Results-based logical framework

	Objectives-hierarchy	Objectively verifiable indicators	Means of verification	Risks
Goal	Strengthening smallholder FOs in their capacity to represent and serve effectively their members in the design and/or implementation of IFAD's development programmes and in their effort to access markets in CEN countries.	Level of FOs' participation and integration of FO's recommendations in IFAD country programs and other public programs	Program documents (number of activities)	Deficient Agricultural Policies; Declining public funding for FOs; Internal conflict in FOs; Opposition by Governments
Objectives	<ol style="list-style-type: none"> 1. FOs in 8 countries in Africa to acquire appropriate competences that allow them to operate properly within IFAD country programmes at different stages. 2. Assess and document the results and impact of producer organizations' engagement in 8 IFAD country programmes. 3. Strengthen the technical capacities of FOs in different areas according to their needs in three countries of the CEN region through training and capacity building. 4. Build and maintain FOs' networking and lobbying capacities. 	<p>Level of FOs' participation in policy dialogue with decision makers in IFAD country programs</p> <p>Indicators of "Strategic potential" and "Professional capacity" used in the profiling</p> <p>Mapping of FOs at country level</p> <p>Profiling of the individual FO</p> <p>FO's attendance in dialogue platforms, committees and consultative bodies or processes related to agricultural policies and food security</p> <p>FOs' and farmers' production and sales increased by (%)</p>	<p>IFAD Programme documents (number of activities and time frame emerging)</p> <p>FOs policy papers and progress reports</p> <p>Specific survey with FOs participation</p> <p>Profiling data in Agro-Info.Net</p>	
Outputs	<ol style="list-style-type: none"> 1. Technical assistance provided in a variety of topics 2. Mapping and profiling of FOs conducted 3. Experience exchanges carried out 4. Advice to FOs for the realization of studies, diagnostic and technical propositions for project design or implementation provided 5. Specific technical or managerial training for FOs staff and members carried out 6. Consultation exercise between national FOs and grassroots communities and producer groups conducted 7. Consensus building workshops between stakeholders organized 8. Face to face meetings conducted 	<p>Number of farmers and FOs staff trained under the project per year;</p> <p>Number of training modules developed in different areas;</p> <p>Number of training sessions per year;</p> <p>Number of farmers benefiting from technical assistance;</p> <p>Number of farmers participating in international stages per year;</p> <p>Number of partnerships established;</p> <p>Number of enterprises supported;</p> <p>Number of agro-enterprises strengthened.</p> <p>Number and quality of work plans elaborated by the tripartite consultations;</p> <p>Number of collaborations started among FOs from different region on those issues;</p> <p>Number of FO's recommendations integrated into the different programmes and policy paper.</p>	<p>Programme documents (Progress reports)</p> <p>Country mapping (on Agro-info.net)</p> <p>FOs Profiles (on Agro-info.net)</p> <p>Meeting report and minutes</p> <p>Evaluation questionnaire</p> <p>Programme files (summary sheets)</p> <p>Records of public programs</p> <p>FOs policy papers</p> <p>Questionnaire/survey of FO's participation in policy dialogue</p>	
Key Activities	For each country a process of tripartite consultation between FOs, IFAD CPMs and agri- agencies will define the specific key activities, services rendered and related indicators along workplans to be defined on the basis of FOs' needs and agri-agencies' expertise.

	800.0	1 220.0		

Results-based logical framework

	Objectives-hierarchy	Objectively verifiable indicators	Means of verification	Assumptions
Goal	Support food security in the Sahel Region of West Africa by increasing the application of climate change adaptation practices in poor rural communities.	An increase in the number of on-farm trees producing fodder, fruit, firewood, fixing nitrogen, etc.	A combination of high resolution satellite images, self-monitoring and evaluation by village communities and ground truthing will be used in a sample of villages. In each village the baseline situation will be recorded. These activities will be implemented under the "African Re-greening Initiatives", which is complementary to this grant. Re-greening is a longer term process and tangible impacts will be measurable beyond the life of this grant.	
Objectives	Increase the capacity of IFAD financed projects and their implementation partners (producer organizations, NGOs, researchers, donor) to influence public policy and investment decisions in support of re-greening as a principal livelihood support and climate adaptation strategy.	(i) Greater awareness of key messages and policy issues – such as tenure issues – among targeted audiences – including senior policy makers, general public and other stakeholder groups. (ii) Increased integration of re-greening support activities in public investment programs and projects.	Country stocktaking reports to include baseline information from in-country focus group awareness surveys amongst stakeholder groups and inventory of re-greening activities in public investment programs and projects. These activities to be followed up at end of grant as part of grant completion reporting though impacts are expected to be limited within grant period itself.	General interest in implications of climate change on local livelihoods amongst communities, media and policy makers Commitment of political leadership in country and international community to support climate adaptation activities
Outcomes	(i) Strengthened capacity of farmers' organizations to lead both advocacy and technical support for re-greening and other climate adaptation initiatives. (ii) Demonstration of appropriately targeted, high quality communications products – including films, economic analysis reports, policy briefs, etc. – prepared to raise awareness and share experience about re-greening efforts in the Sahel and what support is needed to broaden its implementation and impact. (iii) Improved capacity of IFAD supported projects and their international and national technical partners to engage the general public and policy makers regarding re-greening as both a livelihood and climate adaptation strategy	- Increased integration of re-greening in farmers' organization dialogue, publications regarding climate change - Use of the re-greening communication materials produced under the grant by IFAD-supported projects and others - Use of communications and advocacy approaches supported under grant for other livelihood and climate change issues by IFAD-supported projects and stakeholders	Grant and IFAD financed project supervision End of grant assessment	

	Objectives-hierarchy	Objectively verifiable indicators	Means of verification	Assumptions
Outputs	(i) Country stocktaking reports for Burkina Faso, Mali, Niger and Senegal identifying ongoing re-greening activities, lessons learned, policy and public awareness context (ii) a rigorous quantitative and qualitative economic and social impact analysis will be carried out across a variety of related activities to more adequately substantiate the different types of benefits of farmer-managed re-greening as a major climate adaptation practice; (iii) films will be prepared documenting the techniques, experience, benefits and challenges of re-greening and other climate adaptation approaches in the Sahel, which can be used to inform farmers, policy makers and other stakeholders; press information kits, radio and internet messaging scripts and models (iv) Investment simulation models for re-greening which can be applied in project/investment formulations (v) specially tailored events – study tours, forums, etc. will be organized to mobilize policy makers, elected officials, traditional authorities, farmers, civil society, international and national researchers, and local media around existing successes in adaptation to climate change and improved food security and how to support climate adaptation practices more broadly; (vi) Training workshops and participatory assessments for M&E on issues of policy space and public awareness	- Completed country reports disseminated - research activities implemented in cooperation with IFAD-funded projects as well as partners in African Re-greening Initiatives - filming has taken place of 12 best practices in West and East Africa - simulation models made available to projects and piloted in formulation -15 + study tours for journalists, elected officials, senior policy makers - training completion reports and dissemination of results of assessments	- Progress and annual reports of project stakeholders - Research reports published by ICRAF - DVD's - Progress and annual reports of project partners - Progress and annual reports of project partners as well as media reports	Ability to mobilize partners and technical expertise in timely manner
Key Activities	(i) Stocktaking of experiences with re-greening in Burkina Faso, Mali, Niger and Senegal in IFAD projects and other experiences (ii) Socio-economic benefit analysis of re-greening (iii) Development of communications and knowledge management tools for re-greening (iv) Information and advocacy campaigns (v) Planning, coordination, monitoring and reporting (vi) Grassroots support to re-greening	<u>Expenditures</u> (i) \$100,000 (ii) \$300,000 (iii) \$290,000 (iv) \$340,000 (v) \$190,000 (vi) \$800,000	Grant reporting, IFAD disbursements and Audit	Efficient funds flow management

المجموع	1 500	2 620

⁴ تتكوّن قوة عمل منظمة التنمية الهولندية من مستشارين متفرغين (دوليين ووطنيين) توظفهم منظمة التنمية الهولندية وعدد متزايد من مقدمي خدمات تنمية القدرات المحليين (تُدفع تكاليفهم من ميزانية منظمة التنمية الهولندية على أساس المهام المكلفين بها).

Results-based logical framework

	Objectives-hierarchy	Objectively verifiable indicators	Means of verification	Assumptions
Goal	Increase the impact of public and private investments in inclusive market access by smallholders.	Increase of number of smallholders connected to markets in network partner programmes.	Impact assessments IFAD programme reports Network reports	Network partners collaborate to scale up proven good market access practices.
Objectives	To enable decision makers and implementers to make informed choices about the most effective ways to support transparent, inclusive and competitive markets.	Number of requests for assistance to the Network from partner organizations. 50% of partner market access projects effectively improved from knowledge shared through Network.	IFAD project reports Network reports Supervision and evaluation reports	IFAD programmes can express demand for services. IFAD programmes can finance necessary learning and capacity building.
Outputs	<ol style="list-style-type: none"> 1. Proven practices 2. Knowledge and communication products 3. Pools of expertise 4. Institutional arrangements enabling partnerships 	<p>400 Proven practices developed and shared for all market chain players and service providers.</p> <p>100 Local learning groups of market chain players and service providers learning and sharing across country programmes.</p> <p>200 Knowledge and communication products developed and shared for all.</p> <p>COP operational with 10 members exchanging information regularly.</p> <p>Roster of expertise including 100 local business mentors</p> <p>Guidelines for private public partnerships for investors.</p> <p>Tools for assessing investments for investors.</p>	<p>Project supervision, evaluation reports.</p> <p>Project annual reports.</p> <p>Policy briefs.</p> <p>Good practice and impact stories and videos.</p> <p>Service contracts and reports.</p> <p>Websites and online learning platforms.</p> <p>Learning event reports.</p>	<p>Sufficient numbers of small farmers and market chain players are willing to engage in collaborative learning.</p> <p>Sufficient numbers of local mentors can be found and trained</p>
Key activities	<ol style="list-style-type: none"> 1. Network partnership building 2. COP functioning 3. Local learning in country programmes 4. Networking 5. COP services 	<p>7 New partners join the network</p> <p>COP learning agenda developed and functional tasks assigned</p> <p>COP engaged in learning across 10 partners in 10 countries</p> <p>10 Local learning groups engaged in learning and sharing in each of 10 countries</p> <p>Service demands made by network partners to COP for expert consultations</p>	<p>Partnership agreements.</p> <p>Project annual reports.</p> <p>Project supervision and evaluation reports.</p> <p>Project and Partner websites and portals.</p>

Results-based logical framework

	Objectives-hierarchy	Objectively verifiable indicators	Means of verification	Assumptions
Goal	Increase knowledge and capacity for adopting and scaling up best practices and innovations among IFAD stakeholders in East and Southern Africa.	10 IFAD funded programmes and projects and partners adopt new innovative practices	Project supervision reports, Mid term evaluations, End-of-project evaluations, Project completion report.	
Objectives	<ul style="list-style-type: none"> - Build human and social capital within rural communities, smallholder farmers' organizations and among implementers of rural development projects, especially among those financed by IFAD; - Stimulate the scaling up of the best available solutions to improve the results and impact of development projects; - Increase the use of local, talented practitioners and champions as training and technical assistance service providers; - Build capacity in ESA to identify best practices and innovations, and design and implement learning routes. 	<p>90 innovative approaches and best practices identified and systematized;</p> <p>360 of participants in Routes of which 25% women; 3200 others indirectly benefiting from the ex-post results dissemination and innovation plan implementation; 900 local talented practitioners trained involved in project implementation of which 25% women</p>	Supervision reports, mid-term and final evaluations	<p>Existence of replicable sound innovations and possibilities for scaling up</p> <p>Acceptance by participants in Learning Routes of identified and proposed solutions</p> <p>Ability of identified practitioners and champions to share knowledge</p>
Outputs	Innovative development practices systematized and talented practitioners or "champions" identified.	One regional workshop, compendium of 90 best practices and innovations; 900 local talented practitioners enabled to give training services and TA	Summary records of workshops	Accessibility and trustworthiness of information
	Project implementers and other stakeholders participate in Learning routes, adopt new practices and replicate them successfully	20 Learning Routes designed and 20 implemented , 200 training days, 360 direct beneficiaries and 3200 indirect beneficiaries, 40 Innovation Plans designed, financed and implemented	Learning Routes convocations and applicants list, design and end-of-route reports, Innovation Plans and assessments	Favourable macro and micro economic conditions and local acceptance of innovations
	Innovative practices approaches and results disseminated widely	10 written and audio visual materials, 1 Web page created ad update monthly, 20 online Learning Routes Archives	Website analytical statistics, Readership, viewer surveys of publications and AV materials	Accessibility to Internet services and efficient distribution systems for printed matter
Key Activities	(a) Regional workshops; (b) systematize experiences; (c) publish compendium of practices and local talents; (d) organize routes; (e) prepare & implement Innovation Plans; (f) design & distribute publications.	Means: (a) consulting services, training, publications and audio visual materials, staff salaries and operational costs	AWPB and Supervision mission reports, management letters.	Grant agreements signed, PIU established, first AWPB prepared and approved by IFAD.

Note: YRW: young rural women.

Results-based logical framework

	Objectives-hierarchy	Objectively verifiable indicators	Means of verification	Assumptions
Goal	Public policy makers, and rural development project managers and staff are better informed of the characteristics, capabilities and expectations of YRW and take advantage of this new knowledge to improve policy and project design and implementation, making them more relevant for YRW.	<p>Six public institutions incorporate references to YRW within their line of work given the findings of the YRW Programme (one per country).</p> <p>Six private institutions or cooperation agencies incorporate references to YRW within their lines of work given the findings of the YRW Programme.</p> <p>IFAD's Latin American Division includes specific actions orientated towards the development of YRW</p>	<p>Annual programme reports.</p> <p>Monitoring and evaluation (M&E) reports.</p> <p>Information from public agencies</p>	Countries do not undergo major crises that severely affect the normal policy processes and agendas.
Objectives	<p>a) To generate knowledge based on solid empirical evidence about the changes in characteristics, capabilities and expectations of YRW.</p> <p>b) To make this new knowledge available to different collectives (academics, policy-makers, opinion makers).</p> <p>d) To improve the capacity of IFAD's staff, operations and country teams to effectively include YRW in their project designs</p>	<p>Six articles published in nationally circulated.</p> <p>Six articles published in internationally circulated journals.</p> <p>300 copies of national documents and issue documents distributed to key decision-makers on YRW.</p> <p>Increase IFAD references to YRW as a key development actor in new projects in LAC.</p>	<p>Annual programme reports.</p> <p>M&E reports.</p>	Political or social unrest in the participating countries does not affect the opportunity and interest of stakeholders to include the results in their debates, proposals and activities.
Outputs	<p>National research: relevant evidence-based analysis about the YRW in six Latin American countries.</p> <p>Thematic research: relevant evidence-based analysis on specific aspects of YRW at the regional level</p> <p>Policy dialogue and dissemination: fostering policy dialogue processes with strategic and relevant decision-makers at the national and development project levels.</p> <p>Feedback to IFAD: discussion of findings by IFAD's LAC Division, to enable CPMs, country teams and project managers to be more aware of the changes, about new YRW profile and the role</p>	<p>12 working papers produced</p> <p>12 policy analysis reports of national scope</p> <p>24 media briefs about YRW</p> <p>06 meetings to exchange and disseminate information with experts at the national level and presentations at least in 02 regional meetings</p> <p>06 specialized dissemination events with journalists and shapers of public opinion at the national level</p> <p>01 internal document to IFAD's LAC Division, presented, discussed and approved by the Division.</p> <p>Presentation of programme results and recommendations in the annual retreats of the LAC Division.</p>	<p>Annual programme reports.</p> <p>M&E reports.</p> <p>New project designs.</p>	<p>Devaluations or other economic shocks do not reduce the capacity of the programme to finance activities.</p> <p>Other commitments do not compete for the time and attention of the participating partners.</p> <p>Shocks or other limitations do not constrain field work</p>

	Objectives-hierarchy	Objectively verifiable indicators	Means of verification	Assumptions
Key Activities	<p>Selection of national teams</p> <p>Focus groups and workshops with YRW; 10-15 per country.</p> <p>Preparation of working papers policy reports, research reports, media briefs, and scholarly articles.</p> <p>Policy dialogue activities with decision-makers and opinion leaders, in each of the six countries.</p> <p>Developing an internal document for IFAD's LAC Division with key findings and recommendations</p>	<p>N° and composition of advisory teams</p> <p>N° interviews and focus groups conducted</p> <p>N° of participants in meetings.</p> <p>N° of policy dialogue events.</p> <p>N° of media briefs, press releases, briefings and meetings with journalists.</p> <p>N° people receiving information about YRW Programme.</p>	<p>Evaluations and minutes of activities.</p> <p>Annual programme reports.</p> <p>M&E reports.</p>
