Équipe d'exécution du projet

Directeur régional:	Bernard Hien
Directrice de pays:	Pascaline Barankeba
Responsable technique:	Anne Mottet
Responsable des finances:	Neloum Koumingue
Spécialiste climat et environnement:	Gilles Martin
Juriste:	Ebrima Ceesay

Carte de la zone du projet

Les appellations employées et la présentation des données n'expriment aucune position particulière du FIDA quant au tracé des frontières ou limites ni aux autorités concernées.

Carte établie par le FIDA | 13/05/2024

Résumé du financement

Institution initiatrice:	FIDA
Emprunteur/bénéficiaire:	République de Sierra Leone
Organisme d'exécution:	Ministère de l'agriculture et de la sécurité alimentaire
Coût total du projet:	105,5 millions d'USD
Montant du don du FIDA:	30,0 millions d'USD
Conditions du don du FIDA:	Don relevant du Cadre pour la soutenabilité de la dette (CSD) (100%)
Cofinanceurs:	Banque islamique de développement (BIsD), Fonds de l'Organisation des pays exportateurs de pétrole pour le développement international (Fonds de l'OPEP) et Heifer International
Montant du cofinancement:	BIsD: 30,0 millions d'USD Fonds de l'OPEP: 30,0 millions d'USD Heifer International: 0,6 million d'USD
Conditions du cofinancement:	BIsD: prêt Fonds de l'OPEP: prêt Heifer International: don
Contribution de l'emprunteur/du bénéficiaire:	9,1 millions d'USD
Contribution des bénéficiaires:	5,6 millions d'USD
Montant du financement climatique apporté par le FIDA:	15,4 millions d'USD
Institution coopérante:	Supervision directe par le FIDA

I. Contexte

A. Contexte national et justification de l'intervention du FIDA

Contexte national

1. Ces vingt dernières années, l'économie de la Sierra Leone a connu d'importantes fluctuations dues à des chocs intérieurs et internationaux, qui ont mis à mal les progrès considérables réalisés en matière de développement. En 2022, le pays comptait 7,55 millions d'habitants¹, dont la moitié vivait dans des zones rurales, où les taux de pauvreté (73,9%) et d'insécurité alimentaire restent élevés². Son indice de développement humain très faible le classe au 181^e rang sur 195 pays et territoires.
2. Bien que la consommation d'aliments d'origine animale soit très faible en Sierra Leone, le pays est un importateur net de produits de l'élevage (d'une valeur totale estimée à 62,3 millions d'USD en 2021) – 60% de la volaille, 50% des œufs et 90% de la viande de porc sont importés. Cela tient en partie au fait que le secteur de l'élevage n'a pas encore bénéficié de l'appui d'un grand programme public³, malgré le rôle de taille qu'il pourrait jouer dans l'amélioration des moyens d'existence, de la sécurité alimentaire et de la nutrition et dans la réduction de la pauvreté.
3. Parmi les principaux problèmes que rencontrent les petits exploitants et entrepreneurs du secteur de l'élevage figurent la perte de cheptel, l'accès limité aux services et aux intrants, la dépendance aux importations, la faiblesse des services financiers, le manque d'organisation des circuits de commercialisation et les lacunes dans les politiques et le cadre réglementaire.
4. Le programme présidentiel phare, Feed Salone, vise à renforcer la productivité agricole, à accroître la production alimentaire locale, à réduire la faim, à augmenter les recettes d'exportation, à créer des emplois et à renforcer la résilience. L'élevage (volaille et petits ruminants) est l'une des filières prioritaires du programme.

Aspects particuliers relatifs aux thématiques transversales prioritaires du FIDA

5. Environ 78% de la population de la Sierra Leone est en situation d'insécurité alimentaire. La prévalence des carences en micronutriments est en outre particulièrement élevée, et la diversité alimentaire faible.
6. Bien qu'ils représentent une bonne partie de la population⁴, les femmes et les jeunes sont des groupes particulièrement vulnérables en raison de problèmes découlant des pratiques coutumières, tels que l'accès inégal à la terre, aux compétences et aux capitaux. Avec un indice d'inégalité de genre de 0,644, la Sierra Leone s'est classée au 182^e rang sur 189 pays en 2019⁵. Le chômage des jeunes avoisine les 50%, et 33,2% des jeunes sont privés d'éducation, de travail et de formation.

¹ Statistiques sur la Sierra Leone (recensement).

² Programme alimentaire mondial, Carte interactive de la faim dans le monde (HungerMap Live): d'après l'aperçu et les tendances clés de la Sierra Leone (septembre 2023), 20% des ménages sont en situation d'insécurité alimentaire grave.

³ La part des dépenses publiques consacrées à l'agriculture était de 2,04% en 2019, dont 0,12% seulement alloué à la Division de l'élevage et des services vétérinaires.

⁴ Les femmes représentent 52% de la population et 27,4% des ménages sont dirigés par une femme. Environ 80% de la population a moins de 35 ans, et la part des moins de 25 ans est de 62,5%.

⁵ Programme des Nations Unies pour le développement, Rapport sur le développement humain (2020).

7. Conformément aux engagements du FIDA en matière de transversalisation, le projet a été validé comme:

- incluant un financement climatique;
- porteur de transformations en matière de genre;
- tenant compte des enjeux nutritionnels;
- axé sur les jeunes;
- incluant des activités relatives à la capacité d'adaptation.

Justification de l'intervention du FIDA

8. À l'issue de l'évaluation de la stratégie et du programme de pays (2020), il a été recommandé, entre autres: i) de renforcer les liens dans l'ensemble des filières du petit élevage grâce à des alliances productives, à l'agriculture contractuelle, à des centres d'agrégation et à des coopératives, de façon à accroître les retombées positives de la croissance agricole; ii) de poursuivre la diversification des systèmes agricoles, notamment par le développement du petit élevage, qui relève d'une stratégie visant à améliorer la nutrition et à renforcer la résilience économique.
9. Le FIDA, qui est l'un des donateurs intervenant le plus activement en faveur du secteur agricole de la Sierra Leone, peut mobiliser des cofinanceurs pour faire du Projet de développement de l'élevage et des moyens d'existence le premier investissement majeur du pays dans le secteur de l'élevage. Le Fonds s'appuiera sur les enseignements tirés des projets de développement des filières menés en Sierra Leone et sur les innovations des projets en faveur du petit élevage menés dans d'autres pays.

B. Enseignements à retenir

10. L'étude de faisabilité réalisée pendant la conception du projet a révélé que:
i) à cause des effets négatifs persistants de la guerre et de la récente crise sanitaire, le cheptel et le poids moyen par animal ont considérablement diminué, situation qui nécessite de remplacer les animaux d'élevage perdus et de constituer des troupeaux de races améliorées; ii) l'insuffisante contribution des bénéficiaires aux distributions de bétail et l'absence de kits de démarrage adéquats expliquent l'échec des précédentes opérations de repopulation et de constitution de troupeaux; iii) l'accès aux services vétérinaires, la qualité des aliments pour animaux et du fourrage et la gestion de l'élevage sont les principaux moteurs de l'amélioration de la productivité et de la production animales; iv) les marchés locaux sont mal organisés et la vente au détail de la viande est entravée par la rareté des installations de transformation et par une chaîne du froid sous-optimale; v) le renforcement des capacités des agriculteurs et des prestataires de services est une condition préalable à la transformation du secteur de l'élevage.
11. Compte tenu des enseignements tirés du Projet de développement des filières agricoles mené dans le pays, le projet comprendra les activités suivantes:
i) organisation de stages pratiques pour éleveurs, visant à responsabiliser les exploitants et à améliorer la production durable de bétail; ii) utilisation du Système de formation-action pour l'égalité femmes-hommes (GALS) pour promouvoir des processus inclusifs; iii) établissement de partenariats avec des entreprises du secteur agricole et d'alliances productives afin de mettre les centres de production animale en adéquation avec les exigences en matière de transformation et de commercialisation; iv) promotion des entreprises dirigées par des jeunes ou des femmes au moyen d'une programmation et d'activités de développement des entreprises adaptées.

12. En s'inspirant des bons résultats du Programme de finance rurale et d'amélioration communautaire, l'équipe du projet adaptera les produits financiers et le système de dons de contrepartie existants afin d'offrir aux acteurs du secteur de l'élevage un meilleur accès aux financements.

II. Description du projet

A. Objectifs, zone d'intervention et groupes cibles

But et objectifs

13. Le but du projet est de contribuer à la réduction de la pauvreté, à la sécurité alimentaire et à la nutrition des ménages ruraux et de créer des possibilités d'emploi pour les femmes et les jeunes des zones rurales en Sierra Leone. L'objectif de développement est d'améliorer les moyens d'existence des ménages ruraux dans les zones ciblées.

Zone géographique

14. La zone du projet proposé couvre huit districts: Pujehun, Kenema, Kailahun, Kono, Port Loko, Bombali, Koinadugu et Bo.

Groupes cibles

15. Le projet ciblera 62 250 ménages (373 500 personnes), dont au moins 40% de femmes, 30% de jeunes et 5% de personnes handicapées. La majorité (60 000) seront des ménages de petits éleveurs ou de personnes susceptibles de se lancer dans l'élevage. Les 2 250 ménages restants engloberont: i) des microentreprises et petites entreprises dans le domaine de l'élevage; ii) des organisations d'éleveurs; iii) des coopératives de jeunes et de femmes; iv) les ménages qui ne participent pas encore aux filières du petit bétail sélectionnées (volaille et petits ruminants), mais qui sont prêts à créer des microentreprises. Ces 2 250 ménages seront mis en relation avec des petits producteurs afin que la production, les services et la commercialisation fonctionnent harmonieusement dans le cadre d'une approche inclusive du développement des filières.

B. Composantes, résultats et activités

16. Le projet s'articulera autour des trois composantes interdépendantes ci-après.
17. **La composante 1, Appui à la production et à la productivité des petits éleveurs aux fins de l'amélioration des revenus et de la nutrition**, vise à augmenter la production et la productivité de 60 000 petits éleveurs et à donner aux femmes, aux jeunes et aux personnes handicapées les moyens de participer pleinement aux filières de production animale, et de gérer en parallèle les externalités liées aux zoonoses, aux changements climatiques et à la dégradation de l'environnement.
18. **La sous-composante 1.1, Renforcer et appuyer les ressources animales**, est axée sur: i) les services de vulgarisation en matière d'élevage et les capacités des producteurs; ii) la repopulation et la constitution de troupeaux; iii) le développement et la diffusion de races améliorées au niveau des districts; iv) les programmes communautaires d'élevage de petits ruminants.
19. **La sous-composante 1.2, Améliorer la prestation de services et la fourniture d'intrants dans le domaine de l'élevage**, vise à améliorer le système de détection précoce et de réaction rapide face aux maladies animales, l'accès aux services de santé animale et la lutte contre les maladies. Elle a aussi pour but d'améliorer les capacités de production locale d'aliments pour animaux et l'accès au fourrage (en particulier pendant la période sèche), et de réduire les conflits liés à l'utilisation des ressources naturelles, qui sont exacerbés par les changements climatiques. En outre, l'amélioration de l'élevage et de l'alimentation et de la santé animales contribuera à réduire les émissions de méthane, du fait de la hausse de la productivité par tête du bétail.

20. **La sous-composante 1.3, Augmenter la consommation d'aliments d'origine animale et l'utilisation du GALS,** est axée sur la prise en compte de la diversification alimentaire et du GALS, et cherchera à compléter les interventions qui favorisent l'amélioration de la nutrition et l'accès des jeunes et des femmes à la création d'entreprises et aux possibilités d'emploi.
21. **La composante 2, Renforcement et création de microentreprises et petites entreprises d'élevage,** favorisera le développement ou la création de microentreprises et petites entreprises d'élevage, le but étant de les rendre rentables sur le long terme. Le renforcement des services de vulgarisation, de l'approvisionnement en intrants et des services de santé animale, de la production, de la transformation, de la commercialisation et de la logistique dans le secteur privé contribuera également à mieux structurer la filière afin d'en garantir le développement harmonieux et l'efficacité.
22. **La sous-composante 2.1, Développer les microentreprises et petites entreprises d'élevage,** vise à former les microentrepreneurs⁶ et les petits entrepreneurs⁷ (en particulier les jeunes et les femmes) au développement des entreprises afin qu'ils puissent créer leur propre entreprise ou trouver un emploi salarié. Des dons de contrepartie leur seront accordés sur la base de plans d'affaires bancables, et le développement de produits financiers adaptés au secteur de l'élevage sera facilité, de même que l'accès à ces produits.
23. **La sous-composante 2.2, Renforcer les partenariats commerciaux,** permettra aux microentreprises et petites entreprises d'élevage d'accéder aux débouchés commerciaux et d'établir des partenariats avec d'autres acteurs de la filière de l'élevage, notamment des partenariats public-privé. Il s'agira en priorité: i) d'encourager la collaboration commerciale entre les acteurs des filières; ii) de renforcer les organisations axées sur l'élevage; iii) d'améliorer les installations et les infrastructures de commercialisation et de transformation du bétail, notamment les routes de desserte.
24. **La composante 3, Appui institutionnel et coordination du projet,** vise à renforcer les capacités institutionnelles, à créer un environnement politique et institutionnel favorable susceptible d'orienter les investissements publics et privés vers le secteur de l'élevage et à assurer une coordination efficiente du projet.
25. **La sous-composante 3.1, Promouvoir un environnement institutionnel et politique favorable aux investissements dans le secteur de l'élevage,** contribuera aux activités suivantes: i) renforcement des capacités de la Division de l'élevage et des services vétérinaires; ii) examen ou élaboration de politiques et de stratégies adéquates en matière d'élevage; iii) appui aux travaux de recherche menés par l'Institut national de recherche agricole et les universités et renforcement de l'offre de ces derniers en matière d'enseignement vétérinaire; iv) formation de professionnels supplémentaires; v) renforcement des systèmes de surveillance épidémiologique; vi) appui aux campagnes nationales de vaccination contre les maladies prioritaires; vii) mise en place de systèmes de contrôle qualité des denrées alimentaires.
26. **La sous-composante 3.2, Assistance technique,** contribuera à accélérer le renforcement des capacités et la mise au point des approches retenues dans le cadre du projet. Elle favorisera également la coopération Sud-Sud et triangulaire et les innovations, et permettra d'atténuer les risques liés à l'exécution.

⁶ Petits éleveurs qui souhaitent agrandir leur système de production (passer à un système axé sur le marché) et microentreprises informelles qui, dans l'ensemble des segments de la filière, sont spécialisées dans la prestation de services (comme les agents vétérinaires communautaires), la transformation (notamment des aliments pour animaux) et la commercialisation (comme les points de vente locaux).

⁷ Entrepreneurs à petite échelle spécialisés dans l'élevage de poulets et de petits ruminants à aptitude mixte, les activités paravétérinaires et vétérinaires, la production d'aliments pour animaux, l'exploitation de couvoirs, l'abattage et la transformation, entre autres.

27. Des spécialistes de Heifer International, organisation forte d'une riche expérience en matière de projets d'élevage dans différents pays, apporteront leur appui à l'exécution des activités du projet.
- C. Théorie du changement**
28. Les activités du projet ont été conçues pour remédier aux difficultés des petits éleveurs, aux contraintes qui pèsent sur les filières du petit bétail et aux problèmes transversaux.
29. Parmi les facteurs qui limitent le potentiel du secteur de l'élevage en Sierra Leone figurent: i) les effets négatifs persistants de la guerre, la maladie à virus Ebola, la crise des exportations minières et la faiblesse de la production et de la productivité dans le domaine de l'élevage; ii) l'accès limité aux services vétérinaires et aux intrants et la pénurie de vaccins et de médicaments (qui sont tous importés); iii) le manque d'accès aux services liés au développement des entreprises destinés aux petits éleveurs et aux microentreprises et petites entreprises d'élevage; iv) le mauvais état des marchés aux bestiaux, des abattoirs et des installations de transformation, qui sont sous-utilisés en raison de la fragmentation de l'offre des producteurs; v) la compétitivité des prix des importations, qui freine la demande de viande produite localement; vi) le manque d'incitations et de débouchés à l'intention des jeunes et des femmes; vii) les lacunes des cadres politiques et réglementaires, qui découragent les investissements publics et privés.
30. Le projet vise à lever ces obstacles par les moyens suivants: i) des formations techniques et agricoles, des services vétérinaires et de vulgarisation, des intrants améliorés et un mécanisme de repopulation destinés à accroître la production et la productivité de l'élevage, ce qui permettra de réduire la mortalité animale et d'augmenter la taille et les taux de croissance des troupeaux; ii) la promotion du développement des entreprises et de certains services financiers, des liens avec les marchés et des infrastructures de transformation, le but étant d'apporter un appui aux coopératives, microentreprises et petites entreprises d'élevage rentables, en particulier celles qui ciblent les jeunes et les femmes; iii) l'amélioration de l'alimentation des ménages grâce à l'augmentation de l'offre et de la transformation d'aliments spécialement composés, et à la communication visant la modification des comportements liés à la nutrition; iv) le ciblage des femmes à l'aide d'une approche multidimensionnelle destinée à améliorer leurs revenus et leur sécurité alimentaire et à promouvoir leur participation dans les organisations d'éleveurs sur un pied d'égalité avec les hommes; v) le développement des capacités des prestataires de services vétérinaires et de services liés à l'élevage, et l'amélioration de l'environnement favorable aux investissements dans le secteur.
31. Ces interventions permettront, si tout se passe bien, d'accroître les quantités disponibles de viande et d'œufs de qualité, de créer des emplois, d'améliorer les moyens d'existence des ménages et, partant, de réduire durablement la pauvreté rurale, l'insécurité alimentaire et la malnutrition.
32. La réussite du projet repose sur les éléments suivants: i) l'appropriation des activités et l'appui apporté par le Gouvernement sierra-léonais; ii) l'appropriation des activités par les communautés et les microentreprises et petites entreprises d'élevage, et le degré d'engagement de ces dernières; iii) l'efficience de l'unité de gestion de projet (UGP); iv) l'établissement de partenariats efficaces entre les principales parties prenantes.

D. Alignement, appropriation et partenariats

33. Le projet contribuera aux objectifs de développement durable n°s 1, 2, 5, 8, 13 et 17. L'objectif de développement est en phase avec: i) le Cadre stratégique du FIDA 2016-2025; ii) les stratégies du FIDA relatives au ciblage et aux changements climatiques; iii) le programme d'options stratégiques pour la Sierra Leone (2020-2025); iv) l'effet direct n° 1 du Plan-cadre de coopération des Nations Unies

pour le développement durable (2020-2024), qui porte sur l'agriculture durable, la sécurité alimentaire et nutritionnelle et la résilience climatique; v) le pilier n° 1 — effet direct n° 1 du nouveau Plan-cadre de coopération (2025-2030), en lien avec les systèmes alimentaires, la gestion des ressources naturelles et les changements climatiques.

34. La conception du projet est pleinement en phase avec les principales priorités gouvernementales énoncées dans le Plan national de développement à moyen terme (2024-2030) et dans le programme phare Feed Salone (2023-2028) de la Sierra Leone. Le Plan national de développement à moyen terme vise à intensifier la productivité et la commercialisation dans le secteur agricole, à renforcer la disponibilité et la consommation d'aliments diversifiés, sûrs et nutritifs, ainsi que l'accès à de tels aliments, et à créer 16 500 emplois dans l'ensemble des filières agricoles. Le programme Feed Salone vise quant à lui à réduire de 50% le déficit d'importation de produits avicoles et à créer des emplois grâce au développement de la filière des petits ruminants.

E. Coût, avantages et financement

Coût du projet

35. Le coût total du projet s'élève à 105,5 millions d'USD, et son exécution s'étale sur huit ans.
36. Les coûts du projet se répartissent comme suit: i) 42,7 millions d'USD (40% du budget total) seront alloués à la composante 1 (appui à la production et à la productivité des petits éleveurs); ii) 36,6 millions d'USD (34% du budget) seront alloués à la composante 2 (renforcement et création de microentreprises et petites entreprises d'élevage); iii) un total de 26,1 millions d'USD (9,5% du budget total) sera alloué à la composante 3 (appui institutionnel et coordination du projet), dont 10 millions d'USD seront spécialement affectés à la coordination et à la gestion du projet.
37. Les sous-composantes 1.1, 1.2, 1.3, 2.1, 3.1 et 3.2 du projet relèvent partiellement du financement de l'action climatique. Le montant total alloué par le FIDA au projet au titre du financement de l'action climatique, calculé suivant les méthodes des banques multilatérales de développement pour le suivi du financement de l'adaptation aux changements climatiques et de l'atténuation de leurs effets, est estimé à 15,4 millions d'USD (5,8 millions d'USD validés pour l'adaptation et 9,7 millions d'USD validés pour l'atténuation).

Stratégie et plan de financement et de cofinancement

38. Le financement du projet proviendra de six sources: i) les trois institutions financières internationales que sont le FIDA, le Fonds de l'OPEP et la BIIsD, qui contribueront chacune à hauteur de 30 millions d'USD, ce qui représentera 86% du coût total — la BIIsD suivant le modèle de cofinancement parallèle; ii) Heifer International, qui contribuera à hauteur de 0,6 million d'USD; iii) le Gouvernement sierra-léonais, qui apportera une contribution de 9,16 millions d'USD (8,7% du coût total) correspondant aux droits et taxes non perçus; iv) les bénéficiaires, dont les contributions en nature ou en espèces s'élèveront à 5,67 millions d'USD (5,4% du coût total).

Décaissement

39. L'UGP assurera la gestion financière de manière autonome; elle sera responsable de l'utilisation des fonds et des résultats du projet, dont elle rendra compte au Ministère de l'agriculture et de la sécurité alimentaire et au FIDA, conformément aux accords de financement.
40. Le financement du FIDA sera décaissé sur la base de demandes de retrait dûment certifiées, conformément aux procédures du FIDA en matière de décaissement. Les modalités de décaissement seront précisées dans la lettre de présentation des modalités de gestion financière et de contrôle financier du projet. L'UGP, dans le cadre de ses demandes de retrait de fonds du compte du don, pourra suivre trois méthodes de décaissement: i) avance initiale, ii) avance ou justification, iii) remboursement.

Résumé des avantages et analyse économique

41. Les résultats de l'analyse économique et financière du projet sont excellents. Le taux de rentabilité financière interne (38,7%) dépasse le coût d'opportunité du capital (19%) et le rapport avantages-coûts (3,05) est supérieur à 1, ce qui confirme la viabilité financière du projet. La valeur économique actuelle nette devrait atteindre 663 millions d'USD (16,2 milliards de SLL), compte tenu d'un taux de rentabilité économique interne de 33,6%.

Stratégie de retrait et durabilité

42. L'équipe du projet a élaboré une feuille de route claire pour garantir la viabilité à long terme du projet et l'obtention d'effets positifs durables. La stratégie de retrait repose sur les aspects clés suivants: i) amélioration de la production et de l'efficience grâce à l'adoption de meilleures pratiques et de technologies innovantes; ii) développement d'un marché local dynamique grâce aux infrastructures et aux liens entre les acteurs des filières; iii) application de modèles d'alliance productive avec le secteur privé, de façon à garantir la pérennité de la prestation de services techniques et financiers; iv) renforcement de l'appropriation par les communautés et de la participation des parties prenantes, notamment grâce au renforcement des capacités des institutions communautaires.
43. En outre, la concertation sur les politiques, qui vise à créer un environnement favorable au développement des microentreprises et petites entreprises d'élevage, et le renforcement des capacités des universités et de l'Institut national de recherche agricole aideront les éleveurs à investir de nouveau dans le secteur après la clôture du projet.

III. Gestion des risques

A. Risques et mesures d'atténuation

44. En ce qui concerne l'exécution, le principal risque recensé est la faible capacité des institutions et des acteurs de la filière du petit bétail. Pour atténuer ce risque, l'équipe du projet apportera un appui institutionnel et une assistance technique, et mènera à bien les activités de renforcement des capacités en suivant une approche progressive.

Tableau 4
Synthèse des risques

Aspect du risque	Niveau de risque inhérent	Évaluation du risque résiduel
Contexte national	Substantiel	Substantiel
Stratégies et politiques sectorielles	Modéré	Modéré
Contexte environnemental et climatique	Modéré	Modéré
Portée du projet	Modéré	Modéré
Capacités institutionnelles d'exécution et viabilité	Substantiel	Substantiel
Gestion financière	Élevé	Élevé
Passation des marchés au titre du projet	Substantiel	Substantiel
Impact environnemental, social et climatique	Modéré	Modéré
Parties prenantes	Substantiel	Substantiel
Risque global	Substantiel	Substantiel

B. Catégorie environnementale et sociale

45. Le risque environnemental et social est jugé modéré. Par conséquent, l'équipe du projet aura recours aux instruments suivants: i) un plan de gestion environnementale, sociale et climatique; ii) un plan pour la participation des parties prenantes; iii) un mécanisme de réponse aux doléances; iv) une évaluation de l'adaptation ciblée.

C. Classement au regard des risques climatiques

46. Le risque climatique est jugé substantiel. Une évaluation de l'adaptation ciblée a été élaborée.

D. Soutenabilité de la dette

47. D'après les sixième et septième examens effectués par le Fonds monétaire international et l'Association internationale de développement, la dette publique de la Sierra Leone est soutenable, mais le risque lié à la dette extérieure et le risque de surendettement global restent élevés. La dette publique étant passée de 79% à 96% du produit intérieur brut entre 2021 et 2022, le pays a dû emprunter des ressources supplémentaires. La croissance devrait s'accélérer en 2024 grâce à l'essor des secteurs minier et agricole. L'inflation devrait s'élever à 34,7% cette même année, ce qui est inférieur à la hausse moyenne prévue des prix à la consommation (37%). Les autorités reconnaissent l'importance de continuer à procéder à des ajustements budgétaires soutenus et crédibles. La soutenabilité de la dette du pays dépend de la mobilisation de manière prioritaire de ressources sous forme de dons et de l'obtention de financements à des conditions très favorables.

IV. Exécution

A. Cadre organisationnel

Gestion et coordination du projet

48. Une UGP indépendante, responsable de la gestion courante du projet, sera établie à Bo et intégrée à la structure institutionnelle de la Division de l'élevage et des services vétérinaires. Une sous-unité de l'UGP sera mise en place à Bombali. Le comité de pilotage du projet, présidé par le Ministre de l'agriculture et de la sécurité alimentaire, assurera la supervision générale de l'exécution du projet, et évaluera et validera les plans de travail et budgets annuels.

Gestion financière, passation des marchés et gouvernance

49. L'UGP assurera la gestion financière de manière autonome; elle sera responsable de l'utilisation des fonds et des résultats du projet, dont elle rendra compte au Ministère de l'agriculture et de la sécurité alimentaire et au FIDA, conformément aux accords de financement.

50. **Flux de fonds.** Le FIDA accordera un financement sous forme de don au Gouvernement, selon les modalités et conditions prévues dans l'accord de financement. Le Ministère de l'agriculture et de la sécurité alimentaire ouvrira trois comptes désignés en dollars des États-Unis dans une banque de bonne réputation pour recevoir les fonds de chaque financeur. Trois comptes opérationnels libellés en monnaie locale seront également ouverts, et serviront aux paiements quotidiens. Un compte de contrepartie gouvernemental distinct sera ouvert pour la réception des contributions des bénéficiaires.
51. **Contrôle interne.** Un manuel d'exécution du projet sera élaboré pour éclairer l'UGP dans ses opérations courantes et assurer une séparation adéquate et suffisante des tâches. Il comprendra des chapitres consacrés à la gestion financière et aux aspects relatifs aux dons de contrepartie, dans un souci de durabilité et de transparence. Les auditeurs internes du Ministère de l'agriculture et de la sécurité alimentaire incluront les activités et les dépenses de projet dans leurs plans d'audit interne et soumettront leurs rapports au comité de pilotage et au FIDA.
52. **Comptabilité et rapports.** Tous les comptes et livres comptables seront tenus conformément à la méthode de la comptabilité de caisse définie dans les Normes comptables internationales du secteur public. L'équipe du projet s'équipera d'un logiciel de comptabilité pour tenir les comptes et automatiser l'établissement des rapports, de façon à se conformer aux exigences minimales du FIDA en matière de présentation des résultats. Elle élaborera également des rapports financiers intermédiaires trimestriels, qu'elle soumettra dans les 45 jours suivant la fin de chaque trimestre. Les états financiers non audités seront quant à eux présentés dans les quatre mois suivant la fin de chaque exercice.
53. **Audit.** L'Audit Service Sierra Leone effectuera l'audit annuel des états financiers du projet. Les rapports d'audit comprenant les tableaux complémentaires exigés par le FIDA seront soumis dans les six mois suivant la fin de chaque exercice. Avant la fin de chaque exercice, l'équipe du projet chargera l'Audit Service Sierra Leone de procéder à un audit, et fera en outre valider la mission par le FIDA.
54. **Gouvernance.** Le Gouvernement sierra-léonais a atteint des jalons importants en matière de bonne gouvernance, de responsabilité et de transparence. Il a notamment promulgué de nombreuses lois, en particulier la loi de finances 2020 et la loi anticorruption 2019 (amendement), élaboré des plans d'audit fondés sur les risques après avoir bénéficié d'une formation dispensée par un consultant recruté sur le plan international, et élargi le domaine d'activité de l'Audit service Sierra Leone, qui comprend désormais des audits de performance et des audits spécialisés. La Politique révisée du FIDA en matière de prévention de la fraude et de la corruption dans le cadre de ses activités et opérations et les directives du FIDA en matière de passation de marchés s'appliqueront.
55. Le Ministère de l'agriculture et de la sécurité alimentaire déléguera la gestion de la passation de marchés à l'UGP. Parmi les fonctions de passation des marchés figurent: i) l'élaboration de plans de passation des marchés; ii) la rédaction du cahier des charges, des spécifications, du mandat et du devis quantitatif; iii) la conclusion d'un accord avec le FIDA sur la méthode de passation des marchés ou de sélection dans le cadre de chaque activité de passation de marchés; iv) la présélection, les annonces de lancement d'appels d'offre, la gestion des manifestations d'intérêt et l'établissement de listes restreintes; v) l'élaboration des dossiers d'appel à la concurrence et des projets de contrat.

Participation et retours d'information du groupe cible, et mécanisme de réponse aux doléances

56. Le plan pour la participation des parties prenantes sera mis en œuvre pour mobiliser, consulter et informer les parties prenantes du projet au sujet des objectifs, des approches et du groupe cible du projet, sans oublier les questions liées aux changements climatiques et les éventuelles incidences environnementales

du projet. Les parties prenantes pourront éclairer et influencer la prise de décisions concernant les interventions du projet, et leur participation garantira la transparence de l'exécution et favorisera un sentiment d'appropriation des activités qui seront menées.

Mécanisme de réponse aux doléances

- 57. Un mécanisme de réponse aux doléances sera mis en place pour que les communautés puissent faire entendre leurs doléances concernant les effets négatifs que le projet pourrait avoir sur elles, et pour mettre à disposition un ensemble de procédures destinées à résoudre les problèmes rencontrés.

B. Planification, suivi-évaluation, apprentissage, gestion des savoirs et communication

- 58. Un système de suivi-évaluation dûment équipé et doté en personnel sera mis en place au démarrage du projet; il reposera principalement sur des outils numériques destinés à collecter, à traiter et à analyser les données aux fins d'une prise de décisions efficace et d'une gestion axée sur les résultats. Une enquête initiale, une autre à mi-parcours et une dernière à l'achèvement seront menées pour évaluer les résultats et les impacts obtenus dans le cadre du projet.
- 59. L'équipe du projet élaborera et mettra en œuvre un plan de gestion des savoirs et un plan d'action en matière de communication pour déterminer les produits du savoir à développer et les modalités de leur diffusion. Les produits du savoir seront diffusés par différents canaux (radio, télévision, médias sociaux, ateliers, journaux, etc.). Des visites d'échange axées sur l'apprentissage et la mise en commun de l'expérience seront également favorisées.

Innovations et reproduction à plus grande échelle

- 60. L'équipe du projet mettra à l'essai les innovations et les nouvelles technologies décrites dans l'évaluation de la stratégie et du programme de pays du FIDA pour la Sierra Leone. Plus précisément, elle adaptera les écoles pratiques d'agriculture au secteur de l'élevage et intégrera des technologies dans les composantes du projet, en mettant l'accent sur la dématérialisation. Elle adaptera et encouragera également les pratiques innovantes et les approches efficaces en matière de développement des microentreprises et petites entreprises d'élevage. Les résultats obtenus grâce à ces innovations seront reproduits à plus grande échelle durant et après l'exécution du projet.

C. Plans d'exécution

Plans de préparation à l'exécution et de démarrage

- 61. Dans le cadre de la conception du projet, il est prévu qu'une avance de démarrage de 285 000 USD soit versée afin de pouvoir remplir les conditions préalables au premier décaissement et d'assurer un démarrage sans heurt.

Supervision, examen à mi-parcours et plans d'achèvement

- 62. Le FIDA et le Gouvernement sierra-léonais mèneront des missions de supervision annuelles, auxquelles participeront également des représentants de la BIsD et du Fonds de l'OPEP. Des missions d'appui annuelles axées sur des besoins techniques spécifiques seront également menées. Un examen à mi-parcours est prévu à la fin de la troisième année, et une mission à l'achèvement du projet permettra d'évaluer et de décrire, documents à l'appui, la performance globale en matière d'exécution et les résultats obtenus.

V. Instruments et pouvoirs juridiques

- 63. L'octroi au bénéficiaire du financement proposé est régi par un accord de financement entre la République de Sierra Leone et le FIDA. Une copie de l'accord de financement négocié figure à l'appendice I.

64. La République de Sierra Leone est habilitée, en vertu de son ordre juridique, à recevoir un financement du FIDA.
65. Je certifie que le financement proposé est conforme aux dispositions de l'Accord portant création du FIDA, et aux Principes et critères applicables aux financements du FIDA.

VI. Recommandation

66. Je recommande au Conseil d'administration d'approuver le financement proposé par la résolution suivante:

DÉCIDE: que le Fonds accordera à la République de Sierra Leone un don au titre du Cadre pour la soutenabilité de la dette d'un montant de trente millions de dollars des États-Unis (30 000 000 USD), qui sera régi par des modalités et conditions conformes en substance aux modalités et conditions indiquées dans le présent rapport.

Le Président
Alvaro Lario

Negotiated financing agreement

Grant No:

Programme name: Livestock and Livelihoods Development Programme ("LLDP"/"the Programme"/"the Project")

The Republic of Sierra Leone (the "Recipient")

and

The International Fund for Agricultural Development (the "Fund" or "IFAD")

(each a "Party" and both of them collectively the "Parties")

WHEREAS the Recipient has requested a Debt Sustainability Framework (DSF) grant from the Fund for the purpose of financing the Programme described in Schedule 1 to this Agreement;

WHEREAS the Fund has agreed to provide financing for the Programme;

WHEREAS the Programme is expected to receive co-financing from the Islamic Development Bank (IsDB) and the OPEC Fund for International Development (OFID).

NOW THEREFORE, the Parties hereby agree as follows:

Section A

1. The following documents collectively form this Agreement: this document, the Programme Description and Implementation Arrangements (Schedule 1), the Allocation Table (Schedule 2) and the Special Covenants (Schedule 3).

2. The Fund's General Conditions for Agricultural Development Financing dated 29 April 2009, amended as of 28 December 2022, and as may be amended hereafter from time to time (the "General Conditions") are annexed to this Agreement, and all provisions thereof shall apply to this Agreement except for the provisions that refer to Loan financing which shall not apply to this Agreement. For the purposes of this Agreement the terms defined in the General Conditions shall have the meanings set forth therein, unless the Parties shall otherwise agree in this Agreement.

3. The Fund shall provide a DSF grant to the Recipient, which the Recipient shall use to implement the Programme in accordance with the terms and conditions of this Agreement.

Section B

1. The amount of the DSF grant is thirty million United States dollars (USD 30 000 000) (the "Grant/ the "Financing").

2. The first day of the applicable Fiscal Year shall be 1 January.

3. A specific Designated Account in United States Dollars for the exclusive use of the Programme will be opened in the Bank of Sierra Leone , in order to receive funds pertaining to the Grant. The funds in the Designated Account shall not be co-mingled from other funds including those from co-financiers. The Recipient shall inform the Fund of the officials authorized to operate the Designated Account.

4. There shall be a Project Account denominated in Sierra Leonean Leone (SLL) and opened in a reputable commercial bank, to exclusively receive the Financing from the Designated Account. The Recipient must inform the Fund of the officials authorized to operate the Project Account.

5. The Recipient shall provide counterpart financing to the Programme, through in kind contributions, in the amount of approximately nine million one hundred and fifty thousand United States dollars (USD 9 150 000) to cover taxes and duties including other Programme expenditures. Beneficiaries will also make in kind or cash contributions to the Programme amounting to approximately five million six hundred and seventy thousand United States dollars (USD 5 670 000).

Section C

1. The Lead Programme Agency shall be the Ministry of Agriculture and Food Security (MAFS).

2. Additional Programme parties are described in paragraph 11, Schedule 3 of the Agreement.

3. A Mid-Term Review will be conducted as specified in Section 8.03 (b) and (c) of the General Conditions; however, the Parties may agree on a different date for the Mid-Term Review of the implementation of the Programme.

4. The Programme Completion Date shall be the 8th anniversary of the date of entry into force of this Agreement and the Financing Closing Date shall be as specified in the General Conditions.

5. Procurement of goods, works and services financed by the Financing shall be carried out in accordance with the Recipient's procurement methods and regulations to the extent such are consistent with the IFAD Procurement Guidelines.

Section D

1. The Fund will administer the Grant and supervise the Programme.

Section E

1. The following are designated as additional grounds for suspension of this Agreement:

(a) The Programme Implementation Manual (PIM) and/or any provision thereof, has been waived, suspended, terminated, amended or modified without the prior agreement of the Fund and the Fund, after consultation with the Recipient, has determined that it has had, or is likely to have, a material adverse effect on the Programme; and

(b) Any institutional changes have been made by the Recipient to the Project Steering Committee or the Project Implementation Unit (PIU), including the

transfer, suspension, or termination of key PIU staff without cause and without the Fund's no-objection, and the Fund has determined that such changes are likely to have a material adverse effect on the Project.

2. The following is designated as an additional ground for cancellation of this Agreement:

- (a) In the event that the Recipient did not request a disbursement of the Financing twelve (12) consecutive months without justification subsequent to the first eighteen (18) months from the Effective Date.

3. The following are designated as additional conditions precedent to withdrawal:

- (a) The IFAD no objection to the PIM which includes the Financial Administration manual shall have been obtained.
- (b) The following key Programme staff shall have been recruited and approved by the Fund: Project Manager, Finance and Administrative Officer, Procurement Officer and the Monitoring and Evaluation Officer.
- (c) The Designated and the Project Accounts shall have been duly opened in reputable banks.
- (d) The acquisition and installation of an operational software capable of producing financial statements that meet IFAD's requirements.

4. This Agreement is subject to ratification by the Recipient.

5. The following are the designated representatives and addresses to be used for any communication related to this Agreement:

For the Recipient:

The Minister of Finance
Ministry of Finance
Treasury Building
George Street

For the Fund:

The President
International Fund for Agricultural Development
Via Paolo di Dono 44
00142 Rome, Italy

This Agreement has been prepared in the English language in two (2) original copies, one (1) for the Fund and one (1) for the Recipient.

REPUBLIC OF SIERRA LEONE

[Authorised Representative]

Date: _____

INTERNATIONAL FUND FOR
AGRICULTURAL DEVELOPMENT

[The President]

Date: _____

Schedule 1

Programme Description and Implementation Arrangements

I. Programme Description

Programme Description

1. *Target Population.* LLDP will target 62,250 households (373,500 people). The following inclusion minimums will be observed: at least 40% women, 30% youth and 5% persons with disability (PWD). 60,000 households (HHs) will correspond to existing and potential smallholder livestock farmers; 2,250 HHs will encompass: (i) micro and small livestock enterprises (MSLEs); (ii) livestock farmer organizations (LFOs); (iii) youth and women cooperatives; and (iv) households that are not yet engaged in the selected small livestock value chains (poultry and small ruminants) but are ready to establish micro enterprises.
2. *Programme area.* The Programme will cover eight (8) districts: Pujehun, Kenema, Kailahun, Kono, Port Loko, Bombali, Koinadugu, and Bo.
3. *Goal.* The goal of the Programme is to contribute to poverty reduction, food security and nutrition of rural households and create employment opportunities for rural women and youth in Sierra Leone.
4. *Objectives.* The objective of the Programme is to improve the livelihoods of rural households in the targeted areas through three interlinked components: 1) Support smallholder livestock production and productivity for better incomes and nutrition; 2) Strengthen/establish micro and small size Livestock enterprises (MSLEs); and 3) Institutional support and Project coordination.
5. *Components.* The Programme is organised around three components:

Component 1: Support smallholder livestock production and productivity for better incomes and nutrition: The specific objective of this component will be to improve 60,000 smallholder livestock farmers production, productivity; and empowering women and youth to fully engage in livestock value chains - using an integrated, gender-transformative, youth sensitive, market-oriented and nutrition sensitive approaches, while managing the externalities related to zoonotic diseases, climate change, and environmental degradation.

Sub-Component 1.1: Build and support livestock assets: This subcomponent will build the smallholder livestock farmers skills and ensure their access to improved breeds.

Subcomponent 1.2: Enhance the Livestock service delivery and input supply: This subcomponent will enhance the animal disease early detection and rapid response system, access to animal health care.

Subcomponent 1.3: Enhance consumption of animal sourced food and Gender Action and Learning Systems (GALS): This sub-component will mainstream dietary diversification and deliver GALS by complementing interventions which contribute to nutrition improvement (surplus production of meat and egg) and access of youth and women to business and jobs opportunities.

Component 2: Strengthen/establish micro and small size Livestock enterprises (MSLEs): This component aims at supporting the development of new and existing MSLEs to make them sustainably profitable. This support will cover different elements in the prioritized livestock value chains, particularly support services such as: private sector-based extension services, inputs supply and animal health services, production, processing, marketing, logistics, etc.

Subcomponent 2.1: MSLEs businesses development: The expected output of this sub-component is “micro and small entrepreneurs including young people and women are trained in business development service for setting-up their own small/medium-scale business and/or wage employment.

Subcomponent 2.2: Enhanced marketing partnership: This sub-component aims at supporting MSLEs to enhance access to market opportunities and build partnerships with other livestock value chains actors, including public, private partnership. Infrastructures et facilities building will be managed by engineering firms (service provider).

Component 3: Institutional support and Project coordination: will develop the capacity of the Livestock and Veterinary Service Division to deliver its mandate. Policy and institutional support will be provided to improve the enabling environment for public and private investment and engagement in the livestock sector; the Project will also support the integration of a gender lens, where equal opportunities and benefits are sought for men, women, and youth. Component 3 interventions will go beyond the Project social and geographical targeting scope.

Subcomponent 3.1: Support the institutional and policy environment for investment in the livestock sector: This subcomponent will contribute to strengthen institutional capacity, create an enabling policy and intuitional environment to attract public and private investments in the livestock sector and strengthen the coordination of related other projects and initiatives. It will go beyond the Project social and geographical targeting scope and be socially inclusive in nature ensuring that all policy initiates systematically consider perspectives that support the integration of women, youth and PWD.

Subcomponent 3.2: Technical assistance (TA): This subcomponent will contribute to speed-up capacity building, development of the selected Project approaches and mitigate implementation risks.

II. Implementation Arrangements

6. *Lead Programme Agency.* The Ministry of Agriculture and Food Security (MAFS) will be the implementing agency of LLDP.

7. *Programme Oversight Committee.* A Project Steering Committee (PNSC) will be established under the chairmanship of the Minister of Agriculture and Food Security. The deputy chair will be the representative of the Ministry in charge of finance. Its membership will include, among other, the Ministries in charge of youth, women, and trade as well as the representatives of National Farmer association of Sierra Leone, Pig and Poultry Farmer Association, and Agribusiness Chamber. The PNSC will provide: (i) overall oversight of the Project implementation, (ii) assessing and validating annual work-plan and budget as well the annual reports; (iii) helping in assessing risks and supporting strategies for management.

8. *Project Management Unit.* An independent Project Management Unit (PMU), responsible for the day-to-day management of the Project, will be based in Bo, and placed under the institutional structure of the Livestock and Veterinary Services Division (LVSD) under MAFS. A PMU sub-unit will be set-up in Bombali. Project staff will be recruited through open hiring competitive process and their contract annual renewal will be based on annual performance evaluation.

9. *Implementing partners.* The Ministry of Agriculture and the PMU will be supported by experts from Heifer International, who have large and successful experiences in livestock projects in different countries. A MoU with Heifer will be signed at Project inception and will also include the 25% contribution from Heifer on the cost of the activities under their responsibility.

10. *Monitoring and evaluation.* A fully staffed and equipped Monitoring and Evaluation (M&E) system will be put in place at Project start-up, and will mostly rely on digital tools to collect, process, and analyse data for effective decision making and result-based management. The PMU - M&E Officer has the responsibility for the coordination of programming and preparation of the Project's consolidated Annual Work Plan and Budget (AWPB), based on the respective AWPBs from the districts and other implementing partners. The M&E Officer will be supported by the Planning and Statistics Division (PSD) of MAFS at national level and the District Livestock Offices at district level. The Project's results framework which includes key output and outcome indicators will be the main source of reference for impact/performance assessment. A baseline, mid-term and completion survey will be conducted to assess the achievement of Project's results.

11. *Knowledge management.* The Project will draft and implement a Knowledge Management (KM) and Communication action plan which will identify knowledge products to be developed and the modalities for their dissemination. Different channels will be used including radio, tv, social media, workshops, newspapers. The Project will also promote exchange visits for learning and sharing of experiences. KM activities will be carried out in close collaboration with the M&E team, other functional units of the Project PMU, as well as key implementing partners such as Universities, SLARI, etc.

12. *Grievance Redress Mechanism.* The PMU will establish a Grievance Redress Mechanism (GRM) aimed to ensure that communities can raise grievances about the adverse impacts that LLDP may have on them and offer a set of procedures to solve problems in a culturally appropriate manner. Project's stakeholders will be provided with accessible and inclusive means (letterbox and easy access to PMU, WhatsApp number, existing local governance groups) to raise issues, concerns and grievances and allow the Project leadership structures to respond and act upon them in a timely, effective and transparent manner.

13. *Programme Implementation Manual.* A draft Project Implementation Manual (PIM) has been produced as annex of the Project Design Report. This document will need to be finetuned through a participatory process with Project stakeholders and will be submitted to IFAD No Objection as one of the conditions for funds withdrawal.

Schedule 2

Allocation Table

1. *Allocation of Grant proceeds.* (a) The Table below sets forth the Categories of Eligible Expenditures to be financed by the Grant and the allocation of the amounts to each category of the Financing and the percentages of expenditures for items to be financed in each Category:

Category	Grant Amount (expressed in USD)	% of Eligible Expenditures to be Financed net of taxes
I. Goods, Services and inputs	6 180 000	100%
II. Equipment and materials	1 270 000	100%
III. Consulting services	8 500 000	100%
IV. Subsidies and grants	6 960 000	100%
V. Operations costs	4 090 000	100%
VI Unallocated	3 000 000	100%
TOTAL	30 000 000	

(b) The terms used in the Table above are defined as follows:

- (i) Category "Equipment and materials" also includes Vehicles.
- (ii) Category "Consulting services" also includes Trainings and Workshops.

2. *Disbursement arrangements*

(a) *Start-up Costs.* Withdrawals in respect of expenditures for start-up costs (in services and recurrent cost categories) incurred before the satisfaction of the general conditions precedent to withdrawal shall not exceed an aggregate amount of USD 300 000. The activities to be financed by Start-up Costs will require the no objection from IFAD to be considered eligible.

The start-up funds will finance the following activities: (i) key staff recruitment; (ii) PIM refining; (iii) consultant costs (international veterinarian/livestock expert, national consultants for the first AWPB); (iv) IT equipment (laptop, printer and photocopier); (v) communication (internet and other communication costs); (vi) DSA; (vii) car rental; (viii) fuel; (ix) consumables; (x) start-up workshop and organisation thereof.

3. *Audit arrangements*

The MAFS will provide sufficient and qualified internal audit experts to conduct internal audit activities of the Project.

Schedule 3

Special Covenants

I. General Provisions

In accordance with Section 12.01(a)(xxiii) of the General Conditions, the Fund may suspend, in whole or in part, the right of the Recipient to request withdrawals from the Grant Account if the Recipient has defaulted in the performance of any covenant set forth below, and the Fund has determined that such default has had, or is likely to have, a material adverse effect on the Programme:

1. Within 6 months of entry into force of the Financing Agreement, the Programme will procure and install a customize accounting software as it is the practice in IFAD on-going supported projects, to satisfy International Accounting Standards and IFAD's requirements.
2. Within six (6) months of entry into force of the Financing Agreement, the Programme will enter into Memorandum of Understandings (MoU) with implementing partners that will structure the collaboration, define roles, responsibilities and duties with regards to implementation, financial management, accounting and reporting.
3. *Planning, Monitoring and Evaluation.* The Recipient shall ensure that (i) a Planning, Monitoring and Evaluation (PM&E) system shall be established within twelve (12) months from the date of entry into force of this Agreement.
4. *Gender.* The Recipient shall ensure that the following inclusion minimums will be observed: at least 40% women, 30% youth and 5% persons with disability (PWD).
5. *Land tenure security.* The Recipient shall ensure that the land acquisition process has already been completed and that compensation processes were consistent with international best practice and free prior and informed consent principles.
6. *Anticorruption Measures.* The Recipient shall comply with IFAD Policy on Preventing Fraud and Corruption in its Activities and Operations.
7. *Sexual Harassment, Sexual Exploitation and Abuse.* The Recipient and the Programme Parties shall ensure that the Programme is carried out in accordance with the provisions of the IFAD Policy on Preventing and Responding to Sexual Harassment, Sexual Exploitation and Abuse, as may be amended from time to time.
8. *Use of Programme Vehicles and Other Equipment.* The Recipient shall ensure that:
 - (a) all vehicles and other equipment procured under the Programme are allocated for Programme implementation;
 - (b) The types of vehicles and other equipment procured under the Programme are appropriate to the needs of the Programme; and
 - (c) All vehicles and other equipment transferred to or procured under the Programme are dedicated solely to Programme use.
10. *IFAD Client Portal (ICP) Contract Monitoring Tool.* The Recipient shall ensure that a request is sent to IFAD to access the project procurement Contract Monitoring Tool in the IFAD Client Portal (ICP). The Recipient shall ensure that all contracts, memoranda of understanding, purchase orders and related payments are registered in the Programme Procurement Contract Monitoring Tool in the IFAD Client Portal (ICP) in relation to the procurement of goods, works, services, consultancy, non-consulting services, community

contracts, grants and financing contracts. The Recipient shall ensure that the contract data is updated on a quarterly basis during the implementation of the Programme.

11. The Key Programme Personnel are: Project Coordinator, Senior Livestock Officer, an international veterinarian expert (senior level), an Agribusiness Officer, a Social Inclusion Officer, Nutrition Officer, Environmental Safeguards Officer, a Grant Manager, a Finance and Administrative Officer, an Internal Auditor (MAFS), a Monitoring Evaluation and Knowledge Management Officer and a Procurement Officer. In order to assist in the implementation of the Programme, the [PIU/PMU], unless otherwise agreed with IFAD, shall employ or cause to be employed, as required, key staff whose qualifications, experience and terms of reference are satisfactory to IFAD. Key Programme Personnel shall be seconded to the [PIU/PMU] in the case of government officials or recruited under a consulting contract following the individual consultant selection method in the IFAD Procurement Handbook, or any equivalent selection method in the national procurement system that is acceptable to IFAD. The recruitment of Key Programme Personnel is subject to IFAD's prior review [as is the dismissal of Key Programme Personnel]. Key Programme Personnel are subject to annual evaluation and the continuation of their contract is subject to satisfactory performance. Any contract signed for Key Programme Personnel shall be compliant with the national labour regulations or the ILO International Labour Standards (whichever is more stringent) in order to satisfy the conditions of IFAD's updated SECAP. Repeated short-term contracts must be avoided, unless appropriately justified under the Programme's circumstances.

II. SECAP Provisions

1. For projects/programmes presenting high or substantial social, environmental and climate risks, the Recipient shall carry out the implementation of the Programme in accordance with the measures and requirements set forth in the Environmental and Social Impact Assessments (ESIAs)/Environmental, Social and Climate Management Frameworks (ESCMFs) and/or Resettlement Action Plans/Frameworks (RAPs/Fs) and Environmental, Social and Climate Management Plans (ESCMPs) for high risk projects and Abbreviated ESIAs and/or Abbreviated RAP/F and ESCMPs for substantial risk projects and Free, Prior and Informed Consent (FPIC) Plans, FPIC Implementation Plans, Indigenous Peoples Plans (IPPs), Pesticide Management Plans, Cultural Resources Management Plans and Chance Finds Plans] (the "Management Plan(s)"), as applicable, taken in accordance with SECAP requirements and updated from time to time by the Fund.

The Recipient shall not amend, vary or waive any provision of the Management Plan(s), unless: (i) agreed in writing by the Fund and (ii) Recipient has complied with the requirements applicable to the original adoption of the Management Plan(s).

2. The Recipient shall not, and shall cause the Executing Agency, all its contractors, its sub-contractors, and suppliers] not to commence implementation of any works, unless all Programme affected persons have been compensated and/or resettled in accordance with the specific RAP/Abbreviated RAP, FPIC and/ or the agreed works and compensation schedule.

3. The Recipient shall disclose the draft and final ESIA reports and all other relevant Management Plan(s) with Programme stakeholders and interested parties in an accessible place in the Programme-affected area, in a form and language understandable to Programme-affected persons and other stakeholders. The disclosure will take into account any specific information needs of the community (e.g. culture, disability, literacy, mobility or gender).

4. The Recipient shall ensure or cause the Executing Agency and Implementing Agency to ensure] that all bidding documents and contracts for goods, works and services contain

provisions that require contractors, sub-contractors and suppliers to comply at all times in carrying out the Programme with the standards, measures and requirements set forth in the SECAP 2021 Edition and the Management Plan(s), if any.

5. This section applies to any event which occurs in relation to serious environmental, social, health & safety (ESHS) incidents (as this term is defined below); labor issues or to adjacent populations during Programme implementation that, with respect to the relevant IFAD Programme:

- (i) has direct or potential material adverse effect;
- (ii) has substantially attracted material adverse attention of outside parties or create material adverse national press/media reports; or
- (iii) gives rise to material potential liabilities.

In the occurrence of such event, the Recipient shall:

- Notify IFAD promptly;
- Provide information on such risks, impacts and accidents;
- Consult with Programme-affected parties on how to mitigate the risks and impacts;
- Carry out, as appropriate, additional assessments and stakeholders' engagements in accordance with the SECAP requirements; and
- Adjust, as appropriate, the Programme-level grievance mechanism according to the SECAP requirements; and
- Propose changes, including corrective measures to the Management Plan(s) (if any), in accordance with the findings of such assessment and consultations, for approval by IFAD.

Serious ESHS incident means serious incident, accident, complaint with respect to environmental, social (including labor and community), health and safety (ESHS) issues that occur in the context of the loan or within the Recipient activities. Serious ESHS incidents can comprise incidents of (i) environmental; (ii) occupational; or (iii) public health and safety; or (iv) social nature as well as material complaints and grievances addressed to the Recipient (e.g. any explosion, spill or workplace accident which results in death, serious or multiple injuries or material environmental contamination, accidents of members of the public/local communities, resulting in death or serious or multiple injuries, sexual harassment and violence involving Programme workforce or in relation to severe threats to public health and safety, inadequate resettlement compensation, disturbances of natural ecosystems, discriminatory practices in stakeholder consultation and engagement (including the right of indigenous peoples to free, prior and informed consent), any allegations that require intervention by the police/other law enforcement authorities such as loss of life, sexual violence or child abuse, which (i) have, or are likely to have a material adverse effect; or (ii) have attracted or are likely to arouse substantial adverse attention of outside parties or (iii) to create substantial adverse media/press reports; or (iv) give, or are likely to give rise to material potential liabilities).

6. The Recipient shall ensure [or cause the Executing Agency, Implementing Agency, contractors, sub-contractors and suppliers to ensure] that the relevant processes set out in the SECAP 2021 Edition as well as in the Management Plan(s) (if any) are respected.

7. Without limitation on its other reporting obligations under this Agreement, the Recipient shall provide the Fund with:

- Reports on the status of compliance with the standards, measures and requirements set forth in the SECAP 2021 Edition, ESCMPs and the management plan (if any) on a semi-annual basis - or such other frequency as may be agreed with the Fund;
- Reports of any social, environmental, health and safety incidents and/accidents occurring during the design stage, the implementation of the Programme and propose remedial measures. The Recipient will disclose relevant information from such reports to affected persons promptly upon submission of the said reports; and
- Reports of any breach of compliance with the standards, measures and requirements set forth in the SECAP 2021 Edition and the Management Plan(s) (if any) promptly after becoming aware of such a breach.

8. In the event of a contradiction/conflict between the Management Plan(s), if any, and the Financing Agreement, the Financing Agreement shall prevail.

	Policy relevant knowledge product - Number	0	5	8				

Integrated project risk matrix

Risk categories and subcategories	Inherent	Residual
Country context		
Political commitment	Substantial	Substantial
Risk(s): Since the elections last June 2023, there have been two coup attempts (the second at the end of November) and anti-government riots over the summer. Nevertheless, it is expected that the current government through the Ministry of Agriculture and Forestry continues to prioritize and support the livestock sector as part of their agricultural transformation plan and keep the transformation of the livestock sector up in the agenda.		
Mitigations: The ICO will constantly and closely monitor the country situation with the respective government counterparts to minimize and avoid any eventual disruption to the project.		
Governance	Substantial	Substantial
Risk(s): Transparency International ranks the country 110th out of 180 in the Corruption Perception Index (CPI), with a score of 34/100. On the other hand, the World Bank indicator that assesses the quality of public administration (CPIA) has remained stable over the years (3 on a scale of 1 to 6, with 1 being low and 6 high). The Ministry of Agriculture already has a gap in terms of the technical staff to carry out field work. The livestock division has less than 5 qualified veterinary doctors and they are old and already retired long since. The Livestock division lacks the capacity to fully deliver on their mandate		
Mitigations: The project will build the livestock division of the ministry of Agriculture, provide institutional and policy/strategy formulation support. E-registration of beneficiaries with biometric verification will be put in place.		
Macroeconomic	Substantial	Substantial
Risk(s): COVID-19 hampered the average annual growth rate, which is expected to increase in the 2023-2025 period if the Government follows a rigorous monetary policy to combat inflation and currency significant depreciation and a tight fiscal policy to decrease debt pressures. External shocks further aggravated already existing vulnerabilities, with more than 50% of the population being poor according to the latest official statistics available and rising food insecurity.		
Mitigations: The project will focus on livelihoods improvement through the engagement of private sector entities across the livestock value chains to make it a profitable sector. The project has identified private sector value chain actors mainly in veterinary service provision, feed production, production, and improved breed multiplication.		
Fragility and security	Substantial	Substantial
Risk(s): Although not being in the World Bank's list, the country has a relevant degree of fragility. The precarious situation left by the civil war ended in 2001 has been exacerbated by the Ebola virus epidemic occurred in 2014. More recently, the protests (including two attempted coups) that have been ongoing since the presidential elections in June 2023 are clear evidence of tensions between the opposition and the ruling		

Risk categories and subcategories	Inherent	Residual
parties and a general discontent among the population, leading to a potential weakening of the country institutions. On the climate front, increase in risks of climate change-related events (i.e. floods and droughts) hinder food security and the livelihoods of most of the population that largely derives their income from natural resources.		
Mitigations: The project design considers IFAD entry points in the fragility context: capacity building, empowerment and inclusion (by GALS), nutrition, food security, matching grant, technical assistance, etc.		
Sector strategies and policies	Moderate	Moderate
Policy alignment		
Risk(s): The objectives of the project are aligned to IFAD's Strategic Framework 2016-2025 and to IFAD12 and will directly contribute to two strategic objectives outlined in the national COSOP 2020-2025. At national level, LLDP is aligned to the National Midterm Plan and the Feed Salone Flagship Programme. In addition, the Project will follow the National Gender and youth Strategic Plan and the IFAD GALS.		
Mitigations: the project is aligned with the main policies and frameworks regulating the agricultural and livestock sectors at national and international level and will monitor the development of new national sectoral policies and strategies to ensure its continuous alignment over the course of the project implementation.		
Policy development & implementation	Moderate	Moderate
Risk(s): The livestock sector lacks a sound evidence base and a conducive policy and regulatory environment, which is expected to be filled through the National livestock policy currently under development. Also, the sector has been significantly underfunded and is perceived as high-risk.		
Mitigations: The project will support the Ministry of Agriculture to finalize this document and to develop a Livestock Master Plan to ensure the policy constitutes the proper framework for the expected target groups. LLDP will ensure that the policies, acts and regulations ruling the livestock sector will have a gender, youth and climate lens. Project activities aim at supporting LSMEs development and providing institutional support and public and private enabling environment for investment through the adoption of pending livestock policy and regulatory frameworks that are key for the sector development in the country.		
Environment and climate context		
Project vulnerability to environmental conditions	Moderate	Moderate
Risk(s): Degraded ecosystems leading to poor fodder production in pasturelands can penalize the project implementation. Pest and virus pressure, particularly on poultry, could pose a risk to LLDP.		
Mitigations: LLDP will invest in pasture rehabilitation and sustainable agricultural practices through Livestock Farmers Fields Schools. LLDP will invest animal health and in vet services.		
Project vulnerability to climate change impacts	Moderate	Moderate

Risk categories and subcategories	Inherent	Residual
Risk(s): The main climate related risk that could affect the Project would be the emergence or re-emergence of a climate-related disease, in particular a vector borne disease such as the Rift valley fever and the recent anthrax. Climate change could also affect forage production. Hazard could affect assets of farmers.		
Mitigations: The project will invest in the establishment of appropriate veterinary service and advisory schemes to minimize the resurgence of disease(s). Project will also be promoted pasture land rehabilitation, improved water management to water animals, livestock farmers/crop farmers conflict prevention, as well as adapted breeding.		
Project scope		
Project relevance	Moderate	Moderate
Risk(s): After being an area long underfunded, the Government is propelling the livestock sector in the country's development plan as it offers profitable business opportunities for small-scale farmers, women and youth. The major challenge is transforming the way the sector is perceived as certain target communities may not really see livestock as a key economic activity, because they might prefer be engaged in other activities that they see as more profitable and less risky.		
Mitigations: The project did intensive consultations with the relevant stakeholders to jointly identify the key activities and geographic locations to cover, and to put in place an adequate targeting strategy (women, youth and persons with disabilities).		
Technical soundness	Moderate	Moderate
Risk(s): During the preparation phase, the project considered a number of innovative ideas that have created impact in other countries. However, such innovations may not thrive within the Sierra Leone context as there are variations in climatic conditions, the ecology and the business environment that may hamper the impact of such innovative approaches.		
Mitigations: The innovations will be adapted to suit the context and the project will replicate approaches to address – inter alia - gender gaps that have proved successful in other countries.		
Institutional capacity for implementation and sustainability		
Implementation arrangements	Substantial	Substantial
Risk(s): The livestock division within the Ministry of Agriculture has very small, limited number of personnel with low technical capacity. The division has no qualified veterinary doctors as those it used to have are now retired. Logistical resources are limited for which some district offices have no electricity nor internet access in addition to limited budget allocation.		
Mitigations: The project built in a capacity building component, aimed at addressing the technical shortfalls within the division, since this is the very first large-scale livestock project within the livestock division. The project will strengthen Njala UNIMAK Universities to at least start to offer courses in veterinarian doctor, paravets, and CAHWs. Technical assistance will be provided.		

Risk categories and subcategories	Inherent	Residual
M&E arrangements	Substantial	Substantial
Risk(s): The Ministry of Agriculture has a weak M&E system to provide the necessary support to the project.		
Mitigations: The project integrated a robust capacity building within the design to ensure the M&E system within the Ministry of Agriculture is strengthened to not only provide support to the LLDP project, but to sustain and extend similar support to the work of the Ministry of Agriculture as a whole.		
Procurement		
Legal, Regulatory and Policy Framework	Substantial	Substantial
Risk(s): The National Public Procurement Authority (NPPA) is the main body in Sierra Leone that manages the public procurement function. It sets policy, creates Regulations, and monitors the implementation of procurement plans within the ministries and agencies of government, et cetera as per the normal mandates of such similar bodies and international best practice. No issues identified. There is an Act, Regulations, Manual and Standard Bidding Documents. Sierra Leone procurement laws in place includes: PP Regulation Acts 2020; The Public Procurement Act 2016; Anti-Corruption Corruption Act 2000; The Government Budgeting and Accountability Act, 2005. Reference National PP Authority website: www.nppa.gov.sl		
Mitigations: If applicable and where in conflict with the national regulation/ procurement framework, use the IFAD regulations. LLDP will use IFAD's Online Procurement system; as well as use IFAD procurement guidelines. The project will also benefit from services provided by IFAD' WCA Procurement Consultants		
Accountability, Integrity and Transparency of the Public Procurement System	Substantial	Substantial
Risk(s): The conduct of public procurement in Sierra Leone is governed by the Public Procurement Act, 2004 (amended in 2016) and the Regulations on Public Procurement 2020 (the "Regulations"). Additional guidance is set forth in the Public Procurement Manual Second Edition 2020 (the "Procurement Manual"). Standard forms of bidding documents and contract conditions also are issued for use by procuring entities. These materials, therefore, comprise the general legislative framework for the conduct of public procurement. Nonetheless, the procurement rules of a donor or funding agency that are prescribed as part of an international donor/funding agreement would prevail in cases of conflict with the PPA. Notwithstanding the above there is need for improvement on the following: i) Public access to information not readily available; ii) Contract award info not published; iii) Annual procurement statistics published not accurate. Lack of adherence to procurement planning resulting in heightened increase in the implementation of unplanned and unapproved activities by procurement entities.		
Mitigations: A general review of the legislative framework should be undertaken to ensure that the public procurement system functions independently and is not subject to manipulation through authorizations granted to various government entities under separate legislative acts; ii) Use the		

Risk categories and subcategories	Inherent	Residual
<p>project and or IFAD website to publish information regarding contract award, value of contract, method of procurement, and the successful bidder; iii) The project should make use of IFAD SBDs (especially for ICB contracts) given that they already have clear information regarding complaints mechanism.</p> <p>Bidders should be informed at pre-bid meetings and during bid opening session of the existence of a bid challenge system if they want to protest a particular procurement action.</p> <p>manipulation through authorizations granted to various government entities under separate legislative acts; ii) Use the project and or IFAD website to publish information regarding contract award, value of contract, method of procurement, and the successful bidder; iii) The project should make use of IFAD SBDs (especially for ICB contracts) given that they already have clear information regarding complaints mechanism.</p> <p>Bidders should be informed at pre-bid meetings and during bid opening session of the existence of a bid challenge system if they want to protest a particular procurement action.</p>		
Institutional Framework and Management Capacity	Substantial	Substantial
<p>Risk(s): The NPPA is under-funded and under-staffed and the use of e-Procurement is non-existent.</p> <p>Furthermore is the monitoring of performance to improve the system, irregular. Overall is the poor contract management practice by Procurement Entities to highlight.</p> <p>Poor records keeping and Lack of sustainable public procurement policy.</p>		
Mitigations: Technical assistance in the form of provision of document scanners and external hard drives will help in the records management. Social, Environmental and Climate Assessment Procedures (SECAP) to be embedded in project implementation.		
Public Procurement Operations and Market Practices	Substantial	Substantial
<p>Risk(s): Inadequate planning, inefficient contracts management, poor records keeping and inadequate engagement with the private sector nationwide. Many entities do not send their procurement notices to the NPPA to enhance transparency.</p> <p>Furthermore:</p> <ul style="list-style-type: none"> • Inadequate engagements with CSOs. • Inadequate in-country procurement professionals to conduct procurement audits. • Inadequate resource allocation to the Anti-corruption Commission to ensure enforcement of breaches of the Anti-corruption Act. 		
Mitigations: The skills of Procurement officials need to be enhanced in planning, contracts management and records management, as well as provided with scanners and external hard drives for easy storage and retrieval of documents. There is the need to engage more with the private sector nationwide about procurement opportunities		
Assessment of Project Complexity	Substantial	Substantial
Risk(s): i) Manipulation through authorizations granted to various government entities under separate legislative acts; ii) High number of non-competitive procurement method; iii) in some cases, procurement method determined by value of lot and not total value of all the lots. The complexity of the project		

Risk categories and subcategories	Inherent	Residual
is linked to the importation of healthy chickens and small ruminant and delivering same to beneficiaries as healthy birds and ruminants.		
Mitigations: A general review of the legislative framework should be undertaken to ensure that the public procurement system functions independently and is not subject to manipulation through authorizations granted to various government entities under separate legislative acts; ii) IFAD shall ensure that procurement methods are implemented using the Thresholds set and communicated through the Procurement Arrangement Letter (PAL) and other instruments as applicable. The procurement method should be selected based on the total value of a procurement, not on a lot- by-lot basis. With the right planning and sequencing of procurement, the risk is greatly minimized.		
Assessment of Implementing Agency Capacity	Substantial	Substantial
Risk(s): Many procurement professionals but not all are good and can adapt to project procurement. IA's Procurement, Legal and Regulatory Frameworks lacks IFAD's SECAP. IA's has challenges with record keeping and the resources to manage the new project. IA has challenges in its Records management		
Mitigations: Sustainable procurement capacity building initiative and procurement certification are being implemented with ITC ILO BUILDPROC program through support from IFAD. LLDP shall use IFAD's procurement templates which includes provisions for SECAP. LLDP will use IFAD's Online Procurement system; as well as use IFAD procurement guidelines. The project will also benefit from services provided by IFAD' WCA Procurement Consultants		
Project Procurement Overall	Substantial	Substantial
Risk(s): Inadequate planning, lack of proper records keeping and under-resourced national procurement, anti-corruption institutions and implementing agency.		
Mitigations: LLDP will have dedicated staff who will use IFAD standard procurement documents, procedures, and policies. LLDP will participate in advocacy and policy dialogues		
Project Financial Management	High	High
Project External Audit	Substantial	Substantial
Risk(s): i) The delay in submitting the initial audit report and subsequent reports primarily due to non-adherence to rules or oversight by the Finance and administrative officer. ii) Non-compliance with IFAD TORs (Terms of Reference). iii) Inadequate audit coverage, particularly in assessing expenditures of implementing entities.		
Mitigations:) i) Clarification of the initial audit period will be conducted during the start-up workshop. ii) Engagement with the Audit Service Sierra Leone (ASSL) to be performed at the beginning of the financial year. iii) ASSL will be invited to participate in the start-up workshop to clarify roles and responsibilities. iv) Comprehensive Terms of Reference (TOR), which include field visits (minimum 2 days per district) and a specific report on findings of physical controls of goods, services, and works, will be reviewed and approved by IFAD.		

Risk categories and subcategories	Inherent	Residual
Project Accounting and Financial Reporting	Substantial	Substantial
Risk(s): i) Inadequate capacity of FM staff in IPSAS cash basis accounting standards. ii) Delays in implementing the accounting system and staff lacking sufficient skills in its utilisation. iii) Poor quality of IFRs and delayed submission due to insufficient knowledge of the preparation requirements. iv) Delays in recording expenditures in the accounting system, attributed to lack of skills, staff reluctance, or oversight by the Finance and Administrative Officer. v) Insufficient knowledge in preparing project financial statements, including additional schedules required by IFAD. vi) Delay in reporting from the implementing partners or weak quality of the reports submitted.		
Mitigations: i) Accounting procedures will be thoroughly detailed in the financial manual. ii) The startup budget expenditures will include procuring web-based accounting software. iii) Terms of Reference (TOR) for software procurement will include early training of FM staff in software usage, along with remote support during the first year. iv) Training on IFAD FM procedures will be provided during the startup phase with the involvement of Finance Managers from the existing projects . v) Existing FM staff will be mobilised to coach the LLDP in preparing an IFR (automated) with high quality, including the use of accounting software. vi) Clear guidance will be provided in the PIM regarding preparation and reporting by Implementing Partners, with obligations included in the agreements.		
Project Funds flow/disbursement arrangements	Substantial	Substantial
Risk(s): i) Ineffective management of bank accounts, leading to the commingling of funds. ii) Lack of realistic cash flow projections, causing delays in fund disbursement. This issue may stem from a desire to maintain higher cash reserves at the project level or from overly ambitious projections tied to an optimistic AWPB. iii) Delays in mobilising funds from other financiers due to heavy administrative procedures from donors or unexpected changes in the country's situation. iv) Low contribution of counterpart funds, attributed to the absence of valuation tools or the weak quality of the valuation mechanism for in-kind contributions.		
Mitigations: i) Establishing separate designated and operational accounts to receive financing from IFAD, OFID, IsDB, and counterpart funds. ii) develop clear guidance on the FM manual on how preparing cash projection, invite the program team participates in quarterly cash projection preparation. iii) Early training of the project finance team on cash forecasting, WA submission, and authorised IFAD disbursement methods. iv) Implementing separate programming activities using parallel financing instead of co-financing. v) Developing a valuation mechanism during the startup phase including utilisation of tools from existing projects, and regularly engaging beneficiaries on the importance of their contributions.		
Project Internal controls	High	High
Risk(s): Inadequate or non-functioning internal control systems resulting from oversight or a lack of capacity in project		

Risk categories and subcategories	Inherent	Residual
governance. ii) Unclear rules and procedures impacting operational efficiency, including an inadequate approval structure. iii) Weak documentation of expenditures due to insufficient knowledge of IFAD's basic requirements for complete supporting documents. iv) Long outstanding advances due to inadequately justified advances, unclear timelines for retirement, and insufficient monitoring and follow-up by the project. v) Inappropriate contract clauses with technical partners. vi) Mix-up and double counting by dishonest participants due to parallel financing.		
Mitigations: i) Develop a comprehensive Project Implementation Manual (PIM) outlining internal control procedures to be enforced throughout the project. This includes best practices and segregation of duties at all levels of the project team structure. The PIM will feature dedicated sections covering beneficiary selection for matching grants, as well as distribution and monitoring mechanisms. ii) Implement the IFAD SOE documentation list, which will be detailed in the PIM as mandatory requirements. iii) Engage internal auditors from the Ministry of Agriculture to conduct internal audit of the project based on an annual internal audit plan including project risk matrix that are updated regularly including regular field visits and periodic spot checks. iv) Invite internal auditors in the inaugural workshop to clarify their roles and responsibilities. v) Incorporate IFAD fiduciary clauses into all contracts with project partners.		
Project Budgeting	Substantial	Substantial
Risk(s): i) Inadequate capacity of the PMU staff to prepare and submit work plans and budgets of acceptable quality. ii) Unrealistic or overly ambitious AWPBs leading to weak execution because of the low implementation of activities compared to the approved AWPB. iii) Confusion in budgeting and expenditure allocations among various financiers due to lack of adequate knowledge. iv) Budget overruns due to the absence of proper budget monitoring and failure to detect issues in a timely manner.		
Mitigations: i) Enhance the capacity of stakeholders involved in preparing the AWBP by clarifying the main tasks required and providing practical guidelines, including a checklist for the project. ii) Organise specific working sessions on the preparation of the AWBP during the start-up workshop showing characteristic of a good AWBP. iii) Codify the AWBP to clearly indicate the sources of funding and the components for each activity. iv) Develop a comprehensive budget monitoring system or set of accounting software to generate budget variance reports		
Project Organization and Staffing	High	High
Risk(s): i) Lack of qualified and experienced staff in Financial Management including experience in the financial management of donors' funded projects and in IFAD procedures. ii) The project's location outside the capital city makes it difficult to attract and retain such qualified and experienced FM staff. iii) High turnover of the staff due to unattractive package offered by the LLDP taking into account the location which is attractive for families.		

Risk categories and subcategories	Inherent	Residual
Mitigations: i) Early Recruitment - Launch an effective recruitment process early to ensure a complete finance team is in place for the project. ii) Capacity Development - Develop a capacity development plan for the finance team to enhance their skills and knowledge on a continued basis. iii) Mandatory Training - Provide mandatory training to the entire Project Implementation Unit (PIU) at the inception, focusing on financial management aspects and IFAD requirements for the FM Team. iv) Coaching - Utilise the financial management team from existing projects to provide coaching and support during the initial stages.		
Environment, social and climate impact	Moderate	Moderate
Vulnerability of target populations and ecosystems to climate variability and hazards	Low	Low
Risk(s): The main climate related risk that could affect the Project would be the emergence or re-emergence of a climate related disease, in particular a vector borne disease such as the Rift valley fever.		
Mitigations: These risks will be mitigated by the strengthening of zoonotic surveillance systems and disease contingency planning that will enable rapid and adequate response in case of outbreak of climate sensitive disease.		
Greenhouse Gas Emissions	Moderate	Moderate
Risk(s): Livestock is a net emitter of greenhouse gas, mainly because of methane emissions from enteric fermentation of ruminants (during digestion, food ferments in rumen produces methane), manure management (livestock manure produces methane and nitrous oxide (N_2O) during decomposition). Feed production as well as land use and land-use change (deforestation) are also drivers for net GHG. At the margin some additional GHG emissions could occur as a result of increased use of the livestock facilities.		
Mitigations: The project as a whole will contribute to avoiding unnecessary GHG emissions by improving animal health, animal feed and animal breeding. These areas of development will not avoid GHG emissions, but they will reduce them significantly compared to a business-as-usual scenario. A Greenhouse gas accounting analysis using GLEAM-I, carried out by FAO during the design phase of LLDP, indicates that the project could avoid the emission of 2,8 MtCO ₂ e over its implementation period compared with a without-project scenario. It is recommended to update the GLEAM-I analysis at mid-term review, in particular if large ruminants are considered, as well as at project completion. The use of renewable energy for livestock facilities (animal/meat processing and vaccines' storage) will be promoted and supported.		
Physical and Economic Resettlement	Low	Low
Risk(s): The project does not expect any major physical, economic, social and cultural displacement nor any forced eviction.		
Mitigations: Not applicable		
Indigenous peoples	Low	Low

Risk categories and subcategories	Inherent	Residual
Risk(s): The screening process did not identify any significant risks on Indigenous Peoples. The project is not located in areas where Indigenous Peoples are present.		
Mitigations: Not applicable		
Community health, safety and security	Moderate	Moderate
Risk(s): The project could contribute to increased gender-based-violence, increased food contamination and poor diet (with higher consumption of meat). The project is sensible to conflicts between crop farmers and livestock farmers, on the raise wit climate change.		
Mitigations: LLDP includes GALS sessions with specific on GBV prevention. Awareness raising on nutrition will be provided under subcomponent 1.3 and food inspection will be strengthened. LBOs will be trained on conflict prevention and management.		
Labour and working conditions	Moderate	Moderate
Risk(s): The project may induce increase in OHS rather recurrent in the livestock value chain, with a specific risk on handling of hazardous chemicals (Liquid Nitrogen plants for artificial insemination) The project might also face discriminatory practices (abusive labor practices, high gender inequality and the lack of equal opportunities).		
Mitigations: The project will organize appropriate training and where necessary PPE. PIM provides a Management Plan for Nitrogen to comply with and LLDP must supply good equipment and PPE, as well as an outline for a Labour Assessment Management Procedures. LLDP includes GALS sessions with specific focus on women and youth inclusion.		
Cultural Heritage	Low	Low
Risk(s): The screening process did not identify any significant risks in terms of impact on cultural heritage. The project does not expect to be located in areas officially considered as critical cultural heritage.		
Mitigations: Not applicable		
Resource Efficiency and Pollution Prevention	Moderate	Moderate
Risk(s): LLDP presents risk of pollution from effluent and solid waste from rehabilitated slaughterhouses, animal diseases and cruelty, pollution from animal medicines.		
Mitigations: Biowaste from slaughterhouses will be treated and where possible upcycled into local carbon-free agricultural inputs to ensure a sustainable waste management. An outline for waste management plan has been provided. Quarantine facilities will be put in place at border to limit the risk of outbreaks and new diseases. Vet services and epidemi-surveillance will be boosted via training and institutional strengthening.		
Biodiversity Conservation	Moderate	Moderate
Risk(s): The main risk is related to overgrazing and degradation of ecosystem. The second risk is related to the introduction of new animal diseases because of breed imports.		

Risk categories and subcategories	Inherent	Residual
Indirectly, if the project exceed its objectives, maize production could be on raise.		
Mitigations: The project targeting strategy will systematically exclude interventions and activities involving habitats that are legally protected. LLDP will ensure pastureland rehabilitation, provide training to farmers on sustainable feed/fodder production, and encourage farmers to store fodder for the dry season. Suppliers of animals will have to comply with WOAH. In case of important conversion to maize production, a specific project focused on agricultural practices should be developed.		
Stakeholders		
Stakeholder engagement/coordination	Moderate	Moderate
Risk(s): Not all the stakeholders might be involved in project implementation and lack of coordination among them.		
Mitigations: At inception, the project will bring together the relevant stakeholders to ensure their involvement since the beginning, and a stakeholder's engagement plan shall facilitate their coordination during implementation.		
Stakeholder grievances	Substantial	Substantial
Risk(s): There is no grievance mechanism in place.		
Mitigations: A grievance mechanism will be developed during the process of implementation, and this will be done in close collaboration with all the relevant stakeholders.
