AND INVESTMENT BALANCES

Analysis of balances (consolidated) Table 1

As at 31 December

	US\$ thousands	
	2018	2017
Unrestricted cash	190 230	401 782
Cash subject to restriction	92	100
Subtotal cash	190 322	401 882
Unrestricted investments at fair value	1 331 552	1 251 156
Investments at amortized cost	143 998	307 332
Investments subject to restriction	278	350
Subtotal investments	1 475 828	1 558 838
Subtotal cash and investments	1 666 150	1 960 720
Investments impairment		
allowance	(30)	-
Total cash and investments	1 666 120	1 960 720

The composition of the portfolio by entity was as follows:

Table 2

As at 31 December

	US\$ thousands	
Entity	2018	2017
IFAD	1 039 298	1 352 645
ASMCS Trust Fund	76 172	76 788
HIPC Trust Fund	3 790	6 976
Supplementary funds	187 749	130 041
Spanish Trust Fund	101 091	136 191
Haiti Debt Relief Initiative	21 063	24 302
ASAP Trust Fund	236 987	233 777
Total cash and		
investments	1 661 150	1 960 720

(a) Cash and investments subject to restriction

In accordance with the Agreement Establishing IFAD, the amounts paid into the Fund by the then-Category III Member States in their respective currencies on account of their initial or additional contributions are subject to restriction in usage.

(b) Composition of the investment portfolio by instrument (consolidated)

As at 31 December 2018, cash and investments, including payables for investment purchased and receivables, amounted to US\$1,661.3 million (2017 – US\$1.96 billion) comprised of the following instruments:

Table 3

	US\$ tho	usands
-	2018	2017
Cash	190 322	401 882
Fixed-income instruments	1 400 298	1 491 500
Unrealized (loss)/gain on forward contracts	(198)	(951)
Time deposits and other obligations of banks	76 525	65 360
Unrealized (loss)/gain on futures	(201)	2 929
Unrealized (loss)/gain on swaps	(596)	-
Total cash and investments	1 666 150	1 960 720
Receivables for investments sold and taxes receivable	16 052	-
Payables for investments purchased	(20 900)	(9 082)
Total investment portfolio	1 661 302	1 951 638

Fixed-income investments and cash include US\$144 million at amortized cost as at 31 December 2018 (2017 – US\$310.1 million). The impairment loss on the amortized cost portfolio as at 31 December 2018 is US\$30,000 (see note 4[g]). The fair value of amortized cost investments as at 31 December 2018 was US\$141.8 million (2017 – US\$309.9 million).

(c) Composition of the investment portfolio by currency (consolidated)

The currency composition of cash and investments as at 31 December was as follows:

Table 4

	US\$ thousands	
Currency	2018	2017
Chinese renminbi	32 093	83 899
Euro	840 402	862 648
Japanese yen	21 003	17 451
Pound sterling	29 749	(48 539)*
United States dollar	738 055	1 036 179
Total cash and investment portfolio	1 661 302	1 951 638

* This balance pertains to outstanding currency forwards contract.

(d) Composition of the investment portfolio by maturity (consolidated)

The composition of cash and investments by maturity as at 31 December was as follows:

Table 5

	US\$ thousands	
	2018	2017
Due in one year or less	624 405	775 567
Due after one year through five years	906 660	868 342
Due from five to ten years	123 123	244 023
Due after ten years	7 114	63 706
Total cash and investment portfolio	1 661 302	1 951 638

The average life to maturity of the fixed-income investments included in the consolidated investment portfolio at 31 December 2018 was 27 months (2017 – 35 months).

(e) Financial risk management

IFAD's investment activities are exposed to a variety of financial risks: market risk, credit risk, currency risk, custodial risk and liquidity risk, as well as capital risk as a going concern which, however, is limited to the investment portfolio.

(f) Market risk

The actual weights and amounts of each asset class within the overall portfolio, together with the asset allocation weights as of 31 December 2018 and 2017, are shown in tables 6 and 7. Disclosures relate to IFAD-only accounts for the net asset value.

Table 6

2018	Actual	allocation	Investment policy
Asset class	%	%	
Cash	5.5	57.2	n. a.
Swaps	-	(0.5)	n. a.
Time deposit	-	-	n. a.
Global government bonds/agencies	43.6	452.3	n. a.
Global credit bonds	50.9	527.8	n. a.
Total	100.0	1 036.8	

Table 7

2017	Actual allocation		Investment policy
Asset class	%	US\$ millions	%
Cash	9.2	123.4	n.a.
Time deposit	4.3	58.2	n.a.
Global government bonds/agencies	34.9	471.0	100.0
Global credit bonds	36.3	490.0	25.0
Global inflation-linked	7.3	97.5	10.0
Emerging market debt bonds global inflation- linked	8.0	108.0	15.0
Total	100.0	1 348.1	-

The IFAD investment portfolio is split into four tranches, as follows:

- 1. Liquidity tranche: Used for immediate cash disbursements.
- Buffer tranche: Should the liquidity tranche be temporarily depleted due to an unforeseen spike in disbursements, funds in the buffer tranche will be used to fund these outflows. The size of the tranche is determined by the parameters of IFAD's minimum liquidity requirement (MLR).
- Surplus tranche: These are funds in addition to what is required by the MLR and are used to provide return enhancement.
- Funding tranche: Borrowed funds, managed according to an asset liability management framework.

Table 8 shows IFAD's investment portfolio net asset values reclassified based on the tranching approach.

Table 8

2010		
Tranche	%	US\$ millions
Liquidity portfolio	4.4	45.2
Buffer portfolio	49.6	514.9
Surplus portfolio	-	-
Funding portfolio	46.0	476.7
Hedge portfolio*	-	-
Total	100.0	1 036.8

* The hedge portfolio is shown separately since its derivative positions are established to immunize the entire portfolio for interest rate risk and foreign exchange rate risk.

Asset classes are managed according to investment guidelines that address a variety of market risks through restrictions on the eligibility of instruments and other limitations:

- 1. Benchmarks and limits on deviations from benchmarks in terms of tacking error limits;
- 2. Credit floors (refer to note 4[g], credit risk);
- Conditional value at risk limitation, which measures the potential average probable loss under extreme conditions, providing an indication of how much value a portfolio could lose over a forward-looking period; and
- 4. Duration, which measures the sensitivity of the market price of a fixed-income investment to a change in interest rates.

The benchmark indices used for the respective portfolios are shown in table 9.

Table 9 Benchmark indices by portfolio

Portfolio	Benchmark index
Operational cash	Same as the portfolio return
Global strategic portfolio	Equally-weighted extended sector benchmark (internally calculated on a quarterly basis)
Global liquidity portfolio	Zero
Chinese renminbi portfolio	Zero
Asset liability portfolio	Liability repayment rate of return
Global government bonds	Bloomberg Barclays Global Government Bond Index (1 year maturity)
Global credit bonds	Bloomberg Barclays Global Fixed- Income Index (A- or above)
World Bank Reserves Advisory and Management Program (RAMP)	ICE BofAML 0-1 Year US Treasury Index (AAA)
Hedging portfolio	No benchmark

Exposure to market risk is adjusted by modifying the duration of the portfolio, depending on the outlook for changes in securities market prices.

The upper limit for the duration is set at:

- One year above the benchmark for the global government bonds asset class; and
- Two years above the benchmark for the global credit bonds asset class.

The global liquidity, global strategic portfolio, Chinese renminbi and asset liability portfolio are internally managed and no duration limit is prescribed; however, the portfolios have a maximum maturity limit for the eligible investments. The effective duration of IFAD's investment portfolio as of 31 December 2018 and 2017, and respective benchmarks are shown in table 10.

Table 10

Average duration of portfolios and benchmarks in years (IFAD-only)

As of 31 December 2018 and 2017

	Port	folio	Benchr	nark
Portfolio	2018	2017	2018	2017
Operational cash	-	-	-	-

bonds ¹	n.a.	7.1	n.a.	6.9
Hedging	n.a.	n.a.	n.a.	n.a.
World Bank RAMP	0.5	0.5	0.5	0.5
Total average	1.2	2.2	1.2	2.3

The global inflation-linked and emerging market debt portfolios were closed on 30 June 2018.

The sensitivity analysis of IFAD's overall investment portfolio in table 11 shows how a parallel shift in the yield curve (-300 to +300 basis points) would affect the value of the investment portfolio as at 31 December 2018 and 31 December 2017.

Table 11 Sensitivity analysis on investment portfolio (IFAD-only)

	2018	2017		7
	Change in		Change in	
	value of		value of	
Basis	externally		externally	
point	managed	Total	managed	Total
shift in	portfolio	portfolio	portfolio	portfolio
yield	(US\$	(US\$	(US\$	(US\$
curve	million)	million)	million)	million)
-300	38	1 075	102	1 450
-250	32	1 068	83	1 431
-200	25	1 062	65	1 413
-150	19	1 055	48	1 396
-100	12	1 049	31	1 379
-50	6	1 043	15	1 363
0		1 037		1 348
50	-6	1 031	-15	1 333
100	-12	1 025	-29	1 319
150	-17	1 019	-43	1 306
200	-23	1 014	-56	1 292
250	-28	1 009	-69	1 280
300	-33	1 003	-81	1 267

The graph below shows the negative relationship between yields and fixed-income portfolio value.

Graph 1

Sensitivity analysis on investment portfolio value (IFAD-only)

(Millions of United States dollars)

As at 31 December 2018, if the general level of interest rates on the global markets had been 300 basis points higher (as a parallel shift in the yield curves) the overall portfolio value would have been lower by US\$33 million as a result of the capital losses on the marked-to-market portion of the portfolio. If the general level of interest rates on the global markets had been 300 basis points lower (as a parallel shift in the yield curves) the overall portfolio value would have been higher by US\$38 million as a result of the capital gains on the marked-to-market portion of the portfolio.

Table 12 shows the tracking error limits defined by the Investment Policy Statement. Tracking error represents the annualized standard deviation of the excess return versus the benchmark, and is a measure of the active positions taken in managing a portfolio with respect to the benchmark.

Table 12			
Tracking	error ran	nges by	portfolio

Portfolio	Tracking error maximum (percentage per annum)
Global strategic portfolio	n.a.
Asset liability portfolio	n.a.
Global liquidity portfolio	1.5
Chinese renminbi portfolio	1.5
Global government bonds	1.5
Global credit bonds	3.0
Hedging Portfolio	n.a.
World Bank RAMP	n.a.

The investment portfolio's total tracking error as at 31 December 2018 was 0.10 per cent (2017 – 0.11 per cent). Neither the global strategic portfolio nor the asset liability portfolio have been allocated a tracking error limit.

(g) Credit risk

The Investment Policy Statement and Investment Guidelines set credit rating floors for the eligibility of securities and counterparties. The eligibility of banks and bond issues is determined on the basis of ratings by major credit rating agencies. The minimum allowable credit ratings for portfolios within IFAD's overall investment portfolio under the Investment Policy Statement and Investment Guidelines are shown in table 13.

Table 13

Minimum credit rating floor as per Investment Policy Statement as at 31 December 2018

	Credit rating floors for Standard & Poor's (S&P),
Eligible asset classes	Moody's and Fitch
Money market	Investment grade ^a
Fixed-income securities: both nominal a	and inflation-linked
 Government and government agencies fixed-income securities at the national or subnational level 	Investment grade
Supra-nationals	Investment grade
 Asset-backed securities (only agency-issued or guaranteed) 	AAA
Covered bonds	Investment grade
Corporate bonds	Investment grade
Callable bonds	Investment grade
Equity	
Developed market equity	Investment grade ^b
Derivatives: for hedging purposes only	
 Currency forwards Exchange-traded futures and options Interest rate swaps Cross currency swaps Credit default swaps Asset swaps 	Counterparty must have a minimum short-term credit rating of A-1 (S&P) or F1 (Fitch) or P-1 (Moody's) °
Any additional eligibility criteria, as approved by apply.	the President, also

^b The credit quality requirement refers to the issuer and is introduced to ensure consistency with IFAD's overall investment management strategy.

^c At least one rating must comply with the minimum short-term rating; other available ratings must be within investment grade. As at 31 December 2018, the average credit ratings by portfolio were in line with the minimum allowable ratings under the Investment Policy Statement and Investment Guidelines (table 14).

Table 14

Average ^a credit ratings by portfolio (IFAD-only) As at 31 December 2018 and 2017

	Average credit rating ^a	
Portfolio	2018	2017
Operational cash	P-3	P-2
Global strategic portfolio	Aa2	Aa3
Asset liability portfolio ^b	A1	A3
Chinese renminbi c	Time Deposit	Time Deposit
Global government bonds	n.a.	Aa1
Global credit bonds	A1	A3
Global inflation-linked	n.a.	Aa1
Emerging market debt bonds	n.a.	A3

^a The average credit rating is calculated based on market values as at 31 December 2018 and 2017, except for the global strategic portfolio, whereby the credit rating is calculated on an amortized cost basis. The credit ratings used are based on the best credit ratings available from either S&P or Moody's or Fitch.

^b Approximately 2 per cent of the asset liability portfolio is in operational cash with an IFAD-approved commercial bank that has a credit rating equivalent to P3 or BBB as reported by Fitch.

^c The time deposit counterparty in the Chinese renminbi portfolio is the Bank for International Settlements.

Accumulated allowance for securities held at amortized cost

IFAD's portfolio held at amortized cost is subject to provisioning requirements in accordance with IFRS 9. Considering the Investment Policy requirements adopted by the Fund, the investment portfolio held at amortized cost is classified at stage 1 since the financial instruments are investment grade – therefore, they are low credit risk instruments. The related allowance at the end of December 2018 amounts to US\$30,000.

(h) Currency risk

The majority of IFAD's commitments relate to undisbursed loans and grants denominated in special drawing rights (SDR). IFAD's investment portfolio is therefore used to minimize IFAD's overall currency risk deriving from those commitments. Consequently, the overall assets of the Fund are maintained, to the extent possible, in the currencies and ratios of the SDR valuation basket. Similarly, the General Reserve and commitments for grants denominated in United States dollars are matched by assets denominated in United States dollars.

In the case of misalignments that are considered persistent and significant, IFAD undertakes a realignment procedure by changing the currency ratios in IFAD's investment portfolio so as to realign the total assets to the desired SDR weights.

(i) Liquidity risk

Prudent liquidity risk management includes maintaining sufficient cash and cash equivalents to meet loan and grant disbursements as well as other administrative outflows as they arise.

IFAD's liquidity risk is addressed through the MLR. IFAD's liquidity policy, together with the revised MLR for the Tenth Replenishment of IFAD's Resources (IFAD10) period (2016-2018), states that highly liquid assets in IFAD's investment portfolio should remain above 60 per cent of the projected annual gross disbursement level (outflows), including potential additional requirements due to liquidity shocks.

IFAD's latest financial model assumptions, incorporating the 2018 resources available for commitment under the sustainable cash flow approach, calculates a MLR of US\$514.0 million that is comfortably covered by IFAD's investment portfolio balance of US\$1,036.7 million. In line with the tranching approach, the buffer tranche of the investment portfolio exceeds the MLR.

(j) Capital risk

The overall resource policy is reviewed by Management on a regular basis. A joint review with the principal stakeholders is also carried out at least once during each replenishment process. IFAD closely monitors its resource position on a regular basis in order to safeguard its ability to continue as a going concern. Consequently, it adjusts the amount of new commitments of loans and grants to be made during each calendar year depending on the resources available. Longer term resource forecasting is carried out within the analysis performed through IFAD's financial model.

NOTE 5

CONTRIBUTORS' PROMISSORY NOTES AND RECEIVABLES

Table 1

Japan ^b	Eleventh	26 669	

^a Cases for which Members and IFAD have agreed to encashment schedules subject to ratification.

^b Case for which Members and IFAD have agreed to special encashment schedules.

(b) Eleventh Replenishment

Details of contributions and payments made for IFAD9 IFAD10 and IFAD11 are shown in appendix H. IFAD11 became effective on 14 August 2018.

(c) Special Programme for Africa (SPA)

Details of contributions to the SPA under the first and second phases are shown in appendix H, table 3.

(d) Credit risk

Because of the sovereign status of its donor contributions, the Fund expects that each of its contributions for which a legally binding instrument has been deposited will ultimately be received. Collectability risk is covered by the provisions on contributions.

(e) Qualified instruments of contribution and promissory notes

At the end of December 2018, contributions receivables and promissory notes still subject to national appropriation measures amounted to US\$67.5 million (US\$34.7 million as at 31 December 2017).

ALLOWANCES FOR CONTRIBUTIONS IMPAIRMENT

The fair value of the allowance is equivalent to the nominal value, given that the underlying receivables/promissory notes are already due at the balance sheet date. In accordance with its policy, IFAD has established allowances at 31 December as follows:

Table 1 US\$ thousands 2018 2017 Balance at beginning of the year 121 630 121 630 Net (decrease)/increase in allowance Balance at year-end 121 630 121 630 Analysed as follows: Promissory notes of contributors (a) 36 045 36 0 45 Amounts receivable from contributors (b) 85 585 85 585 Total 121 630 121 630

(a) Allowances against promissory notes

As at 31 December 2018, IFAD replenishment contributions deposited in the form of promissory notes up to and including IFAD9 have been fully drawn down.

In accordance with the policy, the Fund has established allowances against promissory notes as at 31 December:

Ta	hlo	2

	US\$ thousands

Revaluation	(3 566)	3 663
Balance at end of year at nominal value	121 415	69 383
Fair value adjustment	(28 164)	(59 199)
Total	93 251	10 184

For the purpose of calculating impairment in accordance with IFRS 9, loans at amortized cost are grouped in three stages.

Stage 1: impairment is calculated on a portfolio basis and equates to a 12-month ECL of these assets.

Stage 2: impairment is calculated on a portfolio basis and equates to the full lifetime ECL of these assets.

Stage 3: impairment is calculated on the full lifetime ECL calculated for each individual asset.

The table below provides a summary of the loan portfolio by stage and exposure (loan outstanding and undrawn commitments) as at 31 December 2018.

Table 7

Exposure	Allowance
8 847.6	7.9
1 001.5	36.0
207.7	62.3
10 056.8	106.2
7 520.3	
2 536.5	
10 056.8	
	1 001.5 207.7 10 056.8 7 520.3 2 536.5

The table below provides details of the accumulated allowance by stage and by entity.

Table 8

Exposure as at 31 December 2018	8 784.1	1 065.0	207.7	10 056.8

The table below provides a sensitivity analysis of the loan portfolio provisioning to the variation of macroeconomic scenarios used in determining the level of impairment.

Table 10

US\$ million	Neutral	Optimistic	Pessimistic	Probability- weighted scenario
Stage 1	6.6	5.5	11.9	7.9
Stage 2	35.8	35.9	36.6	36.0
Stage 3	62.3	62.3	62.3	62.3
Total	104.7	103.7	110.8	106.2

(c) Non-accrual status

Had income from loans in stage 3 amounts in nonaccrual status been recognized as income, income from loans as reported in the statement of comprehensive income for 2018 would have been higher by US\$1,823,159 (2017 – US\$1,636,423). IFAD's loan portfolio is well diversified. Loans are provided to Member States according to the performance-based allocation system. Appendix I provides a summary of the geographical distribution, an analysis of the portfolio by lending terms and details about the maturity structure.

(e) Fair value estimation

Other than initial recognition and determination, the assumptions used in determining fair value are not sensitive to changes in discount rates. The associated impact of the exchange rate movement is closely monitored.

NOTE 10

FINANCIAL INSTRUMENTS BY CATEGORY

Tables 1 and 2 provide information about the Fund's assets and liabilities classification, accounting policies for financial instruments have been applied to the line items below:

Table 1

Contributions, borrowing liabilities, undisbursed grants and deferred revenues are classified at fair value level 2.

NOTE 11

HEAVILY INDEBTED POOR COUNTRIES (HIPC) INITIATIVE

(a) Impact of the HIPC Initiative

IFAD provided funding for the HIPC Initiative in the amount of US\$229,670,000 during the period 1998-2018. Details of funding from external donors on a cumulative basis are found in appendix E2.

For a summary of debt relief reimbursed since the start of the Initiative and expected in the future, please refer to appendix J. Debt relief approved by the Executive Board to date excludes all amounts relating to the enhanced Initiative for Eritrea, Somalia and the Sudan. Authorization for IFAD's share of this debt relief is expected to be given by the Executive Board in 2017-2019. At the time of preparation of the 2018 Consolidated Financial Statements, the estimate of IFAD's share of the overall debt relief for these countries, including principal and interest, was U\$\$198,041,884 (2017 – U\$\$131,997,000 for Eritrea, Somalia and Sudan). Investment income amounted to U\$\$8,213,076 (2017 – U\$\$8,153,914) from the HIPC Trust Fund balances.

(b) Accumulated allowance for the HIPC Initiative

The balances for the two years ended 31 December are summarized below:

_	US\$ thousands	
	2018	2017
Balance at beginning of		
year	14 855	17 685
Change in provision	(3 162)	(3 815)
Exchange rate movements	(318)	985
Balance at end of year	11 375	14 855
Fair value adjustment	(3 468)	(4 605)
Total	7 907	10 250

NOTE 12

PAYABLES AND LIABILITIES

	US\$ thousands	
	2018	2017
Payable for investments purchased	20 900	9 082
ASMCS liability	113 189	127 669
Other payables and accrued liabilities	72 103	71 559
Total	206 192	208 310

Of the total above, an estimated US\$139.2 million (2017 – US\$153.5 million) is payable in more than one year from the balance sheet date.

NOTE 13

DEFERRED REVENUE

Deferred revenue represents contributions received for which revenue recognition has been deferred to future periods to match the related costs. Deferred income includes amounts relating to service charges received for which the related costs have not yet been incurred.

	US\$ thousands	
	2018	2017
Total	387 186	288 340
Fair value adjustment	(26 404)	(26 061)

Members' receivables Member States'	(12 861)	39 914
contributions	11 212	(20 165)
Total movements in the year	(164 537)	345 109
Closing balance 31 December	171 791	336 328

NOTE 17

INCOME FROM CASH AND INVESTMENTS

(a) Investment management (IFAD-only)

Since 1994, a major part of IFAD's investment portfolio has been entrusted to external investment managers under investment guidelines provided by the Fund. As at 31 December 2018, funds under external management amounted to US\$530 million (2017 – US\$700 million), representing 32 per cent of the Fund's total cash and investments (2017 – 36 per cent).

(b) Derivative instruments

The Fund's Investment Guidelines authorize the use of the following types of derivative instruments, primarily to ensure alignment to the currency composition of IFAD's commitments:

(i) Futures

Table 1

	31 December	
	2018	2017
Number of contracts open:		
Buy	276	334
Sell	(194)	(395)
Net unrealized market gains of open contracts		
(US\$ thousands)	209	61
Maturity range of open contracts (days)	66 to 88	67 to 262

(ii) Forwards

The unrealized market value loss on forward contracts as at 31 December 2018 amounted to US\$0.14 million (2017 – loss of US\$2.6 million). The maturities of forward contracts at 31 December 2018 was 35 days (31 December 2017 – 5 to 74 days).

(iii) Swaps

IFAD asset portfolios use derivative instruments such as swaps to immunize positions from interest rate risk. Positions hedged are of medium- to long-term maturities, fixed-rate coupon bonds, effectively converted to variable rate instruments. Hence, matching closer interest rate sensitivities of the portfolios' assets and liabilities consisted of variable rate borrowings.

Table 2

	US\$ thousands 2018	
Outstanding swaps notional	114 315	
Derivative assets		
Interest rate swaps	4 469	
Derivative liabilities		
Interest rate swaps	(5 065)	
Net unrealized market gains of swap contracts	(596)	
Maturity range of swap contracts	2 to 6 years	

(c) Income from cash and investments (consolidated)

Gross income from cash and investments for the year ending 31 December 2018 amounted to US\$5.7 million (2017 – gross income of US\$36.4 million).

Table 3			
2018	US\$ thousands		
		Amortized	
	Fair value	cost	Total
Interest from banks and fixed-income Investments	16 835	3 695	20 530
Net expenses from futures/options and swaps	(1 720)	-	(1 720)
Realized capital gain/(loss) from fixed- income securities	(1 878)	-	(1 878)
Unrealized gain/(loss) from fixed-income securities	(11 210)	(7)	(11 217)
Total	2 027	3 688	5 715

Tabl	e	4
------	---	---

2017	US\$ thousands		
	Fair value	Amortized cost	Total
Interest from banks and fixed-income Investments	21 982	4 562	26 544
Net expenses from futures/options and swaps	(953)	-	(953)
Realized capital gain/(loss) from fixed-income securities	1 837	163	2 000
Unrealized gain/(loss) from fixed-income securities	4 963	3 807	8 770
Total	27 829	8 532	36 361

For amortized cost investments, realized capital gains/(losses) relate to sales of securities whereas unrealized gains/(losses) pertain to the amortization of these securities

The figures above are broken down by income for the consolidated entities, as follows:

Table 5

	US\$ thousands	
	2018	2017
IFAD	2 039	33 326
ASMCS Trust Fund	(13)	1 734
HIPC Trust Fund	60	114
Spanish Trust Fund	1 112	1 059
Haiti Debt Relief Initiative	444	259
ASAP	5 049	816
Supplementary funds	1 446	783
Less: income		
deferred/reclassified	(4 422)	(1 731)
Total	5 715	36 361

The annual rate of return on IFAD cash and investments in 2018 was 0.09 per cent net of investment expenses (2017 –2.21 per cent net of investment expenses).

NOTE 18

INCOME FROM OTHER SOURCES

This income relates principally to reimbursement from the host Government for specific operating expenses. It also includes service charges received from entities housed at IFAD as compensation for providing administrative services. A breakdown is provided below:

	US\$ thousands	
Consolidated	2018 201	
Reimbursement from Host Government	8 565	7 919
Income from other sources	2 309	2 058
Total	10 874	9 977

NOTE 19

INCOME FROM CONTRIBUTIONS

	US\$ thousands		
	2018	2017	
IFAD	29 884	29 615	
ASAP	16 783	52 821	
Supplementary funds	38 534	76 166	
Total	85 201	158 602	

From 2007, contributions to the HIPC Initiative have been offset against the HIPC Initiative expenses.

NOTE 20

OPERATING EXPENSES

An analysis of IFAD-only operating expenses by principal funding source is shown in appendix L. The breakdown of the consolidated figures is set out below:

	US\$ thousands		
	2018 2017		
IFAD	176 082	172 646	
Other entities	12 343	12 130	
Total	188 425	184 776	

The costs incurred are classified in the accounts in accordance with the underlying nature of the expense.

NOTE 21

STAFF NUMBERS, RETIREMENT PLAN AND MEDICAL SCHEMES

(a) Staff numbers

Employees that are on IFAD's payroll are part of the retirement and medical plans offered by IFAD. These schemes include participation in the UNJSPF and in the ASMCS administered by FAO.

The number of full-time equivalent employees of the Fund and other consolidated entities in 2018 was as follows (breakdown by principal budget source):

Table	1

Full-time equivalent	Professional	General Service	Total
IFAD administrative budget	293	181	474
APO/SPO [*]	16	-	16
Others	15	6	21
Programme funds	9	2	11
Total 2018	333	189	522
Total 2017	333	202	535

* Associate professional officer/special programme officer.

(b) Non-staff

As in previous years, in order to meet its operational needs, IFAD engaged the services of consultants, conference personnel and other temporary staff, who are also covered by an insurance plan.

(c) Retirement plan

The UNJSPF carries out an actuarial valuation every two years; the latest was prepared as at 31 December

2017. This valuation revealed an actuarial deficit amounting to 0.07 per cent of pensionable remuneration. Thus the UNJSPF was assessed as adequately funded and the United Nations General Assembly did not invoke the provision of article 26, requiring participating agencies to provide additional payments. IFAD makes contributions on behalf of its staff and would be liable for its share of the unfunded liability, if any (current contributions are paid as 7.9 per cent of pensionable remuneration by the employee and 15.8 per cent by IFAD). Total retirement plan contributions made for staff in 2018 amounted to US\$11,314,132 (2017 – US\$11,087,659).

(d) After-Service Medical Coverage Scheme (ASMCS)

The latest actuarial valuation for the ASMCS was carried out as at 31 December 2018. The methodology used was the projected unit-credit-cost method with service prorates. The principal actuarial assumptions used were as follows: discount rate 2.8 per cent; return on invested assets 3.5 per cent; expected salary increase 3.5 per cent; initial medical cost increase, 4.6 per cent; inflation 1.9 per cent; and exchange rate. The results determined IFAD's liability as at 31 December 2018 to be US\$113,188,729. The 2018 and 2017 Financial Statements include a provision and related assets as at 31 December as follows:

Tał	حاد	2

31 December	79 105	79 081	

ASMCS assets are invested in accordance with the ASMCS Trust Fund Investment Policy Statement approved by the Governing Council in February 2015.

IFAD provides for the full annual current service costs of this medical coverage, including its eligible retirees. In 2018, such costs included under staff salaries and benefits in the Financial Statements amounted to US\$6,758,228 (2017 – US\$6,102,214).

Based on the 2018 actuarial valuation, the level of assets necessary to cover ASMCS liabilities is US\$79,104,967 in net present value terms (including assets pertaining to the International Land Coalition). As reported above, at 31 December 2018 the assets already held in the trust fund are US\$79,104,967; consequently this is sufficient to cover the level of liabilities.

(e) Actuarial valuation risk of the ASMCS

A sensitivity analysis of the principal assumptions of the liability and service cost contained within the group data as at 31 December 2018 is shown below:

Table 3

Impact on	Liability	
Medical inflation:		
4.7 per cent instead of 3.7 per cent	29.2	
3.7 per cent instead of 2.7 per cent	(23.3)	

NOTE 22

GRANT EXPENSES

The breakdown of the consolidated figures is set out below:

	US\$ thousands		
	2018 2017		
IFAD grants	66 602	64 779	
Supplementary funds	26 200	61 890	
ASAP	16 145	50 547	
Total	108 947	177 216	

NOTE 23

DSF EXPENSES

The DSF expenses are set out below:

	US\$ thousands		
IFAD-only	2018	2017	
DSF expenses	138 625	127 766	
Total	138 625	127 766	

DSF financing is recognized as expenditures in the period in which conditions for the release of funds to the recipient are met.

NOTE 24

DIRECT BANK AND INVESTMENT COSTS

	US\$ thousands		
	2018 201		
Investment management fees	1 102	1 318	
Other charges	659	645	
Total	1 761	1 963	

NOTE 25

ADJUSTMENT FOR CHANGE IN FAIR VALUE

An analysis of the movement in fair value is shown below:

Consolidated	US\$ thousands		
	2018	2017	
Loans outstanding	(7 633)	(30 957)	
Accumulated allowance for loan impairment losses	10 459	1 394	
Accumulated allowance for HIPC Initiative	(1 025)	(1 340)	
Net loans outstanding	1 801	(30 903)	
Undisbursed grants	(2 016)	19 231	
Total	(215)	(11 672)	

NOTE 26

DEBT RELIEF EXPENSES

This balance represents the debt relief provided during the year to HIPC eligible countries for both principal and interest. It reflects the overall net effect of new approvals of HIPC debt relief or top ups, the payments made to IFAD by the Trust Fund on behalf of HIPC and the release of the portion of deferred revenues for payments from past years.

NOTE 27

HOUSED ENTITY DISCLOSURE

At 31 December liabilities owed to/(from) IFAD by the housed entities were:

	US\$ thousands			
	2018 20			
International Land				
Coalition	2 104	1 204		
Total	2 104	1 204		

NOTE 28

CONTINGENT LIABILITIES AND ASSETS

(a) Contingent liabilities

IFAD has contingent liabilities in respect of debt relief announced by the World Bank/International Monetary Fund for three countries. See note 11 for further details of the potential cost of loan principal and interest relating to these countries, as well as future interest not accrued on debt relief already approved as shown in appendix J.

IFAD has a contingent liability for DSF financing effective but not yet disbursed for a global amount of US\$901.7 million (US\$828.5million in 2017). In particular, at the end of December 2018, DSF financing disbursable but not yet disbursed, because the conditions for the release of funds were not yet met, amounted to US\$604.3 million (US\$586.6 million in 2017) and DSF projects approved but not yet effective amounted to US\$297.4 million (US\$241.9 million in 2017).

(b) Contingent assets

At the end of December 2018 the balance of qualified instruments of contribution amounted to US\$67.5 million. These contributions are subject to national appropriation measures, therefore those receivables will be considered due upon fulfilment of those conditions and probable at the reporting date.

The DSF framework, approved in 2007, aims for the full recovery of principal repayments forgone through a pay-as-you-go compensation mechanism by Member States. Consequently, IFAD has undertaken a review together with its governing bodies of the mechanism through which this policy will be implemented. This led to the endorsement by the Executive Board in 2013 of the underlying principles thereof. The policy was also endorsed by Member States in the Replenishment Consultation process in 2014 and finally approved by the Governing Council in 2015, moreover during the Eleventh Replenishment consultations in 2018 it was confirmed that there would be no change to the DSF compensation policy. This, in effect, provides a concrete basis on which Member States will be expected to contribute towards principal reflows forgone as a result of the DSF, in addition to their regular contributions.

In 2016, Member States began to make commitments for payment of DSF obligations. The receipt of the funds that have been provided as DSF grants is therefore considered probable and hence is disclosed as a contingent asset. The nominal amount of the amount so disbursed as at 31 December 2018 amounted to US\$1,072.3 million (US\$933.6 million as at December 2017).

NOTE 29

POST-BALANCE-SHEET EVENTS

Management is not aware of any events after the balance sheet date that provide evidence of conditions that existed at the balance sheet date or were indicative of conditions that arose after the reporting period that would warrant adjusting the Financial Statements or require disclosure.

NOTE 30

RELATED PARTIES

The Fund has assessed related parties and transactions carried out in 2018. This pertained to transactions with Member States (to which IAS 24, paragraph 25, is applicable) key management personnel and other related parties identified under IAS 24. Transactions with Member States and related outstanding balances are reported in appendices H and I. Key management personnel are the President, Vice-President, Associate Vice-Presidents and Director and Chief of Staff, as they have the authority and responsibility for planning, directing and controlling activities of the Fund.

The table below provides details of the remuneration paid to key management personnel over the course of the year, together with balances of various accruals.

Aggregate remuneration paid to key management personnel includes: net salaries; post adjustment; entitlements such as representation allowance and other allowances; assignment and other grants; rental subsidy; personal effect shipment costs; postemployment benefits and other long-term employee benefits; and employer's pension and current health insurance contributions. Key management personnel participate in the UNJSPF. Independent review of the latest annual financial disclosure statements confirmed that there are no conflicts of interest, nor transactions and outstanding balances, other than the ones indicated below, for key management personnel and other related parties identified as per IAS 24 requirements.

	US\$ thousands		
	2018	2017	
Salaries and other entitlements	2 070	1 922	
Contribution to retirement and medical plans	343	243	
Other related parties	-	18	
Total*	2 413	2 183	
Total accruals	418	494	
Total receivables	51	14	

 The increase in 2018 is primarily due to transition-related entitlements

NOTE 31

DATE OF AUTHORIZATION FOR ISSUE OF THE CONSOLIDATED FINANCIAL STATEMENTS

The Consolidated Financial Statements are issued by Management for review by the Audit Committee in March 2019 and endorsement by the Executive Board in April 2019. The 2018 Consolidated Financial Statements will be submitted to the Governing Council for formal approval at its next session in February 2020. The 2018 Consolidated Financial Statements were approved by the Governing Council at its forty-second session in February 2019.

Management Assertion Report on the Effectiveness of Internal Controls Over Financial Reporting

Management of the International Fund for Agricultural Development (hereinafter IFAD or the Fund) is responsible for the preparation, fair presentation and overall integrity of its Consolidated Financial Statements. The Financial Statements of the Fund have been prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

According to the Financial Regulations of IFAD, the President is responsible for establishing and maintaining appropriate internal financial control and audit systems of the Fund which would include those over external financial reporting.

The Executive Board of the Fund established an Audit Committee, whose terms of reference, among other things, is to assist the Executive Board in exercising supervision over the financial administration and internal oversight of the Fund. Financial administration would include effectiveness of internal controls over financial reporting. The Audit Committee is comprised entirely of selected members of the Executive Board and oversees the process for the selection of the external auditor and makes a recommendation for such selection to the Executive Board for its approval. The Audit Committee meets with the external and internal auditors to discuss, respectively, the scope and design of the audit, and annual workplan, and any other matter within the Audit Committee's terms of reference that may require the Audit Committee's attention.

The system of internal controls over financial reporting contains monitoring mechanisms and actions that are meant to detect, prevent and facilitate correction of deficiencies identified that may result in material weaknesses in internal controls over financial reporting. There are inherent limitations to the effectiveness of any system of internal control, including the possibility of human error and the circumvention or overriding of controls. Accordingly, an effective internal control system can only provide reasonable, as opposed to absolute assurance with respect to financial statements. Furthermore, the effectiveness of an internal control system can change with circumstances.

The Fund's Management assessed the effectiveness of internal controls over financial reporting for the financial statements presented in accordance with IFRS as of **31 December 2018**. The assessment was based on the criteria for effective internal controls over financial reporting described in the Internal Control -Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). A report was provided to Management by the Office of Audit and Oversight providing reasonable assurance as to the operational effectiveness of these controls. Based on the work performed, Management believes that the Fund maintained an effective system of internal controls over financial reporting as of 31 December 2018, and is not aware of any material control weakness that could affect the reliability of the 2018 financial statements. IFAD's independent external auditor, Deloitte & Touche, S.p.A, has audited the financial statements and has issued an attestation report on Management's assertion on the Fund's internal controls over financial reporting.

INDEPENDENT AUDITOR'S REPORT

To the International Fund for Agricultural Development

Opinion.

We have audited the consolidated financial statements of International Fund for Agricultural Development (the "Company"), which comprise the consolidated and IFAD-only balance sheets as at 31 December 2018. the consolidated and IFAD-only statements of comprehensive income and changes in retained earnings and the consolidated cash-flow statement for the year then ended, the statement of complementary and supplementary contributions and unspent funds, the summary of the Adaption for Smallholder Agriculture Programme Trust Fund and a summary of significant accounting policies and other explanatory notes.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as at December 31, 2018, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the "Consolidated Financial Statements of IFAD as at 31 December 2018" and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the "High-level review of IFAD's Financial Statements for 2018" but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the President and those charged with governance for the Consolidated Financial Statements

The President is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as the President determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the President is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether
 due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a
 material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the President.
- Conclude on the appropriateness of the President's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a moterial uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the consolidated entities or business activities to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

3

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

INDEPENDENT AUDITOR'S REPORT ON MANAGEMENT'S ASSESSMENT ON INTERNAL CONTROLS OVER FINANCIAL REPORTING

To the International Fund for Agricultural Development

We have undertaken a reasonable assurance engagement of the accompanying management's assessment. that the International Fund for Agricultural Development ("IFAD") maintained effective internal controls over financial reporting as of December 31, 2018, as contained in IFAD's Management Assertion Report on the effectiveness of internal controls over financial reporting.

Management's Responsibility

Management of IFAD is responsible for the preparation of its assessment on the effectiveness on internal controls over financial reporting in accordance with the criteria for effective internal controls over financial reporting described in the "Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organisations of the Treadway Commission (2013 framework). IFAD's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Consolidated financial statements of IFAD as of December 31, 2018.

Independence and Quality Control

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence, and due care. confidentiality and professional behavior.

Our firm applies International Standard on Quality Control 1 (ISQC Italia 1) and, accordingly, maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements

Auditor's Responsibility

Our responsibility is to express an opinion on management's assessment on the effectiveness on internal controls over financial reporting based on the procedures we have performed. We conducted our reasonable assurance engagement in accordance with International Standards on Assurance Engagements' Assurance Engagements other than Audits or Reviews of Historical Information ("ISAE 3000 revised") issued by International Auditing and Assurance Standards Board for reasonable assurance engagements. This standard requires that we plan and perform procedures in order to obtain a reasonable assurance as to whether management's assessment on the effectiveness on internal controls over financial reporting is free of material misstatement.

A reasonable assurance engagement involves performing procedures to obtain evidence about management's assessment on the effectiveness on Internal controls over financial reporting. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement in management's assessment on the effectiveness on internal controls over financial reporting, whether due to fraud or error.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Characteristics and Limitations of Internal Controls over Financial Reporting

An entity's internal control over financial reporting is a process designed by, or under the supervision of, the entity's principal executive and principal financial officers, or persons performing similar functions, and effected by the entity's board, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. An entity's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with generally accepted accounting principles and that the receipts and expenditures of the entity are being made only in accordance with authorizations of the entity's management; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, management's assertion that IFAD maintained effective internal controls over financial reporting, included within the Consolidated financial statements of IFAD as of December 31, 2018, is fairly stated, in all material respects, based on the criteria for effective internal controls over financial reporting described in the "Internal Control – Integrated Framework" issued by the Committee of Sponsoring Organisations of the Treadway Commission (2013 framework).

For 2017	8 003 828			-	448	-	448

^a Australia's withdrawal from membership of IFAD became effective on 31 July 2007.

^b See note 5(a).

^c See notes 6(a) and (b).

^d In addition to its pledge to the Eighth Replenishment of EUR 6 million, Ireland made a further contribution of EUR 891,000.

 Payments include cash and promissory notes. Amounts are expressed in thousands of United States dollars. Thus payments received for less than US\$500 are not shown in appendix H. Consequently, the contribution from Zambia (US\$148) does not appear above.

^a Loans denominated in United States dollars and are repayable in the currencies in which withdrawals are made. Loans in SDR and, for purposes of presentation in the balance sheet, the accumulated amount of loans denominated in SDR has been valued at the US\$/SDR rate of 1.39053 at 31 December 2018. Loans denominated in EUR have been valued at the US\$/EUR rate of 0.8747758 at 31 December 2018.

^b Repayment amounts include participation by the Netherlands and Norway in specific loans to these countries, resulting in partial early repayment and a corresponding increase in committable resources.

^c The amount of the loan to the IFAD Fund for Gaza and West Bank is included in the above balance. See note 2(h)(ii).

Table 2 Summary of loans approved at nominal value by year (As at 31 December 2018)
